

Preventive Maintenance, Essential Care and CMS Book: Table of Contents

Section 1: Moving From Reactive to Results Oriented Maintenance (ROM)

- 1.1 Objective of This book
- 1.2 Introduction to IDCON, INC
- 1.3 Maintenance Management - Results Oriented Maintenance

Section 2: Using ROM to Optimize Your Preventive Maintenance Process

- 2.1 PM/ECCM Philosophy
- 2.2 Definitions for PM/ECCM
- 2.3 Selecting Maintainability Method
- 2.4 Implement Selected Maintainability Method
- 2.5 Document the PM /ECCM process
- 2.6 Documentation of Condition Monitoring - Concepts and Definitions
- 2.7 Equipment Numbers
- 2.8 Standard (Inspection) Text
- 2.9 Who should run the inspection Route?
- 2.10 Inspect on What Frequency?
- 2.11 Organizing an inspection Route

Section 3: Fasteners, Welds, and Foundation, Spring Supported Elements, and Keys 3.1 Fasteners

- 3.2 Welds
- 3.3 Foundations
- 3.4 Spring Supported Elements
- 3.5 Keys, Key-Ways, and Locking Devices

Section 4: Valves and Pipes

- 4.1 Valves
- 4.2 Pipes

Section 5: Introduction to Ball and Roller Bearings

- 5.1 Bearing Types
- 5.2 Bearing Terminology
- 5.3 Ball Bearing Nomenclature and Designations
- 5.4 Ball Bearings
- 5.5 Bearing Damage and its Causes
- 5.6 Adding Lubrication
- 5.7 Condition Monitoring Methods for Bearings

Section 6: Chains

- 6.1 Inspection on Chain Drives
- 6.2 Alignment
- 6.3 Chain Drive Condition Monitoring and Troubleshooting Guide

Section 7: Belts

- 7.1 V-Belts
- 7.2 Tools for Condition Monitoring of Belts
- 7.3 High Torque Drive (HTD) Belts
- 7.4 Belt Troubleshooting Guide

Section 8: Couplings

- 8.1 General
- 8.2 Misalignment
- 8.3 Laser Alignment
- 8.4 Condition Monitoring
- 8.5 Shaft Couplings
- 8.6 Couplings Alignment Tolerances

Section 9: Gear Boxes

- 9.1 Basic Gear Types
- 9.2 Gear Wear Patterns and Failure Types
- 9.3 Condition Monitoring of Gear Boxes While Running
- 9.4 Condition Monitoring of Gear Boxes During Shutdown
- 9.5 Condition Monitoring Aids
- 9.6 Summary of Condition Monitoring and Preventive Maintenance of a Gearbox

Section 10: Seals

- 10.1 Packing Types
- 10.2 Lantern Ring
- 10.3 Installing Packing
- 10.4 Mechanical Seals
- 10.5 Condition Monitoring of Seals

Section 11: Pumps

- 11.1 Centrifugal Pump
- 11.2 Submersible Pump

Section 12: Fans and Blowers

- 12.1 Fans
- 12.2 Common Fan Terms
- 12.3 Fan Troubleshooting Guide
- 12.4 Heavy Duty Fan Condition Monitoring Guide
- 12.5 Blowers
- 12.6 Blower Condition Monitoring Guide
- 12.7 Blower Troubleshooting Guide

Section 13: Heat Exchangers

- 13.1 General
- 13.2 Condition Monitoring of Heat Exchangers

Section 14: Lifting Equipment / Cranes

- 14.1 End Trucks with Drive
- 14.2 Frame and Girders
- 14.3 Hoist Unit
- 14.4 Wire Rope
- 14.5 Hook and Hook Block
- 14.6 Sliding Controls

Section 15: Conveyors

- 15.1 Condition Monitoring of Belt Conveyors
- 15.2 Condition Monitoring of Plate
- 15.3 Condition Monitoring of Roller Conveyors
- 15.4 Condition Monitoring of Screw Conveyor

Section 16: Hydraulic Systems

- 16.1 General
- 16.2 Contamination
- 16.3 Fluid and Temperature Recommendations
- 16.4 Leakage
- 16.5 Condition Monitoring of Hydraulic Cylinder (Non-Rotating)
- 16.6 Hydraulic System Troubleshooting Guide

Section 17: Lubrication Systems

- 17.1 Function and Types
- 17.2 Lubrication Control
- 17.3 Lubricating Methods
- 17.4 Deterioration and Contamination
- 17.5 Condition Monitoring of Lubrication Oils
- 17.6 Condition Monitoring of Centralized Grease Lubrication System

Section 18: Pneumatic (Compressed Air) System

- 18.1 Air Quality
- 18.2 Air Handling
- 18.3 Condition Monitoring of an Air Handling Station

Section 19: Air Compressors

- 19.1 General
- 19.2 Reciprocating Type Compressor
- 19.3 Rotary Screw Compressor
- 19.4 Rotary Screw Compressor Troubleshooting Guide
- 19.5 Air Compressor Condition Monitoring Guide

Section 20: Steam and Condensate Systems

- 20.1 Steam Traps
- 20.2 Condition Monitoring
- 20.3 Steam System Condition Monitoring Guide

Section 21: Electrical Systems

- 21.1 General
- 21.2 AC Motors
- 21.3 DC Motors
- 21.4 Breakers
- 21.5 Relays - General
- 21.6 Transformers
- 21.7 Motor Control Center
- 21.8 Switchgear Cubicles and Control Panels
- 21.9 Cables and Conduits
- 21.10 Power Capacitors
- 21.11 Thermography
- 21.12 Batteries
- 21.13 Photoelectric Sensors

Section 22: Rotary Joints

- 22.1 Lug Supported Joints
- 22.2 Self Supported Joints
- 22.3 Seal Rings
- 22.4 Rotary Steam-Joint, Johnson without compressor
- 22.5 Rotary Steam-Joint, Johnson with compressor
- 22.6 Rotary Steam-Joint, Johnson
- 22.7 Rotary Joint - Dryer, Beloit, CS Simplex

Section 23: Instruments & Aids for Condition Monitoring and Troubleshooting

- 23.1 Temperature Measurements
- 23.2 Visual Inspections
- 23.3 Leak/Crack/Thickness Detection and Measurement
- 23.4 Rotating Equipment Condition Monitoring Tools
- 23.5 Fluid Monitoring/Contamination Control
- 23.6 Using Alignment Tools
- 23.7 Additional Useful Instruments

Appendix A: Acronyms**Appendix B: Condition Monitoring Standards**

AC Motor

Gear Coupling
