Title:	The Sizing of Paper

TAPPI PRESS

The Sizing of Paper

Edited by Walter F. Reynolds

A Project of the Papermaking Additives Committee of the Paper and Board Manufacture Division.

1989, 1971. Second Edition. 156 pp., 6" x 9-1/2" hard cover

Item Number: 0102B051

ISBN: 0898520517

Table of Contents

- 1 Chemistry and Application of Rosin Size.
- 2 Alkyl Ketene Dimer Sizes.
- 3 Sizing with Alkenyl Succinic Anhydride.
- 4 Surface Sizing.
- 5 Internal Sizing with Stearic Acid.
- 6 Fluorochemical Sizing.
- 7 Testing Paper and Board for Sizing.
- 8 Appendix: Mechanism of Paper Wetting.

Subject Index

additives	crystallization	refining
alkaline papermaking;		rosin size;
using alkyl ketene dimer	dispersion size;	analysis, fundamentals, in
alkalinity;	application	neutral papermaking,
effect of alkyl ketene dimer		oxidation, types
alkenyl succinic anhydride;	fillers	
application, problems	fluorochemical size;	soap size;
alkyl ketene dimer;	applications, effects on	application
reaction with cellulose,	machines, testing, types	sodium aluminate
reaction with water,		stearic acid
retention	internal sizing	stock temperature
alum;		surface sizing;
demand, effect of alkyl	low-viscosity size	performance, problems
ketene dimer		surface-chemical
analytical methods;	oxidation	phenomena
rosin sizes		
anions	pH;	test instruments;
application of rosin	effect of alkyl ketene dimer	Barss Knobel & Young,
	paste size;	Bristow tester, Penescope,
	handling, properties	Vanceometer
cations	physical properties	test types;
chemical properties	pick-up	blood serum penetration,
chemistry;	process water	capillary rise, Carson curl,
of alum, of rosin, of alkenyl	pulps	Cobb, contact angle,
succinic anhydride, of alkyl		currier size, drop, dry
ketene dimer		

indicator, fluorescence
size, HST, KBB, lactic acid,
pen and ink, valley size,
water absorption by total
immersion, water flotation,
writing ink penetration
testing;
choosing a method, factors
affecting
