- These top three reasons even outscored categories such as improving job performance, generating ideas and finding solutions to problems! TAPPI has grown into the world's largest professional association serving the pulp, paper, and converting industries.

PIMA is the premier association for management professionals in the paper and pulp industry.

By combining forces, PIMA and TAPPI will recognize the best of PIMA's Manufacturing Reliability, International Management, and IT conferences and TAPPI's Papermakers and Coating conferences. This event will allow exhibitors and sponsors to reach a great number of key decision makers all in one venue. Be a part of this inaugural event. He'll draw upon lessons learned which can be applied to the paper industry.

### Glen Hopkins - Vice President and General Manager, Printing & Technology Platforms, Hewlett-Packard Company

Drawing from his experience as a leader with a print technology innovator, Hopkins will discuss "Digital Darwinism" - the lightening-fast rate in which the world is "flattening", the relentless move to digital, the enormous growth of the emerging market, and how all these things will create tremendous risk—and tremendous opportunities—for those willing to change. His observations will specifically address the paper and printing arena.
