Subject Index
Technical Information Papers

This document was last updated September 3, 2015

A-
Abras---tion
  Selection criteria for wet end ceramics, 0502-15
Abrasion resistance
  Selection criteria for wet end ceramics, 0502-15
Absorption
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Acrylic fibers
  see Polyaerylics, Synthetic fibers
Additives
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
Adhesives
  Buying, storing, and handling flexo folder glueraotary diecutter adhesives, 0305-25
  Causes and corrections of common corrugator bonding problems, 0304-32
  Evaluating glue lap adhesive properties, 0304-16
  Procedure for setting up a raw material trial on the corrugator, 0304-01
  Proper methods of measuring starch adhesive viscosity, 0304-33
  Starch adhesive preparation and distribution systems: housekeeping, 0304-06
  Starch adhesive trial, 0304-22
  Statistical process control of starch gelatinization temperature, 0304-14
  Statistical process control of starch viscosity, 0304-15
  Stickies definition and classification, 0603-02
  Techniques for bonding of densified liners, 0304-40
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
  Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
  Understanding and troubleshooting hot melt adhesives, 0304-74
    Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44
After dryers
  Paper machine drying rate, 0404-07
Agitation
  Using washing water as the vehicle in starch based corrugating adhesive, 0304-44
Agitators
  Guidelines for side-entering stock agitators, 0420-13
Air
  Paper machine room ventilation guidelines, 0404-50
Air balance
  see Air, Materials balance
Air flow
  Measurement of vacuum pump air flow, 0420-12
  Minimum dryer pocket air requirements, 0404-17
  Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
  Sheet handling devices, 0404-44
Air jets
  Sheet handling devices, 0404-44
Air permeability
  Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20
Air pollution
  Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Air staging
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Alignment
  Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
Alkali
  Specific heat of caustic soda solutions, 0606-07
Alkaline sulfite pulping
  Boiling point rise of spent sulfite liquors, 0607-21
  Definitions of terms in the sulfite pulping process, 0607-25
  Density of aqueous sodium sulfite solution, 0607-18
  Density of milk of lime solution, 0607-05
  Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
  Sulfur burner gas strength volume, 0607-01
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Alkalinity
  Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Ammonia
  Solubility of sulfur dioxide, 0607-06
Analysis
  Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Angle of slide
  see Slide angle
Anilox coaters
   In-line coating at the corrugator, TIP 0304-39
Anilox rolls
   see Flexography, Printing cylinders
Anvil
   Troubleshooting the diecutting section, 0305-39
Approach flow systems
   Headbox approach piping guidelines, 0404-54
Ash
   Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
   Drainage evaluation by mass measurement, 0502-12
Atmosphere
   Testing atmospheres simulating end use conditions, 0808-05
Auditing
   Checklist for a properly planned project, 0408-01
Automatic feeders
   see Feeders

B-
Bacteria
   Starch adhesive preparation and distribution systems: housekeeping, 0304-06
Bag papers
   Paper machine performance guidelines, 0404-47
Bags
   Paper machine drying rate, 0404-07
Bar Width Reduction (BWR)
   see Product codes
Bar codes
   see Product codes
Bases
   see Hydroxides
Basis weight
   Headbox approach piping guidelines, 0404-54
Batch digesters
   Guidelines for inspecting batch digesters, 0402-22
Batch process
   Measurement of dryer condensing rates (vertical separator method), 0404-18
Beams
   Calibration of flexible beam crush tester, 0304-20
Bearings
   Corrugator bearing clearance checks and their impact, 0304-47
   Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
   Total indicated runout and its impact on combined board quality, 0304-56
Biocide
   Using washing water as the vehicle in starch based corrugating adhesive, 0304-44
Biomass
   Performance test procedure for boilers using biomass as fuel, 0416-18
   Sampling procedures for biomass fuel for boiler performance testing, 0416-17
   Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Biomechanics
   see Human factors
Bisulfites
   Physical and chemical properties of magnesia-base pulping solutions, 0607-04
   Solubility of sulfur dioxide, 0607-06
   Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
   Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10
Black liquors
   Field welding of pin studs in black liquor recovery boilers, 0402-15
   Recommended test procedure for black liquor evaporators, 0416-11
   Recovery boiler performance calculation – short form, 0416-01
   Response to contamination of high purity boiler feedwater, 0416-05
   Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Blade coaters
   see also Coaters
   In-line coating at the corrugator, TIP 0304-39
Bleach plants
   Bleaching plant washer efficiency guide, 0606-23
Bleached board
   Paper machine drying rate, 0404-07
   Paper machine performance guidelines, 0404-47
Bleaching
   Boiling point rise of spent sulfite liquors, 0607-21
   Cotton in nonwovens, 1205-02
   Chlorine gas curve, 0606-03
   Definitions of terms in the sulfite pulping process, 0607-25
   Density of aqueous sodium sulfite solution, 0607-18
   Density of chlorine gas, 0606-03
   Density of milk of lime solution, 0607-05
   Energy checklist: pulp mill, 0416-24
   Heat of vaporization of liquid chlorine, 0606-04
   Recommended pulp bleaching stage designation method, 0606-21
   Relative enthalpy (heat content) of sodium hydroxide solutions, 0606-08
   Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
   Specific gravity and density of caustic soda solutions, 0606-20
   Specific gravity of sodium chloride solutions, 0606-10
   Sulfur burner gas strength volume, 0607-01
   Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
   Viscosity of liquid chlorine 0606-05
   Viscosity of sodium hydroxide solutions, 0606-11
Bleaching stages
   see Bleaching
Blind-drilled rolls
   see Vacuum rolls

Blistering
   Addendum to Corrugating Defect Terminology Manual -
   defects related to the use of fingerless singlefacers, 0304-17

Blow boxes
   Sheet handling devices, 0404-44

Blowdown
   see also Blowing
   Design engineer decisions tree: paper mill boiler
   feedwater, 0416-04
   Water quality guidelines and monitoring requirements for
   paper mill boilers operating with softened makeup water, 0416-14

Blowing
   Water quality and monitoring requirements for paper mill
   boilers operating on high purity feedwater, 0416-03

Board caliper
   see Thickness

Boiler feed water
   see Boilers, Feedwater

Boiler tubes
   Guideline for obtaining high quality radiographic testing
   of butt welds in boiler tubes, 0404-33
   Guidelines for evaluating quality of boiler tube butt welds
   with ultrasonic testing, 0402-31
   Guidelines for specification and inspection of electric
   resistance welded (ERW) and seamless boiler tube for critical
   and noncritical service, 0402-13

Boilers
   Best practice guidelines for detecting and mitigating
   waterside cracking (stress-assisted corrosion) in power and
   recovery boilers, 0402-38
   Design engineer decisions tree: paper mill boiler
   feedwater, 0416-04
   Explanation of recovery boiler leak indications, 0416-23
   Evaluating reverse osmosis for treating makeup to the
   boiler feedwater in a pulp and paper mill, 0416-07
   Guidelines for detection, monitoring and prevention of
   flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
   Guidelines for replacement of generating bank tubes with
   expanded joints in two-drum boilers, 0416-08
   Guidelines for evaluating quality of boiler tube butt welds
   with ultrasonic testing, 0402-31
   Keys to successful chemical cleaning of boilers, 0416-06
   Performance test procedure for boilers using biomass as
   fuel, 0416-18
   Sampling procedures for biomass fuel for boiler
   performance testing, 0416-17
   Water quality and monitoring requirements for paper mill
   boilers operating on high purity feedwater, 0416-03
   Water quality guidelines and monitoring requirements for
   paper mill boilers operating with softened makeup water, 0416-14

   Water treatment-related opportunities for energy
   conservation in a paper mill powerhouse, 0416-13
   Nitrogen oxide emissions control from biomass and kraft
   recovery boilers in the pulp and paper industry, 0416-25
   Best Practice for Recovery Boiler Inspection (Optimizing
   Inspection Scope), 0416-26

Bonding
   Techniques for bonding of densified liners, 0304-40

Box compression
   see Compression strength

Box flaps
   see Flaps

Box machines
   Troubleshooting a glue lap problem, 0304-10

Box plants
   see Converting plants

Boxes
   Corrugated boxplant-list of potential hazards, 0301-01
   Critical properties to consider when unitizing, 0304-72
   High vacuum sheet dewatering, 0404-60
   Squaring flap cut (center special) boxes, 0305-45

Broke
   Broke loss calculations, 0502-10

Bronze
   Guidelines for nondestructive examination of suction roll
   shells, 0402-19
   Weld repairs on new suction roll shells, 0402-17

Burners
   Nitrogen oxide emissions control from biomass and kraft
   recovery boilers in the pulp and paper industry, 0416-25

Burst testers
   Calibration and maintenance of, 0304-24

Butt joints
   Guidelines for evaluating quality of boiler tube butt welds
   with ultrasonic testing, 0402-31

Butt welds
   Guidelines for evaluating quality of boiler tube butt welds
   with ultrasonic testing, 0402-31

C-

CADCAM
   Computer-assisted machinery, 0305-02

CONEG
   see Regulations

Cadmium
   An explanation of the CONEG heavy metal guidelines, 0304-58

Calcination
   Physical data of calcined kaolin-water suspensions, 0106-09

Calcium base liquors
   Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07

Calcium bisulfite
   Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07

Calcium carbonate
   Physical data of calcium carbonate-water suspensions,
Calcium hydroxide
Density of milk of lime solution, 0607-05

Calculations
see Computation

Calibration
Basic guidelines for image analysis measurements, 0804-09
Calibration and maintenance of the manually operated micrometer, 0304-30
Calibration of flexible beam crush tester, 0304-20
Of burst testers, 0304-24
Calibration technique for the drum style chip thickness classifier, 0602-03
Suggestions for developing a box plant quality manual, 0304-49

Caliper
see Thickness

Canadian standard freeness
Interconversion of freeness, 0809-01

Carbon steel
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Carbonates
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Physical data of calcium carbonate-water suspensions, 0106-01

Cast iron
Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14

Castings
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25

Caustic soda
see Sodium hydroxide

Causticizing
Energy checklist: pulp mill, 0416-24
Material balance equations relating to digester requirements, 0418-02

Ceramic coatings
Press roll cover application guidelines, 0404-37

Ceramics
Selection criteria for wet end ceramics, 0502-15
Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

Certification
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Chalk
see Calcium carbonate

Charting
Introduction to the flow chart, 0305-26
Short-run statistical process control: a basic charting method, 0304-70
Statistical process control pin adhesion, 0304-23
Statistical process control - procedures for charting warp, 0304-13

Checklist
see Maintenance

Chemical preparation
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10

Chemical properties
Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Magnesia-base pulping solutions, 0607-04
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31

Chemical pulps
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Chemical recovery
Recastoricizing material balance equations relating to digester requirements, 0418-02

Chemicals
Material safety data sheets, what to look for - how to understand them, 0304-38

Chests
see Stock chests

Chip classifiers
Calibration technique for the drum style chip thickness classifier, 0602-03

Chip silos
see Chip bins

Chips
Calibration technique for the drum style chip thickness classifier, 0602-03

Chlorides
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12

Chlorine
Chlorine gas curve, 0606-02
Density of chlorine gas, 0606-03
Heat of vaporization of liquid chlorine, 0606-04
Viscosity of liquid chlorine, 0606-05

Chlorine dioxide
Safe storage and handling of, 0606-30
Specific gravity of sodium chloride solutions, 0606-10
Chrome
Tests for corrugator roll wear, 0304-53

Chromium
An explanation of the CONEG heavy metal guidelines, 0304-58

Clad-steel plate
see Plates

Classification
Paper grade classifications, 0404-36

Clay
Kaolin clay pigment index, 0106-06
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of hydrous Kaolin-water suspensions, 0106-02

Cleaners
Catalog of stock prep pilot plants, 0502-20
Introduction to centrifugal cleaners, 0508-10

Cleaning
Cleaning anilox rolls: procedures and options, 0306-18
Cleanup procedures for flexo folder gluer/rotary
diecutters, 0305-33
Daily, weekly, and monthly maintenance checklists, 0305-34
Dryer fabric cleaning, 0404-38
Housekeeping at order and shift change and weekly, 0305-32
Introduction to centrifugal cleaners, 0508-10
Keys to successful chemical cleaning of boilers, 0416-06
Paper machine clothing cleaning and conditioning for
recycled fiber use, 0404-51
Paper machine shower recommendations, 0404-61
Post-fabrication cleaning of stainless steel in the pulp and
paper industry, 0402-35

Cleaning chemicals
see Cleansers

Cleansers
Keys to successful chemical cleaning of boilers, 0416-06

Clogging
Nozzle maintenance and clogging, 0420-15

Clothing
see Felts, Machine clothing

Coating color
see Color

Coating thickness
Tests for corrugator roll wear, 0304-53

Coatings
Guidelines for thermal spray coatings installed to prevent
corrosion in pulp mill process equipment, 0402-32
Tests for corrugator roll wear, 0304-53

Coefficient of friction
see Friction factor

Combined boards
Common curtain coating problems: causes, detection, and
correction, 0304-26
Obtaining off the corrugator for use in statistical process
control procedures, 0304-12
Total indicated runout and its impact on combined board
quality, 0304-56

Compression
Corrugated caliper: why is it so important?, 0304-04

Compression resistance
see Compression strength

Compression strength
Corrugated caliper: why is it so important?, 0304-04
Obtaining a combined board caliper off the corrugator for
use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting
specification at finishing crush process control points to the
paper and paperboard industries, 0304-11

Computation
Paper machine drying rate, 0404-07

Computer-assisted
see CADCAM

Concentricity
Total indicated runout and its impact on combined board
quality, 0304-56

Condensates
Guidelines for detection, monitoring and prevention of
flow accelerated corrosion (FAC) in the pulp and paper mill,
0402-36
Measurement of dryer condensing rates (continuous
method), 0404-03
Measurement of dryer condensing rates (vertical separator
method), 0404-18
Stripping of kraft pulping process condensates:
regulations, design and operation, 0416-10
Water quality and monitoring requirements for paper mill
boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for
paper mill boilers operating with softened makeup water,
0416-14
Water treatment-related opportunities for energy
conservation in a paper mill powerhouse, 0416-13
Yankee dryer steam condensing rates, 0404-49

Condensation
Dryer condensing rates (batch method), 0404-02
Dryer condensing rates (continuous method), 0404-03

Condensing rates
see Condensation

Conditioning
Paper machine clothing cleaning and conditioning for
recycled fiber use, 0404-51
Testing atmospheres simulating end use conditions, 0808-05

Conductivity
Water quality and monitoring requirements for paper mill
boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for
paper mill boilers operating with softened makeup water,
0416-14

Conical refiners
Conical refining intensity, 0508-07

Consistency
Drainage evaluation by mass measurement, 0502-12
Generalized method for determining the pipe friction loss
of flowing pulp suspensions, 0410-14
  Optimum for pumping pulp, 0410-15

Construction materials
  Sodium chlorate (NaClO₃) safe handling and storage, 0606-31

Contact bearings
  see Bearings

Contact technique
  Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Container boards
  Friction -- slide angle, 0304-34

Contaminants
  see Impurities

Contamination
  see Pollution control

Continuous digesters
  Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27

Contraction
  Flow from a 45° slice, 0410-03
  Flow from a nozzle (slice) with inclined upper lip, 0410-04
  Flow from a vertical slice, 0410-02

Control charts
  see Charting

Control systems
  Short-run statistical process control: a basic charting method, 0304-70

Conversion factors
  Units of measurement and, 0800-01

Converting factors
  Moisture content of paper: terminology and conversion, 0808-02

Converting plants
  Boxplant quality measurement: why test?, 0304-02
  Computer-assisted machinery, 0305-02
  Corrugated boxplant - list of potential hazards, 0301-01
  Machinery considerations and selection, 0305-06

Copper
  Role of in a printing ink, 0304-61
  Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Copper sulfate
  Tests for corrugator roll wear, 0304-53

Cores
  Determination of winder sets per reel, 0502-02
  Reel diameter for various reel spool and roll core sizes, 0502-03

Corrosion
  see also Corrosion inhibitors
  Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
  Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
  Fluoropolymer properties and applications in pulp and paper mills, 0402-37
  Guide to the use of stainless steel pipe specifications, 0402-24
  Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
  Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
  Guidelines for inspecting batch digesters, 0402-22
  Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
  Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
  Guidelines for nondestructive examination of suction roll shells, 0402-19
  Nozzle maintenance and clogging, 0420-15
  Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
  Ultrasonic technician performance test for boiler tube inspection, 0402-21
  Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
  Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Corrosion inhibitors
  Keys to successful chemical cleaning of boilers, 0416-06

Corrosion prevention
  Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
  Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03

Corrugated boards
  see Boxes, Corrugated boards

Corrugated containers
  see Boxes, Corrugated board, Folder gluers, Die cutters

Corrugated medium
  An alternative method for designating flute sizes, 0302-04

Corrugating
  An alternative method for designating flute sizes, 0302-04

Corrugating adhesives
  see Adhesives

Corrugating machines
  Checking for coating wear on corrugating rolls, 0304-73
  Checking the flute depth of corrugating rolls, 0304-75
  Checking the parallel of corrugating rolls with “NCR”
paper, 0304-62
Computer-assisted machinery, 0305-02
Conducting a corrugator temperature audit, 0304-65
Corrugator bearing clearance checks and their impact, 0304-47
Impact of doublebacker hot plate level on board quality and how to measure it, 0304-66
Improved techniques to measure corrugator glue machine meter gaps, 0304-68
Prevention of score cracking in a box plant, 0304-37
Procedure for setting up a raw material trial on the corrugator, 0304-01
Starch viscosity in corrugating adhesives, 0304-15
Tests for corrugator roll wear, 0304-53
Corrugating medium
Causes and corrections of common corrugator bonding problems, 0304-32
Edge crush test (ECT): its relationship to box compression and its derivation from containerboard edge stiffness, 0304-09
Paper machine performance guidelines, 0404-47
Paper machine drying rate, 0404-07
Procedure for setting up a raw material trial on the corrugator, 0304-01
Splicer defects and cures, 0304-31
Corrugating plants
see Operations
Corrugating rolls
see Rolls
Corrugator-double backer
see Corrugating machines
Corrugators
see Corrugating machines
Costs
Press section economic evaluation, 0404-22
Cotton
In nonwovens, 1205-02
Couch rolls
Paper machine vacuum selection factors, 0502-01
Counters
Counter ejector section, 0305-44
Cracks
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for nondestructive examination of suction roll shells, 0402-19
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Crescent formers
Paper machine vacuum selection factors, 0502-01
Cross direction
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Statistical process control -- procedures for charting warp, 0304-13
Troubleshooting cross-machine direction moisture profile problems, 0404-57
Warp in corrugated board, 0304-07
Crown
see Roll crown
Crush
Calibration of flexible beam crush tester, 0304-20
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11
Cubical contents
see Volumetry
Curing
Drying and curing techniques for in-line flexographic printing, 0306-06
Curtain coating
Common curtain coating problems: causes, detection, and correction, 0304-26
Weight test, 0304-19
Cutters
see Die cutters
Cutting dies
see Die cutters, Rotary machines
D-
Damage
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26
Dandy rolls
Dandy roll applications, 0404-53
Data storage
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Data tables
Moisture content of paper: terminology and conversion, 0808-02
Deaerators
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Defects
Addendum to Corrugating Defect Terminology Manual -- defects related to the use of fingerless singlefacers, 0304-17
Corrugator bearing clearance checks and their impact, 0304-47
Definitions
see Nomenclature
Degradation
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Densified liners
see Liners
Density
- Density of aqueous sodium bicarbonate solution, 0607-13
- Density of aqueous sodium carbonate solution, 0607-14
- Density of chlorine gas, 0606-03
- Milk of lime solution, 0607-05
- Physical data of calcined kaolin-water suspensions, 0106-09
- Physical data of calcium carbonate-water suspensions, 0106-01
- Physical data of hydrous Kaolin-water suspensions, 0106-02
- Sodium sulfite solution, 0607-18
- Specific gravity and density of caustic soda solutions, 0606-20
- Specific gravity of sodium chloride solutions, 0606-10

Deposits
- Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
- Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
- Keys to successful chemical cleaning of boilers, 0416-06

Deterioration
- see Degradation

Dewatering
- see Drainage, Water removal

Diameter
- Roll diameter for various reel spool and roll core sizes, 0502-03

Dictionaries
- see Nomenclature

Die cutters
- see also Rotary machines
- Buying, storing, and handling flexo folder gluер/rotary diecutter adhesives, 0305-25
- Checklist: preparing die cuts for shipment, 0305-49
- Cleanup procedures for flexo folder gluer/rotary diecutters, 0305-33
- Troubleshooting the diecutting section, 0305-39
- Drying and curing techniques for in-line flexographic printing, 0306-06
- Introduction to flexo folder gluер/rotary diecutter TIPs, 0305-04
- Minimizing rolling scores on lightweight and high-performance liners in diecutting operations, 0304-64
- Ordering cutting dies, 0305-21
- Project leader, 0305-13
- Proper use of pull bands, 0305-18
- Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40
- Rotary cutting die maintenance, 0305-23
- Rotary diecutter urethane anvil maintenance, 0305-35
- Squaring flap cut (center special) boxes, 0305-45

Dieboard
- Multiple-out rotary diecut stacking, 0305-47
- Stacking off the rotary diecutter, 0305-46

Diecut
- Multiple-out rotary diecut stacking, 0305-47
- Stacking off the rotary diecutter, 0305-46

Differential steam pressures
- see Pressure gradient

Digester balance equation
- Recausticizing material balance equations relating to digester requirements, 0418-02

Digesters
- Energy checklist: pulp mill, 0416-24
- Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
- Guidelines for inspecting batch digesters, 0402-22
- Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27

Dimensional measurement
- Calibration technique for the drum style chip thickness classifier, 0602-03

Dispersions
- Physical data of calcined kaolin-water suspensions, 0106-09
- Physical data of calcium carbonate-water suspensions, 0106-01
- Physical data of hydrous Kaolin-water suspensions, 0106-02

Dissolved oxygen
- Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
- Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Dissolving pulps
- Boiling point rise of spent sulfite liquors, 0607-21
- Definitions of terms in the sulfite pulping process, 0607-25
- Density of aqueous sodium sulfite solution, 0607-18
- Density of milk of lime solution, 0607-05
- Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
- Sulfur burner gas strength volume, 0607-01
- Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Doctor blades
- Ink metering systems for corrugated flexo presses, 0306-09
- Overview of the selection process for a laser engraved ceramic anilox roll, 0306-17

Documentation
- Press fabric record book, 0404-21
- Suggestions for developing a box plant quality manual, 0304-49

Documents
- Purchase order, 0305-07

Doublefacers
- Impact of doublebacker hot plate level on board quality and how to measure it, 0304-66
- Splicer defects and cures, 0304-31

Doublewall corrugated boards
- Causes and corrections of common corrugator bonding problems, 0304-32

Downtime
The need for planned maintenance, 0305-30

Drainage
- Drainage evaluation by mass measurement, 0502-12
- Fourdrinier drainage performance evaluation – blow test method, 0410-07
- High vacuum sheet dewatering, 0404-60
- Interconversion of freeness, 0809-01

Drainage factor
- Interconversion of freeness, 0809-01

Dry bulb temperature
- Relative humidity tables, 0808-06

Dry ends
- Procedure for setting up a raw material trial on the corrugator, 0304-01

Dryer bars
- see Dryers

Dryer condensing rates
- see Dryers

Dryer felts
- see also Felts
- Dryer fabric cleaning, 0404-38
- Recommended tensions in dryer fabrics, 0404-04

Dryer hoods
- see Exhaust hoods

Dryer pockets
- Recommended minimum dryer pocket air requirements, 0404-17
- Troubleshooting cross-machine direction moisture profile problems, 0404-57

Dryer sections
- Performance of, 0404-33
- Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
- Sheet handling devices, 0404-44

Dryers
- Application of dryer bars, 0404-35
- Dryer condensing rates (batch method), 0404-02
- Dryer condensing rates (continuous method), 0404-03
- Dryer condensing rates (vertical separator method), 0404-18
- Dryer fabric cleaning, 0404-38
- Dryer section performance monitoring, 0404-33
- Drying and curing techniques for in-line flexographic printing, 0306-06
- Paper machine drying rate, 0404-07
- Through drying, 0404-25

Drying rate
- see Drying

Dry-laid nonwovens
- Pilot paper machines, 0502-16

Duplex stainless steel
- see Stainless steel

Dust
- Paper machine room ventilation guidelines, 0404-50

E-

Economics
- Press section economic evaluation, 0404-22

Economizers
- Guideline specification for procurement of an economizer for a recovery boiler, 0416-21
- Guidelines for operating and maintenance practices impacting an economizer on a recovery boiler, 0416-22
- Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
- Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Edge crush tests (ECT)
- Calibration of flexible beam crush tester, 0304-20
- Edge crush test (ECT): its relationship to box compression and its derivation from containerboard edge stiffness, 0304-09

Efficiency
- Paper machine performance guidelines, 0404-47
- Press section monitoring, 0404-19
- Recovery boiler energy efficiency improvements, 0416-16
- Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13

Elliptical technique
- Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Emissions
- Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Employee injuries
see Human factors

Energy
- Energy checklist: pulp mill, 0416-24
- Paper machine energy conservation, 0404-63
- Recovery boiler energy efficiency improvements, 0416-16
- Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13

Energy conservation
- Paper machine room ventilation guidelines, 0404-50
- Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24

Enthalpy
- Relative enthalpy (heat content) of sodium hydroxide solutions, 0606-08

Environmental factors
- see Environments

Environments
- Caustic soda (NaOH) safe storage and handling, 0606-27
- Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
- Gaseous ozone (O₃) safe handling, 0606-28
- Hydrogen peroxide (H₂O₂) safe storage and handling, 0606-24
- Methanol (CH₃OH) safe storage and handling, 0606-25
- Oxygen (O₂) bulk storage and safe handling, 0606-29
- Sodium chlorate (NaClO₃) safe handling and storage, 0606-31
- Sulfuric acid (H₂SO₄) safe storage and handling, 0606-26

Equations
- Papermaker’s formulas, 0502-17

Equilibrium
- Relative humidities over saturated salt solutions, 0808-03

Equipment
- Starch adhesive trial, 0304-22
- Quality techniques using existing equipment, 0306-11

Ergonomics
- see Human factors

Erosion
- Nozzle maintenance and clogging, 0420-15

Evaluation
- see also Performance
- Drainage evaluation by mass measurement, 0502-12

Evaporation
- see also Drying
- Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24

Evaporators
- Energy checklist: pulp mill, 0416-24
- Recommended test procedure for black liquor evaporators, 0416-11

Exhaust gas
- Paper machine room ventilation guidelines, 0404-50
- Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

Exhaust hoods
- Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24

Extrusion coating
- Guidelines for web conveyance and winding tension levels, 0200-01

F-

Fabric
- See also Forming fabrics, Dryer felts
- Paper machine clothing performance analysis, 0404-26

Fan pumps
- Headbox approach piping guidelines, 0404-54

Feed section
- see Feeding

Feedback control
- see Control systems

Feeders
- Material handling considerations for flexo folder gluers, 0305-54

Feedwater
- Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
- Design engineer decisions tree: paper mill boiler feedwater, 0416-04
- Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07
- Response to contamination of high purity boiler feedwater, 0416-05
- Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
- Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Felts
- see also Press felts
- Dryer fabric cleaning, 0404-38
- Methods to minimize sheet rewet in the press section, 0404-59
- Porosity measurement of press felts on the paper machine (HSPT), 0404-29
- Press fabric record book, 0404-21
- Troubleshooting cross-machine direction moisture profile problems, 0404-57
- Water permeability of press fabrics, 0404-43
Fiber length
Cotton in nonwovens, 1205-02

Fiberboards
see Boxes, Corrugated boards

Fiberglass-reinforced plastic
see Plastic

Field tests
see Test methods

Film
Guidelines for web conveyance and winding tension levels, 0200-01
Quality techniques using existing equipment, 0306-11

Filters
Paper machine room ventilation guidelines, 0404-50

Fine papers
Paper machine drying rate, 0404-07
Paper machine performance guidelines, 0404-47

Fingerless singlefacers
see Singlefacers

Fingerprints
Quality techniques using existing equipment, 0306-11

Flaps
Squaring flap cut (center special) boxes, 0304-45
Understanding and troubleshooting hot melt adhesives, 0304-74

Flat boxes
see Vacuum boxes

Flat crush tests
Calibration of flexible beam crush tester, 0304-20

Flexibility
Calibration of flexible beam crush tester, 0304-20

Flexible beam crush tester
Calibration of flexible beam crush tester, 0304-20

Flexible packaging
Guidelines for web conveyance and winding tension levels, 0200-01

Flexo folder-gluers
see Folder gluers, Die cutters, Rotary machines

Flexo ink
Printing section, 0305-38

Flexography
Cleaning anilox rolls: procedures and options, 0306-18
Guide to proper wipe roll selection for the corrugated box industry, 0306-20
Identifying anilox roll volume measuring equipment, 0306-15
Ink metering systems for corrugated flexo presses, 0306-09
Quality techniques using existing equipment, 0306-11
Overview of the selection process for a laser engraved ceramic anilox roll, 0306-17
Viscosity reading procedure for flexographic corrugated inks, 0304-18
Flow
Generalized method for determining the pipe friction loss of lowing pulp suspensions, 0410-14
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Paper machine shower recommendations, 0404-61

Flow charts
Introduction to the flow chart, 0305-26

Flow measurement
Flow determination by chemical method, 0410-09
Weirs and flumes, 0410-10

Flow rates
see Flow measurement

Flumes
Weirs and flumes, 0410-10

Fluoropolymers
Fluoropolymer properties and applications in pulp and paper mills, 0402-37

Flutes
An alternative method for designating flute sizes, 0302-04

Fogging
Steam shower applications in the forming section, 0404-58

Folder gluers
Buying, storing, and handling flexo folder gluer/rotary diecutter adhesives, 0305-25
Cleanup procedures for flexo folder gluer/rotary diecutters, 0305-33
Counter ejector section, 0305-44
Extruded glue mechanism supplement, 0305-43
Folding section, 0305-42
Introduction to flexo folder gluer/rotary diecutter TIPS, 0305-04
Installation, 0305-12
Machinery considerations and selection: yoked scoring slotting section, 0305-53
Material handling considerations for flexo folder gluers, 0305-54

Formaldehyde
Understanding formaldehyde management, 0304-25

Formation
Dandy roll applications, 0404-53

Forming
Forming section monitoring, 0502-14
Paper machine shower recommendations, 0404-61
Steam shower applications in the forming section, 0404-58

Forming fabrics
Drainage evaluation by mass measurement, 0502-12
Forming section monitoring, 0502-14
Methods to minimize sheet rewet in the press section, 0404-59
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Paper machine vacuum selection factors, 0502-01
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements. 0404-27
Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19
Water permeability of press fabrics, 0404-43

Forming sections
Fourdrinier drainage performance evaluation – blow test method, 0410-07
Troubleshooting cross-machine direction moisture profile problems, 0404-57

Fossil fuels
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Fourdrinier machines
Control of stock activity on a fourdrinier table, 0410-08
Drainage performance evaluation – blow test method, 0410-07
Papermaker’s formulas, 0502-17

Free sheet
Paper machine drying rate, 0404-07

Freeness
Interconversion of, 0809-01

Friction
Generalized method for determining the pipe friction loss of lowing pulp suspensions, 0410-14

Friction factor
Statistical process control friction - slide angle, 0304-34

Fuel oil
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Furnaces
see Recovery furnaces

G-
Gas
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

Gauges
see Measuring instruments

Gel temperature
see Gels

Gelatinization temperature
see Gels

Gels
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
Statistical process control of starch gelatinization temperature, 0304-14

Gin motes
see Cotton

Ginning
see Cotton

Glass fibers
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28

Glossaries
see Nomenclature

Glue
Evaluating glue lap adhesive properties, 0304-16
Extruded glue mechanism supplement, 0305-43
Folding section, 0305-42

Glue lap
see Glued joints

Glue machine
see Gluers

Glue pattern
see Gluing

Glued joints
Troubleshooting a glue lap problem, 0304-10

Gluers
Causes and corrections of common corrugator bonding problems, 0304-32
How to prevent score cracking in a box plant, 0304-37
Improved techniques to measure corrugator glue machine meter gaps, 0304-68
Procedure for setting up a raw material trial on the corrugator, 0304-01
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
Troubleshooting a glue lap problem, 0304-10

Gluing
Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17

Gluing machines
see Gluers

Grab truck
see Lift trucks

Granite
Roll material and surface requirements, 0404-41

Green liquors
Recausticizing material balance equations relating to digester requirements, 0418-02

Grinders
Grinder pulpstones – cubical contents, 0605-01
Pulpstone speed chart, 0605-02

Grinding
Granite roll material and surface requirements, 0404-41

Grooved rolls
Press roll cover application guidelines, 0404-37

Ground calcium carbonate (GCC)
see Calcium carbonate

Guides
Press fabric guiding, 0404-64

Guide rolls
Press fabric guiding, 0404-64

H-
Halogens
see specific term, e.g., Chlorine

Hardness
Response to contamination of high purity boiler feedwater, 0416-05
Water quality guidelines and monitoring requirements for
paper mill boilers operating with softened makeup water, 0416-14

**Hazards**
- Corrugated boxplant-list of potential hazards, 0301-01
- Material safety data sheets, what to look for - how to understand them, 0304-38

**Hazardous materials**
- Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
- Formaldehyde management, 0304-25
- Material safety data sheets – what to look for, how to understand them, 0304-38
- Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10
- Understanding hazardous materials warning labels, 0304-41

**Headboxes**
- Flow from a 45° slice, 0410-03
- Flow from a nozzle (slice) with inclined upper lip, 0410-04
- Flow from a vertical slice, 0410-02
- Head of stock behind slice (head/jet relationships), 0410-05
- Papermaker’s formulas, 0502-17

**Heat**
- Paper machine room ventilation guidelines, 0404-50

**Heat content**
- *see* Enthalpy

**Heat of vaporization**
- Liquid chlorine, 0606-04

**Heat recovery**
- Paper machine room ventilation guidelines, 0404-50

**Heat transfer**
- Application of dryer bars, 0404-35
- Recommended test procedure for black liquor evaporators, 0416-11

**Heat transfer coefficient**
- Recommended test procedure for black liquor evaporators, 0416-11

**Heating**
- Conducting a corrugator temperature audit, 0304-65

**Heating equipment**
- Steam shower applications in the forming section, 0404-58

**Heavy metals**
- *see* Metals

**High density**
- High density liners…what are they?, 0304-43

**High density liners**
- *see* Liners

**High intensity presses**
- Terminology for high temperature pressing, 0404-48

**High performance liners**
- *see* Liners

**High temperature**
- Terminology for high temperature pressing, 0404-48

**High vacuum**
- High vacuum sheet dewatering, 0404-60

**Hoods**
- Inspection guidelines for Yankee hood systems, 0425-02
- Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24

**Hot melts**
- Understanding and troubleshooting hot melt adhesives, 0304-74

**Hot pressing**
- Terminology for high temperature pressing, 0404-48

**Housekeeping**
- *see* Maintenance, Cleaning

**Humidity**
- Dryer section performance monitoring, 0404-33
- Equilibrium relative humidities over saturated salt solutions, 0808-03
- Psychrometric charts, 0404-45
- Recommended minimum dryer pocket air requirements, 0404-17
- Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
- Relative humidity tables, 0808-06
- Testing atmospheres simulating end use conditions, 0808-05
- Troubleshooting cross-machine direction moisture profile problems, 0404-57

**Humidity measurement**
- Relative humidity tables, 0808-06

**Humidity rooms**
- Paper test rooms: design considerations, 0808-04

**Hydrocyclones**
- Introduction to centrifugal cleaners, 0508-10

**Hydrogen peroxide**
- Hydrogen peroxide (H2O2) safe storage and handling, 0606-24

**Hydroxides**
- Definitions of terms in the sulfite pulping process, 0607-25
- Density of aqueous sodium sulfite solution, 0607-18
- Density of milk of lime solution, 0607-05
- Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
- Sulfur burner gas strength volume, 0607-01

**Hypochlorite bleaching**
- *see* Hypochlorites, Bleaching

**I-**

**Illumination**
- Basic guidelines for image analysis measurements, 0804-09

**Image analysis**
- Basic guidelines for image analysis measurements, 0804-09

**Image quality**
- Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Impregnation
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27

Impulse drying
see Drying

Impurities
Dryer fabric cleaning, 0404-38
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Stickies definition and classification, 0603-02

In-process checklist
see Production

Infiltration
Paper machine room ventilation guidelines, 0404-50

Infrared detectors
Troubleshooting cross-machine direction moisture profile problems, 0404-57

Infrared dryers
Drying and curing techniques for in-line flexographic printing, 0306-06

Ink
Copper in a printing ink, 0304-61
Guideline for direct contact printing of bar code symbols on corrugated, 0306-16
Ink metering systems for corrugated flexo presses, 0306-09
Proofing a flexo printing ink, 0304-60
Quality parameters of a printing ink, 0304-59
Quality techniques using existing equipment, 0306-11
Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40
Viscosity reading procedure for flexographic corrugated inks, 0304-18

Inorganic salts
Equilibrium relative humidities over saturated salt solutions, 0808-03

Inspection
Guidelines for inspecting batch digesters, 0402-22
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
Guidelines for routine periodic inspection and testing of cast iron Yankee and MG dryers, 0425-01
Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13
Inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Inspection of continuous digesters and impregnation vessels, 0402-27
Inspection guidelines for Yankee hood systems, 0425-02
Nondestructive examination of suction roll shells, 0402-19
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Ultrasonic technician performance test for boiler tube inspection, 0402-21
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Installation
Flexo folder gluers, 0305-12
Project leader, 0305-13
Press section monitoring, 0404-19

Instruments
Forming section monitoring, 0502-14

Intensity
Conical refining intensity, 0508-07

Internal bond strength
Troubleshooting a glue lap problem, 0304-10

Iron
Response to contamination of high purity boiler feedwater, 0416-05
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Jet dryers
Methods of evaluating high velocity dryers, 0404-05

Jet velocity
Head of stock behind slice (head/jet relationship), 0410-05

Jets
Flow from a 45° slice, 0410-03
Flow from a nozzle (slice) with inclined upper lip, 0410-04
Flow from a vertical slice, 0410-02

Joints
Troubleshooting a glue lap problem, 0304-10

Jordans
see Conical refiners

Jumbo rolls
Reel diameter for various reel spool and roll core sizes, 0502-03

Kaolin
Kaolin clay pigment index, 0106-06

Kraft papers
Paper machine drying rate, 0404-07

Kraft pulping
Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10

Labels
Understanding hazardous materials warning labels, 0304-41
Laboratories
- Paper test rooms: design considerations, 0808-04

Laminates
- Guidelines for web conveyance and winding tension levels, 0200-01

Lead
- An explanation of the CONEG heavy metal guidelines, 0304-58

Leakage
- Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
- Explanation of recovery boiler leak indications, 0416-23

Lignosulfonates
- Boiling point rise of spent sulfite liquors, 0607-21
- Definitions of terms in the sulfite pulping process, 0607-25
- Density of aqueous sodium sulfite solution, 0607-18
- Density of milk of lime solution, 0607-05
- Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
- Sulfur burner gas strength volume, 0607-01
- Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Lime mud
- see White liquor mud

Lime burning
- Energy checklist: pulp mill, 0416-24

Lime-base solutions

Trimming
- Machinery considerations and selection: yoked scoring slotting section, 0305-53
- Squaring flap cut (center special) boxes, 0305-45

Troubleshooting
- Forming section monitoring, 0502-14
- Glue lap problem, 0304-10
- Press section monitoring, 0404-19
- Recommended test procedure for black liquor evaporators, 0416-11
- Steam shower applications in the forming section, 0404-58

Tubes
- Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
- Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
- Guidelines for operating and maintenance practices impacting an economizer on a recovery boiler, 0416-22
- Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
- Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
- Keys to successful chemical cleaning of boilers, 0416-06
- Ultrasonic technician performance test for boiler tube inspection, 0402-21
- Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Tungsten carbide
- Tests for corrugator roll wear, 0304-53

Tuning
- see Control

Turpentine
- Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

Twisting
- Techniques to minimize twist warp, 0304-50

U-

Uhle boxes
- See also Vacuum boxes
- Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

Ultrafine ground limestone
see Limestone

**Ultraviolet radiation**  
Drying and curing techniques for in-line flexographic printing, 0306-06

**Ultrasonic tests**  
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31  
Guidelines for inspecting batch digesters, 0402-22  
Ultrasonic technician performance test for boiler tube inspection, 0402-21  
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

**Unitized handling**  
Critical properties to consider when unitizing, 0304-72

**Units of measurement**  
Units of measurement and conversion factors, 0800-01

**Unloading**  
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31  
Sulfuric acid (H₂SO₄) safe storage and handling, 0606-26

**U.P.C.**  
see Product codes

**Urethanes**  
Rotary diecutter urethane anvil maintenance, 0305-35

**V-**  
**Vacuum**  
High vacuum sheet dewatering, 0404-60  
Paper machine vacuum selection factors, 0502-01  
Papermaker’s formulas, 0502-17  
Steam shower applications in the forming section, 0404-58

**Vacuum boxes**  
High vacuum sheet dewatering, 0404-60  
Paper machine vacuum selection factors, 0502-01  
Performance evaluation techniques for paper machine vacuum systems, 0404-55

**Vacuum equipment**  
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

**Vacuum filters**  
Bleaching plant washer efficiency guide, 0606-23

**Vacuum pumps**  
Guidelines for measurement of vacuum pump air flow, 0420-12  
Performance evaluation techniques for paper machine vacuum systems, 0404-55  
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements. 0404-27

**Vacuum rolls**  
Guidelines for nondestructive examination of suction roll shells, 0402-19  
Liquid penetrant testing of new suction roll shells, 0402-11  
Paper machine vacuum selection factors, 0502-01  
Press roll cover application guidelines, 0404-37  
Techniques for nip impressions, 0404-46  
Weld repairs on new suction roll shells, 0402-17

**Vacuum washers**  
Bleaching plant washer efficiency guide, 0606-23

**Valves**  
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25  
Headbox approach piping guidelines, 0404-54

**Vapor pressure**  
Chlorine gas curve, 0606-02  
Vapor pressure of sulfur dioxide solutions, 0607-11  
Vapor pressure of sodium carbonate solution, 0607-16  
Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

**Variance**  
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

**Varnish**  
Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

**Velocity**  
see also Machine speed

**Ventilation**  
Paper machine room ventilation guidelines, 0404-50  
Recommended minimum dryer pocket air requirements, 0404-17  
Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24

**Viscosity**  
Density of aqueous sodium sulfite solution, 0607-18  
Liquid chlorine, 0606-05  
Proper methods of measuring starch adhesive viscosity, 0304-33  
Quality techniques using existing equipment, 0306-11  
Statistical process control of starch viscosity, 0304-15  
Viscosities of spent sulfite liquors at 26.7° C (Oswalt capillary viscometer), 0607-22  
Viscosity of a neutral sulfite spent liquor (Ostwald capillary viscometer), 0607-23  
Viscosity of sodium carbonate solution, 0607-17  
Viscosity of sodium hydroxide solutions, 0606-11  
Viscosity reading procedure for flexographic corrugated inks, 0304-18

**Vision**  
Basic guidelines for image analysis measurements, 0804-09

**Volume**  
Grinder pulpstones – cubical contents, 0605-01  
Identifying anilox volume measuring equipment, 0306-15

**W-**  
**Warning labels**  
see Hazardous materials

**Warpage**  
Go/no go gauge devices for the boxplant, 0304-42  
Statistical process control -- procedures for charting warp, 0304-13
Techniques to minimize twist warp, \textit{0304-50}
Warp in corrugated board, \textit{0304-07}

\textbf{Wash waters}
Using washing water as the vehicle in starch based corrugating adhesive, \textit{0304-44}

\textbf{Washers}
Energy checklist: pulp mill, \textit{0416-24}
Bleaching plant washer efficiency guide, \textit{0606-23}

\textbf{Washing}
Bleaching plant washer efficiency guide, \textit{0606-23}
Recommended pulp bleaching stage designation method, \textit{0606-21}

\textbf{Wastewater treatment equipment}
\textit{see Effluent treatment}

\textbf{Water}
\textit{see also Solubility}
Design engineer decisions tree: paper mill boiler feedwater, \textit{0416-04}
Guidelines for measurement of vacuum pump air flow, \textit{0420-12}
Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), \textit{0607-12}
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, \textit{0416-13}

\textbf{Water content}
\textit{see Moisture content}

\textbf{Water hardness}
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, \textit{0416-03}

\textbf{Water permeability}
Troubleshooting cross-machine direction moisture profile problems, \textit{0404-57}

\textbf{Water removal}
Determination of water removal by wet presses, \textit{0404-01}
High vacuum sheet dewatering, \textit{0404-60}
Methods to minimize sheet rewet in the press section, \textit{0404-59}
Paper machine drying rate, \textit{0404-07}

\textbf{Water resistance}
Techniques for running “WRA” (water resistant starch adhesive), \textit{0304-46}
Understanding wet strength: what are MRA, WRA, and WPA?, \textit{0304-69}

\textbf{Water treatment}
Design engineer decisions tree: paper mill boiler feedwater, \textit{0416-04}
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, \textit{0416-13}

\textbf{Water vapor}
Paper machine room ventilation guidelines, \textit{0404-50}

\textbf{Waterside cracking}
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, \textit{0402-38}

\textbf{Wax}
Common curtain coating problems: causes, detection, and correction, \textit{0304-26}
Curtain coating weight test, \textit{0304-19}

\textbf{Wear resistance}
\textit{see Abrasion resistance}

\textbf{Web tension}
Guidelines for web conveyance and winding tension levels, \textit{0200-01}

\textbf{Webs}
\textit{see also Paper webs}
Guidelines for web conveyance and winding tension levels, \textit{0200-01}

\textbf{Weight}
Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, \textit{0404-20}
Procedure for utilizing statistical control techniques to monitor the tare weight of a run of boxes, \textit{0304-35}

\textbf{Weirs}
Weirs and flumes, \textit{0410-10}

\textbf{Welding}
Guide to the use of stainless steel pipe specifications, \textit{0402-24}
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, \textit{0402-03}
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, \textit{0402-31}
Guidelines for inspection of continuous digesters and impregnation vessels, \textit{0402-27}
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, \textit{0402-25}
Field welding of pin studs in black liquor recovery boilers, \textit{0402-15}

\textbf{Wet bulb temperature}
Relative humidity tables, \textit{0808-06}

\textbf{Wet ends}
Drainage evaluation by mass measurement, \textit{0502-12}
Forming section monitoring, \textit{0502-14}
How to prevent score cracking in a box plant, \textit{0304-37}
Selection criteria for wet end ceramics, \textit{0502-15}

\textbf{Wet felts}
\textit{see also Felts}
Porosity measurement of press felts on the paper machine (HSPT), \textit{0404-29}

\textbf{Wet press}
Determination of water removal by, \textit{0404-01}

\textbf{Wet pressing}
Terminology for high temperature pressing, \textit{0404-48}

\textbf{Wet strength}
Understanding wet strength: what are MRA, WRA, and WPA?, \textit{0304-69}

\textbf{Wet-laid nonwovens}
Pilot paper machines, \textit{0502-16}

\textbf{White liquors}
Recacusticizing material balance equations relating to digester requirements, \textit{0418-02}

\textbf{White water}
Drainage evaluation by mass measurement, \textit{0502-12}
Flow determination by chemical method, \textit{0410-09}
Weirs and flumes, 0410-10

Width
Weight of newsprint rolls, 0502-11

Winding
Guidelines for web conveyance and winding tension levels, 0200-01

Wire
Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

Williams freeness
Interconversion of freeness, 0809-01

Winders
Determination of winder sets per reel, 0502-02

Wiperoll
see Flexography

Wood
Calibration technique for the drum style chip thickness classifier, 0602-03

Wood chips
