List of Illustrations	xx
List of Tables	xxv
About the Author	xxvi
Preface	xxviii

Table of Contents

CHAPTER 1. MEETING THE CHALLENGE OF THE ENVIRONMENT	1
A Collision Course	4
Addressing the Environment Through Government	5
Tightening Standards	6
The Quick Fix and Pressures to Comply	7
Sustainability Through Pollution Prevention	8
Beware the Two-Headed Dragon	8
Case Histories of Enforcement Actions	9
Oxidizer Problems, Reasonable Policy for Repairs	10
Moving to a New Site Within the System	12
Everyone Knew but One Inspector	12
Penalties Plunder Profits	13
Where Do We Go From Here?	14
CHAPTER 2. THE ROLE OF GOVERNMENT AS PROTECTOR OF THE ENVIRONMENT	15
The Laws that Bind Us	16
Rulemaking: The Process that Follows	18
Delegation of Enforcement to Lower Authorities	19
Permits: A Right or a Privilege?	20
Permit Review	20
Enforcing the Law, Inspection	23
Inspection by Requests for Information	24
Notice of Violation and Confrontation	24
The Consent Order	25
Determining the Amount of Penalties	25
There are Only Losers	26
CHAPTER 3. PUBLIC PARTICIPATION	27
Environmental Advocacy Groups	28
Environmental Justice Organizations	30
Risk Assessment and the Community	32
What is Risk Assessment?	33
Risk and Trust	34
Legal Requirements for Public Participation	37
SARA Title III, Right-to-Know	37
Clean Air Act of 1990	38
Community-Based Environmental Protection	38
Voluntary Community Programs	40
A Final Note: Proactive Industry Response	40

CHAPTER 4. OVERVIEW OF ENVIRONMENTAL AND SAFETY REGULATIONS	43
Emitting Pollutants to Air	44
Hazardous and Solid Wastes	49
Classifying Hazardous Waste	50
Solid Wastes	52
Categories of Hazardous Waste Generators	53
Operating Requirements	53
Secondary Issue: Laundered Wipers	53
Underground Storage Tanks	54
Process Water Wastes	54
Permits	56
Silver Halides and Aqueous Solutions	56
Stormwater Runoff	57
Superfund/SARA and the Printer	57
Toxic Release Inventory Report TRI	58
TIER II Inventory Report	58
Toxic Substance Control	60
Occupational Health and Safety	62
Hazard Communication Standard	62
Ambient Indoor Air Pollutant Standards	63
Personal Protective Equipment (PPE)	63
Storage Standards	64
Other Pertinent Concerns	64
Summing Up	64
CHAPTER 5. PREVENTING POLLUTION BY DESIGN	65
Source Reduction	67
Opportunities to Reduce Pollution	68
Targeting Printing Opportunities	70
Water Ink Technology	72
Alcohol-free Fountain Solutions	74
Housekeeping and Maintenance	77
Creativity and Innovation Make a Difference: The Self-Cleaning Chambered Doctor Blade System	79
The Role of Substrates in the Printing Environment: Boon or Barrier to Pollution Prevention?	80
EVA Films: A Case in Point	82
Metallocenes to the Rescue	83
Coatings Can Offer Relief	84
Economics of Pollution Prevention	85
Strategy for Success	86
CHAPTER 6. PROCESS CHEMISTRY: THE FOUNDATION OF PRINTING AND SOURCE OF PRINTERS' ENVIRONMENTAL CONCERNS	89
Ink: The Necessary Ingredient	90
Pigments	92
Resins	93
Solvents as Vehicles	93

Fountain Solutions	97
Solvents Used to Dilute Ink on Press	98
Cleaning the Press and Image Carriers	100
Prepress—Design and Image Carriers	101
Chemicals in Finishing Operations	103
Coatings	104
Adhesives	105
Maintenance Chemistry	105
Suppliers Spur Improvements	105
Moving to the Future	106

CHAPTER 7. CATEGORIES AND SOURCES OF POLLUTANTS IN A TYPICAL PRINTING FACILITY

	107
Categories of Waste	108
Air Pollution and Printing	109
Ground Level Ozone—VOC	109
Hazardous Air Pollutants	111
Particulates in the Air	112
Indoor Air Pollution	113
Clean-up Alternatives	113
Hazardous Wastes	114
Locating Hazardous Wastes in the Pressroom	115
Solid Wastes and Resource Conservation	116
Wastewater and Printer Discharges	117
Aqueous Systems Common to Printing	118
Spills a Major Focus	120
Multi-media Overview	120

CHAPTER 8. IDENTIFYING AND QUANTIFYING HAZARDOUS CHEMICALS

	121
Material Safety Data Sheets	124
Organizing MSDS for Reference	129
Identifying the Hazardous Components	130
Using the Hazardous Data to Eliminate Pollution and Liability	133
Charting the Use of Chemicals in the Process	134
Quantifying the Chemicals and Exposure	137
Computing Emissions for Small Businesses	137
Computing Emissions for Major Facilities	139
Potential to Emit—A Federal Mandate	139
Next Step: Where Do We Go From Here?	142

CHAPTER 9. TAKING A PROACTIVE STANCE: THE INTERNAL AUDIT

	143
Advantages of Conducting an Audit	144
Organizing for the Internal Audit	144
Role of Consultants	146
Conducting the Audit	146

Tools to Use in the Audit	147
Audit Checklist	147
MSDS, Flow Charts and Mass Balance	148
Fleshing Out the Observations and Developing an Action Plan	148
Fishbone Brainstorming Chart	149
Making Use of Technology	152

CHAPTER 10. CLEAN AIR PERMITS AND COMPLIANCE STANDARDS 153

Basic Components of CAA90	154
Ozone Poses Major Printing Problems	158
Hazardous Air Pollutants	159
Attainment Versus Non-Attainment Areas	160
Clean Air Compliance Thresholds: Potential to Emit Design Parameters for Printing	161
Computing Your PTE	162
Options to Comply as a Less than Title V Source	165
Components of An Air Permit	166
Adding or Modifying Equipment	168
The Permit Package	168
Minor Sources; State Permits	171
Records and Reports	171
Risk Management Plans	174
New Source Review	174
Emission Reduction Credits	175
Putting Away Credits for the Future	176
What are ERCs?	177
How do You Quantify ERCs?	177
Other than Over-control, How are ERCs Created?	178
There's Gold in Them Thar Hills	178
Technology Control Guidelines	178
What Next? Reactivity Research	181
Avoiding the High Price of Non-compliance Permits and Reports	182
Punishment by Penalties	183
How Does One Get Into Trouble?	184
Violations, Penalties and Common Sense	188

CHAPTER 11. ADD-ON CONTROLS FOR CLEANER AIR 189

Alternatives for Add-on Controls	190
Basic Types of Add-on Controls	191
Advantages and Disadvantages—Which Do We Select?	195
Thermal Oxidation	195
Catalytic Oxidizers	197
Specifying Control Systems	199
Stack Tests	202
Permanent Total Enclosures	202
Definition of a Total Enclosure	205
Disadvantages of PTE	206
Is There a Future for Add-on Controls?	207

CHAPTER 12. INKS: MEETING THE DEMANDS OF QUALITY AND THE ENVIRONMENT	209
Market Forces Work Against Each Other	209
Soy and Vegetable Oil Inks	210
Radiation Curing Finds Niches	211
Waterborne Inks and Flexographic Printing	213
Basic Requirements for Waterborne Inks	215
Flexographic Equipment Limitations	215
Case History: Firm X Coating Mills; Water Inks and Multi-media Pollution Prevention	220
 CHAPTER 13. MANAGING HAZARDOUS WASTE STREAMS	 227
What is a Hazardous Waste?	229
Classifying Generators by Activity	230
Locating Hazardous Wastes in the Pressroom	231
Sources of Waste in a Printing Facility	233
Managing the Hazardous Wastes	234
Minimizing All Wastes	238
 CHAPTER 14. UNDERSTANDING AND MANAGING YOUR INKS FOR ENVIRONMENTAL COMPLIANCE	 241
Another Look at the MSDS	241
Ordering Ink to Maximize Capacity	243
Color Management and Storage Challenges	244
Color Standard Systems and Automated Ink Blending	245
Process Printing; The Ultimate Goal	246
What Does Ink Management Do for You?	247
Starting the Program	248
 CHAPTER 15. REDUCING POLLUTION BY ADDRESSING PRESS CLEAN-UP	 251
Clean-up Spews Wastes	251
Solvent and Aqueous, Both Pose Hazards	253
Resolving Cleaning Issues at the Press	254
Why Do We Produce Excess Clean-up Waste?	254
Positive Steps in the Pressroom	257
Innovative Approaches	258
Dry Ice Does the Job	258
Safe Press Washes Replace Traditional Solvents	258
In-line Cleaning Equipment	259
Off-press Cleaning Equipment	260
Case Studies with New Cleaning Solutions	262
Water Flexo Newspaper Seeks Cleaner Environment	263
Folding Cartons in North Carolina	264
Solving the Problem of Clean-up Wastes	265

CHAPTER 16. THE DIGITAL REVOLUTION IN PREPRESS OPERATIONS: POLLUTION PREVENTION PARTNERS WITH TECHNOLOGY	267
Traditional Art and Plate Preparation	269
Setting Copy Comes of Age	271
Software Leads the Way	272
Electronic Prepress Production	275
Making Plates a Safer Way	275
Lithographic Platemaking, Then and Now	275
Flexographic Image Carriers	277
Gravure Cylinders	280
Screen and Digital Printing	281
Labels and Tags	283
Digital: A Means, Not an End	283
CHAPTER 17. PROCESS WATER WASTE: PROTECTING OUR DRINKING WATER SUPPLY	285
What Concerns Affect Printers?	286
Standards for Pretreatment	288
Best Management Practices—Silver Halides	289
Components of a Silver BMP	290
What Methods are Available to Reclaim Silver?	290
No Sewers: Have Septic Tank	292
Traditional Methods of On-site Wastewater Treatment	292
Minimizing Wastewater Output	295
When in Doubt, Test First	297
CHAPTER 18. CHEMICAL SAFETY IN THE PRESSROOM	299
Essentials of a Safety Program	301
Hazard Communication Compliance Program	301
Material Safety Data Sheets	303
Format of MSDS	303
Locations of MSDS Books in Facility	308
Labels: Up-Front Key to Safety in the Workplace	309
Role of the Label in the Use of Industrial Chemicals	309
OSHA Hazcom Labeling	310
HMIS Labels—Hazard Material Identification System	311
DOT Hazardous Materials Labels	312
Hazardous Waste Labels	313
No Container Without a Label	315
Process Safety Management	315
Hazards Assessment	315
Technology of the Process	316
Employee Involvement	317
Rules for Personal Protective Gear	317
Respiratory Protection Program	319
Nature of Respiratory Hazards	319

Medical Records—A 30-Year Responsibility	320
An Annual Responsibility—Forms 200 and 300	321
OSHA Consultation Services	324
CHAPTER 19. STORING CHEMICALS: PRECAUTIONS AND LIMITATIONS	325
OSHA Regulations Relative to Storing Chemicals	326
Flammability and Explosion	326
Storing Toxic and Reactive Chemicals	328
Fire Departments and NFPA Standards	329
Storage Rooms	329
Storage Cabinets	332
Local Laws to Restrict Storage of Chemicals	332
Suffolk County, New York	332
Above- and Below-Ground Storage Tanks	333
Underground Storage Tanks	334
Aboveground Storage	335
Certification of UST Installation	335
Spill Prevention Programs	336
Housekeeping and Maintenance	336
CHAPTER 20. EPCRA: MOTIVATION FOR POLLUTION PREVENTION	337
Emergency Planning	338
Emergency Notification	339
Reporting Chemicals Stored on Site	340
Process for Filing a TIER II Report	342
The Toxic Release Report—TRI	344
Completing a TRI Report	349
Getting Started	351
Completing the Form—Part 1: Facility Identification	352
Completing the Form: Chemical Specific Information	352
Lesson to be Learned from SARA Title III Reports	356
CHAPTER 21. ENVIRONMENTAL MANAGEMENT SYSTEMS	359
The Challenge of the EMS	361
Components of an EMS	362
A Basic System for the Smaller Facility	364
ISO 14000: International Certification	366
ISO 14001: An Integrated Environmental Management System	368
Commitment	368
Planning for the EMS	368
Understanding the Implications Within the Company	370
Evaluating and Implementing Alternatives	370
Evaluating Efforts and Progress	373
Review and Revisions	373
Proactive Rather than Enforced Compliance	376

CHAPTER 22. ECONOMICS OF COMPLIANCE AND NON-COMPLIANCE	379
Investing in Technology to Comply	379
Large Format Digital Printing	380
Direct to Plate or Press	380
Water-base Inks Replace Solvent	381
Eliminating the Alcohol from Fountain Solution	382
Comparing the Economic Options to Compliance	383
Return on Investment	387
Add-on Controls: A Question of Feasibility	390
Cost of Non-compliance: Litigation and Penalties	392
Clean Air Civil Penalty Policy	393
Supplemental Environmental Projects (SEPs)	394
Small Business Incentive Program	395
It Pays to Comply	396
CHAPTER 23. THE ENVIRONMENT IN THE INTERNATIONAL ARENA	397
Treaties and Agreements	398
Gathering the Nations to do Good	399
Challenge of Population Growth	400
Energy Poses Challenges	402
Atmospheric Concerns	403
International Law and Regulation	406
Regional and National Approaches to the Environment	407
Western European Community	408
Central and Eastern Europe	410
Our Neighbor to the North	411
Japan	411
China	412
ISO 14000 Expected to Boost Environmental Compliance	412
International Efforts to Control Chemicals	413
CHAPTER 24. LOOKING BACK TO LOOK AHEAD	417
30 Years in the Working	418
Reinvention of the Agency and its Tools	421
Cleaner, Cheaper, Smarter	422
Project XL	423
Design for the Environment (DfE)	424
Consensus for Regulatory Reform	424
How Effective is Reinvention?	426
Technical Challenges to the Current System	427
Are We Tackling the Real Issues?	427
Ozone Reactivity Scales	428
Multi-media and Performance-based Standards	429
Technology Advances the Cause	430
Facing Up to the System	431

APPENDIX

I.	Environmental Protection Agency Regional Offices (United States Environmental Protection Agency)	434
II.	Small Business Ombudsman Contacts for EPA and by States (United States Environmental Protection Agency)	437
III.	Directory of OSHA Consultation Offices (Occupational Safety and Health Administration)	451
IV.	Converting, Printing and Publishing Associations and Organizations (NPES and Jelmar Publishing Co., Inc.)	457
V.	Printing Industry and Environmental Publications (Jelmar Publishing Co., Inc.)	469
VI.	Major Environmental Laws (United States Environmental Protection Agency)	481
VII.	Typical Regulations Encountered by Printers in Lower New York State (P-F Technical Services, Inc.)	483
VIII.	Abbreviations and Acronyms Used by Environmental Agencies <i>(Terms of Environment: Glossary, Abbreviations and Acronyms, USEPA, revised December 1997)</i>	486
IX.	Pollution Prevention Opportunities: Flexography, Lithography, Screen Printing (Flexography, <i>Flexographic Ink Options: A Cleaner Technologies Substitutes Assessment</i> , USEPA Document EPA 744-R-00-004a; Lithography, <i>Fit to Print</i> , An Environmental Prevention Manual for New England Lithographers, USEPA, Document EPA-903-B-97-001; Screen, <i>Cleaner Technologies Substitutes Assessment</i> , USEPA, Document EPA 744-R-94-005)	501
X.	Pollution Prevention Checklist for Printers (P-F Technical Services, Inc.)	513
XI.	Flow Diagram, Chemical Usage at Presses (Joseph Badalamenti, Disc Graphics)	518
XII.	EPA's Industrial Process Description of the Printing Industry (USEPA, EPA 310-R-95-014)	520

XIII.	Printing Industry Chemistry: Flexography, Lithography, Screen (USEPA, <i>Design for the Environment, A Cleaner Technologies Substitute Assessment</i> ; Flexography, EPA 744-R-00-004a, Sept. 2000, pp 3-30 – 3-32; Lithography, EPA 744-R-95-008, July 1996, pp 2-8 – 2-10; Screen, EPA 744-R-94-005, pp II-2 – II-5)	533
XIV.	Environmental Compliance Audit Form (P-F Technical Services, Inc.)	543
XV.	Glossary of Air Pollution Terms (Georgia Department of Natural Resources, Air Protection Branch)	554
XVI.	List of Federal Hazardous Air Pollutants (HAPs) (USEPA, <i>Fit to Print</i> manual)	560
XVII.	Tools for Determining Air Emissions: Mass Balance: Spreadsheets to Compute Usage and Emissions: Worksheets for Small and Medium/Large Printer; Guidance by USEPA for Determination of Volatile Organic Compounds of Inks Supplied and as Used (P-F Technical Services, Inc.)	563
XVIII.	Air Emission Report to State Agencies: Sample Report of Small to Medium Printing Facility with Add-on Control; Sample Report of Title V Facility (P-F Technical Services, Inc.)	574
XIX.	Potential to Emit: A Guide for Small Businesses (USEPA, EPA-456/B-98-003)	581
XX.	New Source Review Requirements (USEPA, EPA 300-N-99-002)	587
XXI.	Air Permits (New York State Department of Environmental Conservation)	591
XXII.	Add-on Control Systems: Sample Request for Proposal, Checklist to Compare Proposals, Computation of Cost of Control, Simplified Approach to VOC Control (P-F Technical Services, Inc.)	609
XXIII.	Sample Stack Test Documents for Add-on Controls, Protocol for Test, Report of Concluded Test, Testing of Catalysts (Environmental Science Services, Inc.)	623

XXIV.	Hazardous Waste Generation for a Small Business (New York State Department of Environmental Conservation)	648
XXV.	Template for Hazardous Waste Management Program (P-F Technical Services, Inc.)	662
XXVI.	Hazardous Waste Classifications (USEPA, "Notification of Regulated Waste Activity")	679
XXVII.	Pretreatment Standards for Process Waste Water (USEPA, EPA/625/10-86/005)	684
XXVIII.	Silver Halide Best Management Program (P-F Technical Services, Inc.)	696
XXIX.	Spill Prevention Program (Stuart Cooper, PE, Enviro-Assist)	706
XXX.	Model Hazard Communication Program (P-F Technical Services, Inc.)	714
XXXI.	Representative MSDS Forms	731
XXXII.	OSHA Form 300 NS Instructions for Completion (O.M.B., Document No. 1220-0029)	784
XXXIII.	Typical Storage Regulations by Local Agency; Suffolk County, New York (Suffolk County, NY, Sanitary Code)	792
XXXIV.	Risk Assessment (<i>EPA Journal</i> , Jan/Feb/Mar 1993)	810
XXXV.	SARA Title III; Inventory Reporting, Tiers I and II (USEPA; <i>Community Right-to-Know and Small Business</i> ; Understanding Sections 311 and 312 of the Emergency Planning and Community Right-to-Know Act of 1986)	818
XXXVI.	SARA TITLE III; Toxic Release Inventory Reporting, Form R (USEPA, EPA 745-K-99-001)	836
XXXVII.	Filing and Tickler System for Environmental Management System (P-F Technical Services, Inc.)	868

XXXVIII.	Clean Air Act Stationary Source Civil Penalty Policy (USEPA)	872
XXXIX.	Small Business Incentive Program (USEPA, Fact Sheet, May 20, 1996)	887
XL.	Excerpts from EPA Supplemental Environmental Projects Policy Pertaining to Penalties (EPA, Office of Enforcement and Compliance Assurance, effective May 1, 1998)	894
XLI.	Return on Investment Worksheets (P-F Technical Services Inc.)	902
XLII.	Introduction to Environmental Accounting. Key Concepts and Terms (USEPA, EPA 742-R-95-001)	907
XLIII.	Emissions Reduction Credits: An Asset for Growth (P-F Technical Services, Inc.)	914
	BIBLIOGRAPHY	917
	INDEX	925
	HOW TO USE THE COMPUTER DISK	934

- A. Pollution Prevention Checklist for Printers
- B. Environmental Compliance Audit Form
- C. Tools for Determining Air Emissions: Mass Balance—
Small Printer
- D. Tools for Determining Air Emissions: Mass Balance—
Large Printer
- E. Air Emission Report of VOCs to State Agencies
- F. Add-on Control Systems: Sample Request for Proposal
- G. Add-on Control Systems: Comparison Spreadsheet
- H. Template for Hazardous Waste Management Program
- I. Forms for Silver Halide Best Management Program
- J. Spill Prevention Program
- K. Model Hazard Communication Standard Program
- L. OSHA Form 300 Reporting Forms
- M. SARA Title III Inventory Reporting, Tier I and II Forms
- N. SARA Title III List of Lists (Chemicals)
- O. SARA Title III Toxic Release Inventory Forms
- P. Filing and Tickler System for Environmental Management
- Q. Return on Investment Worksheets
