Title:	Paper Machine Steam and Condensate Systems

TAPPI PRESS

Paper Machine Steam and Condensate Systems
4th Edition, edited by Robert D. Perrault

1990. 40 pp., 8-1/2" x 11" soft cover
Item Number: 0101R096

ISBN: 0898525047

This book gives papermakers and those responsible for solving drying-related problems a basic understanding of the design, operation, and control of paper machine steam and condensate removal systems.

Table of Contents:

Foreword	2.2 Thermocompressor pressure control system with differential control valve
Contributors	2.3 Dryer differential control using the thermocompressor spindle
Introduction	2.4 Thermocompressor cascade system
	2.5 Yankee dryers
1 Steam Control and Condensate Evacuation Systems Design	3 Blow Through (Flow) Control for Dryer Drainage Systems
1.0 General	3.0 General
1.1 Basic steam pressure control system	3.1 Blow through control principles
1.2 Multiple pressure control sections	3.2 Blow through control installation
1.3 Automatic differential pressure control	3.3 Yankee or single dryer blow through control system
1.4 Dryer temperature control using a vacuum system	
1.5 Pressure and temperature control for each dryer section	4 Mechanical Vapor recompression (MVR)
1.6 Simple three-section cascade dryer section	4.0 General
1.7 Positive pressure control loops for wet end dryers	4.1 Advantages
1.8 Low pressure wet end dryer	
1.9 Temperature control of wet end dryers	5 Dryer Drainage System Controls and Equipment
1.10 After size drying control	5.0 General
1.11 Single felted dryer section	5.1 Pressure control
2 Thermocompressors (THC)	5.2 Differential pressure control
2.0 General	5.2.1 Transmitter installation
2.0.1 Construction and operation	5.3 Separator control
2.0.2 Advantages and disadvantages of thermocompressor systems	5.4 Vacuum system
2.0.3 Performance	5.4.1 Vacuum pump
Thermocompressor Systems	5.4.2 condenser (heat exchanger)
2.1 Thermocompressor pressure control system	5.5 Effect of air in steam
	5.5.1 Noncondensable bleeds
	5.6 Syphons for paper machine dryers

- 5.7 Effect of centrifugal force
- 5.8 Drive horsepower and dryer condensate load

6 Troubleshooting, Check-out, Start-up, and Shutdown of Dryer Drainage Systems

- 6.0 Equipment Check-out
- 6.1 General installation
- 6.2 Control valves
- 6.3 Separators
- 6.4 Condensate pumps and motors
- 6.5 Vacuum pump
- 6.6 Heat exchanger (HE)
- 6.7 Thermocompressor (THC)
- 6.8 Steamfit and piping
- 6.9 Controllers
- 6.10 Systems checkout - flushing new systems and rebuilds
- 6.11 Shutdown procedures
 - 6.11.1 Cold shutdown
 - 6.11.2 Warm shutdown
- 6.12 Sheet breaks
 - 6.12.1 Long breaks
 - 6.12.2 Short breaks
- 6.13 Operating problems and trouble shooting
 - 6.13.1 Low differential pressure
 - 6.13.2 High differential pressure
 - 6.13.3 High drive torque
 - 6.13.4 High separator level
 - 6.13.5 Very low separator level
 - 6.13.6 High steam pressure
 - 6.13.7 Low steam pressure
 - 6.13.8 High steam usage per pound of water evaporated
 - 6.13.9 Loss in production rates
