Subject Index
Technical Information Papers

This document was last updated April 2, 2019

A-
 Abrasion
  Selection criteria for wet end ceramics, 0502-15
 Abrasion resistance
  Selection criteria for wet end ceramics, 0502-15
 Absorption
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
 Accessibility
  Maintenance considerations in new construction and rebuilds, 0408-02
 Acrylic fibers
  see Polyacrylics, Synthetic fibers
 Additives
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
 Adhesives
  Buying, storing, and handling flexo folder gluer/rotary diecutter adhesives, 0305-25
  Causes and corrections of common corrugator bonding problems, 0304-32
  Evaluating glue lap adhesive properties, 0304-16
  Procedure for setting up a raw material trial on the corrugator, 0304-01
  Proper methods of measuring starch adhesive viscosity, 0304-33
  Starch adhesive preparation and distribution systems: housekeeping, 0304-06
  Starch adhesive trial, 0304-22
  Statistical process control of starch gelatinization temperature, 0304-14
  Statistical process control of starch viscosity, 0304-15
  Stickies definition and classification, 0603-25
  Techniques for bonding of densified liners, 0304-40
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
  Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
  Understanding and troubleshooting hot melt adhesives, 0304-74
  Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44
 After dryers
  Paper machine drying rate, 0404-07
 Agitation
  Using washing water as the vehicle in starch based corrugating adhesive, 0304-44
 Agitators
  Guidelines for side-entering stock agitators, 0420-13
 Air
  Paper machine room ventilation guidelines, 0404-50
  Air balance
    see Air, Materials balance
  Air flow
    Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
    Recommended minimum dryer pocket air requirements, 0404-17
    Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
    Sheet handling devices, 0404-44
  Air jets
    Sheet handling devices, 0404-44
  Air permeability
    Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20
  Air pollution
    Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
    Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
  Air staging
    Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
 Alignment
  Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
 Alkali
  Specific heat of caustic soda solutions, 0606-07
 Alkaline sulfite pulping
  Boiling point rise of spent sulfite liquors, 0607-21
  Definitions of terms in the sulfite pulping process, 0607-25
  Density of aqueous sodium sulfite solution, 0607-18
  Density of milk of lime solution, 0607-05
  Solubility of sulfur dioxide, Ca(HSO3)2; solutions, 0607-01
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
  Sulfur burner gas strength volume, 0607-01
 Alkalinity
  Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
 Ammonia
  Solubility of sulfur dioxide, 0607-06
Analysis
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03

Angle of slide
see Slide angle

Anilox coaters
In-line coating at the corrugator, 0304-39

Anilox rolls
see Flexography, Printing cylinders

Anvil
Troubleshooting the diecutting section, 0305-39

Approach flow systems
Headbox approach piping guidelines, 0404-54

Ash
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Drainage evaluation by mass measurement, 0502-12
Chemical cleaning guide for press fabrics, 0404-65

Atmosphere
Testing atmospheres simulating end use conditions, 0808-05

Auditing
Checklist for a properly planned project, 0408-01

Automatic feeders
see Feeders

Availability
Definitions of black liquor recovery furnace availability, 0416-02

B-

Backing Blade
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Bacteria
Starch adhesive preparation and distribution systems: housekeeping, 0304-06

Bag papers
Paper machine performance guidelines, 0404-47

Bags
Paper machine drying rate, 0404-07

Bar Width Reduction (BWR)
see Product codes

Bar codes
see Product codes

Bases
see Hydroxides

Basis weight
Headbox approach piping guidelines, 0404-54

Batch digesters
Guidelines for inspecting batch digesters, 0402-22

Batch process
Measurement of dryer condensing rates (vertical separator method), 0404-18

Beams
Calibration of flexible beam crush tester, 0304-20

Bearings
Corrugator bearing clearance checks and their impact, 0304-47

Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Total indicated runout and its impact on combined board quality, 0304-56
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Bearing failure
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Biocide
Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Biomass
Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Biomechanics
see Human factors

Bisulfites
Physical and chemical properties of magnesia-base pulping solutions, 0607-04
Solubility of sulfur dioxide, 0607-06
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Black liquors
Field welding of pin studs in black liquor recovery boilers, 0402-15
Recommended test procedure for black liquor evaporators, 0416-11
Recovery boiler performance calculation – short form, 0416-01
Response to contamination of high purity boiler feedwater, 0416-05
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Blade coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Bleach plants
Bleaching plant washer efficiency guide, 0606-23

Bleached board
Paper machine drying rate, 0404-07
Paper machine performance guidelines, 0404-47

Bleaching
Boiling point rise of spent sulfite liquors, 0607-21
Cotton in nonwovens, 1205-02
Chlorine gas curve, 0606-02
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of chlorine gas, 0606-03
Density of milk of lime solution, 0607-05
Energy checklist: pulp mill, 0416-24
Heat of vaporization of liquid chlorine, 0606-04
Recommended pulp bleaching stage designation method, 0606-21
Relative enthalpy (heat content) of sodium hydroxide solutions, 0606-08
Solubility of sulfur dioxide, Ca(HSO3)_2 solutions, 0607-07
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Viscosity of liquid chlorine 0606-05
Viscosity of sodium hydroxide solutions, 0606-11

Bleaching stages
see Bleaching

Blind-drilled rolls
see Vacuum rolls

Blistering
Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17

Blow boxes
Sheet handling devices, 0404-44

Blowdown
see also Blowing
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Blowing
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03

Board
Pilot paper and wet laid nonwoven machines, 0502-16

Board caliper
see Thickness

Boiler feed water
see Boilers, Feedwater

Boiler tubes
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13

Boilers
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Explanation of recovery boiler leak indications, 0416-23
Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Keys to successful chemical cleaning of boilers, 0416-06
Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Bonding
Techniques for bonding of densified liners, 0304-40

Box compression
see Compression strength

Box flaps
see Flaps

Box machines
Troubleshooting a glue lap problem, 0304-10

Box plants
see Converting plants

Boxes
Corrugated boxplant-list of potential hazards, 0301-01
Critical properties to consider when unitizing, 0304-72
High vacuum sheet dewatering, 0404-60
Squaring flap cut (center special) boxes, 0305-45

Broke
Broke loss calculations, 0502-10

Bronze
Guidelines for nondestructive examination of suction roll shells, 0402-19
Weld repairs on new suction roll shells, 0402-17

Burners
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Burst testers
Calibration and maintenance of, 0304-24

Butt joints
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

Butt welds
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
CADCAM
Computer-assisted machinery, 0305-02

CONEG
see Regulations

Cadmium
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58

Calcination
Physical data of calcined kaolin-water suspensions, 0106-09

Calcium base liquors
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07

Calcium bisulfite
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07

Calcium carbonate
Physical data of calcium carbonate-water suspensions, 0106-01

Calcium hydroxide
Density of milk of lime solution, 0607-05

Calculations
see Computation

Calibration
Basic guidelines for image analysis measurements, 0804-09
Calibration and maintenance of the manually operated micrometer, 0304-30
Calibration of flexible beam crush tester, 0304-20
Of burst testers, 0304-24
Suggestions for developing a box plant quality manual, 0304-49
Caliper
see Thickness

Canadian standard freeness
Interconversion of freeness, 0809-01

Carbon steel
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Carbonates
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Physical data of calcium carbonate-water suspensions, 0106-01

Cartridges
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Cast iron
Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14

Castings
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25

Caustic soda
see Sodium hydroxide

Causticizing
Energy checklist: pulp mill, 0416-24
Material balance equations relating to digester requirements, 0418-02

Ceramics
Selection criteria for wet end ceramics, 0502-15
Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

Certification
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Chalk
see Calcium carbonate

Charting
Introduction to the flow chart, 0305-26
Short-run statistical process control: a basic charting method, 0304-70
Statistical process control pin adhesion, 0304-23
Statistical process control - procedures for charting warp, 0304-13

Checklist
see Maintenance

Chemical preparation
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10

Chemical properties
Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Magnesia-base pulping solutions, 0607-04
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31

Chemical pulps
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Chemical recovery
Recausticizing material balance equations relating to digester requirements, 0418-02
Chemicals
Material safety data sheets, what to look for - how to understand them, 0304-38
Chemical cleaning guide for press fabrics, 0404-65

Chests
see Stock chests

Chip silos
see Chip bins

Chlorides
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12

Chlorine
Chlorine gas curve, 0606-02
Density of chlorine gas, 0606-03
Heat of vaporization of liquid chlorine, 0606-04
Viscosity of liquid chlorine, 0606-05

Chlorine dioxide
Safe storage and handling of, 0606-30
Specific gravity of sodium chloride solutions, 0606-10

Chrome
Tests for corrugator roll wear, 0304-53

Chromium
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58

Clad-steel plate
see Plates

Classification
Paper grade classifications, 0404-36

Clay
Kaolin clay pigment index, 0106-06
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of hydrous Kaolin-water suspensions, 0106-02

Cleaners
Catalog of Stock Preparation Pilot Plants, 0502-20
Introduction to centrifugal cleaners, 0508-10

Cleaning
Cleaning anilox rolls: procedures and options, 0306-18
Cleanup procedures for flexo folder gluer/rotary diecutters, 0305-33
Daily, weekly, and monthly maintenance checklists, 0305-34
Dryer fabric cleaning, 0404-38
Housekeeping at order and shift change and weekly, 0305-32
Introduction to centrifugal cleaners, 0508-10
Keys to successful chemical cleaning of boilers, 0416-06
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Paper machine shower recommendations, 0404-61
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35

Cleaning chemicals
see Cleaners

Cleansers
Keys to successful chemical cleaning of boilers, 0416-06

Clogging
Nozzle maintenance and clogging, 0420-15

Clothing
see Felts, Machine clothing

Coating color
see Color

Coating thickness
Tests for corrugator roll wear, 0304-53

Coatings
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Tests for corrugator roll wear, 0304-53

Coefficient of friction
see Friction factor

Combined boards
Common curtain coating problems: causes, detection, and correction, 0304-26
Obtaining off the corrugator for use in statistical process control procedures, 0304-12
Total indicated runout and its impact on combined board quality, 0304-56

Compression
Corrugated caliper: why is it so important?, 0304-04

Compression resistance
see Compression strength

Compression strength
Corrugated caliper: why is it so important?, 0304-04
Obtaining a combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Computation
Paper machine drying rate, 0404-07

Computer-assisted
see CADCAM

Concentricity
Total indicated runout and its impact on combined board quality, 0304-56

Condensates
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Measurement of dryer condensing rates (continuous method), 0404-03
Measurement of dryer condensing rates (vertical separator method), 0404-18
Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Yankee dryer steam condensing rates, 0404-49
Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04

Condensation
Dryer condensing rates (batch method), 0404-02
Dryer condensing rates (continuous method), 0404-03

Condensing rates
see Condensation

Conditioning
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Testing atmospheres simulating end use conditions, 0808-05

Conductivity
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Conical refiners
Conical refining intensity, 0508-07

Consistency
Drainage evaluation by mass measurement, 0502-12
Generalized method for determining the pipe friction loss of flowing pulp suspensions, 0410-14
Optimum for pumping pulp, 0410-15

Construction materials
Sodium chlorate (NaClO3) safe handling and storage, 0606-31

Contact bearings
see Bearings

Contact technique
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Container boards
Friction -- slide angle, 0304-34

Contaminants
see Impurities

Contamination
see Pollution control

Continuous digesters
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27

Contraction
Flow from a 45° slice, 0410-03
Flow from a nozzle (slice) with inclined upper lip, 0410-04
Flow from a vertical slice, 0410-02

Control charts
see Charting

Control systems
Short-run statistical process control: a basic charting method, 0304-70

Conversion factors
Units of measurement and, 0800-01

Converting factors
Moisture content of paper: terminology and conversion, 0808-02

Converting plants
Boxplant quality measurement: why test?, 0304-02
Computer-assisted machinery, 0305-02
Corrugated boxplant - list of potential hazards, 0301-01
Machinery considerations and selection, 0305-06

Copper
Role of in a printing ink, 0304-61
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Copper sulfate
Tests for corrugator roll wear, 0304-53

Cores
Determination of winder sets per reel, 0502-02
Reel diameter for various reel spool and roll core sizes, 0502-03

Corrosion
see also Corrosion inhibitors
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Guide to the use of stainless steel pipe specifications, 0402-24
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for inspecting batch digesters, 0402-22
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Guidelines for nondestructive examination of suction roll shells, 0402-19
Nozzle maintenance and clogging, 0420-15
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Corrosion inhibitors
Keys to successful chemical cleaning of boilers, 0416-06

Corrosion prevention
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Corrugated boards
Copper in a printing ink, 0304-61
Critical properties to consider when unitizing, 0304-72
Important quality parameters of a printing ink, 0304-59
Obtaining caliper off the corrugator for use in statistical
process control procedures, 0304-12
Proofing a flexo printing ink, 0304-60
Statistical process control friction-slide angle, 0304-34
Techniques to minimize twist warp, 0304-50
Warp in corrugated board, 0304-07
Corrugated boxes
see Boxes, Corrugated boards
Corrugated containers
see Boxes, Corrugated board, Folder gluers, Die cutters
Corrugated medium
An alternative method for designating flute sizes, 0302-04
Corrugating
An alternative method for designating flute sizes, 0302-04
Corrugating adhesives
see Adhesives
Corrugating machines
Checking for coating wear on corrugating rolls, 0304-73
Checking the flute depth of corrugating rolls, 0304-75
Checking the parallel of corrugating rolls with “NCR”
paper, 0304-62
Computer-assisted machinery, 0305-02
Conducting a corrugator temperature audit, 0304-65
Corrugator bearing clearance checks and their impact,
0304-47
Impact of doublebacker hot plate level on board quality
and how to measure it, 0304-66
Improved techniques to measure corrugator glue machine
meter gaps, 0304-68
Prevention of score cracking in a box plant, 0304-37
Starch viscosity in corrugating adhesives,
0304-15
Tests for corrugator roll wear, 0304-53
Corrugated medium
Causes and corrections of common corrugator bonding
problems, 0304-32
Edge crush test (ECT): its relationship to box compression
and its derivation from containerboard edge stiffness, 0304-09
Paper machine performance guidelines, 0404-47
Paper machine drying rate, 0404-07
Procedure for setting up a raw material trial on the
corrugator, 0304-01
Splicer defects and cures, 0304-31
Corrugating plants
see Operations
Corrugating rolls
see Rolls
Corrugator-double backer
see Corrugating machines
Corrugators
see also Corrugating machines
Costs
Press section economic evaluation, 0404-22
Cotton
In nonwovens, 1205-02
Couch rolls
Paper machine vacuum selection factors, 0502-01
Counters
Counter ejector section, 0305-44
Cover
Maintenance considerations in new construction and
rebuilds, 0408-02
Cracks
Best practice guidelines for detecting and mitigating
waterside cracking (stress-assisted corrosion) in power and
recovery boilers, 0402-38
Guidelines for inspection and nondestructive testing of
dryer machine dryer, 0404-16
Guidelines for inspection of continuous digesters and
impregnation vessels, 0402-27
Guidelines for nondestructive examination of suction roll
shells, 0402-19
Inspection for cracking of composite tubes in black liquor
recovery boilers, 0402-30
Crescent formers
Paper machine vacuum selection factors, 0502-01
Cross direction
Calculation and partitioning of variance using paper
machine scanning sensor measurements, 1101-01
Statistical process control -- procedures for charting warp,
0304-13
Troubleshooting cross-machine direction moisture profile
problems, 0404-57
Warp in corrugated board, 0304-07
Crown
see Roll crown
Crush
Calibration of flexible beam crush tester, 0304-20
Statistical process control techniques to assist in meeting
specification at finishing crush process control points to the
paper and paperboard industries, 0304-11
Cubical contents
see Volumetry
Curing
Drying and curing techniques for in-line flexographic
printing, 0306-06
Curtain coating
Common curtain coating problems: causes, detection, and
correction, 0304-26
Weight test, 0304-19
Cutters
see Die cutters
Cutting dies
see Die cutters, Rotary machines
D- 
Damage 
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Dandy rolls
Dandy roll applications, 0404-53

Data storage
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Data tables
Moisture content of paper: terminology and conversion, 0808-02

Deaerators
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Defects
Addendum to Corrugating Defect Terminology Manual -- defects related to the use of fingerless singlefacers, 0304-17
Corrugator bearing clearance checks and their impact, 0304-47

Definitions
see Nomenclature

Degradation
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28

Densified liners
see Liners

Density

Weld repairs on new suction roll shells, 0402-17

Shipping containers
Guideline for direct contact printing of bar code symbols on corrugated, 0306-16

Shock drying
Terminology for high temperature pressing, 0404-48

Showers
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Paper machine shower recommendations, 0404-61
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements. 0404-27
Steam shower applications in the forming and press section, 0404-58
Chemical cleaning guide for press fabrics, 0404-65

Silica
Response to contamination of high purity boiler feedwater, 0416-05
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Single Facers
Procedure for setting up a raw material trial on the corrugator, 0304-01

Singlefacers
Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17
Alternative method for designating flute sizes, 0302-04
Causes and corrections of common corrugator bonding problems, 0304-32
Checking for coating wear on corrugating rolls, 0304-73
Checking the flute depth of corrugating rolls, 0304-75
Parallel of corrugating rolls with “NCR” paper, 0304-62
Preventing score cracking in a box plant, 0304-37
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
Splicer defects and cures, 0304-31
Recommended dryer differential pressures, 0404-31

Skid
Material handling considerations for flexo folder gluers, 0305-54

Slabling
Broke loss calculations, 0502-10

Slices
Flow from a 45° slice, 0410-03
Flow from a nozzle (slice) with inclined upper lip, 0410-04
Flow from a stock behind slice (head/jet relationship), 0410-05
Flow from a vertical slice, 0410-02

Slide angle
Statistical process control, friction, 0304-34

Slottting
Machinery considerations and selection: yoked scoring slotting section, 0305-53

Slurry
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of calcium carbonate-water suspensions, 0106-01
Physical data of hydrous kaolin-water suspensions, 0106-02

Slushed paper stock
see Paper stock

Smearing
Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

Smog
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Sodium
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Sodium bicarbonate
Density of aqueous sodium bicarbonate solution, 0607-13

Sodium bisulfite
Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

Sodium borate
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08

Sodium carbonate
Density of aqueous sodium carbonate solution, 0607-14
Specific heat of sodium carbonate solution, 0607-15
Vapor pressure of sodium carbonate solution, 0607-16
Viscosity of sodium carbonate solution, 0607-17

Sodium chlorate
Safe storage of, 0606-31

Sodium chloride
Specific gravity of sodium chloride solutions, 0606-10

Sodium hydroxide
Caustic soda (NaOH) safe storage and handling, 0606-27
Relative enthalpy of solution, 0606-08
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
Specific gravity and density of caustic soda solutions, 0606-20
Specific heat of caustic soda solutions, 0606-07
Viscosity of sodium hydroxide solutions, 0606-11

Sodium sulfite
Density of aqueous sodium sulfite solution, 0607-18

Solids content
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of calcium carbonate-water suspensions, 0106-01
Physical data of hydrous Kaolin-water suspensions, 0106-02

Solubility
Solubility of sulfur dioxide, 0607-06
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Solutions
Equilibrium relative humidities over saturated salt solutions, 0808-03
Specific heat of caustic soda solutions, 0606-07

Sorption
Cotton in nonwovens, 1205-02

Soot blowers
Recovery boiler sootblowers: practical guidelines, 0416-20
Recovery boiler sootblowers: the basics, 0416-19

SPC techniques
see Statistical methods

Specialty coating pigment
see Pigment

Specific gravity
see Density

Specific heat
Specific heat of caustic soda solutions, 0606-07
Specific heat of sodium carbonate solution, 0607-15

Specifications
Guideline specification for procurement of an economizer for a recovery boiler, 0416-21
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03

Speed
see Velocity

Spent sulfite liquors
Density of aqueous sodium sulfite solution, 0607-18

Splicers
Splicer defects and cures, 0304-31

Spools
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Reel diameter for various reel spool and roll core sizes, 0502-03

Spunlaced fabric
Cotton in nonwovens, 1205-02

Spray coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Squared paper
Squaring flap cut (center special) boxes, 0305-45

Squaring
see Squared papers, Trimming

Stackers
Multiple-out rotary diecut stacking, 0305-47
Stacking off the rotary diecutter, 0305-46

Stacking
Corrugated caliper: why is it so important?, 0304-04

Stacking strength
see Compression strength

Stainless steel
Guide to the use of stainless steel pipe specifications, 0402-24
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Guidelines for nondestructive examination of suction roll shells, 0402-19
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Weld repairs on new suction roll shells, 0402-17

Standard conditions
Testing atmospheres simulating end use conditions, 0808-05

Starch
Proper methods of measuring starch adhesive viscosity, 0304-33
Starch adhesive preparation and distribution systems: housekeeping, 0304-06
Starch adhesive trial, 0304-22
Statistical process control of starch gelatinization temperature, 0304-14
Statistical process control of starch viscosity, 0304-15
Techniques for running “WRA” (water resistant starch adhesive), 0304-46
Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44

Starch conversion
Statistical process control of starch gelatinization temperature, 0304-14

Statistical analysis
How to perform a gauge repeatability and reproducibility study, 0304-71
Obtaining combined board caliper off the corrugator for use statistical process control procedures, 0304-12
Starch viscosity in corrugating adhesives, 0304-15

Statistical distribution
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Statistical methods
Boxplant quality measurement: why test?, 0304-02
Obtaining combined board caliper off the corrugator, 0304-12
Procedures for charting warp, 0304-13
Procedures for utilizing statistical control techniques to monitor the tare weight of a run of boxes, 0304-35
Short-run statistical process control: a basic charting method, 0304-70
Statistical process control: friction - slide angle, 0304-34
Statistical process control of starch gelatinization temperature, 0304-14
Statistical process control of starch viscosity, 0304-15
Statistical process control pin adhesion, 0304-23
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Statistical process control
see Statistical methods
Statistical quality control
see Statistical methods
Statistics
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Obtaining combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Starch viscosity in corrugating adhesives, 0304-15
Statistical process control of starch gelatinization temperature, 0304-14

Status reports
see Reporting

Steam
Application of dryer bars, 0404-35
Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for routine periodic inspection and testing of cast iron Yankee and MG dryers, 0425-01
Response to contamination of high purity boiler feedwater, 0416-05
Steam shower applications in the forming and press section, 0404-58
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Yankee dryer steam condensing rates, 0404-49
Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04

Steam chests
Terminology for high temperature pressing, 0404-48

Steam pressure
see Pressure gradient

Step-Up Strip
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Sterilization
Starch adhesive preparation and distribution systems: housekeeping, 0304-06

Stickies
Stickies definition and classification, 0603-02

Stock flow
Optimum consistency for pumping pulp, 0410-15

Stock (pulp)
Control of stock activity on a fourdrinier table, 0410-08
Head of stock behind slice (head/jet relationships), 0410-05

Stock preparation
Catalog of Stock Preparation Pilot Plants, 0502-20

Stones
see Pulpstones

Storage
Buying, storing, and handling flexo folder glue/rotary diecutter adhesives, 0305-25
Caustic soda (NaOH) safe storage and handling, 0606-27
Chlorine dioxide (ClO2) safe storage and handling, 0606-30
Hydrogen peroxide (H2O2) safe storage and handling, 0606-24
Methanol (CH3OH) safe storage and handling, 0606-25
Oxygen (O2) bulk storage and safe handling, 0606-29
Sodium chlorate (NaClO3) safe handling and storage, 0606-31
Sulfuric acid (H2SO4) safe storage and handling, 0606-26

Strapping
Critical properties to consider when unitizing, 0304-72
Material handling considerations for flexo folder gluers, 0305-54

Stress
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38

Stress assisted corrosion
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38

Stress corrosion
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27

Strippers
Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10

Stripping
Troubleshooting the diecutting section, 0305-39

Stuff boxes
Headbox approach piping guidelines, 0404-54

Suction
see Vacuum

Suction press rolls
see Press rolls, Vacuum rolls

Suction presses
Paper machine vacuum selection factors, 0502-01

Suction rolls
see Vacuum rolls
Guidelines for nondestructive examination of suction roll shells, 0402-19
Sulfite liquors
  Boiling point rise of spent sulfite liquors, 0607-21
  Definitions of terms in the sulfite pulping process, 0607-25
  Density of aqueous sodium sulfite solution, 0607-18
  Density of milk of lime solution, 0607-05
  Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
  Sulfur burner gas strength volume, 0607-01
  Viscosities of various spent sulfite liquors at 26.7°C and other temperatures, 0607-22

Sulfite pulping
  Boiling point rise of spent sulfite liquors, 0607-21
  Definitions of terms in the sulfite pulping process, 0607-25
  Density of aqueous sodium sulfite solution, 0607-18
  Density of milk of lime solution, 0607-05
  Physical and chemical properties of magnesia-base pulping solutions, 0607-04
  Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
  Solubility of sulfur dioxide, 0607-06
  Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
  Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10
  Sulfur burner gas strength volume, 0607-01
  Vapor pressure of sulfur dioxide solutions, 0607-11
  Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Sulfite waste liquor
  see Spent sulfite liquors

Sulfur burners
  Sulfur burner gas strength volume, 0607-01

Sulfur dioxide
  Boiling point rise of spent sulfite liquors, 0607-21
  Definitions of terms in the sulfite pulping process, 0607-25
  Physical and chemical properties of magnesia-base pulping solutions, 0607-04
  Solubility of sulfur dioxide, 0607-06
  Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
  Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10
  Sulfur burner gas strength volume, 0607-01
  Vapor pressure of sulfur dioxide solutions, 0607-11
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
  Viscosity of a neutral sulfite spent liquor (Ostwald capillary viscometer), 0607-23
  Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

Sulfuric acid
  Sulfuric acid (H₂SO₄) safe storage and handling, 0606-26

Supervision
  Project leader, 0305-13

Surface properties
  Granite roll material and surface requirements, 0404-41

Surface speed
  see Retention, Machine speed

Suspended solids
  Generalized method for determining the pipe friction loss of flowing pulp suspensions, 0410-14

Symbols
  Guideline for direct contact printing of bar code symbols on corrugated, 0306-16

Systems
  Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15

T-

Tare weight
  Statistical control techniques to monitor the tare weight of a run of boxes, 0304-35

Task time

Technical nomenclature
  see Nomenclature

Temperature
  Conducting a corrugator temperature audit, 0304-65
  Density of aqueous sodium bicarbonate solution, 0607-13
  Density of aqueous sodium carbonate solution, 0607-14
  Dryer section performance monitoring, 0404-33
  Dryer surface temperature measurement, 0404-39
  Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
  Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
  Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10
  Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
  Specific heat of sodium carbonate solution, 0607-15
  Statistical process control of starch gelatinization temperature, 0304-14
  Statistical process control of starch viscosity, 0304-15
  Testing atmospheres simulating end use conditions, 0808-05
  Troubleshooting cross-machine direction moisture profile problems, 0404-57
  Vapor pressure of sodium carbonate solution, 0607-16
  Vapor pressure of sulfur dioxide solutions, 0607-11
  Viscosity of a neutral sulfite spent liquor (Ostwald capillary viscometer), 0607-23
  Viscosity of sodium carbonate solution, 0607-17
  Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03

Tension
  Recommended tensions in dryer fabrics, 0404-04
Terminology
see Nomenclature

Test conditions
Testing atmospheres simulating end use conditions, 0808-05

Test equipment
Paper test rooms: design considerations, 0808-04

Test facilities
Paper test rooms: design considerations, 0808-04
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03

Test methods
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12

Testing
Basic guidelines for image analysis measurements, 0804-09
Catalog of Stock Preparation Pilot Plants, 0502-20
Drainage evaluation by mass measurement, 0502-12
Forming section monitoring, 0502-14
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Paper test rooms: design considerations, 0808-04
Recommended test procedure for black liquor evaporators, 0416-11
Water removal by wet presses, 0404-01

Thermal measurement
Recovery boiler performance calculation – short form, 0416-01

Thermal spray
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Guidelines for inspecting batch digesters, 0402-22

Thermobonding
Cotton in nonwovens, 1205-02

Thermography
Troubleshooting cross-machine direction moisture profile problems, 0404-57

Thermoplastics
Fluoropolymer properties and applications in pulp and paper mills, 0402-37

Thick stock
see High consistency

Thickness
Corrugated caliper: why is it so important?, 0304-04
Method for evaluating thickness of wet press fabrics, 0404-28
Obtaining combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Through drying
Through drying, 0404-25

Tissue
Inspection guidelines for Yankee hood systems, 0425-02
Pilot paper and wet laid nonwoven machines, 0502-16

Tolerance
Corrugator bearing clearance checks and their impact, 0304-47

Total indicated runout
see also Combined boards
Total indicated runout and its impact on combined board quality, 0304-56

Total reduced sulfur
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

Transport
Checklist: preparing die cuts for shipment, 0305-49
Sodium chlorate (NaClO3) safe handling and storage, 0606-31
Sulfuric acid (H2SO4) safe storage and handling, 0606-26

Trim
Broke loss calculations, 0502-10
Paper machine room ventilation guidelines, 0404-50

Trimming
Machinery considerations and selection: yoked scoring slotting section, 0305-53
Squaring flap cut (center special) boxes, 0305-45

Troubleshooting
Forming section monitoring, 0502-14
Glue lap problem, 0304-10
Press section monitoring, 0404-19
Recommended test procedure for black liquor evaporators, 0416-11
Steam shower applications in the forming and press section, 0404-58

Tubes
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for operating and maintenance practices impacting an economizer on a recovery boiler, 0416-22
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Keys to successful chemical cleaning of boilers, 0416-06
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Tungsten carbide
Tests for corrugator roll wear, 0304-53

Tuning
