Waste Audit Report

Growing the worth of your waste & improving operations
Voice of the Customer

“Let’s improve our waste handling.”

“Can you help us find new, more reliable revenue streams for our waste?”

“What kind of equipment do we need to streamline our processes?”

“How can I make more money from segregating paper grades?”
“Waste Audits have been talked about for years, what does this do for me?”
We do the heavy lifting

- Environmental Impact

“This is what steps you can take to improve”
Repeatable Process Drives Revenue Lift

“The audit performed by Mid America Paper Recycling was very thorough. From the initial Waste Audit Survey questionnaire to the in-depth report that followed, I appreciated the level of detail presented. The report helped us better understand our current recycling program at our company and the opportunities for improvement in several areas, including overall goals, logistics, equipment, and safety. Following the report, Mid America Paper Recycling came on-site to visit our facilities and worked with us to devise creative solutions to address our corrugate recycling. They helped us see our waste and recycling streams differently and presented a path to reduce costs and generate revenue.” – Sustainability Manager
Voice of the Customer

“I know I’m not making as much revenue as I could, but I don’t know why.”

“Can you help us find new, more reliable revenue streams for our waste?”

“What kind of equipment do we need to streamline our processes?”

“What can I do to improve my waste handling?”

“How can I make more money from segregating paper grades?”
Waste Audits have been talked about for years, what does this do for me?

“Mid America helped us see our waste and recycling streams differently and presented a path to reduce costs and generate revenue.”
It’s your turn

Every company has some waste capture or recycling processes that are running well, and some that could use improvement.

Learn how do you measure up to best in class organizations.

Mid America Paper Recycling will create a comprehensive recycling plan based on continuous improvement methodologies.

No matter if you come in as a Fledgling or a Dynamo, there are opportunities to improve.
