Subject Index

Technical Information Papers

This document was last updated January 30, 2024

__A__

Abrasion
Selection criteria for wet end ceramics, 0502-15

Abrasion resistance
Selection criteria for wet end ceramics, 0502-15

Absorption
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Accessibility
Maintenance considerations in new construction and rebuilds, 0408-02

Acoustic Emission
See Nondestructive Tests

Acrylic fibers
see Polyacrylcs, Synthetic fibers

Additives
Techniques for running “WRA” (water resistant starch adhesive), 0304-46

Adhesives
Buying, Storing, and Handling P.V.A. Adhesives Used on Folder Gluers and on Sheet Laminators, 0305-25
Causes and corrections of common corrugator bonding problems, 0304-32
Evaluating glue lap adhesive properties, 0304-16
Procedure for setting up a raw material trial on the corrugator, 0304-01
Starch adhesive preparation and distribution systems: housekeeping, 0304-06
Starch adhesive trial, 0304-22
Statistical process control of starch gelatinization temperature, 0304-14
Statistical process control of starch viscosity, 0304-15
Techniques for bonding modern high-performance liners, 0304-40
Techniques for running “WRA” (water resistant starch adhesive), 0304-46
Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
Understanding and troubleshooting hot melt adhesives, 0304-74
Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44

After dryers
Paper machine drying rate, 0404-07

Agitation
Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Agitators
Guidelines for side-entering stock agitators, 0420-13

Air
Paper machine room ventilation guidelines, 0404-50

Air balance
see Air, Materials balance

Air flow
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
Recommended minimum dryer pocket air requirements, 0404-17
Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
Sheet handling devices, 0404-44

Air jets
Sheet handling devices, 0404-44

Air permeability
Automated Scanning for Moisture Content and Air Permeability on Paper Machine Felts, 0502-21
Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20

Air pollution
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Air staging
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Alignment
Checking the parallel of corrugating rolls with “NCR” paper, 0304-62

Alkali
Specific heat of caustic soda solutions, 0606-07

Alkaline sulfite pulping
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Alkalinity
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

Alumina
Guidelines for Rotary Lime Kiln Refractory, 0416-27
Ammonia
   Solubility of sulfur dioxide, 0607-06
Analysis
   Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Angle of slide
   see Slide angle
Anilox coaters
   In-line coating at the corrugator, 0304-39
Anilox rolls
   see Flexography, Printing cylinders
   Ink metering systems for corrugated flexo presses, 0306-09
Anvil Wear
   Troubleshooting the Die Cutting Section, 0305-39
Approach flow systems
   Headbox approach piping guidelines, 0404-54
Ash
   Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
   Drainage evaluation by mass measurement, 0502-12
   Chemical cleaning guide for press fabrics, 0404-65
Atmosphere
   Testing atmospheres simulating end use conditions, 0808-05
Attenuation
   Headbox approach piping guidelines, 0404-54
Auditing
   Checklist for a properly planned project, 0408-01
Automatic feeders
   see Feeders
Automated Felt Scanner
   Automated Scanning for Moisture Content and Air Permeability on Paper Machine Felts, 0502-21
Automation
   Industry 4.0 Lexicon, 1103-04
Availability
   Definitions of black liquor recovery furnace availability, 0416-02

__B__

Backing Blade
   Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06
Bacteria
   Starch adhesive preparation and distribution systems: housekeeping, 0304-06
Bags
   Paper machine drying rate, 0404-07
Bar Width Reduction (BWR)
   see Product codes
Bar codes
   see Product codes
Bases
   see Hydroxides
Basis weight
   Headbox approach piping guidelines, 0404-54
Batch digesters
   Guidelines for inspecting batch digesters, 0402-22
Batch process
   Measurement of dryer condensing rates (vertical separator method), 0404-18
Bauxite
   Guidelines for Rotary Lime Kiln Refractory, 0416-27
Bearings
   Corrugator bearing clearance checks and their impact, 0304-47
   Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
   Total indicated runout and its impact on combined board quality, 0304-56
   Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03
Bearing failure
   Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03
Biocide
   Using washing water as the vehicle in starch based corrugating adhesive, 0304-44
Biomass
   Performance test procedure for boilers using biomass as fuel, 0416-18
   Sampling procedures for biomass fuel for boiler performance testing, 0416-17
   Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Biomechanics
   see Human factors
Bisulfites
   Physical and chemical properties of magnesia-base pulping solutions, 0607-04
   Solubility of sulfur dioxide, 0607-06
   Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
   Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10
Black liquor
   Field welding of pin studs in black liquor recovery boilers, 0402-15
   Recommended test procedure for black liquor evaporators, 0416-11
   Recovery boiler performance calculation – short form, 0416-01
   Response to contamination of high purity boiler feedwater, 0416-05
   Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Black Oxide
   Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04
Blade
   Paper machine doctor recommendations, 0404-67
Blade coaters
   see also Coaters
   In-line coating at the corrugator, 0304-39
Blade holder
   Paper machine doctor recommendations, 0404-67
Bleach plants
Bleaching plant washer efficiency guide, 0606-23

Bleached board
Paper machine drying rate, 0404-07
Paper machine performance guidelines, 0404-47

Bleaching
Boiling point rise of spent sulfite liquors, 0607-21
Cotton in nonwovens, 1205-02
Chlorine gas curve, 0606-02
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of chlorine gas, 0606-03
Density of milk of lime solution, 0607-05
Energy checklist: pulp mill, 0416-24
Heat of vaporization of liquid chlorine, 0606-04
Recommended pulp bleaching stage designation method, 0606-21
Relative enthalpy (heat content) of sodium hydroxide solutions, 0606-08
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Viscosity of liquid chlorine 0606-05
Viscosity of sodium hydroxide solutions, 0606-11

Bleaching stages
see Bleaching

Blind-drilled rolls
see Vacuum rolls

Blistering
Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17

Blow boxes
Sheet handling devices, 0404-44

Blow-through steam
Recommended Dryer Differential Pressures, 0404-31

Blowdown
see also Blowing

Blowing
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

Board
Pilot paper and wet laid nonwoven machines, 0502-16

Board caliper
see Thickness

Boiler feed water
see Boilers, Feedwater

Boiler tubes
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13

Boilers
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Explanation of recovery boiler leak indications, 0416-23
Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Keys to successful chemical cleaning of boilers, 0416-06
Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Bonding
Techniques for bonding modern high-performance liners, 0304-40

Box compression
see Compression strength

Box flaps
see Flaps

Box machines
Troubleshooting a glue lap problem, 0304-10

Box plants
see Converting plants

Boxes
Corrugated boxplant-list of potential hazards, 0301-01
Critical properties to consider when unitizing, 0304-72
High vacuum sheet dewatering, 0404-60

Broke
Broke loss calculations, 0502-10

Bronze
Guidelines for nondestructive examination of suction roll shells, 0402-19
Weld repairs on new suction roll shells, 0402-17

Burners
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Burst testers
Calibration and maintenance of the burst tester, 0304-24
Butt joints
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

Butt welds
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

CASTI
CADCAM
CONEG
see Regulations
Cadmium
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58
Calcination
Physical data of calcined kaolin-water suspensions, 0106-09
Calcium base liquors
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Calcium bisulfite
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Calcium carbonate
Physical data of calcium carbonate-water suspensions, 0106-01
Calcium hydroxide
Density of milk of lime solution, 0607-05
Calculations
see Computation
Calibration
Basic guidelines for image analysis measurements, 0804-09
Calibration and maintenance of the manually operated micrometer, 0304-30
Calibration and maintenance of the burst tester, 0304-24
Suggestions for developing a box plant quality manual, 0304-49
Caliper
see Thickness
Canadian standard freeness
Interconversion of freeness, 0809-01
Carbon steel
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Carbonates
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Physical data of calcium carbonate-water suspensions, 0106-01
Cartridges
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Cast iron
Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14
Castings
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Caustic soda
see Sodium hydroxide
Causticizing
Energy checklist: pulp mill, 0416-24
Material balance equations relating to digester requirements, 0418-02
Centrifugal Cleaner
Introduction to centrifugal cleaners, 0508-10
Ceramics
Selection criteria for wet end ceramics, 0502-15
Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19
Certification
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Chalk
see Calcium carbonate
Chambered Doctor Blade
Ink metering systems for corrugated flexo presses, 0306-09
Charting
Short-run statistical process control: a basic charting method, 0304-70
Statistical process control - procedures for charting warp, 0304-13
Checklist
see Maintenance
Chemical Cleaning
Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
Chemical preparation
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10
Chemical properties
Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Magnesia-base pulping solutions, 0607-04
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31
Chemical pulps
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

**Chemical Recovery**
- Recaustizing material balance equations relating to digester requirements, 0418-02

**Chemicals**
- Material safety data sheets, what to look for - how to understand them, 0304-38
- Chemical cleaning guide for press fabrics, 0404-65

**Chests**
- See Stock chests

**Chip silos**
- See Chip bins

**Chlorides**
- Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
- Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12

**Chlorine**
- Chlorine gas curve, 0606-02
- Density of chlorine gas, 0606-03
- Heat of vaporization of liquid chlorine, 0606-04
- Viscosity of liquid chlorine, 0606-05

**Chlorine dioxide**
- Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
- Specific gravity of sodium chloride solutions, 0606-10

**Chrome**
- Tests for corrugator roll wear, 0304-53

**Chromium**
- An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58
- Yankee Dryer Thermal Spray Coating, 0425-09

**Clad-steel plate**
- See Plates

**Classification**
- Paper grade classifications, 0404-36

**Clay**
- Kaolin clay pigment index, 0106-06
- Physical data of calcined kaolin-water suspensions, 0106-09
- Physical data of hydrous Kaolin-water suspensions, 0106-02

**Cleaners**
- Catalog of Stock Preparation Pilot Plants, 0502-20

**Cleaning**
- Cleaning anilox rolls: procedures and options, 0306-18
- Cleanup procedures for flexo folder gluers/rotary diecutters, 0305-33
- Daily, weekly, and monthly maintenance checklists, 0305-34
- Dryer fabric cleaning, 0404-38
- Housekeeping guidelines, 0305-32
- Keys to successful chemical cleaning of boilers, 0416-06
- Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
- Paper machine shower recommendations, 0404-61
- Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35

**Cleaning chemicals**
- See Cleansers

**Cleansers**
- Keys to successful chemical cleaning of boilers, 0416-06

**Clogging**
- Nozzle maintenance and clogging, 0420-15

**Clothing**
- See Felts, Machine clothing

**Coating**
- Kaolin clay pigment index, 0106-06

**Coating color**
- See Color

**Coating thickness**
- Tests for corrugator roll wear, 0304-53

**Coatings**
- Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
- Tests for corrugator roll wear, 0304-53

**Coefficient of friction**
- See Friction factor

**Combination Metering System**
- Ink metering systems for corrugated flexo presses, 0306-09

**Combined boards**
- Common curtain coating problems: causes, detection, and correction, 0304-26
- Obtaining off the corrugator for use in statistical process control procedures, 0304-12
- Total indicated runout and its impact on combined board quality, 0304-56
- How to Minimize Rolling Scores in Diecutting Operations, 0304-64

**Compressibility**
- Objective Determination of the Haptic Properties of Tissue Products, 0808-07

**Compression**
- Corrugated caliper: why is it so important?, 0304-04

**Compression resistance**
- See Compression strength

**Compression strength**
- Corrugated caliper: why is it so important?, 0304-04
- Obtaining a combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
- Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

**Computation**
- Paper machine drying rate, 0404-07

**Computer-assisted**
- See CADCAM

**Concentration**
- Best Practices for Consistency Measurement, 1101-07

**Concentricity**
- Total indicated runout and its impact on combined board quality, 0304-56

**Condensate**
- Application of dryer bars, 0404-35
Condensates
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Measurement of dryer condensing rates (continuous method), 0404-03
Measurement of dryer condensing rates (vertical separator method), 0404-18
Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Yankee dryer steam condensing rates, 0404-49
Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04
Condensation
Dryer condensing rates (batch method), 0404-02
Dryer condensing rates (continuous method), 0404-03
Condensing rates
see Condensation
Conditioning
Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
Testing atmospheres simulating end use conditions, 0808-05
Conductivity
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Conical refiners
Conical refining intensity, 0508-07
Conservation
Paper Machine Water Efficiency, 0502-22
Consistency
Drainage evaluation by mass measurement, 0502-12
Guidelines for Retention Measurements, 0502-13
Generalized method for determining the pipe friction loss of flowing pulp suspensions, 0410-14
Optimum consistency for pumping pulp, 0410-15
Best Practices for Consistency Measurement, 1101-07
Construction materials
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31
Consumption
Paper Machine Water Efficiency, 0502-22
Contact bearings
see Bearings
Contact technique
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Container boards
Friction -- slide angle, 0304-34
Contaminants
see Impurities
Contamination
see Pollution control
Continuous digesters
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Contraction
Flow from a 45° slice, 0410-03
Flow from a nozzle (slice) with inclined upper lip, 0410-04
Flow from a vertical slice, 0410-02
Control charts
see Charting
Control systems
Industry 4.0 Lexicon, 1103-04
Short-run statistical process control: a basic charting method, 0304-70
Conversion factors
Units of measurement and, 0800-01
Converting factors
Moisture content of paper: terminology and conversion, 0808-02
Converting plants
Boxplant quality measurement: why test?, 0304-02
Corrugated boxplant - list of potential hazards, 0301-01
Machinery considerations and selection, 0305-06
Coolers
Guidelines for Rotary Lime Kiln Refractory, 0416-27
Copper
The role of copper in a printing ink, 0304-61
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Copper sulfate
Tests for corrugator roll wear, 0304-53
Cores
Determination of winder sets per reel, 0502-02
Reel diameter for various reel spool and roll core sizes, 0502-03
Correlation
QCS Dynamic Sensor Correlation Sampling Method, 1101-04
Moisture Dynamic Correlation Method, 1101-05
Corrosion
see also Corrosion inhibitors
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Guide to the use of stainless steel pipe specifications, 0402-24
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for inspecting batch digesters, 0402-22
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Guidelines for nondestructive examination of suction roll shells, 0402-19
Nozzle maintenance and clogging, 0420-15
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Corrosion inhibitors
Keys to successful chemical cleaning of boilers, 0416-06

Corrosion prevention
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03

Corrugated boards
The role of copper in a printing ink, 0304-61
Critical properties to consider when unitizing, 0304-72
Important quality parameters of a printing ink, 0304-59
Obtaining caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control friction-slide angle, 0304-34
Techniques to minimize twist warp, 0304-50
Warp in corrugated board, 0304-07

Corrugated boxes
see Boxes, Corrugated boards

Corrugated containers
see Boxes, Corrugated board, Folder gluers, Die cutters

Corrugated medium
An alternative method for designating flute sizes, 0302-04

Corrugating
An alternative method for designating flute sizes, 0302-04

Corrugating adhesives
see Adhesives

Corrugating machines
Checking for coating wear on corrugating rolls, 0304-73
Checking the flute depth of corrugating rolls, 0304-75
Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
Conducting a corrugator temperature audit, 0304-65
Corrugator bearing clearance checks and their impact, 0304-47
Impact of doublebacker hot plate level on board quality and how to measure it, 0304-66
Improved techniques to measure corrugator glue machine meter gaps, 0304-68
Prevention of score cracking in a box plant, 0304-37
Starch viscosity in corrugating adhesives, 0304-15
Tests for corrugator roll wear, 0304-53

Corrugating medium
Causes and corrections of common corrugator bonding problems, 0304-32
Edge crush test (ECT): its relationship to box compression and its derivation from containerboard edge stiffness, 0304-09

Crown
see Roll crown

Crush
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Cubical contents
see Volumetry

Curing
Paper machine performance guidelines, 0404-47
Paper machine drying rate, 0404-07
Procedure for setting up a raw material trial on the corrugator, 0304-01
Splicer defects and cures, 0304-31

Corrugating plants
see Operations

Corrugating rolls
see Rolls

Corrugator-double backer
see Corrugating machines

Corrugators
see also Corrugating machines
Procedure for setting up a raw material trial on the corrugator, 0304-01

Costs
Press section economic evaluation, 0404-22

Cotton
In nonwovens, 1205-02

Couch rolls
Paper Machine Vacuum System Selection Factors, 0502-01

Cover
Maintenance considerations in new construction and rebuilds, 0408-02
Rotary die cutter urethane anvil cover maintenance, 0305-35

Cracks
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Guidelines for inspection and nondestructive testing in power and recovery boilers, 0402-38
Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for nondestructive examination of suction roll shells, 0402-19
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Creasing
Troubleshooting the Die Cutting Section, 0305-39

Crescent formers
Paper Machine Vacuum System Selection Factors, 0502-01

Cross direction
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Statistical process control -- procedures for charting warp, 0304-13
Troubleshooting cross-machine direction moisture profile problems, 0404-57

Crown
see Roll crown

Crush
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Cubical contents

Paper machine room ventilation guidelines, 0404-50

**Information systems**
Industry 4.0 Lexicon, 1103-04

**Infrared detectors**
Troubleshooting cross-machine direction moisture profile problems, 0404-57

**Infrared dryers**
Drying and curing techniques for in-line flexographic printing, 0306-06

**Ink**
The role of copper in a printing ink, 0304-61
Quality parameters of a printing ink, 0304-59
Quality techniques using existing equipment, 0306-11
Reduction or elimination of ink and/or varnish smear
when printing and rotary die cutting in one pass, 0305-40
Viscosity reading procedure for flexographic corrugated inks, 0304-18

**Ink printing proofs**
Proofing of a flexo printing ink, 0304-60

**Inorganic salts**
Equilibrium relative humidities over saturated salt solutions, 0808-03

**Inspection**
Guidelines for inspecting batch digesters, 0402-22
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
Guidelines for routine periodic inspection and testing of cast iron Yankee and MG dryers, 0425-01
Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13
Inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Inspection of continuous digesters and impregnation vessels, 0402-27
Design, Operation, Performance Evaluation and Inspection guidelines for Yankee hood systems, 0425-02
Guidelines for nondestructive examination of suction roll shells, 0402-19
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Safe and Reliable Start-Up and Shut-Down of Yankee Hood Air Systems, 0425-07
Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26
Guidelines for the In-Service Detection of Acoustic Emission Indications in Yankee Dryers, 0425-08
Yankee Dryer Thermal Spray Coating, 0425-09

**Installation**
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

**Instrumentation**
Press section monitoring, 0404-19

**Instruments**
Forming section monitoring, 0502-14

**Insulating**
Guidelines for Rotary Lime Kiln Refractory, 0416-27

**Insulation**
Guidelines for Rotary Lime Kiln Refractory, 0416-27

**Intensity**
Conical refining intensity, 0508-07

**Internal bond strength**
Troubleshooting a glue lap problem, 0304-10

**Drying and curing techniques for in-line flexographic printing**, 0306-06

**Iron**
Response to contamination of high purity boiler feedwater, 0416-05
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

**Jet dryers**
Methods of evaluating high velocity dryers, 0404-05

**Jet velocity**
Head of Stock Behind Slice (Head/Jet and Slice Flow Rate Relationships), 0410-05

**Jets**
Flow from a 45° slice, 0410-03
Flow from a nozzle (slice) with inclined upper lip, 0410-04
Flow from a vertical slice, 0410-02

**Joints**
Troubleshooting a glue lap problem, 0304-10

**Jordans**
see Conical refiners

**Journals (Documents)**
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

**Jumbo rolls**
Reel diameter for various reel spool and roll core sizes, 0502-03

**Kaolin**
Kaolin clay pigment index, 0106-06

**Kraft papers**
Paper machine drying rate, 0404-07
Paper machine performance guidelines, 0404-47

**Kraft pulping**
Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10

**Labels**
Understanding hazardous materials warning labels, 0304-41

**Laboratories**
Paper test rooms: design considerations, 0808-04

**Laminates**
Guidelines for Tension During Web Conveyance and for Winding, 0200-01

**Languages**
Common or local names for a nonwood fiber raw material, 0609-01

**Lead**
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58
Leakage
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
Explanation of recovery boiler leak indications, 0416-23

LED UV
Drying and curing techniques for in-line flexographic printing, 0306-06

Lignosulfonates
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO3)2; solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Lime
Guidelines for Rotary Lime Kiln Refractory, 0416-27

Lime Kiln
Guidelines for Rotary Lime Kiln Refractory, 0416-27

Lime mud
see White liquor mud

Lime reburning
Energy checklist: pulp mill, 0416-24

Lime-base solutions

Overview of the selection process for a laser engraved ceramic anilox roll, 0306-17

Printing cylinders
Cleaning anilox rolls: procedures and options, 0306-18
Identifying anilox roll volume measuring equipment, 0306-15
Overview of the selection process for a laser engraved ceramic anilox roll, 0306-17

Printing ink
see Ink

Printing papers
Paper machine drying rate, 0404-07

Printing plates
Quality techniques using existing equipment, 0306-11
Computer assisted mounting systems, 0306-02

Processes
Safe and Reliable Start-Up and Shut-Down of Yankee Hood Air Systems, 0425-07

Process control
Obtaining combined board caliper off the corrugator for use in statistical procedures, 0304-12
Short-run statistical process control: a basic charting method, 0304-70
Starch viscosity in corrugating adhesives, 0304-15
Statistical of starch gelatinization temperature, 0304-14
Statistical process control friction-slide angle, 0304-34
Statistical process control -- procedures for charting warp, 0304-13

Process Water
Flow determination by chemical method, 0410-09

Production
Papemaker’s formulas, 0502-17

Profile
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Profiles
Troubleshooting cross-machine direction moisture profile problems, 0404-57
Steam shower applications in the forming and press section, 0404-58

Profiling Screws
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Project planning
see Planning

Projects
Yankee Dryer Thermal Spray Coating, 0425-09

Protective coatings
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0404-32

Psychrometric charts
see also Humidity
Psychrometric charts, 0404-45

Pull rolls
Pulp mill equipment
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0404-32
Horizontal end suction centrifugal stock pumps, 0420-10

Pulp mills
Energy checklist: pulp mill, 0416-24
Fluoropolymer properties and applications in pulp and paper mills, 0402-37

Pulpers
Catalog of Stock Preparation Pilot Plants, 0502-20

Pulping
Density of chlorine gas, 0606-03

Pulpstones
Grinder pulpstones: cubical contents, 0605-01
Pulpstone speed chart, 0605-02

Pulp
Generalized method for determining the pipe friction loss of lowing pulp suspensions, 0410-14
Optimum consistency for pumping pulp, 0410-15
Paper machine drying rate, 0404-07
Pilot paper and wet laid nonwoven machines, 0502-16

Pulp Cleaning
Introduction to centrifugal cleaners, 0508-10

Pumping
Generalized method for determining the pipe friction loss of lowing pulp suspensions, 0410-14
Optimum consistency for pumping pulp, 0410-15

Pumps
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Horizontal end suction centrifugal stock pumps, 0420-10

Purchase
Buying, Storing, and Handling P.V.A. Adhesives Used on Folder Gluers and on Sheet Laminators, 0305-25
PVA
Buying, Storing, and Handling P.V.A. Adhesives Used on Folder Gluers and on Sheet Laminators, 0305-25

Pyrometry
Dryer surface temperature measurement, 0404-39

Qualification
Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21

Quality
Box plant quality measurement: why test?, 0304-02
Important quality parameters of a printing ink, 0304-59
Quality techniques using existing equipment, 0306-11
Starch adhesive trial, 0404-22
Suggestions for developing a box plant quality manual, 0304-49

Quality control
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13
Liquid penetrant testing of new suction roll shells, 0402-11

Quality manual
see Quality

Radiography
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Raw materials
Procedure for setting up a raw material trial on the corrugator, 0304-01

Raw Yankee
Guidelines for usage of MAP on raw Yankee surfaces, 0425-05

Recausticizing
see Causticizing

Reclaimed fibers
Paper Machine Clothing Cleaning and Conditioning for
Recycled Fiber Use, 0404-51

**Seals**
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

**Sealants**
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12

**Seamless materials**
Guide to the use of stainless steel pipe specifications, 0402-24

**Selection**
Machinery considerations and selection, 0305-06

**Selective catalytic reduction**
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

**Selective noncatalytic reduction**
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

**Semichemical pulps**
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO₃)₂; solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C and other temperatures, 0607-22

**Sensitivity**
Basic guidelines for image analysis measurements, 0804-09

**Sensors**
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
QCS Dynamic Sensor Correlation Sampling Method, 1101-04
Moisture Dynamic Correlation Method, 1101-05

**Servicing**
Maintenance considerations in new construction and rebuilds, 0408-02

**Setting time**
Understanding and troubleshooting hot melt adhesives, 0304-74

**Shafts**
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34

**Shape**
Total indicated runout and its impact on combined board quality, 0304-56

**Sheet water content**
see Moisture content

**Shells**
Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
Weld repairs on new suction roll shells, 0402-17

**Shock drying**
Terminology for high temperature pressing, 0404-48

**Showers**
Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
Paper machine shower recommendations, 0404-61
Press fabric dewatering and conditioning — suction box (Uhle box) design and vacuum requirements 0404-27
Steam shower applications in the forming and press section, 0404-58
Chemical cleaning guide for press fabrics, 0404-65

**Silica**
Guidelines for Rotary Lime Kiln Refractory, 0416-27
Response to contamination of high purity boiler feedwater, 0416-05
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Paper Machine Water Efficiency, 0502-22

**Silos**
Headbox approach piping guidelines, 0404-54
Single Facers
Procedure for setting up a raw material trial on the corrugator, 0304-01

Singlefacers
Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17
Alternative method for designating flute sizes, 0302-04
Causes and corrections of common corrugator bonding problems, 0304-32
Checking for coating wear on corrugating rolls, 0304-73
Checking the flute depth of corrugating rolls, 0304-75
Parallel of corrugating rolls with “NCR” paper, 0304-62
Preventing score cracking in a box plant, 0304-37
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
Splicer defects and cures, 0304-31

Siphons
Thermocompressor Applications for Paper Drying, 0404-66

Skid
Material handling considerations for flexo folder gluers, 0305-54
Recommended Dryer Differential Pressures, 0404-31

Slabbing
Broke loss calculations, 0502-10

Slices
Flow from a 45° slice, 0410-03
Flow from a nozzle (slice) with inclined upper lip, 0410-04
Head of Stock Behind Slice (Head/Jet and Slice Flow Rate Relationships), 0410-05
Flow from a vertical slice, 0410-02

Slide angle
Statistical process control, friction, 0304-34

Slotting
Machinery considerations and selection: yoked scoring slotting section, 0305-53

Slurry
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of calcium carbonate-water suspensions, 0106-01
Physical data of hydrous Kaolin-water suspensions, 0106-02

Slushed paper stock
see Paper stock

Smearing
Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

Smog
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Smoothness
Objective Determination of the Haptic Properties of Tissue Products, 0808-07

Sodium
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Sodium bicarbonate
Density of aqueous sodium bicarbonate solution, 0607-13

Sodium bisulfite
Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

Sodium borate
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08

Sodium carbonate
Density of aqueous sodium carbonate solution, 0607-14
Specific heat of sodium carbonate solution, 0607-15
Vapor pressure of sodium carbonate solution, 0607-16
Viscosity of sodium carbonate solution, 0607-17

Sodium chlorate
Sodium chlorate (NaClO3) safe handling and storage, 0606-31

Sodium chloride
Specific gravity of sodium chloride solutions, 0606-10

Sodium hydroxide
Caustic soda (NaOH) safe storage and handling, 0606-27
Relative enthalpy of solution, 0606-08
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
Specific gravity and density of caustic soda solutions, 0606-20
Specific heat of caustic soda solutions, 0606-07
Viscosity of sodium hydroxide solutions, 0606-11

Sodium sulfite
Density of aqueous sodium sulfite solution, 0607-18

Solids content
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of calcium carbonate-water suspensions, 0106-01
Physical data of hydrous Kaolin-water suspensions, 0106-02

Solubility
Solubility of sulfur dioxide, 0607-06
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Solutions
Equilibrium relative humidities over saturated salt solutions, 0808-03
Specific heat of caustic soda solutions, 0606-07

Sorption
Cotton in nonwovens, 1205-02

Soot blowers
Recovery boiler sootblowers: practical guidelines, 0416-20
Recovery boiler sootblowers: the basics, 0416-19
Sootblower Safety and Upgrade Guidelines, 0416-28

SPC techniques
see Statistical methods

Specialty coating pigment
see Pigment
Specialty papers
Paper machine performance guidelines, 0404-47

Specific gravity
see Density

Specific heat
Specific heat of caustic soda solutions, 0606-07
Specific heat of sodium carbonate solution, 0607-15

Specifications
Guideline specification for procurement of an economizer for a recovery boiler, 0416-21
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

Speed
see Velocity

Spent sulfite liquors
Density of aqueous sodium sulfite solution, 0607-18

Splicers
Splicer defects and cures, 0304-31

Spools
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Reel diameter for various reel spool and roll core sizes, 0502-03

Spunlaced fabric
Cotton in nonwovens, 1205-02

Spray coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Squaring
see Squared papers, Trimming

Stackers
Multiple-out rotary diecut stacking, 0305-47
Stacking off the rotary diecutter, 0305-46

Stacking
Corrugated caliper: why is it so important?, 0304-04

Stacking strength
see Compression strength

Stainless steel
Guide to the use of stainless steel pipe specifications, 0402-24
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Guidelines for nondestructive examination of suction roll shells, 0402-19
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Weld repairs on new suction roll shells, 0402-17

Standard conditions
Testing atmospheres simulating end use conditions, 0808-05

Starch
Starch adhesive preparation and distribution systems: housekeeping, 0304-06
Starch adhesive trial, 0304-22

Statistical process control of starch gelatinization temperature, 0304-14
Statistical process control of starch viscosity, 0304-15
Techniques for running “WRA” (water resistant starch adhesive), 0304-46
Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44

Starch conversion
Statistical process control of starch gelatinization temperature, 0304-14

Statistical analysis
How to perform a gauge repeatability and reproducibility study, 0304-71
Obtaining combined board caliper off the corrugator for use statistical process control procedures, 0304-12
Starch viscosity in corrugating adhesives, 0304-15

Statistical distribution
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Statistical methods
Boxplant quality measurement: why test?, 0304-02
Obtaining combined board caliper off the corrugator, 0304-12
Procedures for charting warp, 0304-13
Procedures for utilizing statistical control techniques to monitor the tare weight of a run of boxes, 0304-35
Short-run statistical process control: a basic charting method, 0304-70
Statistical process control: friction - slide angle, 0304-34
Statistical process control of starch gelatinization temperature, 0304-14
Statistical process control of starch viscosity, 0304-15
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Statistical process control
see Statistical methods

Statistical quality control
see Statistical methods

Statistics
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Obtaining combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Starch viscosity in corrugating adhesives, 0304-15
Statistical process control of starch gelatinization temperature, 0304-14

Status reports
see Reporting

Steam
Application of dryer bars, 0404-35
Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for routine periodic inspection and testing of cast iron Yankee and MG dryers, 0425-01
Response to contamination of high purity boiler feedwater, 0416-05
Steam shower applications in the forming and press section, 0404-58
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Yankee dryer steam condensing rates, 0404-49
Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04
Steam chests
Terminology for high temperature pressing, 0404-48
Steam pressure
see Pressure gradient
Step-Up Strip
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06
Sterilization
