

Papermaking Science and Technology

a book series
covering the latest
technology and
future trends

Book 20

Biorefining of Forest Resources

Book editor

Raimo Alén, Dr.Tech., Professor, University of Jyväskylä, Laboratory of Applied Chemistry, Jyväskylä, Finland

Publisher

Paper Engineers' Association/Paperi ja Puu Oy

Paperi ja Puu Oy

Table of Contents

| | | |
|---|---|-----|
| 1 | Structure and chemical composition of biomass feedstocks | 17 |
| 2 | Principles of biorefining | 55 |
| 3 | Raw material resources | 115 |
| 4 | Forest biorefineries — a serious global business opportunity | 131 |
| 5 | Utilisation of solid wood-based materials..... | 151 |
| 6 | Extraction and utilisation of non-structural wood and bark components | 176 |
| 7 | Biochemical and chemical conversion of forest biomass | 225 |
| 8 | Thermochemical conversion of forest biomass | 262 |
| 9 | Cellulose derivatives..... | 305 |
| | Conversion factors..... | 355 |
| | Index..... | 357 |

CHAPTER 1

Structure and chemical composition of biomass feedstocks

| | | |
|----------|---|-----------|
| 1 | Introduction..... | 18 |
| 2 | Fundamental structure of wood and wood fibres..... | 20 |
| 2.1 | Macroscopic structure | 20 |
| 2.2 | Cell types..... | 22 |
| 2.3 | Cell wall layering..... | 27 |
| 2.4 | Special tissues..... | 28 |
| 3 | Chemical composition of wood..... | 29 |
| 3.1 | Gross composition | 29 |
| 3.2 | Distribution of the wood constituents | 35 |
| 4 | Chemical composition of non-wood feedstocks..... | 37 |
| 5 | Chemistry of wood constituents..... | 39 |
| 5.1 | Carbohydrates | 39 |
| 5.2 | Lignin | 43 |
| 5.3 | Lignin-hemicellulose bonds | 46 |
| 5.4 | Extractives | 47 |
| | References | 50 |

CHAPTER 2

Principles of biorefining

| | | |
|----------|--|-----------|
| 1 | Biorefinery systems..... | 56 |
| 1.1 | General aspects..... | 56 |
| 1.2 | Chemical and biochemical conversion..... | 59 |
| 1.3 | Thermal conversion..... | 64 |
| 1.4 | Complementary observations and technologies..... | 70 |
| 2 | Pulping-based biorefining..... | 73 |
| 2.1 | Introduction..... | 73 |
| 2.2 | Pulping methods..... | 74 |
| 2.2.1 | Kraft pulping..... | 76 |
| 2.2.2 | Sulphite pulping..... | 83 |
| 2.2.3 | Organosolv pulping..... | 89 |
| 2.3 | Some practical considerations..... | 91 |
| 2.3.1 | Introduction..... | 91 |
| 2.3.2 | By-products of kraft pulping..... | 98 |
| 2.3.3 | By-products of acid sulphite pulping..... | 102 |
| | References..... | 104 |

CHAPTER 3

Raw material resources

| | | |
|----------|---|------------|
| 1 | Trees and other plants as raw material for biorefineries..... | 116 |
| 2 | Global biomass resources and their utilisation..... | 117 |
| 3 | Sources of forest biomass for biorefining | 118 |
| 3.1 | Forest biomass | 118 |
| 3.2 | Principles for estimating resources and availability | 118 |
| 3.3 | Agricultural biomass | 122 |
| 4 | International trade in wood for energy and industry | 122 |
| 5 | Costs of supply | 125 |
| 6 | Sustainable development and certification of biomass production..... | 126 |
| | References | 128 |

CHAPTER 4

Forest biorefineries — a serious global business opportunity

| | | |
|----------|---|------------|
| 1 | Background..... | 132 |
| 2 | Drivers for forest biorefineries..... | 134 |
| 3 | Scenarios for biofuel production in forest biorefineries..... | 135 |
| 4 | Products, technologies and raw materials of forest biorefineries | 138 |
| 5 | Barriers and prerequisites for biorefinery diffusion | 141 |
| 5.1 | Economic and market factors..... | 142 |
| 5.2 | Technological factors | 142 |
| 5.3 | Political factors | 142 |
| 5.4 | Ecological and raw material-related factors | 143 |
| 5.5 | Collaboration..... | 143 |
| 6 | Business models..... | 143 |
| 7 | Conclusions and future perspectives..... | 147 |
| | References | 148 |

CHAPTER 5

Utilisation of solid wood-based materials

| | | |
|----------|--|------------|
| 1 | General approach..... | 152 |
| 2 | Wood modification..... | 153 |
| 2.1 | Chemical modification..... | 153 |
| 2.2 | Impregnation modification | 155 |
| 2.3 | Performance of modified wood..... | 155 |
| 2.4 | Commercialisation outlook..... | 157 |
| 3 | Wood polymer composites | 157 |
| 3.1 | Introduction | 157 |
| 3.2 | Historical aspects..... | 158 |
| 3.3 | Materials | 159 |
| 3.4 | Manufacturing technologies..... | 162 |
| 3.5 | Interactions between wood and polymers | 164 |
| 3.6 | Performance and properties..... | 166 |
| 3.7 | Industrial production | 168 |
| 3.8 | Future trends | 170 |
| | References | 171 |

CHAPTER 6

Extraction and utilisation of non-structural wood and bark components

| | | |
|----------|---|------------|
| 1 | Introduction..... | 178 |
| 2 | Terpenoid-based products from oleoresin | 180 |
| 2.1 | Pine tar | 181 |
| 2.2 | Turpentine products | 183 |
| 2.3 | Rosin products..... | 186 |
| 2.3.1 | Gum and wood rosin production..... | 187 |
| 2.3.2 | Tall oil rosin production | 187 |
| 2.3.3 | Properties and utilisation of rosins..... | 188 |
| 3 | Products of fatty acids and sterols | 190 |
| 3.1 | Tall oil fatty acids (TOFA) | 191 |
| 3.1.1 | Uses of TOFA..... | 192 |
| 3.1.2 | Specialty fatty acids from conifers..... | 192 |
| 3.2 | Sterols | 193 |
| 4 | Lignans and other polyphenols from wood and knots..... | 195 |
| 4.1 | HMR lignan from spruce knots | 195 |
| 4.2 | Other lignans and polyphenols | 196 |
| 5 | Polyphenols and other components from bark | 198 |
| 5.1 | Tannins..... | 198 |
| 5.1.1 | Hydrolysable tannins..... | 199 |
| 5.1.2 | Condensed tannins..... | 199 |
| 5.2 | Pine bark extracts..... | 200 |
| 5.3 | Ginkgo leaf extract..... | 201 |
| 5.4 | Stilbenes from spruce bark | 201 |
| 5.5 | Birch bark products | 203 |
| 5.5.1 | Birch bark tar..... | 204 |
| 5.5.2 | Betulinal and other triterpenoids..... | 204 |
| 5.5.3 | Betulinic acid and other betulinal derivatives..... | 204 |

Extraction and utilisation of non-structural wood and bark components

| | | |
|----------|--|------------|
| 5.6 | Aspirin and Taxol..... | 205 |
| 6 | Water-soluble polysaccharide gums | 206 |
| 6.1 | Gum arabic | 206 |
| 6.2 | Larch arabinogalactans..... | 207 |
| 6.3 | Xylans and mannans from wood | 207 |
| 7 | Miscellaneous specialty products | 208 |
| 8 | Natural rubber..... | 209 |
| 9 | Conclusions..... | 210 |
| | References | 212 |

CHAPTER 7

Biochemical and chemical conversion of forest biomass

| | | |
|----------|---|------------|
| 1 | Introduction..... | 226 |
| 2 | Conversion of cellulosic biomass to sugars..... | 228 |
| 2.1 | Acid hydrolysis..... | 228 |
| 2.2 | Enzymatic hydrolysis..... | 230 |
| 2.2.1 | Pre-treatment techniques..... | 230 |
| 2.2.2 | Enzymes..... | 232 |
| 2.2.3 | Technological aspects..... | 234 |
| 3 | Production of basic chemicals and their derivatives..... | 235 |
| 3.1 | General aspects..... | 235 |
| 3.2 | Ethanol..... | 236 |
| 3.2.1 | Current production..... | 236 |
| 3.2.2 | Ethanol production from lignocellulosics..... | 237 |
| 3.2.3 | Process configurations..... | 238 |
| 3.2.4 | Pilot-scale plants..... | 239 |
| 3.2.5 | Cost estimates for bioethanol..... | 239 |
| 3.3 | Other alcohols..... | 240 |
| 3.4 | Carboxylic acids..... | 242 |
| 3.5 | Other chemicals..... | 251 |
| | References..... | 254 |

CHAPTER 8

Thermochemical conversion of forest biomass

| | | |
|----------|---|------------|
| 1 | General aspects | 264 |
| 2 | Gasification | 265 |
| 2.1 | Introduction | 265 |
| 2.2 | Raw materials..... | 266 |
| 2.2.1 | Fuel properties..... | 266 |
| 2.2.2 | Gas feeds..... | 268 |
| 2.2.3 | Treatment of solid materials..... | 268 |
| 2.3 | Gasification process..... | 268 |
| 2.4 | Gasification reactors for syngas production..... | 271 |
| 2.4.1 | Fluidised bed reactors..... | 271 |
| 2.4.2 | Entrained bed and fixed bed reactors | 272 |
| 2.4.3 | Dual-fluidised bed gasification | 273 |
| 2.5 | Syngas processing (clean-up and conditioning)..... | 274 |
| 2.5.1 | General | 274 |
| 2.5.2 | Reforming/tar removal | 274 |
| 2.5.3 | Gas conditioning | 276 |
| 2.5.4 | Ultra-cleaning | 276 |
| 2.6 | Syngas processing by the Fischer-Tropsch process..... | 277 |
| 2.6.1 | General and historical approach..... | 277 |
| 2.6.2 | Biomass as raw material..... | 279 |
| 2.6.3 | Reaction network..... | 279 |
| 2.6.4 | Quality of syngas..... | 280 |
| 2.6.5 | Mechanisms and product distribution..... | 281 |
| 2.6.6 | Shell Middle Distillate Synthesis..... | 283 |
| 2.6.7 | Process scheme and process integration | 284 |

| | | |
|----------|--|------------|
| 2.7 | Other methods for production of liquid or gaseous biofuels | 285 |
| 2.7.1 | Hydrogen | 285 |
| 2.7.2 | Synthetic natural gas | 285 |
| 2.7.3 | Methanol and dimethyl ether | 286 |
| 2.7.4 | Ethanol and mixed alcohols | 286 |
| 2.7.5 | Petrol | 287 |
| 2.8 | Demonstration projects | 287 |
| 3 | Pyrolysis | 289 |
| 3.1 | Potential uses of bio-oils | 289 |
| 3.2 | Production technologies | 290 |
| 3.2.1 | Bubbling fluidised beds | 291 |
| 3.2.2 | Circulating fluidised and transported beds | 292 |
| 3.2.3 | Ablative pyrolysis | 292 |
| 3.2.4 | Rotating cone | 292 |
| 3.3 | Pyrolysis feedstocks and product yields | 293 |
| 3.3.1 | Product composition and properties | 294 |
| 3.3.2 | Chemicals and other products | 297 |
| 4 | Liquefaction | 297 |
| | References | 299 |

CHAPTER 9

Cellulose derivatives

| | | |
|----------|---|------------|
| 1 | Approach to the concept of cellulose and its derivatives | 306 |
| 1.1 | General background..... | 306 |
| 1.2 | Some historical milestones | 309 |
| 1.3 | Chemical structure..... | 310 |
| 1.4 | Accessibility and reactivity | 311 |
| 1.5 | Solvents..... | 314 |
| 2 | Common cellulose derivatives | 318 |
| 2.1 | Esters of inorganic acids..... | 318 |
| 2.2 | Esters of organic acids..... | 325 |
| 2.3 | Ethers | 331 |
| 2.4 | Other products..... | 337 |
| 3 | Special cellulose-based products | 344 |
| 3.1 | Micro- and nanoscale-sized celluloses..... | 344 |
| 3.2 | Bacterial cellulose..... | 346 |
| | References | 348 |
