

Document Name:	0102b045
Section:	TAPPI PRESS
Title:	Printing Fundamentals

TAPPI PRESS

Printing Fundamentals
 Edited by Alex Glassman

1985. 340 pp., 6" x 9" hard cover.
 Item Number: 0102B045
 ISBN: 0898520452

A primer for printing as it relates to paper, particularly vital to a papermaker or printer's communication with his customers. Contents include principles of contact printing; principles of noncontact printing; groundwood paper grades; coated grades and commercial printing; book publishing paper; business and writing papers; paperboard; performance characteristics of paper; testing paper and board for printing; and future trends.

Table of Contents:

Preface	Letterpress printing
List of Figures	Gravure printing
List of Tables	Lithographic printing
	Screen printing
Section I Principles of Contact (Impression)	Binding and finishing
Printing Processes	Inks for letterpress and lithography
1 Principles of Contact (Impression) Printing	Specialty printing
Processes	Packaging printing
Introduction	Greeting cards
Printing methods	Newspaper printing
The printing system	Magazine publishing
Preparatory operations	Book publishing
Typesetting	Business forms
Process photography	Commercial printing
Line photography	Process distribution in printing
Halftone photography	
Color reproduction	Section II Principles of Noncontact Printing
Color correction	2 Principles of Noncontact Printing
Screen angles	Introduction
Ink trapping	Impactless printing systems for variable
Image assembly	printing
Automated imposition	Thermal printing process
Platemaking	Electrosensitive printing process
Photoengraving	Electro-thermosensitive printing process
Gravure plate and cylinder making	Magnetic printing process
Lithographic platemaking	Electrophotographic printing systems
New plate developments	Electrographic dielectric printing systems
Screens for screen printing	Plain paper electrophotographic computer
Electrophotographic plates	printout systems
Other plates for reprography	Ink-jet printing
Printing	Printing speeds

Summary

Section III Groundwood Paper Grades

3 Groundwood Paper Grades

Introduction

Newsprint

History

Economics

Printing requirements

Newspaper press configurations

General

Printing couples

Other components of a newspaper press

Paper considerations for runnability

Transit damage

Press unwind

The printing units

Printer to former

Paper properties

Paper considerations for printability

Stereo letterpress

Thin plate or shallow relief letterpress

Lithographic processes

Ink receptivity

Ink showthrough

Formation

Printing other than black and white

Color printing

Inserts

Spectacolor

New developments

Groundwood specialties

Catalogs

Catalog binding

Printing methods for catalogs

Directories

Printing processes for directories

Paper requirements

Paperbacks or pocket books

Supercalendered newsprint

Publication papers

Groundwood web offset and offset

Section IV Coated Grades and Commercial Papers

4 Coated and Commercial Papers

Introduction

Coating methods

Coating materials

Coating pigments

Adhesives

Natural binders

Synthetic binders

Coated paper properties and use

Lightweight

Book weights

Sheet-fed litho

Letterpress papers

Web printing papers

Gravure

Cover weights

Paper-ink interaction

5 Papers for Office Copying

Introduction

Plain paper for copying

Coated paper for copying

Dry EP Papers

Liquid EP Papers

Dielectric papers

6 Map Papers

Introduction

Section V Labels and Packaging Papers

7 Packaging Papers

Introduction

Packaging papers

End-use examples

8 Box Wrap Papers

Introduction

Uncoated box wrap papers

Coated box wrap papers

9 Label Papers

Introduction

Characteristics of label papers

10 Noncellulose Papers

Introduction

Film-based synthetic papers

Fiber-based synthetic papers

Disposable synthetic papers

Section VI Book Publishing Papers

11 Book Publishing Papers

Introduction

Aesthetic or appearance characteristics

Color

Brightness

Gloss

Texture

Opacity

Defects

Printability/runnability characteristics

Printing processes and paper selection

Letterpress

Gravure

Offset or lithographic

Web offset

Binding

Trimming

Moisture

Gusseting

Bulk requirements

NASTA specifications

Permanency considerations

Availability
Papers for books by type and application
Trade books
Textbooks
Workbook, drawing, and coloring books
Reference books
Lightweight printing papers
Special interest books
End-leaf applications
Book jackets and cover applications
Trends in book publishing
Glossary

Section VII Business and Writing Papers

12 Safety Papers

Introduction
Classification
Basic principles
Types of safety papers
Safe papers
Anti-counterfeit papers

13 Stamp Papers

Introduction

14 MICR/OCR Papers

Introduction
MICR papers

15 Writing, Ledger, and Bond Papers

Introduction
Bond papers
Duplicating papers
Ledger papers
Mimeo papers
Xerographic papers

16 Business Form Papers

Introduction
Paper requirements
Manifolding systems

17 Uncoated Paper for Copying Machines

Introduction
Paper design characteristics
Paper dimensional characteristics

Section VII Paperboard

18 Paperboard

Introduction
Types of multi-ply formers
Printing on paperboard
Lithography
Rotogravure

Section IX Performance Characteristics of Paper

19 Performance Characteristics of Paper
Introduction

Runnability
In sheets
In rolls
Printability
Coated vs. uncoated papers
Letterpress
Paper characteristics for letterpress
Offset lithography
Paper characteristics for offset
Gravure (Intaglio)
Paper characteristics for sheet-fed gravure
Paper characteristics for web-fed gravure
Screen process
Paper characteristics for screen process

Section X Testing Paper and Board for Printing

Introduction
The scientific basis for testing
Test functions
Testing paper for printing
Classification according to printing processes

20 Tests for Gravure Printing

Introduction
Print smoothness
Gravure print testing
Laboratory gravure presses
Gravure cylinder etch
Standard test method
Tests on solid print
Baggy webs and roll build

21 Tests for Letterpress Printing

Introduction
Printing smoothness
Printing tests for smoothness
Ink receptivity
Ink transfer during printing
Uniformity of paper surfaces
Surface strength
Conclusion

22 Tests for Offset Printing

Introduction
Communication standards
Runnability
Cleanliness
Surface strength
Water resistance
Mechanical properties
Web runnability

Section XI Future Trends

23 Printing Developments and the Papermaker
Introduction
Changing markets for printing papers
Newsprint: Growth of web offset
Publication printing
Growth of paper production and printing

markets
Commercial printing
Packaging
Growth of various printing processes
Letterpress printing
Gravure printing
Offset printing
Flexography
Electrostatic printing
Roll paper
Offset newsprint
Letterpress news
The future

24 Di-Litho
Introduction

25 The Significance of Twin Wire Formed
Paper
Introduction

26 Future End-Use Requirements
Introduction
Information storage
Communication
Packaging
Sanitary products

27 Economics and Future Trends
Introduction
Major grades of paper and board
Total paper and board
Newsprint
Other printing and writing papers
Packaging Papers
Tissue papers and sanitary paper products
Paperboard packaging
Future trends

28 Future Trends in Printing Processes
Introduction
Overview of future trends
Waterless lithography
Dot matrix printing
Thermal printing
Electrosensitive printing
Styli-electrographic printing
Laser-electrophotographic printing
Ink-jet printing
Summary

Subject Index:

Absorption; lithography papers
Adhesives
Air-knife coating
Air-leak smoothness testers
Anti-counterfeit papers; stamp papers
Apparent consumption; defined

Bekk smoothness tester
Bible printing
Bill-blade coating
Binders; label papers, used in, lithography
papers, used in, types of
Binding; book papers, catalogs, directories,
glossary, methods, paperback books, types of
Blanket piling; unpredictability of
Blister tests
Bond papers
Book papers; aesthetic characteristics,
applications, binding, book jackets, bulk
requirements, coated papers, converting, end-
leaf applications, glossary, gravure for,
letterpress printing, lightweight papers,
lithography, NASTA specifications,
paperbacks, runnability, special-interest
books, trends
Book publishing; trends, use of color
Box-wrap papers
Bulk; book papers, calculation of
Bureau of Engraving; paper requirements
Business forms

Calcium carbonate; paper coating, use in
Calendering; business forms, ink holdout,
influence on, paper coating and,
supercalendered newsprint, trade-offs
Cameron Belt Press
Carbon paper tissue
Carbonless paper
Cartons
Cast-coating process
Catalogs; binding, coated paper properties,
printing, trends
Chapman smoothness tester
Checks; character recognition, paper
requirements
Clark tester
Clay
Coated papers; lightweight coated papers,
binders, types of, book weights, box wrap,
carbonless paper, cast-coated, classifications,
coating materials, coating methods, cover
weights, defined, dull-coated,
electrophotographic printing, glossy-coated,
gravure, used in, groundwood papers, history
of, label papers, letterpress, used in,
lightweight, map papers, matte-coated, office
copying, use in, packaging papers, paper-ink
interaction, paperboard, printing on, pigments
used in coating, printability, safety papers,
sheet-fed litho, use in, thermal printing, trends,
web printing, use in
Coating
Color; book publishing, trends in, correction,
gravure printing, newspaper printing,
packaging printing, perception, publication
printing, trends in, reproduction, separation,

spectacolor, variation during printing
Color printing; forecast
Color strength; testing
Commercial papers
Commercial printing; trends
Computers; character recognition, continuous forms, dot-matrix printing, electrophotographic printing, impactless printing, influence on, information storage and retrieval, ink-jet printing, magnetic storage of information, variable printing
Computersetting; history of
Contact printing; lithography, gravure printing, binding and finishing, color reproduction, commercial printing, defined, halftone photography, image assembly, imposition, job procedure, line photography, methods, platemaking, prepress operations, press operations, process photography, screen printing, specialty printing, trends, typesetting
Converting; binding and finishing, book papers, glossary, packaging papers, use of, paperboard roll stock
Copier papers; paper requirements
Copiers; plain paper
Corrugated board; printing on
Cylinder board
Cylinder forming machines

Dancer roll
Dielectric printing; trends
DiLitho printing; comparison of various systems, newspaper printing, origins, paper requirements, plates, potential problems
Directories; paper requirements, printing and binding
Disposables
Dot-matrix printing; impactless printing, thermal printing, variable printing, lasers, legibility
Driography; plates
Drying; paper webs
Dummy
Duplicating papers
Dusting tests

Electrophotographic printing; variable printing, coated papers, computer printing with lasers, dielectric printing, zinc-oxide systems, duplicators, plain-paper copying, lasers, paper requirements, plates, technological developments, trends
Electro-thermosensitive printing
Elmendorf Tear Test
Exported paper; trends

Facsimile transmission
Filters; color reproduction
Fine papers

Finishing
Flat-bed cylinder press
Flexography; newspaper printing, packaging printing, printing on corrugated board, print tests, trends
Fluorochemical-treated paper; packaging paper
Formation; fourdrinier vs. twin-wire
Forming machines; paperboard
Fourdrinier; evolution

G.R.I. Printability Tester
Glassine paper
Gravure printing; applications, book papers, catalogs, coated paper properties, coated paperboard, color in, cylinder etching, cylinder making, cylinders, relative cost of, defective webs, groundwood papers, ink-drying tests, missing dots, newsprint, packaging printing, paper requirements, paper smoothness, paperboard, paperboard moisture content, platemaking, predicting printability, print gloss, print smoothness, printing on corrugated liner, printing tests, pros and cons, roll defects, run lengths, sheet fed, speed compared with dot-matrix, stamp papers, test development, tests, tests on solid print, tone density, tone quality, trends, types of runs, web fed, wraparound plates, potential use
Greaseproof papers; map papers, packaging papers
Greeting cards
Groundwood papers; newsprint, catalogs, clay coated, comparison of various grades, defined, directories, gravure printing, ink showthrough, lightweight coated, lithography, newsprint, office papers, paperback books, publication papers, specialty grades, supercalendered newsprint, trends, types of
Gusseting

Halftones dots; ink receptivity and, gravure printing, newsprint printing, perceptual threshold
Halftone photography; print quality for different papers, screens, tone reproduction
Halftone photography; print quality for different papers, screens, tone reproduction
Halftone screens; moire patterns
Halftones; book papers, electrophotographic printing, gravure printing, used in, label papers, letterpress printing, used in, lithography, used in, map papers, use in, newspaper printing, use in, process color

Image assembly
Impactless printing; electrophotographic printing, ink-jet printing, lasers, printing with: thermal printing, variable printing, xerotyping,

comparison of methods, computers, influence of, defined, dielectric printing, dot-matrix printing, electrophotographic printing, electrosensitive printing, ink-jet printing, magnetic printing, plain-paper copying, printing speeds, recording energy, thermal printing, trends, various processes described, xerotyping

Imported paper

Imposition

Impression printing

Ink; coated paper, interaction with, driography, used in, drying tests, emulsification, flexography, used in, gloss, gravure, used in, gravure printing of paperboard, heat-set, high-gloss, invisible, label papers, letterpress, used in, lithography, used in, magnetic, paper requirements, paperboard lithography, quick-set, related to paper surface properties, rough papers, safety papers, showthrough, transfer in letterpress printing, trapping, ultraviolet

Ink holdout; calendering, effect of, gloss variations, letterpress printing, print gloss, as a measure of, printing tests

Ink receptivity; ink trapping, effect on, letterpress printing

Ink showthrough; groundwood paper, measuring of

Ink transfer; letterpress printing, paperboard printing

Ink trapping; moire patterns, ink absorption

Ink wip tests

Ink-jet printing; variable printing, applications, image versatility, speed capability, trends

Inserts

Intaglio printing; postage stamps

K and N ink test

Label papers, printing on

Lasers; impactless printing, variable printing, defined, platemaking, printing, trimming copier paper

Ledger papers

Letterpress printing; book papers, coated paper, coated paper properties, commercial printing, compared with other methods, DiLitho process, flat bed, ink receptivity, ink transfer during, inks, newspaper printing, newsprint decline in use of, packaging printing, paper requirements, paper smoothness, platemaking, plates, relative cost of, print smoothness, printing, printing tests, pros and cons, publication printing trends in, rotary press, run lengths, tests, trends, web tension

Lightweight coated papers; coated papers, book papers, groundwood, problems

Lightweight papers; trends

Line photography

Linting; lithography

Liquid penetration tests

Lithography; advantages of offset, alcohol-water dampener, blanket piling, book papers, business forms, catalogs, clay-coated paperboard, coated paper properties, color variation, growth, inks, linting, mechanical strength tests, newspaper printing, newsprint, packaging printing, paper requirements: for sheet-fed, web printing, paper surface strength, paperboard, platemaking, plates, relative cost, press contamination, printing problems, printing process, pros and cons, run lengths, runnability, sheet-fed printing, telephone directories, tests, trends, water resistance of paper, waterless lithography, web offset, web runnability tests.

Magazines; growth of, printing trends

Magnetic ink character recognition; business forms, defined, development of, paper requirements, printing requirements

Makeready

Map papers

Mechanical layout

Mechanical papers

Mimeo papers

Missing dots; gravure printing, newspaper printing, perceptual threshold

Moire patterns; color reproduction

Moisture content of paper; binding, effect on, lithography, importance in, paper requirements, web offset printing

Moisture tests; paper

Moisture welts

Multi-ply board

Multi-ply formers

Newspaper printing; angle bars, bay window, color, damaged paper, DiLitho process, folders, formers, general description, ink receptivity, inserts, letterpress printing, lithography, metal plates, methods, missing dots, new developments, offset lithography, trend toward, paper requirements, plastic plates, popularity of various methods, press configurations, press unwind, reel, reel room, roll splicing, roll tension, rolls, unevenly wound, spectacular, straight runs, web breaks, web-fed rotary press, web tension

Newsprint; basis-weight reduction in, consumption trends, demands on, economics, history, imports, ink showthrough, letterpress printing, plate development, printing requirements, production trends, supercalendered, trends, twin-wire paper, web offset: growth of

Noncellulose papers; disposable, fiber-based, film-based

Noncontact printing
Nonimpact printing

Office copying; dielectric printing
Offset lithography
Optical character recognition; business forms, carbon paper tissue, defined, description, development, paper requirements

Packaging papers; wrapping paper, applications, consumption trends, greaseproof papers, stiffness test, trends, wastepaper
Packaging printing; printing on corrugated board, print tests, trends

Paper classification; printing processes, for various

Paper coating; binders, calendering, cast coating, double coating, history of, ink gloss, related to, materials, methods, paperboard, pigments, safe papers, safety papers, web drying

Paper consumption; decline in, gravure and web offset, GNP, imports and exports, newsprint, packaging papers, paperboard packaging, printing and writing papers, tissue and sanitary papers, trends

Paper end uses; broadly classified, communication, information storage and retrieval, packaging, sanitary products, trends
Paper industry; growth of, origins in U.S.

Paper production; trends

Paper quality; damaged rolls, twin-wire vs. single wire, unevenly wound rolls

Paper requirements; bond paper, book binding, book covers, book papers, box wrapping paper, brightness, bulk, Bureau of Engraving, business forms, bank checks, color standards, coloring books, defects, dielectric printing, DiLito printing process, directories, duplicating papers, elasticity, electrophotographic printing, formation, gloss, gravure printing, high-speed presses, ink receptivity, inks, ledger papers, letterpress papers, letterpress printing, lightweight coated papers, lithography, magnetic ink character recognition, mimeo papers, moisture content, NASTO specifications, new technology, newspaper printing, opacity, optical character recognition, paperback books, permanency, press runnability, reference books, screen printing, sheet-fed lithography, sheet-fed printing, stamp papers, textbooks, texture, trade books, uncoated copier papers, web printing papers, web printing, xerographic papers

Paper webs; runnability, tension control, trends

Paperback books

Paperboard; coatings, consumption trends, converting roll stock, formers, history of,

gravure, lithography, origins, printing, printing trends, structure, web printing requirements
Paperboard packaging; consumption trends
Papers; coated, commercial, map, office copying, packaging

Parker Print-Surf device

Photographs; continuous tone, halftones, stripping

Phototypesetting; history of

Pigment binders; gravure printing of paperboard

Pigments; coatings, used in, color reproduction

Pin register

Plain paper

Plain paper copying; uncoated copier paper, trends

Plastics; food packaging

Platemaking; electrophotographic plates, lasers, using, new developments, newspaper printing, printing trends, run length, screen printing

Platen press

Postage stamps, gravure printing, gum requirements, technical requirements

Press contamination

Print density; ink transfer, as a measurement

Print gloss tests

Printability; book papers, classification of papers, coated vs. uncoated, defined, gravure papers, letterpress printing, lithography

Printing; box wrapping paper, business forms, trends in, catalogs, computers, directories, magnetic ink, packaging paper, tests, limitations of

Printing industry; GNP, related to, growth of, profile of

Printing methods; broadly classified

Printing papers; broadly classified, consumption trends, label papers

Printing, process; binding, direct printing, finishing, offset printing, prepress operations, press operations, trends

Printing terms; lack of standards

Printing tests; applications, defined, gravure printing, ink holdout, letterpress printing, limitations, lithography, moisture content, paper smoothness, print density, print gloss, printing, surface strength, test developments
Printing trends; dot-matrix systems, electrosensitive printing, ink-jet printing, laser printing, platemaking, printing pressure, speed, thermal printing, waterless lithography, xerotyping

Process photography; films, lenses, nonscreen printing processes

Publication printing; trends

Quality audit; applications, distinguished from quality control

Quality control; applications, book papers, distinguished from quality audit, printing industry

RHO meter

Referee test; applications

Reflection densitometer

Reprography; new market force

Research test; applications

Roll damage; packaging operations, influence on, waste

Roll defects; gravure printing, web offset printing

Roll winding; baggy rolls, paperboard printing, runnability, uneven winding

Rollers; nips

Rolls; press requirements, slipping cores, splicing, tension, unwinding, waste, wound unevenly

Rotary press

Rotogravure

Run lengths; various printing processes

Runnability; book papers, defined, gravure printing, letterpress printing, lightweight papers, lithography, newspaper printing, paper properties, as a function of, paper webs, tests

Safe papers

Safety papers

Sanitary paper products; consumption trends

Screen printing; paper requirements, trends, uses

Screens; photography with, types of

Secondary fibers; in paperboard

Sheffield Smoothness Tester

Signatures

Size-press coating

Specialty printing; business forms, commercial, greeting cards, packaging printing

Spectacolor

Stamp papers; gravure printing, gum requirements, technical requirements

Stratified-flow headbox

Stripping

Surface sizing; book papers

Surface strength

Synthetic binders

Synthetic fibers; in copier papers

Synthetic papers; disposable, fiber-based, film-based

Taber Tester

Testing; applications, defined, gravure printing, ink holdout, letterpress printing, limitations, lithography, moisture content, paper smoothness, print density, print gloss, printing, printing smoothness, surface strength, tear, test development

Thermal printing; variable printing, trends

Tissue papers; consumption trends

Titanium dioxide; paper coating, as a

Tailing-blade coating

Trimming; uncoated copier paper

Twin-wire formers; growth of, origins, stratified-flow headbox, various designs

Twin-wire paper, advantages, ash, used in, fiber distribution, lightweight newsprint, linter characteristics

Two-sided paper; described

Typesetting; cold type, hot type, phototypesetting

Uncoated copier paper; basis weight, charge acceptance, curl, fiber furnish, image fixing and smoothness, moisture content, office copying, used for, opacity, paper requirements, sizing, smoothness, specifications, stiffness, thickness, trends, trimming

Uncoated papers; box wrap, electrophotographic printing, label papers, printability

Variable printing; xerotyping, computers, influence of, defined, dielectric printing, dot-matrix printing, electrophotographic printing, electrosensitive printing, electro-thermosensitive printing, ink-jet printing, laser printing, magnetic printing, plain-paper copying, principal uses, printing speeds, thermal printing, trends, various processes described, xerotyping

Waste; color runs, during, roll damage and, web offset printing

Waterless lithography; plates

Wax-pick test

Web breaks; newspaper printing, propagation, tension, importance of

Web drying

Web letterpress printing

Web offset lithography; newsprint, growth in

Web offset printing; bible printing, blanket-to-blanket, catalogs, common-impression cylinder, newspaper printing, paper requirements, paper waste

Web printing; baggy rolls, coated paper properties, letterpress printing, low basis weight, paperboard, run lengths, runnability tests, splicing rolls, tear tests, trends

Web tension; gravure printing, letterpress printing, lithography, newspaper printing, paperboard printing, runnability

Winders

Wrapping paper

Writing papers; broadly classified, consumption trends, new markets

Xerographic papers

Xeroprinting

Young's Modulus; paper stiffness
