

# **SIZING: FACTS AND FALLACIES**

**BY**

**JEROME M. GESS**

**AND**

**PAUL H. WILSON**

---

# TABLE OF CONTENTS

**FOREWORD** .....I

**ACKNOWLEDGMENTS** .....II

**INTRODUCTION** .....III

**BACKGROUND - SIZING FACTS AND FALLACIES** .....VI

**PART A: THE PENETRATION OF A FLUID INTO A SHEET OF PAPER** .....1

**PART B: THE MEASUREMENT OF "SIZING"** .....5

    The HST Test .....5

    The Cobb Test .....10

**CHAPTER I**

**PHYSICAL FACTORS THAT GO INTO RENDERING A SHEET OF PAPER RESISTANT TO WETTING AND THE SORPTION OF WATER** .....12

        The Structure of the Sheet of Paper .....12

        Surface Treatments .....20

        Hornification .....22

**CHAPTER II**

**THE TREATMENT OF FIBERS WITH ADDITIVES TO MAKE THEM RESISTANT TO WETTING AND THE SORPTION OF WATER** .....24

        Introduction .....24

        Film Formation (Indirect Formation of Bonds between a Sizing Agent and Cellulose) .....25

        Direct Bonds Between Cellulose and a Sizing Agent .....29

            Hydrogen Bond Formation .....29

            Summary .....35

        Covalent Bond Formation .....36

        Ionic Bonds .....38

            Summary .....39

---

---

|   |    |
|---|----|
| Other Potential Bonds .....   | 39 |
| <b>CHAPTER III</b>  |    |
| THE STRUCTURE OF POTENTIAL SIZING AGENTS .....                                | 41 |
| Hydrophilic Reactive Groups .....   | 41 |
| Hydrophobic Units .....   | 43 |
| <b>CHAPTER IV</b>   |    |
| THEORIES RELATING TO THE REACTIONS THAT IMPART SIZING TO CELLULOSE FIBERS ... | 45 |
| The Distribution Function .....   | 46 |
| Steam Distillation .....  | 48 |
| Vapor Phase Migration .....   | 50 |
| Sintering and Flow .....  | 52 |
| <b>CHAPTER V</b>  |    |
| DISTRIBUTION FUNCTION: ACCELERATION OF THE RATE OF DISTRIBUTION .....         | 54 |
| <b>CHAPTER VI</b>   |    |
| SECONDARY FACTORS IN THE CHEMISTRY OF SIZING .....                            | 56 |
| Introduction .....  | 56 |
| Zeta Potential, Capacity and Charge Analysis .....                            | 57 |
| ALUM AND "SIZING" .....   | 61 |
| Introduction .....  | 61 |
| Papermakers' Alum .....   | 62 |
| OTHER POTENTIAL SOURCES OF THE ALUMINUM MOIETY .....                          | 69 |
| Sodium Aluminate .....  | 69 |
| Aluminum Chloride .....   | 70 |
| Iron Free Alum .....  | 70 |
| Poly Aluminum Chloride and Sulfate .....                                      | 71 |
| CONDUCTIVITY .....  | 73 |
| FINES RETENTION .....   | 74 |
| <b>CHAPTER VII</b>  |    |
| ROSIN SIZING .....  | 77 |
| Facts: The Experience of Papermakers .....                                    | 77 |
| The Forms of Rosin .....  | 82 |
| Sodium Rosinate vs. Rosin Acid .....  | 85 |
| Rosin and the pH of the Papermaking Process .....                             | 89 |
| Rosin and Cationic Polymers other than the Aluminum Moiety of Alum .....      | 91 |
| Retention and Its Importance to Sizing .....                                  | 92 |
| Calcium Rosinate and Sizing Efficiency .....                                  | 93 |
| Analysis and Hypotheses Regarding How Rosin Reacts to Give Sizing .....       | 95 |

---

---

|  |     |
|--|-----|
| <b>CHAPTER VIII</b>  |     |
| SELF SIZING AND FUGITIVE SIZING .....  | 102 |
| Summary .....  | 106 |
| <br><b>CHAPTER IX</b>  |     |
| NEUTRAL/ALKALINE VERSUS ACID PAPERMAKING .....   | 108 |
| <br><b>CHAPTER X</b>   |     |
| "REACTIVE SIZES" POTENTIAL SIZING AGENTS THAT CAN REACT<br>WITH ACIDIC HYDROGEN ATOMS .....      | 111 |
| <br><b>CHAPTER XI</b>  |     |
| ALKENYL SUCCINIC ANHYDRIDE (ASA) .....   | 114 |
| Introduction .....   | 114 |
| The Chain Length of the Alkenyl Group and the Location of the Double Bond .....                  | 116 |
| The Stability of ASA .....   | 116 |
| The Reaction of ASA with the Elements of a Papermaking Furnish .....                             | 120 |
| Preparation of ASA emulsions .....   | 121 |
| Addition of ASA to Cellulose .....   | 123 |
| Advantages/Disadvantages of ASA .....  | 124 |
| <br><b>CHAPTER XII</b>   |     |
| ALKYL KETENE DIMER (AKD) .....   | 125 |
| Overview .....   | 125 |
| Use of AKD .....   | 129 |
| Other Sizing Agents .....  | 130 |
| <br><b>CHAPTER XIII</b>  |     |
| THE MEASUREMENT OF SIZING .....  | 131 |
| Introduction .....   | 131 |
| Part I: The Relationship of a Web and its Ability to Pass Through a Size or Metering Press . . . | 131 |
| Part II: Specific Test Methods .....   | 132 |
| Penetration Tests .....  | 134 |
| HST Test .....   | 134 |
| Newsprint Sizing .....   | 136 |
| Pen and Ink Test .....   | 136 |
| Ink Flotation .....  | 137 |
| Penoscope .....  | 137 |
| Tests Measuring Surface Characteristics .....  | 138 |
| Vanceometer .....  | 138 |
| IGT Test .....   | 139 |
| Bristow Test .....   | 139 |

---

---

|  |     |
|--|-----|
| Carson Curl Test .....   | 140 |
| K and N Ink Test .....   | 140 |
| Hexane Test .....  | 140 |
| Contact Angle .....  | 141 |
| Immersion Tests .....  | 142 |
| Cobb Test .....  | 142 |
| <br>   |     |
| <b>CHAPTER XIV</b>   |     |
| <b>SURFACE SIZING</b> .....  | 143 |
| Foam Control .....   | 144 |
| Starch Pickup .....  | 144 |
| Size Press Enhancement of HST .....  | 144 |
| <br>   |     |
| <b>APPENDIX I</b>  |     |
| A MEANS OF CONVERTING A STANDARD HSWT UNIT INTO ONE THAT WILL FOLLOW<br>THE RATE OF WETTING AND THE PENETRATION OF A TEST FLUID INTO THE BODY<br>OF A SHEET OF PAPER ..... | 146 |
| <br>   |     |
| <b>APPENDIX II</b>   |     |
| <b>ROSIN SIZING OF PAPERMAKING FIBERS</b> .....  | 149 |
| The Strong-Bond/Weak-Bond Theory Expands the Generally Accepted Mechanism<br>for Internal Sizing of Paper with Rosin .....   | 149 |
| Proposed Modifications To Sizing Mechanism .....   | 149 |
| Using the Proposed Modifications .....   | 151 |
| Sizing Migration .....   | 151 |
| Mechanism For Sizing of Paper With Rosin Soap and Alum .....   | 152 |
| Mechanism For Sizing of Paper With Rosin Acid and Alum .....   | 153 |
| Conclusions .....  | 153 |
| <br>   |     |
| <b>APPENDIX III</b>  |     |
| <b>THE STRONG BOND/WEAK BOND THEORY OF SIZING: ALKYL KETENE DIMER<br/>    AND THE STRONG BOND-WEAK BOND THEORY</b> .....   | 156 |
| Introduction .....   | 156 |
| Background .....   | 156 |
| Discussion .....   | 158 |
| Conclusions .....  | 159 |
| <b>INTERNAL SIZING WITH STEARIC ACID</b> .....   | 162 |
| Introduction .....   | 162 |
| Properties of Commercial Stearic Acid .....  | 162 |
| Sizing Response With Stearic Acid Size .....   | 164 |
| Mill Problems With Stearic Sizes .....   | 165 |
| Stearate Spots .....   | 165 |

---

---

|  |            |
|--|------------|
| Wet Press Roll Adhesion and Stearate Plating ..... | 165        |
| Vapor Phase Migration of Stearate .....            | 165        |
| Strength loss .....                                | 166        |
| Acid system .....                                  | 166        |
| Preferred Uses of Stearic Acid Size .....          | 166        |
| <b>INDEX .....</b>                                 | <b>167</b> |

---
