# Table of Contents

*Introduction* ix

1. **Use of Starch in the Paper Industry** ........................................... 1  
   1.1. Literature Cited 2

2. **Colloidal and Polymeric Chemistry of Starches** ............................ 5  
   2.1. Properties of Starches 5  
   2.2. Granular State of Starch 6  
   2.3. Dispersion of Starch Granules 11  
   2.4. Paste State of Starch 11  
   2.5. Reversion of Dispersion 12  
   2.6. Properties of Amylose and Amylopectin 13  
   2.7. Chemical Modification of Starch 16  
   2.8. Major Groups of Modified Starch 16  
   2.9. Starch Paste for Use in Paper Coating 18  
   2.10. Literature Cited 18

3. **Application Requirements for Starch in the Paper Industry** .......... 21  
   3.1. Viscosity Specifications 21  
   3.2. Charge Specifications 22  
   3.3. Dispersion Stability 23  
   3.4. Starches for Use in Surface Sizing and Paper Coating 24  
   3.5. Current and Future Requirements for Starch Products 25  
   3.6. Literature Cited 26

4. **Starch Spoilage** .......................................................................... 29  
   Robert Kearney  
   4.1. Cooked Starch 30  
   4.2. Cleaning of Pipes and Equipment Used for Starch 31
4.3. Chemical Control Methods 31
4.4. Summary 32

5. Manufacture and Composition of Unmodified Starch .......................... 33
   5.1. Manufacture of Cornstarch 33
   5.2. Manufacture of Potato Starch 34
   5.3. Manufacture of Wheat Starch 35
   5.4. Evaluation of Starch Quality 35
   5.5. General Properties of Unmodified Starches 36
   5.6. Literature Cited 38

6. Manufacture and Properties of Modified Starches ............................ 39
   6.1. The Modification Process 39
   6.2. Manufacture of Converted Starches 41
   6.3. Manufacture of Derivatized Starches 43
   6.4. Cooking Requirements for Modified Starch 46
   6.5. Properties of Modified Starches 46
   6.6. Literature Cited 48

7. New Starch Products for Surface Sizing and Coating in the 21st Century .... 51
   Deflev Glittenberg
   7.1. Introduction 51
   7.2. Status Quo and Challenges in the Nineteen Nineties 51
   7.3. Novel Developments of Coating Starches 52
   7.4. Hungry for Even Higher Solids 57
   7.5. Starches as Coating Pigments 62
   7.6. Starches as Monomers in Co-Polymerization 63
   7.7. New Developments in Surface Treatment Using Starches 64
   7.8. High-Solids Surface Sizing 65
   7.9. Starches from Genetically Modified Organisms (GMO Starches) 66
   7.10. Summary and Outlook 66
   7.11. Literature Cited 67

8. Novel Uses for Starch and Starch-Based Chemicals in Papermaking and Coating ................................................................. 71
   Charles P Klass
   8.1. Strength Enhancement Through Surface Sizing 71
   8.2. Starch Use in Coating Binders 72
   8.3. Thermally Modified and Dextrinated Starch Binders 72
   8.4. Starch/Latex Graft Binders 72
   8.5. Nanoparticle Biopolymer Latex Binders 73
   8.6. Dilute Viscosity Measurements for Polymer Classification 75
   8.7. Carbon Footprint 78
   8.8. Literature Cited 79
9. **Shipping, Handling, and Storage of Starch** .......................................................... 81
   9.1. Bulk Shipment of Starch  81
   9.2. Bulk Starch Unloading and Transfer Systems  83
   9.3. Bulk-Railcar Unloading Systems  85
   9.4. Bulk Storage Silos  86
   9.5. Starch Slurry Makedown Equipment  88
   9.6. Literature Cited  91

10. **Dispersion of Starch for Use in the Paper Mill** .................................................. 93
    10.1. Starch Suspension in Water  93
    10.2. Starch Dispersion in Water  95
    10.3. Factors in Starch Dispersion and Viscosity Development  96
    10.4. Dispersion and Properties of Modified Starches  98
    10.5. Dispersion and Properties of Starches from Corn Hybrids  100
    10.6. Literature Cited  91

11. **Retrogradation of Dispersed Starch** ................................................................. 103
    2001 Hans Maurer, 2013 Update by Detlev Glittenberg
    11.1. The Retrogradation Process  103
    11.2. Measures to Control Retrogradation and Amylose Precipitation  106
    11.3. Literature Cited  107

12. **Enzyme Conversion of Starch for Paper Sizing and Coating** ................................ 109
    12.1. Economic Reasons for Enzymatic Conversion of Starch  109
    12.2. The Enzymatic Conversion Process  111
    12.3. Preparation of Starch Paste for Use in Paper Coating  115
    12.4. Literature Cited  118

13. **Thermal and Thermochemical Conversion of Starch** ........................................... 119
    13.2. Continuous Starch Cooking  119
    13.3. The Thermal Conversion Process  120
    13.4. Preparation of Starch Paste for Use in Surface Sizing and Paper Coating  124
    13.5. Literature Cited  126

14. **Surface Sizing of Paper** ..................................................................................... 127
    14.1. The Role of Starch in Surface Sizing  127
    14.2. Surface Sizing with a Flooded-nip Size Press  127
    14.3. Surface Sizing with a Metered Size Press  131
    14.4. Pigmented Surface Sizing  133
    14.5. Other Surface-sizing Systems  135
    14.6. Use of Starch in New Specialty Papers  139
    14.7. Literature Cited  139
### 15. Roll Coating and Blade Coating of Paper: A Historical Review

- 15.2. Hydrodynamics of the Coating Process 145
- 15.3. Coating Drying and Binder Migration 146
- 15.4. Starch Selection for Paper Coating 147
- 15.5. Literature Cited 148

Stig Renvall

- 16.1. Background and Developments in Surface Sizing of Paper and Board 151
- 16.2. Surface-Sizing 151
- 16.3. New Coating-technology Developments in the Paper Industry 155
- 16.4. Literature Cited 159

### 17. Manufacture of Coated Paper Grades: A Historical Review

- 17.1. General Requirements 161
- 17.2. Coating Materials 161
- 17.3. Design Requirements for Coated Paper Grades 164
- 17.4. Coating Application Methods 167
- 17.5. Finishing Methods 172
- 17.6. Coating Formulations for Paper 172
- 17.7. Coating Formulations for Paperboard 175
- 17.8. Specialty Coatings 176
- 17.9. Testing Methods for Coated Paper 178
- 17.10. Literature Cited 179

### 18. Advances in the Manufacture of Coated Paper Grades

Detlev Glittenberg

- 18.1. Literature Cited 181

### 19. Improving Water Resistance of Starch Coatings

Gordon Bugg

- 19.1. Starch as a Coating Binder: Types and Modification 183
- 19.2. Establishing the Need for Improving Water Resistance 184
- 19.3. Measuring Water Resistance 185
- 19.5. Approach II: Co-binder Systems and the Impact of Starch Substitution by Latex 196
- 19.7. A Note to the Reader 198
- 19.8. Literature Cited 198

### 20. Starch in Nanotechnology Applications

Anthony V. (Tony) Lyons

- 20.1. An Introduction to Nanotechnology 199
