## Zünd D3 + BHS150

Your first choice in digital cutting.

# The Zünd Solution

## D3 digital cutter

- Dual-beam technology offers maximum productivity at speeds up to 110 cut inches/sec (2.8 cut meters/sec)
- Build quality for 24/7 operation

---

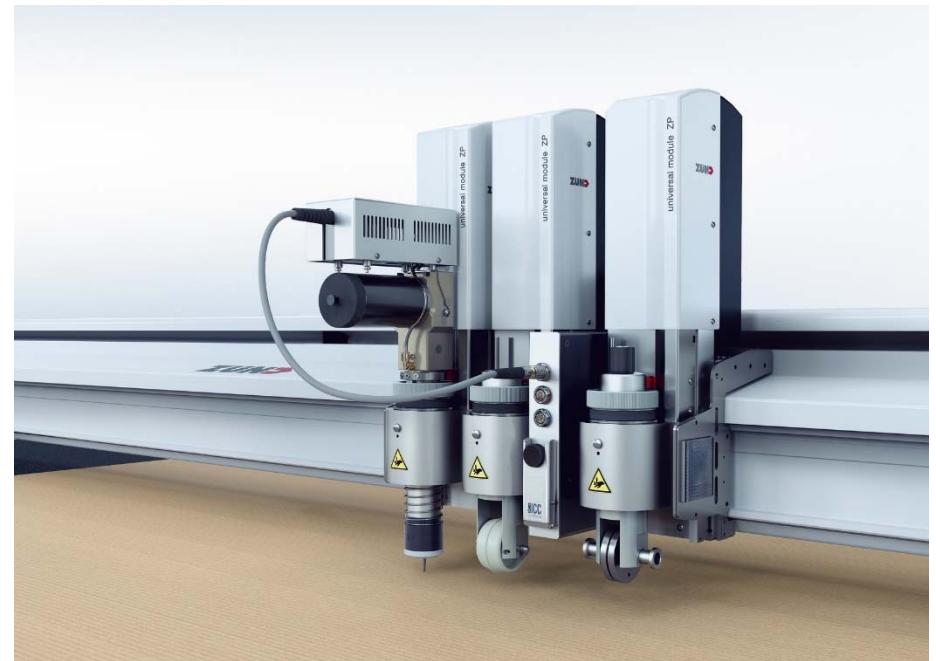

Your first choice in digital cutting.

# The Zünd Solution

## Zünd Modularity

- Up to 3 different tooling methods at the ready for any given job
- Cutting, creasing, perforating, v-cutting, etc.
- Interchangeable module and tooling positions

**Your first choice in digital cutting.**

# The Zünd Solution

## Job Identification

- Automatic job retrieval
- Bottom side QR code scan retrieves corresponding job
- Identify different jobs within a stack for fully automated, non-stop processing

Your first choice in digital cutting.

## The Zünd Solution

- Stack height up to 59" (1500mm)
  - Allows for longer uninterrupted production
- Materials up to 4.3" (110mm) thick i.e. corrugated, foam, etc.
- Individual board weight up to 55lbs (25kg)
- Cutting area up to 126" x 125" (3210 × 3200 mm)

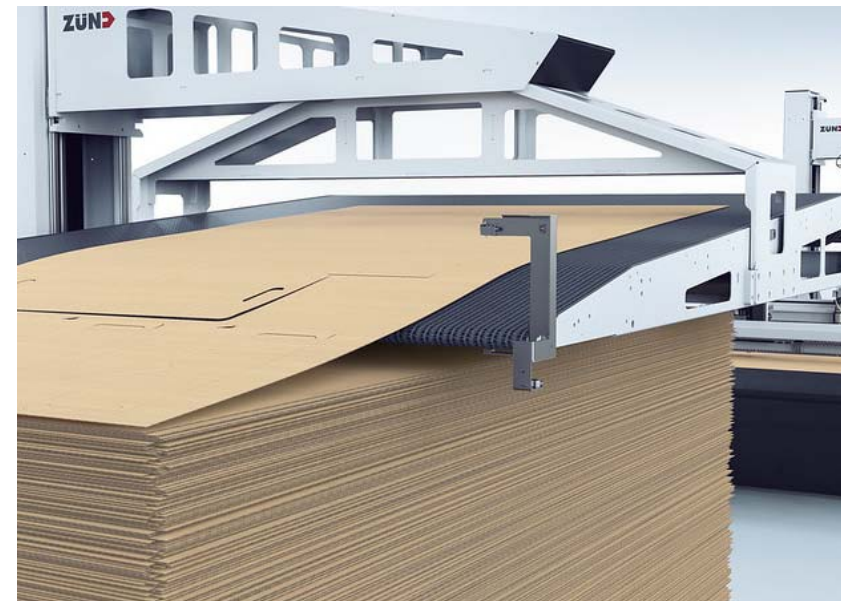

Your first choice in digital cutting.

# The Zünd Solution

## BHS-150 Stacking

- Bridgeless production: off-load conveyor stacks cut boards on a pallet eliminating the need for bridges to hold cut pieces in place saving time on separating cut parts from scrap
- Finished stacks can be removed without interrupting production

---
