P-Squared Presents

Lean Champion Workshop

For the Packaging Industry
September 24-28th, 2007

Hosted by Calpine Corrugated, Fresno, CA

Space is limited.

REGISTER NOW

A workshop built to train
participants to move an organization
from mass production to lean, more
profitable manufacturing.

Lean Champion Workshop

For the Printing & Packaging Industry

Workshop Description:

This workshop is designed to equip process improvers across our industry. It will prepare printers, suppliers, prepress, and end users, to understand how to maximize profitability from production and administrative processes. The course is customized for the packaging industry..

Participants learn the essential tools of Lean implementation. Classroom learning is balanced by daily field study where experience is gained in plant benchmarking, Value Stream Mapping, Visual Workplace (5S, 7S), and Kaizen event management. They also learn how to best use their leadership skills to ensure lasting success.

The focus is on results so participants build action plans and are teamed with coaches. Lean certification (level one) is awarded only when the action plan's implementation is successfully completed.

Workshop Agenda:

AM

PM

Monday:

Travel

Arrival, Dinner at 6pm

Whitney Andersen, Administrative Analysis & Support
Scott Ellis EdD, Co-founder, Organizational Development
Scott Heilmann MBA, Engineering & Business Analysis
David Levy, Business Analysis & Leadership
Leslie Pickering, Co-founder, Engineering
Victor Pinto, Engineering

Why P²? P² knows packaging. P² knows Lean.

Our multi-discipline group of packaging professionals brings years of successful lean implementation experience. Lean Champions trained by P² receive tools and coaching for an implementation action plan that is customized for your company's challenges. The results include more reliable processes, faster production, higher quality, and lower inventory. P² is about improving processes and the systems that support the people who run them.

Why Calpine Corrugated?

Lean Champion trainees will see Calpine Corrugated being built Lean from the ground up. Participants will gain hands on experience learning lean tools in this state of the art facility. We believe this unprecedented plant will shape the future of packaging.

Why Fresno?

Many of our Lean Champion Workshops have been held at Clemson University in South Carolina and Fox Valley Technical College in Wisconsin. A west coast venue has been requested and Calpine Corrugated offers that opportunity at a pivotal time during the plant's first months of production.
