

# **Cooling Water Treatment: Principles and Practice**

## **TABLE OF CONTENTS**

Introduction: Marketing Cooling Water Treatment xvii

1 Cooling System and Heat Exchange Essentials 1

1.1 Evaporative Cooling Systems 3

1.2 Notes on Some Common Types of Cooling Towers 6

1.3 Evaporation and Total Water Usage 10

1.4 Water Usage Calculations 13

1.5 Heat Transfer and Heat Exchangers 15

1.6 Heat Exchanger Waterside Inspection 20

2 Makeup Water Sources and their Impurities 23

2.1 Sources of Water for Cooling System Makeup 24

2.2 Mineral Impurities and Problems Caused 29

2.3 Dissolved Gases and other Impurities 35

2.4 Examples of Variations in Makeup Water Sources 36

3 Makeup Water Pretreatment Processes 43

3.1 Raw Water Flocculation/Clarification Pretreatment Processes 44

3.2 Notes on Chemical Precipitation Softening Processes 51

3.3 Aeration Towers for Makeup Water Pretreatment 54

3.4 Manganese Greensand Oxidation and Filtration 55

3.5 Sand, Anthracite, Multimedia, and Automatic  
Self-Cleaning Water Filters 56

3.6 Ion-Exchange Softening and Blending 61

3.7 Reverse Osmosis 67

3.8 Acid Dosing 75

3.9 Pretreatment Employing Magnetic and Other Physical Devices 78

4 Corrosion, Fouling, and Deposition 85

4.1 Corrosion Chemistry 87

4.2 Types of Corrosion 94

4.3 Scales, Sludges, Inorganic Deposits, and Foulants 104

4.4 Saturation Indices 112

4.5 Microbiology and Microbiological Fouling 122

4.6 Legionellosis 132

5 Chemical Treatments and Programs for Cooling Water 137

5.1	Some Basics of Chemical Inhibitor Programs	139
5.2	Some Early Inhibitors, Deposit Control Agents, and Cooling Water Programs	140
5.3	Some "Traditional" Cooling Water Inhibitors	148
5.4	Some "Standard" Phosphonates and Organic Polymers	152
5.5	Summary List and Examples of Phosphonates and Organic Polymers	165
5.6	Some Cooling Water Product Formulations	169
6	Microbiological Control Programs	177
6.1	Forms of Biocides	182
6.2	Oxidizing Biocides	183
6.3	Nonoxidizing Biocides	209
6.4	Biodispersants	229
6.5	Other Forms of Microbiological Control	232
7	Buying and Selling Cooling Water Programs	235
7.1	The Basic Starting Position for Selling Cooling Water Programs	237
7.2	The Basic Starting Position for Buying Cooling Water Programs	243
7.3	Selling the Proposal	251
7.4	Notes on Some Cooling Water Program Marketing Strategies	258
8	Surveys, Inspections, and Cooling Water Program Selection	263
8.1	Surveying the Cooling Water System from a Marketing Standpoint	265
8.2	Surveying the Cooling Water System from a Technical Standpoint	267
8.3	Survey Interpretation and Proposal Focus	285
8.4	Cooling Water Program Selection	299
9	Managing Cooling Water Programs	313
9.1	Cooling Water Program Field Services	315
9.2	Cooling Water Management and Good Housekeeping Practice	316
9.3	The Control of Legionellosis	320
9.4	Precommission Cleaning and Program Start-Up	330
9.5	On-Line (In-Service) and Off-Line Cleaning	341
9.6	Chemical Dosing and Program Control	352
10	Monitoring and Control	367
10.1	Material Balance	369
10.2	Water Sampling, Testing, and Reporting	369

10.3 Inhibitor Monitoring and Control	375
10.4 Corrosion Monitoring and Control	379
10.5 Deposition/Fouling Monitoring and Control	385
10.6 Biomonitoring and Control	389
10.7 Control Using Computer Software Programs	392
10.8 Cooling Water Program Control Parameters and	

Troubleshooting Guide 396
