| Preface | iii |
| Acknowledgments | iii |
| Author Index | vi |

INTRODUCTION

| | |
|--|---|
| 1. Overview | 1 |
| <i>Mahendra R. Doshi and Jeffrey M. Dyer</i> | |

QUANTIFICATION AND ANALYSIS

| | |
|---|----|
| 2. Potential of Stickies in Brown Recycled Fiber Pulps | 55 |
| <i>Christiane Ackermann, Hans-Joachim Putz and Lothar Götsching</i> | |
| 3. Quantification of Pressure Sensitive Adhesive, Residual Ink, and Other Colored Process Contaminants Using Dye and Color Image Analysis | 69 |
| <i>Roy R. Rosenberger and Carl J. Houtman</i> | |

SEPARATION TECHNOLOGY

| | |
|--|-----|
| 4. Optimization of Stickies Removal in Screens and Cleaners | 78 |
| <i>François Julien Saint Amand</i> | |
| 5. Paper Recycling Factors Affecting the Screening of Pressure Sensitive Adhesives ... | 126 |
| <i>Richard A. Venditti, Bradley E. Lucas, Xin Huo, Hasan Jameel and Hou-min Chang</i> | |

DEPOSITS AND PACIFICATION

| | |
|---|-----|
| 6. Deposits in Papermachine Producing Recycled Papers | 134 |
| <i>Thierry Delagoutte, Josiane Brun and Bruno Carre</i> | |
| 7. Deposition Synergy Between Mechanical and Deinked Pulps | 140 |
| <i>Lawrence H. Allen</i> | |

Contents (continued)

DEPOSITS AND PACIFICATION (continued)

| | |
|--|------------|
| 8. Overview of Two Major Deposit Problems in Recycling: Slime and Stickies. | 149 |
| Part I: Slime Problems in Recycling | |
| <i>A. Blanco, C. Negro, C. Monte and J. Tijero</i> | |
| 9. Overview of Two Major Deposit Problems in Recycling: Slime and Stickies. | 161 |
| Part II: Stickies Problems in Recycling | |
| <i>A. Blanco, C. Negro, C. Monte, H. Fuente and J. Tijero</i> | |
| 10. Talc for Contaminant Control in Recycled Fiber | 173 |
| <i>Jorge L. Yordan, Peter Biza and Gary Williams</i> | |
| 11. The Critical Nature of Macrostickies Quantification and the Use of Enzymes for Control | 178 |
| <i>James W. Fitzhenry</i> | |

RECYCLING COMPATIBLE ADHESIVES

| | |
|---|------------|
| 12. Methodology Developed at CTP to Characterize the Behavior of Adhesives During Paper Recycling | 182 |
| <i>Thierry Delagoutte, Alain Cochaux, Yves Vernac and Gerard Galland</i> | |
| 13. Can Laboratory and Pilot Recycling Trials Predict Adhesive Removal in Commercial Recycling Systems? Results from the USPS Environmentally Benign Stamp Project | 189 |
| <i>Carl Houtman, Daniel Seiter, Nancy Ross Sutherland and Donald Donermeyer</i> | |
| Subject Index | 194 |
| Organizations and Institutions Index | 196 |
