

## Table of Contents

1. Acknowledgments.....	6
2. Introduction, Methodology, and Scope .....	7
Methodology.....	8
Scope.....	8
3. Executive Summary.....	10
4. Introduction to Cellulose Nanomaterials.....	12
Why so much interest in cellulose nanomaterial?.....	14
Why is interest in cellulose nanomaterial exploding now? .....	15
What is “nano”? A closer look.....	16
The road to commercialization .....	17
Questions that end users need to ask .....	18
5. Cellulose Nanocrystals (CNC) .....	21
Properties of CNC.....	21
Leading producers of CNC.....	22
The acid hydrolysis process.....	23
The American Value Added Pulping process (AVAP) .....	23
The catalytic oxidation process.....	24
Summary and conclusions .....	25
6. Cellulose Nanofibrils (CNF) .....	27
Properties of CNF .....	27
Leading producers of CNF.....	28
Mechanical processes .....	29
Chemical and enzymatic pre-treatment .....	30
Kyoto Process.....	31
TEMPO .....	32
Summary and conclusions .....	33
7. Microfibrillated Cellulose (MFC) .....	36
Leading producers of MFC .....	36
8. Cellulose Filaments (CF) .....	39
Leading producers of CF.....	39
9. State of the Industry .....	41
Commercial development.....	41
Applications development .....	42
10. The Road Ahead .....	47

Future cost of cellulose nanomaterials at commercial scale.....	49
Value proposition.....	54
Applications.....	56
Forecasts.....	57
11. Environment, Health, and Safety (EHS) .....	59
Risk assessment of cellulose nanomaterials.....	59
A. Physical and chemical properties of cellulose nanomaterials.....	59
B. Exposure scenarios .....	60
C. Toxicity information for cellulose nanomaterials .....	61
Life-cycle risk analysis .....	61
A. Workplace exposure .....	61
B. Consumers and environmental exposure.....	63
Regulatory and risk management.....	65
A. Consumers .....	65
B. Environment .....	66
Conclusions .....	66
12. Recommendations for End Users .....	68
13. Producer Profiles.....	70
Appendix: Universities and Research Centers .....	151
14. Glossary.....	167
15. Index.....	171
16. Appendix I: Biographies .....	173

## LIST OF FIGURES

Figure 4.1 - Cellulose.....	12
Figure 4.2 – Cellulose Fibrils .....	12
Figure 5.1 - AVAP Process .....	24
Figure 6.1 - CNF and MFC Comparative Specifications (particle diameter in nanometers) .....	27
Figure 6.2 - GL&V FibreFine™ System .....	30
Figure 6.3 - Kyoto Process.....	32
Figure 10.1 - The Road to Commercialization.....	47
Figure 10.2 -Continuous Commercial Process for CNC.....	51
Figure 10.3 - Supply and Demand .....	53
Figure 10.4 - Breakeven Cost vs. Weight Reduction and Loading .....	55
Figure 13.1 - BGB Ultra. ....	80

Figure 13.2 - % Change from Control.....	139

**LIST OF TABLES**

Table 4.1 - Cellulose Nanomaterials: Typical Dimensions. ....	13
Table 4.2 - Nanomaterials: Relative Strength. ....	14
Table 4.3 - Cellulose nanomaterials: advantages. ....	15
Table 4.4 - Grand Challenges. ....	17
Table 5.1 - CNC Comparative Specifications. ....	21
Table 5.2 - CNC Capacity 2017. ....	22
Table 5.3 - Challenges with CNC. ....	25
Table 6.1 - CNF Capacity 2017. ....	28
Table 6.2 - Challenges with CNF.....	31
Table 7.1 - MFC Capacity 2017.....	36
Table 8.1 - CF Capacity 2017. ....	39
Table 9.1 - Commercial Development Highlights. ....	41
Table 10.1 - Technical Challenges. ....	48
Table 10.2 - Business Challenges. ....	49
Table 10.3 - Projected prices at commercial scale.....	50
Table 10.4 - Economics of CNC Production.....	51
Table 10.5 - Value Propositions for Cellulose Nanomaterials.....	54
Table 10.6 - Cellulose Nanomaterial Potential by Application .....	56
Table 10.7 - Summary of Forecasts.....	57
Table 13.1 - Alberta Innovates CNC Characteristics. ....	71
Table 13.2 - American Process CNC Specifications. ....	75
Table 13.3 - American Process CNF Specifications. ....	75
Table 13.4 - BioPlus GB-Fibril Specifications.....	75
Table 13.5 - Blue Goose BGB Ultra Typical Values.....	81
Table 13.6 - Borregaard Exilva Specifications. ....	82
Table 13.7 - CelluComp Curran CV500 Specifications.....	85
Table 13.8 - CelluForce NCV-100 Product Specifications.....	87
Table 13.9 - FiberLean® MFC Typical Test Results. ....	98
Table 13.10 - Melodea CNC Specifications. ....	116
Table 13.11 - Nippon Paper Industries, CNF Production Facilities. ....	121
Table 13.12 - Oji Paper Phosphorylated CNF Specifications.....	124
Table 13.13 - Oji Transparent Sheet Specifications. ....	125
Table 13.14 - Sappi Valida Specifications.....	131
Table 13.15 - Sugino Machine BiNF-i-s Specifications. ....	135

Table 13.16 - Suzano CNF Characteristics.....	137
Table 13.17 - UMaine Cellulose Nanofibril Specifications.....	142
Table 13.18 - Cellulose Nanocrystal Specifications.....	142
Table 13.19 - TEMPO Cellulose Nanofibril Specifications.....	143
Table 13.20 - Weidmann WMFC Q Specifications.....	147
Table 13.21 - Research Topics.....	151
