Title:	Introduction to Nonwovens

BOOK

Introduction to Nonwovens
By Albin F. Turbak

1998, 66 pages soft cover
Item Number: 0101R271
Price: Member \$22.00; Nonmember \$33.00
Shipping Weight: 1 pound
ISBN: 0-89852-345-1

Special Offer!

Buy all three books by Turbak and save 20%. This includes: Introduction to Nonwovens, 0101R271, Nonwovens: Theory, Process, Performance, and Testing, 0101R199, and Nonwovens: An Advanced Tutorial, 0101R157.

Item Number: 0101NONSET

Member: \$96.00, Nonmember: \$143.00

This textbook presents an overview of the nonwovens markets, uses, technology, testing, and terminology. Written at an introductory level, the book will be an especially useful tool for introducing students and new industry employees to the field of nonwovens. *Introduction to Nonwovens* includes information in three main areas: nature of the fibers, methods of manufacture, and techniques used to hold nonwoven structures together. Contents include:

- Definition
- Markets and Uses
- Process Overview
- Polymers
- Fibers
- Fiber Types
- Web Bonding
- Manufacturing Methods

TABLE OF CONTENTS

PREFACE	iii
DEFINITION	1
MARKETS AND USES	1
Market size and Growth	1
Product Uses	2
PROCESS OVERVIEW	4
POLYMERS	6

Natural Polymers	6
Synthetic Polymers	7
Material Mechanical Properties	7
FIBERS	10
Fiber Shapes	10
Product Costs	10
FIBER TYPES	11
Natural Fibers	13
Cotton	13
Wood Pulp	13
Protein Fibers	15
Manufactured Fibers	15
Polyester	15
Nylon	16
Polyolefins	17
Acrylics	18
Glass	18
Cellulosics	19
Rayon	19
Tencel	20
Acetate	20
WEB BONDING	21
Mechanical/Needle Punching	22
Thermal Bonding	23
Polymeric Latexes	24
Glass Transition Temperature	25
Effects of Substituents on the T _g of Ethylene	26
Effects of Lamination, Binder Levels and Bonding Methods	27
Wetting	29
MANUFACTURING METHODS	31
Dry Laid Systems	32
Advantages and Disadvantages	32
Air Laid Random Systems	32
Carded Systems	33
Spun Lace Systems	34
Wet Laid Systems	36
Advantages and Disadvantages	37
Hydroentangled	37
Melt Spun Systems	38
Spunbonded	38
Melt Blown	39
Advantages and Disadvantages	40
Stretched Plastic Films	42
APPENDIX	44
TESTING	44
INDA-Standard Methods of Testing Nonwoven Fabrics	46
ASTM-Standard methods of testing Nonwoven Fabrics	48
AATCC-Standard Methods of Testing Nonwoven Fabrics	50
GLOSSARY	51

CONVERSION FACTORS	60
Conversion Factor Table	60
Metric and Decimal Equivalents	60
