

CONTENTS

Foreword	ix
Glossary of terms for the pulp and paper industry	xvi
List of symbols	xx
Sign conventions	xxv
 1. Pulp and Paper Technology	 1
1.1 Introduction	1
1.1.1 Pulp and paper materials	1
1.2 Pulping	7
1.2.1 Mechanical pulping	7
1.2.2 Chemical pulping	8
1.3 Brightening and bleaching	14
1.3.1 Mechanical pulp brightening	15
1.3.2 Chemical pulp bleaching	18
1.4 Papermaking	27
1.5 Recycle of fibres	29
1.6 Material recovery and pollution control	30
1.6.1 Water	31
1.6.2 Energy	36
1.6.3 Material recovery	36
1.6.4 Pollution prevention	41
Further reading	45

Principles of Electrochemical Technology	52
2.1 Introduction	52
2.2 Electrochemical cells	53
2.2.1 Thermodynamics	53
2.2.2 Conductivity and transport	57
2.2.3 Reaction rates	67
2.2.4 Potential and current distribution	75
2.3 Electrochemical reactors	78
2.3.1 Reactor configurations	78
2.3.2 Figures of merit	88
2.3.3 Voltage balance	90
2.3.4 Material balance	92
2.3.5 Energy balance	93
2.3.6 Pressure drop	96
2.3.7 Reactor materials	96
2.4 Electrochemical processes	101
2.4.1 Process descriptions	101
2.4.2 Process costs	103
2.4.3 Process modelling and optimisation	108
Further reading	109
Electrochemical Technology for the Pulp and Paper Industry	111
3.1 Introduction	111
3.2 Chemical pulp	111
3.2.1 Pulp yield	111
3.2.2 Chemical recovery	117
3.2.3 Chemical pulp bleaching	122

3.2.4	Recovery of bleaching chemicals	161
3.2.5	Electrochemical processes in closed -cycle chemical pulp mills	170
3.3	Mechanical pulp	175
3.3.1	Chemical recovery	175
3.3.2	Mechanical pulp brightening	176
3.4	Waste treatment	181
3.4.1	Liquid wastes	181
3.4.2	Gaseous wastes	185
3.5	Electrochemical Processing of Lignin	189
Further reading		190
4.	Process Synthesis	199
4.1	Introduction	199
4.2	Hierarchy of process synthesis	200
4.3	Process engineering	203
4.3.1	The nature of industrial chemical processes	203
4.3.2	Stoichiometry, thermodynamics and rates	203
4.3.3	Flowsheets and stream tables	208
4.3.4	Material and energy balances	210
4.3.5	Cost estimation	212
4.3.6	Process modelling and optimisation	213
4.4	Artificial intelligence	217

4.5	An example problem - The totally chlorine free bleaching of chemical pulp	218
4.5.1	Process options	218
4.5.2	Level 1 analysis	220
4.5.3	Level 2 analysis	222
4.5.4	Process viability	227
4.6	Conclusion	228
Further reading		228
