

Chemical Engineering of Polymers: Production of Functional and Flexible Materials

TABLE OF CONTENTS

Preface

Part I: Synthesis and Application

1. Copolymerization of Aniline P-Phenylenediamine in an Acetic Acid Medium
A. H. Durgaryan, NA. Durgaryan, R. H. Arakelyan, and N. A. Miraqyan
2. Free-Radical Frontal Polymerization of Acrylamide in the Presence of Nano and Micro Additives
A. O. Tonoyan and S. P. Davtyan
3. Influence of Ph on the Structuring of Zetag 9014® Type of Cationic Polymer
E. Alvarenga, L. Hayrapetyan, S. Hayrapetyan, G. Pirumyan, E. Govasmark, and B. Salbu
4. Aromatic Azides and Pentazenes in Multistep Radical Polymerization
V. G. Syromyatnikov, D. G. Vyshnevsky, and A. Yu. Kolendo
5. Synthesis and Adsorption Properties of 4 -Aminostyrene and Methacrylic Acid Copolymer, Immobilized in Situ on Silica Surface
E. Yanovska, L. Vretik, D. Sternik, O. Kychkiruk, O. Nikolaeva, and M. Melnyk
6. Synthesis of Polyarylates Containing Ether Bonds in Macromolecules G. Papava, N. Dokhturishvili, N. Gelashvili, M. Gurgenishvili, K. Papava, I. Chitrekashvili, and Z. Tabukashvili
7. Synthesis of Polyarylates on the Base of Nucleus Bisphenols in High Boiling Solvents
G. Papava, N. Maisuradze, E. Gavashelidze, Sh. Papava, M. Gurgenishvili, I. Chitrekashvili, and V. Sherozia

Part II: Composites and Nanoparticles

8. Structure and Properties of the Polystyrene/Fullerene Composite Films
O. Alekseeva, N. Bagrovskaya, and A. Noskov
9. Composites on the Basis of Sawdust with Some Organic and Inorganic Binders
O. Mukbaniani, J. Aneli, G. Buzaladze, E. Markarashvili, and T. Tatrishvili
10. Aging Process of Gold Nanoparticles Synthesized in Situ in Aqueous Solutions of Polyacrylamides
Nataliya Kutsevol, Vasyl Chumachenko, Yuliia Harahuts, Andriy Marinin, and Vasyl Chumachenko

11. Microscale Temperature Visualization in Silver Nanoparticle Doped Polymer Nanocomposite
N. Ponjavidze and G. Petriashvili

12. Polyaniline- Co3O4 Nanocomposites: Synthesis, Structural, Morphological, Optical and Electrical Properties
Z. Hesari and B. Shirkavand Hadavand

13. Strategy for Nanohybridized Synthesis of MAMBOX Systems
M. Donadze and T. Agladze

14. New Composite Polymer Electrolyte Based on PVDF with the Addition of TiO2
G. S. Askarova, K. A. Ablayeva, A. P. Kurbatov, and Ye. S. Sivokhina

15. Dextran-Polyacrylamide as Nanocarrier for Targeted Delivery of Anticancer Drugs into Tumor Cells
P. Telegeeva, N. Kutsevol, S. Filipchenko, and G. Telegeev

16. Investigation Photothermal and Photooptical Energy Conversions in Silver and Gold Nanoparticles Doped Nanocomposites for the Modeling of Cancer Cells Visualization and Photothermal Cancer Therapy
K. Chubinidze and M. Chubinidze

17. Synthesis and Characterization of Conductive Polyurethane Composites Containing Polyaniline–CuO Nanocomposites
Z. Hesari and B. Shirkavand Hadavand

Part III: Materials and Properties

18. Fundamentals and Challenges in Curing Process
Marc J. M. Abadie

19. New Polymer Metal Complexes Based β -Diketone and Lanthanides for OLEDs
I. Savchenko, A. Berezhnytska, and Ya. Fedorov

20. Intergel Systems: Highly Effective Instrument for Rare Earth Elements Extraction from Industrial Solutions
T. K. Jumadilov, Zh. A. Abilov, and R. G. Kondaurov

21. Investigation of Complex Formation Process of Copper with Fulvic Acids
T. Makharadze, G. Supatashvili, and G. Makharadze

22. HgBa2Ca2Cu3Oy Superconductor Prepared by as Vapour Diffusion Process
T. Lobzhanidze, I. Metskhvarishvili, G. Dgebuadze, B. Bendeliani, M. Metskhvarishvili, and V. Gabunia

23. Study of Temperature Dependence of Specific Resistance of Nickel-Tungsten Coating on Copper
T. Marsagishvili, G. Mamniashvili, G. Tatishvili, N. Ananiashvili, M. Gachechiladze, and J. Metreveli

24. Topology of Formation of Latexes in Heterogeneous Static Monomer-Water Systems
A. A. Hovhannisyan, M. Khaddazh, N. G. Grigoryan, G. K. Grigoryan, and O. A. Zhuravleva

25. Synthesis and Research of Some Phtalocyaninic Dyes with Cu, Zn for Testing in the Systems of Solar Cells Type

S. Robu, G. Dragalina, A. Popusoi, N. Nasedkina, A. Covali, and T. Potlog

26. Polymeric Recording Media Based on Carbazole Containing Copolymers and Benzoxyphtalocyanines of Transition Metals
S. Robu, M. Abadie, I. Andries, A. Chirita, N. Nasedchina, A. Ivancic, and O. Corsac

27. Buckminsterfullerene-Pyrrolidines as Promising Antioxidants in Polymer Materials
Eldar B. Zeynalov and Matanat Ya. Magerramova

28. Design and Photocatalytic Properties of Semiconductor/Dye//Polymer Thin Film Photocatalysts
O. Linnik, O. Nadtoka, N. Chorna, N. Smirnova, and V. Syromyatnikov

29. Graded Zone Stretching of the Linear Polymers
L. Nadareishvili, N. Topuridze, L. Sharashidze, and I. Pavlenishvili

30. Possibilities of Current Carrying Superconducting Polymer-Ceramic Nanocomposites Obtainment
S. P. Davtyan and A. O. Tonoyan

Part IV: Green Chemistry and Recycling

31. The Influence of Rubber Recyclate Morphology on the Properties of Rubber-Asphalt Composite
M. Sienkiewicz, H. Janik, K. Borzedowska, and Sz. Konkel

32. Degradation of Modified TPS in the Natural and Industrial Compost
H. Janik, M. Sienkiewicz, M. Wawrowska, and K. Wiecierzicka

33. Renewable Resources for Polyurethanes and Polyurethane Composites: A Review
J. T. Haponiuk, A. Hejna, Ł. Piszczyk, J. Datta, and K. Formela

34. Modification of Polyethylene Films Via Photochemical Reaction
V. Smokal, O. Krupka, A. Kolendo, and V. Syromyatnikov

Index
