The Technical Needs: Nonwovens for Medical/Surgical and Consumer Uses
Edited by Donald F. Durso

1986. 241 pp., 6" X 9-1/2" hard cover
Item Number: 0102b049
ISBN: 0898520495

Table of Contents

Preface
Authors
List of Figures
List of Tables

Section I Raw Materials
1 The Importance of Cellulosic Fibers
2 Cotton's Place in Healthcare and Consumer Nonwovens
   Cotton's Place in Capillary Control
   Purified Cotton Fiber: a Key Raw Material
   Cotton's Place in Body (Skin) Contact
   Products
   Cotton Purity Compared to Other Celluloses
   Cotton Cellulose Derivatives
   Cotton's Place in Binder Free Nonwovens
   Cotton's Place in Thermal Bonded Products
   Cotton's Place in the Mind of the Consumer
   Cotton Technical References
   Intrinsic Fiber Property Comparisons
   Fiber Stress/Strain Properties
   Fiber Length
   Fiber Linear Density
   Fiber Morphology
   Resultant Cotton Fiber/Fabric Attributes
3 Woodpulp for Absorbent Products
   Historical Development
   Performance of Absorbent Structures
   Buckeye Studies
   Effect of Pulp Parameters
   Effect of Fiber Length
   Effect of Extractives
   Effect of Air Felt Parameters
4 Rayon
   Cellulose
   Viscose
   Fiber Formation
   Staple Fiber Purification and Finishing
   Fiber Structure
   Fiber Properties
   Fiber Variants
   Direct Dissolution
   Summary
5 Present Status and Future Needs of High Performance Fiber for Nonwovens
   Non Woven Process
   Wet Laid Nonwoven
   Polymer Laid Nonwovens
   Dry Laid Nonwovens
   Combination Nonwovens
   The Importance of Fiber Materials
   Recent Trends in Fiber Utilization and Process Development
   Fiber Machine Interaction
   Dry Laid Machinery
   Polymer Laid Processes
   Wet Laid Processes
   Present and Future Fiber Requirements
6 Bonding Nonwovens
   Inherently Bonded Nonwovens
   Thermally Bonded Nonwovens
   Mechanically Bonded Nonwovens
   Needle Punched Nonwovens
Stitch Through Nonwovens
Spunlaced Nonwovens
Chemically Bonded Nonwovens
Bonding Nonwovens Using Solvents
Bonding Nonwovens Using Binders
Binder Migration
Helpful binder Equations
Application of Binders to Nonwovens
Spray Bonding
Saturation or Impregnation Bonding
Coating Bonding
Foam Bonding
Print Bonding
Drying and Curing

7 Chemical Bonding of Nonwoven Webs
Latex Technology
Nonwoven Binders
Fundamentals of Binder Performance
Cohesion
Adhesion
Binder Distribution
Developing Better Binders
Summary

8 Flame Retardants for Nonwovens
Definitions
Standards and Test Methods
Available Flame Retardants
Halogenated Materials and Antimony Oxide
Phosphorous Compounds
Ammonium Sulfamate
Ammonium Bromide
Borax and Boric Acid
Alumina Tryhydrate
Mode of Action of Flame Retardants
Compounding with Flame Retardants

11 Synthetic Polymer Body Prostheses
Materials
Property Requirements of Prostheses
Types of Prostheses
Polymers Used in Prostheses
Fabrications
The Future

12 Some Nonwovens and Their Specialized Uses
Structural Features and Properties of Some
Nonwovens
End Use Targets
Specialized Uses
Uses of Geotextiles

Section III
13 Performance Testing
General Overview: Materials and Composites
14 Performance Testing: Interfacing with the Consumer
15 Describing Factors Influencing the Perception
Of Comfort
Background
Specimens
Evaluation
Interpretation
Developing the Comfort Index
Conclusion
16 the Effect of Wearing Diapers on Skin
Skin Wetness - Adults
Skin Wetness- Infants
Skin Friction - Adults and Infants
Skin Abrasion - Adults
Skin Penetration - Adults
Skin Microbiology - Adults
Discussion
Conclusion
17 Methods for Testing the Biobarrier Properties
Of Packaging Material Used in Medical Devices

Strike Through Method
