

# Paper Machine Wet Press Manual, Fourth Edition

---

Item Number 0102B042  
ISBN: 089852-042-8  
1999. 224 pages, soft cover.

Edited by: Richard A. Reese

This Manual is designed as an introduction to wet pressing technology in the paper industry and practical application on paper machines. This edition includes new chapters on steam showers, press section optimization, new technology, and a glossary.

## Table of Contents

|                                                                     |     |
|---------------------------------------------------------------------|-----|
| Contributors.....                                                   | iii |
| Preface.....                                                        | iii |
