The Mechanics of Rollers
by David R. Roisum, Ph.D.

1996. 306pp., 7"x10" soft cover book
Item Number: 0101R255
ISBN: 0-89852-313-3

Now in Japanese!
translated by Kiyoshi Wada
1997. 306 pp., 7"x10" soft cover
Item Number: 0101R255J
ISBN 0-89852-313-3

The Mechanics of Web Handling is the third book in Dave Roisum's trilogy. The Mechanics of Winding and The Mechanics of Rollers are also available from TAPPI PRESS.

The Mechanics of Rollers combines the science of web handling with the application of rollers. This unique book covers design, application, and maintenance for rollers of all sizes, shapes, and webs. The Mechanics of Rollers is a comprehensive yet easy-to-use reference containing hundreds of figures, tables, and design equations, plus bibliography, glossary, and index. A must-have text for anyone involved in buying, selling, or specifying rollers, this book will also be a valuable reference for machine designers, process engineers, and maintenance personnel in the paper, film, foil, nonwovens, textiles, and converting industries.

Table of Contents

1 Introduction
2 Tension and Tension Control

1 The Foundation of Web Processes
2 Roller Applications
3 Dead and Live Shaft Arrangements
4 Heads and Journals
4 Bearings
5 Roller Geometry - Axial
5 Roller Geometry - Diametral
6 Shell Materials
6 Coverings and Coatings
7 To Drive or Not to Drive
7 Roller Drives
8 Roller Issues
10 Articles and Books
11 Why Web Tension Is Important
12 Choosing a Process Tension
13 Load Cell Tension
14 Load Cell Sizing Example
15 Other Load Cell Considerations
16 Dancer Controlled Tension
17 Dancer Design
18 Dancer Dynamics
19 Draw Control
20 Tension Variations in a Draw Zone
21 Catenary (Loop) Control
22 Tension from Motor Readings
23 Current Control
3 Deflection

29 Why Deflection Must Be Minimized
30 How Much Deflections is Allowable
31 Deflection Definition and Forces
32 Deflection Calculation Made Simple
33 Deflection Calculation Example
34 A Closer Deflection Calculation
35 Cantilevered Machines
36 Cantilever Calculation Example
37 Roller Deflection Summary
38 Bibliography

4 Traction, Torque and Power

39 Why Traction Is Important
41 Which Mode Is In Effect
42 The Normal Entry Law
43 Static Coefficient of Friction
44 Friction Complications
45 Air Entrainment
46 Air Entrainment Model and Application
47 Air Entrainment Example Calculation
48 Grooving
49 Texturizing
49 Web and Roller Porosity
50 Measuring Traction
51 Traction Factors
52 The Band-Brake Equation
53 Band Brake Application
54 Band-Brake and Macroslippage
54 Band-Brake and Microslippage
55 Nipped Pull Rollers
56 S or Bridle Wrapped Drive Rollers
57 Vacuum, Pressure and Centrifugal Effects
58 Roller Drag
58 Measuring Drag
60 Inertial Tension
62 Wrap Angle
64 Drive Tension
64 To Drive or Not to Drive
65 Tension from DC Motor Readings
66 Summary
67 Bibliography

5 Nipped Rollers

69 Nipped Rollers for Web Transport
70 Nipped Rollers for Web Processing
71 Nipped Roller Issues

6 Shells

91 Introduction
92 Axial Shell Geometries
92 Radial Shell Geometries
93 Shell Materials
94 Heads
95 Shell Stresses
96 Composites
97 Case for Composites
98 Bibliography

7 Journals and Shafts

99 Journals and Shafts Must Be Short
100 Bending
101 Bending Stress Example Problem
102 Torsion
102 Combined Stresses
103 Fatigue
104 Fits
104 Bibliography

8 Bearings

105 Introduction
106 Bearing Types
107 Sizes and Options
108 Lubrication
109 Load and Life
110 Bearing Drag
111 Maintenance of Bearings
112 Bibliography

9 Coatings and Covers

113 Why Coat
17 **Spreaders**

201 Introduction
202 Spreading Principles
203 Concave Spreader
204 Bowed Spreader Roller
207 Bent Pipe and D-Bar Spreaders
208 Dual Bowed Roller Spreader
209 Pos-Z Spreader
210 Expander Rollers
210 Expander Rollers
210 Edge Pull Web Stretchers
211 Compliant Cover Rollers
212 Grooving
213 Spreading Is Temporary
214 Bibliography

18 **Specialty Rollers and Elements**

215 Additional Roller Resources
216 Air Bars
217 Vacuum Bars
217 Concave Rollers
217 Crowned Rollers
218 Edge Guides
220 Footage (Length) Counters
221 Spring Mounted rollers
221 Skewing or Squaring Rollers
222 Calendering
224 Laminator Curl
225 Embossing
226 Slitting
228 Static Electricity
230 Bibliography

19 **Wound Rolls**

233 Rolls Versus Rollers
234 Roll Cylindricity and Defects
235 Roll Runout, Vibration and Handling
236 Roll Hardness
237 Interlayer Slippage
238 Air Entrainment
239 Unwind Drive Sizing
239 Drive Sizing Example - English Units
243 Drive Sizing Example - Metric Units
245 Bibliography

20 **Maintenance**
