

***The Art and Science of Corrugator Scheduling...by Manual and Computer
Methods
By Franklin H. Cloud***

Published by Jelmar Publishing Co. 1996.
104 pages, soft cover
ISBN 1-885067-04-6
Item # 0638CORRS

Explains the best procedures for scheduling on the corrugator, whether it is a single, double or triple knife unit. Addresses how each type of knife influences flexibility, waste and roll stock. Gives comparative performance data for both computer and manual scheduling.

TABLE OF CONTENTS

	Introduction or Corrugating 101.....	1
1	The Art of Corrugator Scheduling, Manual Methods.....	6
2	Costing and Evaluating Schedules.....	20
3	The Magic of Multiple Cutoff.....	31
4	Analysis of Corrugator Side Trim	40
5	The Computer Tries corrugator Scheduling	53
6	Roll Stock: Study of Number and Sizes of Stock--Simulation Study.....	67
7	Corrugator Size and Cutoff Characteristics.....	83
	References	93
	Index	94

LIST OF ILLUSTRATIONS

1.	Making a Regular Slotted Glued Container, Typical Configuration.....	2
2.	Trimming Configurations	10
3.	Corrugator Run and Trim Sheet, Sequence No. 13	11
4.	Diagram of 200#C Runs in Sequence Number 13.....	13
5.	Corrugator Run and Trim Sheet for Sequence Number 14, Five Items	16
6.	Corrugator Run and Trim Sheet for Alternate Sequence Number 14,A.....	17
7.	Length of Run versus running production, 87-inch Corrugator	26
8.	Costing the Three Schedules	28
9.	Combiner Run Evaluation, Single Cutoff.....	34
10.	Combiner Run Evaluation, Double Cutoff	35
11.	Combiner run Evaluation, Triple Cutoff	36
12.	Diagram and Statistics, Scheduling Seven Same Items	37
13.	One company's Inches of Trim by Net Width	42
14.	1993 TAPPI Side Trim Survey.....	44
15.	Breakeven One Thousand Lineal Feet, 200#C	52
16.	Detail of Sets to be Scheduled	57
17.	Best Manual versus Computer, Total Changes--Three Set Moving Average	62
18.	Best manual versus Computer, Gross Running--Three Set Moving Average	63
19.	Best manual versus Computer, Trim--Three Set Moving Average	64
20.	Best manual versus Computer, Total Cost--By Individual Set	65
21.	Number of Sizes Study, Number and Cost of Changes	71
22.	Number of Sizes Study, Changes versus Trim Costs	72
23.	Number of Sizes Study, Production Volumes	73
24.	Number of Sizes Study, Machine Widths and Percent Trim	74
25.	Number of Sizes Study, Net Corrugator Output in S2quare Feet per Hour	75

**The Art and Science of Corrugator Scheduling...by Manual and Computer
Methods
By Franklin H. Cloud**

26.	Number of Sizes Study, Number of Rolls consumed and Average tons per Roll	77
27.	Roll Sizes, Percent of Tonnage (Roll Stocks)	82
28.	Number of Changes by Corrugator Size and Cutoff	86
29.	Productivity by Corrugator Size and cutoff, 200#C	88
30.	Run Length versus Lineal Feet per Hour, 200#C	89
31.	Side Trim Inches and percent Trim by Size and Cutoff.....	90
32.	Width Utilization and Average Number Out of Size and Cutoff.....	90
33.	Costs per Net Thousand Square Feet by Corrugator Size and Cutoff, 200 #C, for 87-inch and 96-inch Corrugators	91

LIST OF TABLES

1.	Corrugator Summary Statistics.....	21
2.	Corrugator Variable Costs	23
3.	Corrugator Operations, Hours and Costs	25
4.	Corrugator Summary Statistics, Numerical Values	29
5.	Test Results.....	30
6.	Self-Trim versus Double Cutoff, Scheduled on a 63-inch Corrugator	39
7.	Trim Cost Index per Net Thousand Square Feet	47
8.	Relationship of Cost of a Size Change versus Taking Excess Trim	50
9.	Breakeven Lineal Feet, Size change cost Equal to Excess Trim Cost	51
10.	Scheduling Summary	59
11.	Scheduling Summary, Cost Detail.....	60
12.	Summary of Roll Stock Statistics.....	70
13.	Inventory Carrying Costs	78
14.	Corrugator Size Study and Related Inventory Change Costs	80
15.	Statistical and Cost Summary of Six Computer Scheduling Runs	85
