<b>PREFACE TO 3RD EDITION</b>	<b>vii</b>	<b>7. KRAFT PULPING</b>	<b>75</b>
		7.1 Brief History of Development	75
<b>PREFACE TO 2ND EDITION</b>	<b>viii</b>	7.2 Kraft Process Nomenclature and Definition of Terms	75
<b>PREFACE TO 1ST EDITION</b>	<b>ix</b>	7.3 Description of Kraft Process	76
<b>1. INTRODUCTION</b>	<b>1</b>	7.4 Chemistry of Kraft Pulping	78
1.1 Importance of Paper	1	7.5 Operation and Control	80
1.2 Definition of Pulp, Paper, Paperboard	1	7.6 Process Modifications	83
1.3 Chronology of Technological Development	1	<b>8. COOKING EQUIPMENT</b>	<b>85</b>
1.4 Modern Pulp and Paper Operations	2	8.1 Batch Digesters	85
1.5 Requirements and Sources of Papermaking Fibers	4	8.2 Modifications to Conventional Batch Kraft Cooking	88
1.6 Introduction to Fiber Chemistry	5	8.3 Continuous Digesters	89
1.7 Behavior of Cellulosic Fibers	7	8.4 Sawdust Cooking	95
<b>2. CHARACTERISTICS OF WOOD AND WOOD PULP FIBERS</b>	<b>10</b>	8.5 Blow Heat Recovery	97
2.1 Tree Structure	10	<b>9. PROCESSING OF PULP</b>	<b>99</b>
2.2 Characteristics of Wood	11	9.1 Defibering	99
2.3 Effect of Fiber Structure (Morphology) on Fiber and Paper Properties	17	9.2 Deknotting	99
2.4 Wood Species Identification	19	9.3 Brown Stock Washing	101
<b>3. WOOD AND CHIP HANDLING</b>	<b>21</b>	9.4 Screening	109
3.1 The Wood Resource	21	9.5 Centrifugal Cleaning	114
3.2 Wood Harvesting Techniques	22	9.6 Thickening	118
3.3 Pulpwood Measurement	27	9.7 Stock Pumping & Handling	121
3.4 Wood Preparation	28	9.8 Pulp Storage & Blending	124
3.5 Chip Handling and Storage	32	9.9 Preparing Pulp For Shipment	126
3.6 Chip Quality Control	34	<b>10. CHEMICAL RECOVERY</b>	<b>134</b>
<b>4. OVERVIEW OF PULPING METHODOLOGY</b>	<b>37</b>	10.1 Black Liquor Oxidation	134
4.1 Introduction to various Pulping Methods	38	10.2 Evaporation	134
4.2 Market Pulp	41	10.3 Recovery Boiler	142
4.3 Trends in Pulping	44	10.4 Reausticizing	150
4.4 Comparison of Pulp Properties and Applications	44	10.5 Calcining	154
<b>5. MECHANICAL PULPING</b>	<b>47</b>	10.6 By-Product Recovery	157
5.1 Mechanical Pulping Nomenclature	47	10.7 Recovery of Sulfite Liquors	160
5.2 Stone Groundwood Process	48	10.8 Alternative Kraft Recovery	162
5.3 Refiner Mechanical Pulping Methods	54	<b>11. BLEACHING</b>	<b>164</b>
5.4 Thermomechanical Pulping	57	11.1 Bleaching Sequences	164
5.5 Chemically Modified Mechanical Pulping	60	11.2 Preparation of Bleach Chemicals	166
5.6 Heat Recovery	64	11.3 Defining a Bleaching Stage	169
<b>6. SULFITE PULPING</b>	<b>66</b>	11.4 Oxygen Bleaching	173
6.1 Brief History of Development	66	11.5 Chlorine Dioxide Delignification	174
6.2 Nomenclature and Definition of Terms	66	11.6 Caustic Extraction	175
6.3 Process Description	67	11.7 Chlorine Dioxide Bleaching	175
6.4 Chemistry of Sulfite Pulping	70	11.8 Peroxide Bleaching	176
6.5 Chemistry of Cooking Liquor Preparation	71	11.9 Ozone Bleaching	176
6.6 Operation and Control of Cooking	71	11.10 Enzymes	177
6.7 Two-Stage Sulfite Pulping	72	11.11 Displacement Bleaching	177
6.8 Future Prospects for Sulfite Pulping	73	11.12 Pulp Brightening (Mechanical Pulp Bleaching)	179
		<b>12. PULP MILL OPERATING STRATEGY AND ECONOMICS</b>	<b>182</b>
		12.1 Selection of a Mill Site	183

12.2 Process Design and Plant Layout	183	20. MANUFACTURING TECHNIQUES FOR SPECIFIC PAPER AND BOARD GRADES	310
12.3 Production Control	184	20.1 Newsprint	310
12.4 Inventory Control	186	20.2 Publication Grades	314
12.5 Economic Considerations	187	20.3 Sack Grades	315
12.6 Cost Control	188	20.4 Linerboard	316
<b>13. PREPARATION OF STOCK FOR PAPERMAKING</b>	<b>190</b>	20.5 Corrugating Medium	317
13.1 Repulping (Dispersion)	190	20.6 Fine Paper	318
13.2 Refining	191	20.7 Tissue Grades	319
13.3 Metering and Blending of Furnishes	202	<b>21. ECONOMICS OF PAPER MACHINE OPERATION</b>	<b>325</b>
<b>14. SECONDARY FIBER</b>	<b>205</b>	21.1 Factors Affecting Machine Efficiency	326
14.1 Wastepaper Procurement	206	21.2 Lost Time Analysis	328
14.2 Degree of Recycling	206	21.3 Grade Mix vs. Profitability	330
14.3 Repulping of Wastepaper	207	<b>22. PROPERTIES AND TESTING OF PULP AND PAPER</b>	<b>332</b>
14.4 Contaminant Removal	209	22.1 Objectives of Testing	332
14.5 Deinking	211	22.2 Characterization of Testing Procedures	333
14.6 Bleaching	216	22.3 Pulp Testing	335
14.7 Secondary Fiber Utilization	217	22.4 Paper Testing	340
<b>15. NON-FIBROUS ADDITIVES TO PAPERMAKING STOCK</b>	<b>218</b>	22.5 Automated Paper Testing	344
15.1 Retention on the Papermachine	218	<b>23. INTRODUCTION TO PAPER END USES</b>	<b>345</b>
15.2 Wet End Chemistry	219	23.1 Sheet Finishing	345
15.3 Applications of Non-Fibrous Additives	221	23.2 Converting	349
15.4 Alkaline Papermaking	225	23.3 Printing	352
<b>16. PAPER MANUFACTURE - WET END OPERATIONS</b>	<b>227</b>	<b>24. PROCESS CONTROL</b>	<b>357</b>
16.1 Introduction to the Paper Machine	227	24.1 Measurement and Control	357
16.2 Approach System	228	24.2 Process Control Computers	362
16.3 Flowspreader and Headbox	230	<b>25. MILL SERVICES</b>	<b>366</b>
16.4 Sheet Forming Process	237	25.1 Water Supply	366
16.5 Wire Part (Fourdrinier)	238	25.2 Boiler Feedwater	368
16.6 Twin-Wire Forming	244	25.3 Boiler Operation	368
16.7 White Water System	246	25.4 Steam Utilization	373
16.8 Broke System	247	25.5 Electrical Distribution	376
16.9 Pressing	249	25.6 Energy Management	376
16.10 Vacuum System	260	25.7 Corrosion Control	378
<b>17. PAPER MANUFACTURE - DRY END OPERATIONS</b>	<b>263</b>	<b>26. WATER POLLUTION ABATEMENT</b>	<b>381</b>
17.1 Paper Drying	263	26.1 Introduction	381
17.2 Calendering	273	26.2 Sources of Pollutants and In-Plant Abatement	384
17.3 Profile Control	276	26.3 Standards and Regulations	385
17.4 Reeling	278	26.4 Environmental Monitoring	386
17.5 Paper Machine Drives	279	26.5 Primary Treatment	387
17.6 Winding	279	26.6 Secondary Treatment	389
17.7 Roll Finishing	282	26.7 Color Removal	393
<b>18. SURFACE TREATMENTS</b>	<b>284</b>	26.8 Solids Handling	395
18.1 Sizing	284	<b>27. AIR POLLUTION ABATEMENT</b>	<b>398</b>
18.2 Pigmented Coating	288	27.1 Standards and Regulations	398
18.3 Supercalendering	296	27.2 Source of Air Pollution	399
<b>19. MULTIPLY PAPERBOARD MANUFACTURE</b>	<b>299</b>	27.3 Monitoring and Testing	400
19.1 Multiply Formers	299	27.4 In-Process Abatement	403
19.2 Water Removal	304	27.5 Control Equipment	405
19.3 Sheet Finishing	307	<b>INDEX</b>	<b>415</b>
19.4 Plybonding	308		
19.5 Board Properties	309
