

Fundamentals of Electrospinning & Electrospun Nanofibers

By: Tong Lin and Jian Fang, Institute for Frontier Materials, Deakin University

Forward by: Liming Dai, Case Western Reserve University

TABLE OF CONTENTS

Foreword

Preface

Chapter 1. Introduction to Nanofibers

1.1. Nanomaterials and Nanotechnology

1.2. Nanofibers

1.3. Nanofiber-Making Techniques

1.4. References

Chapter 2. Electrospinning

2.1. Brief History

2.2. Basic Apparatus—"Needle" Based Electrospinning

2.3. Taylor Cone

2.4. Whipping and Jet Instability

2.5. Solution Electrospinning: Advantages and Disadvantages

2.6. Effect Factors of Solution Electrospinning

2.7. Melt-Electrospinning

2.8. References

Chapter 3. Electrospun Fibers: Morphologies and Unique Properties

3.1. Typical Morphology

3.2. Internal Structure

3.3. Unique Properties

3.4. References

Chapter 4. Improvement of Fiber Quality

4.1. Main Problems

4.2. Improvement Methods

4.3. References

Chapter 5. Advanced Needle Electrospinning

- 5.1. Second Electrode-Enhancement
- 5.2. Gas-Jacket Enhanced Electrospinning
- 5.3. Multiple Needle Electrospinning
- 5.4. Shielding Ring
- 5.5. Porous Tube Spinneret
- 5.6. Near-Field Electrospinning
- 5.7. Emulsion Electrospinning
- 5.8. Laser Induced Melt Electrospinning
- 5.9. Portable Electrospinner
- 5.10. References

Chapter 6. Needleless Electrospinning

- 6.1. Problems with a Single Needle Electrospinner
- 6.2. Aided by Magnetic Liquid
- 6.3. Upward Spinning
- 6.4. Downward Spinning
- 6.5. Needleless Melt Electrospinning
- 6.6. Core-Sheath Needleless Electrospinner
- 6.7. References

Chapter 7. Control of Nanofiber Deposition

- 7.1. Fiber Alignment
- 7.2. Fibrous Tubes
- 7.3. Liquid Bath Collection
- 7.4. 3D Fibrous Structures
- 7.5. References

Chapter 8. Nanofiber Yarns

- 8.1. Definition
- 8.2. Nanofiber Short Bundle

8.3. Continuous Bundles

8.4. Nanofiber Yarns

8.5. References

Chapter 9. Applications of Electrospun Nanofibers

9.1. Biomedical

9.2. Environment

9.3. Electronic Devices

9.4. Catalysis and Enzyme

9.5. Other Applications

9.6. References

Chapter 10. Inorganic Nanofibers

10.1. Carbon Nanofibers

10.2. Ceramic Nanofibers

10.3. Metal Nanofibers

10.4. References

Appendix I: A Comparison of Various Solution-based Electrospinning Techniques

Appendix II. Commonly-used Characterization Methods for Electrospun Nanofibers

Index
