Introduction to Nonwovens Technology

Subhash K. Batra, Ph.D., Nonwovens Cooperative Research Center, North Carolina State University
Behnam Pourdeyhimi, Ph.D., Nonwovens Institute, North Carolina State University

Foreword by John W. S. Hearle

TABLE OF CONTENTS

Foreword
Series Preface
Acknowledgements
Prologue

PART I. USEFUL PRELIMINARIES

1. Definitions
   • What Is a Nonwoven Fabric?
   • Structural Definitions
   • Advantages of the Structural Definitions
   • The Study of Nonwovens Technology: An Impressionistic Approach
   • Problems/Exercises

2. Structure of Thin Webs: The Orientation Distribution Function (ODF)
   • Introduction
   • The Orientation Distribution Function: A Description of Homogeneous Thin-Web Structure
   • Isotropy vs. Anisotropy
   • A Simple Illustration of the Importance of ODF
   • Influence of ODF: A Few Other Examples
   • Problems/Exercises

3. Basic Technologies and Their Augmentations
   • Problems/Exercises

PART II. STAPLE-FIBER BASED TECHNOLOGIES

4. Preparation of Staple Fibers for Web Formation
   • Introduction
   • Opening and Blending of Staple Fiberstock
   • Problems/Exercises

5. Staple Fiber Web Formation: Carding
   • Introduction
   • Basic Elements of the Carding Process
   • Card Clothings and Their Plausible Role
   • Randomizing or Random Rollers: Condensing or Scrambling Rollers
   • Some Recent Developments
   • Aerodynamic Influences in Carding
   • Batt Formation and Card Feeding
   • Does Carding Individualize Fibers?
   • End Use Products
   • Problems/Exercises
6. Staple Fiber Web Formation: Airlay
- Introduction
- Airlay for Non-Wood-Pulp Fibers
- Airlay for Wood Pulp
- Application Markets
- Problems/Exercises

PART III. BONDING TECHNOLOGIES

7. Needlepunch Bonding
- Historical Context
- Needlepunch Bonding
- Needlepunching Technology
- Properties of Conventional Needle punched Fabrics
- Fibers Used and Potential Markets
- Special Purpose Needle Looms
- Problems/Exercises
- Appendix

8. Hydroentanglement Bonding
- Historical Context
- The Core of the Technology
- Bonding Mechanism and Fiber Characteristics
- The Degree of Bonding
- Fabric Properties and Applications
- Application Markets
- Problems/Exercises
- Appendix 8.A
- Appendix 8.B

9. Thermal Bonding
- Introduction
- Prerequisites for Thermal Bonding
- Bonding Technologies
- Problems/Exercises

9H. Heat and Steam: Concepts, Definitions, Relevance to Thermal Bonding
- Introduction
- Conduction and Its Relevance
- Convection and Its Relevance
- Radiation and Its Relevance
- On Steam and Its Relevance

10. Resin/Chemical Bonding
- Introduction
- Latex Binders
- Classes of Latex Binders and Their Characteristics
- How Does the Bond Form?
- Thermoset Resins
- Application Technologies
- Drying/Curing
- Application Markets
- Problems/Exercises
PART IV. INTEGRATED TECHNOLOGIES

11. The Wetlay Process
   • Historical Context
   • The Technology
   • Properties of Wetlaid Nonwovens
   • Application Markets
   • Problems/Exercises

12. Melt-Extrusion Technologies: The Spunbond Process
   • Introduction
   • Broad Overview: Spunbond Technology
   • Preparation and Web Formation: Evolution
   • Product Characteristics
   • Product Markets
   • Problems/Exercises

12P. Polymer/Fiber Physics—A Brief Overview
   • Introduction
   • Preliminary Definitions and Concepts
   • Viscosity
   • About Fiber Spinning and Property Development 235

   • Introduction and Historical Context
   • The Technology
   • Fabric Characteristics
   • Problems/Exercises
   • Appendix

14. Fibrillated/Split/Slit Film and Nanoscale Webs (Flash-spinning, Electro-spinning and Bicomponent-Based)
   • Fibrillated/Perforated Film Nonwovens
   • Flash-Spun Nonwovens
   • Electrospun Webs
   • Micro and Nanoscale Fiberwebs via Bicomponent Fibers

PART V. WINDING IT UP

15. Integrative Technologies: Stitch-bonding, Co-forming, Napco, Lamination, Resin-bonding
   • Introduction
   • Stitch-bonding/Stitch-knitting
   • Co-forming Technology
   • NAPCO Technology: 3-D weblinker
   • Lamination as an Integrative Process
   • Resin-bonding as an Integrative Process

16. Raw Materials: Properties and Use in Fiberweb Nonwovens
   • Introduction
   • Manufactured Fibers/Resins
   • Problems/Exercises

Index
