Improvement Based ISO-9000 Quality System Implementation Plans for Packaging Plants

By William F. Houser

Published by Integrated Productivity & Quality Systems

1997, 220 pages, soft cover.
Item Number: 08ISOIP

This unique "how to" manual explains how to become ISO certified and how to reduce costs and gain productivity in the process. The only ISO manual written specifically for the corrugated containers industry, this step-by-step guide will be an invaluable tool for plants in the process of becoming ISO certified. It will also be a useful reference for plants considering certification and for those plants that are already certified. Twenty chapters cover everything a plant needs to know to become ISO certified.

TABLE OF CONTENTS

Introduction **Page 1**
The Improvement-Based Approach to ISO 9000 Certification in a Packaging Plant
Chapter 1 **Page 19**
Element 4.1, Management Responsibility
