
BOOK

The Mechanics of Web Handling

By David R. Roisum

1998. 222 pages, soft cover

Item Number: 0101R273

ISBN:089852346X

The Mechanics of Web Handling is the third book in Dave Roisum's trilogy. *The Mechanics of Winding* and *The Mechanics of Rollers* are also available from TAPPI PRESS.

This unique book covers many aspects of web handling for manufacturing, converting, and printing. The book is applicable to any web including paper, film, foil, nonwovens, and textiles. *The Mechanics of Web Handling* is designed for product, process, and maintenance engineers responsible for web machinery. Through this valuable text, readers will better understand how to design and operate machinery to avoid wrinkles, web breaks, registration, guiding, and other types of costly web problems.

Fourteen chapters cover the following topics:

- Introduction to Web Handling
- Material Mechanics
- Dimension Control
- Tension and Tension Control
- Downweb Tension Variations
- Crossweb Tension Variations
- Temporal Tension Variations
- Guiding
- Nips
- Slitting
- Spreading
- Winding
- Wrinkling
- Web Breaks

TABLE OF CONTENTS

1	Introduction to Web Handling	8	Bibliography
1	What is a web?	2	Material Mechanics
2	Web Materials and Industries	9	Material Matters
3	Web Converting	10	Tensile Test
4	Web Handling	11	Stress-Strain Curve
5	Web Mechanics	12	Brittle and Ductile Materials
6	Web Handling Opportunities	13	Poisson's Ratio
7	Other Web Handling Resources		

The Mechanics of Web Handling

Table of Contents

<p>14 Hygro-Thermal Expansion 15 Anisotropy 16 Hooke's Law 17 Creep and Stress Relaxation 18 Hysteresis, Memory and Set 19 Static Coefficient of Friction 20 Friction Complications 21 Test Frequency 22 Units 23 Bibliography</p> <p>3 Dimensional Control</p> <p>25 Product Geometry 26 Basis Weight 27 Caliper 28 Length 29 Width 30 Bulk and Density 31 Roll Bulk 31 Roll Stresses and Bulk Loss 32 Roll Firmness 33 Roll Bulk and Firmness 34 Roll Weight 35 Registration 38 Wound Roll Width Variations 39 Wound Roll Offsets 40 Telescoping and Dishing 41 Length and Speed Measurement 42 Incremental Encoder Applications 43 Resolving Length Differences 44 Measuring Waste and Efficiency 47 Bibliography</p> <p>4 Tension and Tension Control</p> <p>49 Why Web Tension is Important 50 Choosing a Process Tension 51 Tension Exceptions 52 How Close Must Tension Be Held 53 Load Cell Tension 54 Load Cell Sizing Example 55 Other Load Cell Considerations 56 Dancer Controlled Tension 57 Dancer Design 58 Dancer Dynamics 59 Draw Control 60 Tension Variations in a Draw Zone 61 Catenary (Loop) Control 62 Tension from Motor Readings 63 Current Control 64 Bibliography</p> <p>5 Downweb Tension Variations</p> <p>65 Tension Down Through a Machine 66 Roller Drag 68 Inertial Tension 70 Band Brake and Tension Difference 71 Load Cell or Dancer Sections 72 Draw or Speed Controlled Sections 73 Downweb Tension Summary 74 Bibliography</p> <p>6 Crossweb Tension Variations</p>	<p>75 Tension Variations Across Web Length 77 In-plane Misalignment and Bending 78 In-plane Example Problem 79 High In-plane Misalignments 80 Out-of-plane Twisting 81 Diagonal Shear Wrinkles 82 Manual Alignment Checks 83 Roller Diametral Variations 85 Partial Drive 85 Path Length Variations 86 Baggy Webs 89 Bibliography</p> <p>7 Temporal Tension Variations</p> <p>91 Time Varying Tension 92 Drive Sensor Resolution 94 Drive Actuator Resolution 94 Steady State vs. Transient Response 95 Speed Changes 95 Speed Reference 96 Multiple Drive Sections 97 Web Time Constants and Transport 97 Drive Time Constants 98 Selected Bibliography</p> <p>8 Guiding</p> <p>99 Guiding Introduction 100 Camber 101 Acceleration Offset 102 Passive Guides 103 Unwind Guide 103 Rewind Guide 104 Steering Guide 106 Displacement Guide 107 Oscillation 108 Bibliography</p> <p>9 Nips</p> <p>109 Nipped Rollers for Web Transport 110 Nipped Rollers for Web Processing 111 Hertzian Contact 112 Determining Peak ZD Nip Stress 113 A Rubber Covered Roller Model 114 Complex Nip Models 115 Interior Contact Stresses 116 Nip Loading Mechanisms 117 Nip Load System Friction 118 Load Versus Gap Control 119 Roller Deflection in a Nip 120 Crowning 121 Load Crown Match 122 Deflection Compensating Techniques 123 Roller Geometrical Errors 124 Nip Impressions 125 Static Nip Impressions 126 Dynamic Nip Impressions 127 Bibliography</p> <p>10 Slitting</p> <p>129 Slitting Issues 130 Slitting System Options 131 Laser Slitting</p>
