The Mechanics of Winding
Edited by David R. Roisum, Ph. D.

1994. 237 pp., 7" x 10" soft cover
Item Number: 0101R236
ISBN: 0898522811

*The Mechanics of Web Handling* is the third book in Dave Roisum's trilogy. *The Mechanics of Winding* and *The Mechanics of Rollers* are also available from TAPPI PRESS.

Table of Contents

1 Introduction to Winding
   Winder Applications
   Why Wind?
   Where Winders Fit in
   the Foundation of a Roll (Cores)
   the Three Winder Classes
   the TNT’s of Winding
   Web Tension
   Nip
   Torque Differential
   Roll Structuring
   a Black Box Model of Winding
   Winding Mechanics
   Bibliography

2 Roll Quality Measurement
   What Makes a Good Roll?
   Roll Structure Measurement
   Backtender’s Friend Hardness
   Billy Club Harness
   Paro Roll Tester Hardness
   Rhometer Hardness
   Schmidt Hammer Hardness
   Acoustic Time of Flight
   Axial Press Test
   Caliper in Roll
   Core Torque Test
   Pressure Transducers
   Pull Tab Interlayer Pressure
   Smith Needle Interlayer Pressure
   Cameron Gap Strain
   J Line Interlayer Slippage
   Radially Drill Holes
   Slit Roll Face
   Strain Gauges
   WIT-WOT Pilot Winder
   X Ray Tomography
   Density Analyzer
   Finish Issues
   Measurement Selection
   Measurement Sensitivity
   How Much / How Often to Measure
   Who Should Test
   Who Should Be Tested
   What Should Be Recorded
   How to Interpret Data
   Bibliography

3 The Density Analyzer
   Density Analyzer Applications
   Density Analyzer Operation
   History of the Density Analyzer
   Operating Principles
   Operating Principles
   Counter Data Acquisition
   Density Software
   Sizing Density Hardware
   Density Data and Noise
   Basis Weight and Caliper Effects
   Bibliography

4 Winding Models
   What Is a Winding Model
   Modeling
   Equilibrium
   Strain Displacement
Alignment and Deflection
Drive Speed
Drive Control Precision
Slitters
Trim Removal
Shear Slitter Geometries
Guiding
Safety

Appendices
Unit Conversion Tables
Load Cells for Web Tension
Tension from Motor Reading
Tension from Web Sag
Torque and Power Requirements
Nips on a Two Drum Winder
Nip Stress Measurement
Roll Measurement Sensitivity
Density Hardware List
Winding Model Input Sets
Linear Isotropic
Altmann's Winding Model
Yagoda's Winding Model
Finite Difference Approximations
Matrix Coefficients for Models
Hygrothermal Diffusion Program
Time Cycle calculation Program

Glossary
A Selected Bibliography
Controls
Cores, Chucks & Shafts
Defects
Density Analyzer
Drives
General Introduction to Winding
Other
Measurement
Nip Mechanics
Productivity
Web Handling
Winding Models

Subject Index
Acceleration (See Speed Change)
Acoustics (Also See Noise)
Air Entrainment
Air Shear Burst
Alignment
Automation
Axial Press Test
Backtender's Friend
Baggy Web
Basis Weight (Also See Caliper and Density)
Bibliography, Selected
Billy Club hardness
Blocking
Boundary Condition
Core (See Core Radial Stiffness BBC)
Deflection
Grooving
Normal Entry Law
Speed
Stress
Tolerances
Traction
Vibration
Rolling Friction (See Nip, Rolling Friction)
Rope Marks (See Corrugations)
Rounding (See Speed, Change)
RPM
Runnability
Runout (See Roller, Tolerances)
S Curve (See Speed, Change)
Safety
Salvage Winder
Schmidt (Concrete) Hammer
Shafted & Shaftless,
Sidelay (See Guide)
Slit Roll Face Test
Slitter
Smith Needle
Snapoff (See Web, Break)
Solvents (See Diffusion)
Speed
   Air Entrainment
   Buckles
   Change
   Differential
   Limits
   Measurement
   Vibration
Splice Offset
Spreading
Stack Modules
Starring
Strain Gauge
Strength (See Web, Strength)
Stress Relaxation (See Creep)
Stress Strain curves
Stretch (Also See Tension, Stress Strain)
Tangential Stresses (See Md Stresses)
Telescope
Tension Control
Testing
Thrusting (Also See Roll, Width)
Time Constants
Time Cycle
TIR
TNT
Toque
   Differential
   Drive
   Req's Unwinding
Traction (See Roller, Traction)
Trim Removal
Turret Winder (See Winder, Turret)
Two Drum Winder (See Winder, Two Drum)
Unit Conversion Tables
Unwind
   Belts
   Brakes
   Saddles
   Vibration
Vibration
   Bibliography
   Guidelines
   Rollers
   Throwout
   Unwind
   Wound Roll
Web
   Break
   Flutter
   Products
   Profile
   Strength
   Width
   Winder Specification
Winding (Also See Winder)
   Applications
   Arrangement
   Classification
   Duplex
   Locations Convert.
   Location Mfg.
   Selection
   Specifications
   Turret
   Two Drum
Wound Roll Models
   Altmann's - Appendix
   Model, Computer,
   Models Math
   Nomenclature, Symbols, Units
   Strains
   Tangential Stress Formulation
   Verification
   Yagoda's
   Wrap Angle (Also See Roller, Traction)
   Wrinkle (Also See Spreading and Alignment
   And Roller, Deflection)
   X Ray Tomography
   ZD Stress (See Interlayer Pressure)
