

# Table of Contents

Foreword . . . . .	iii
Contributors to Past Editions . . . . .	iv
Contributors to the Seventh Edition . . . . .	v
Part 1: Corrugating Problems . . . . .	1
Steve Rote, Kevin Monzingo, and Kellcie Waters, Metsä Group	
Intro to Corrugating Troubleshooting . . . . .	3
A. Singlefacer and Doublebacker Defects	
Intro to Corrugating Troubleshooting . . . . .	3
Blisters . . . . .	4
Cockles . . . . .	8
Wash boarding . . . . .	9
Corrugations—Loose . . . . .	10
Zipper bonding . . . . .	13
Singlefacer Liner Loose Along Slit Edge . . . . .	14
Doublebacker Liner Loose Along Slit Edge . . . . .	16
Spotty Adhesive Pattern on Singleface Side . . . . .	18
Spotty Adhesive Application on Doublebacker Side . . . . .	19
Warped Board—Normal . . . . .	20
Warped Board—Reverse . . . . .	21
Warped Board—“S”. . . . .	22
Warped Board—Machine Direction . . . . .	23
Warped Board—Twist . . . . .	24
Flutes Formed Low . . . . .	25
Flute Formation, Caliper Loss, and Flat Crush . . . . .	26
Corrugations—Leaning . . . . .	28
Corrugations—Cut at Fingers . . . . .	29
Corrugations—Cut or Fractured . . . . .	30
Dry Streaks at Fingers on Singlefacer Side. . . . .	31
Dry Streaks at Fingers on Doublebacker Side . . . . .	33
Liner Damaged at Fingers . . . . .	34
Corrugations—High and Low . . . . .	35
Score Cracking or Cutting at Corrugator. . . . .	37
Score Cracking or Checking at Flexo-Folder Gluers, Die Cutters, or Printing Presses. . . . .	38

Slitting and/or Cutoff Ragged . . . . .	.40
Facing and Medium Edges not Properly Aligned (Offline) . . . . .	.41
Singleface Liner Damaged by Excessive Pressure (Pressure Roll Cutting) . . . . .	.42
Wrinkles in Liners or Corrugating Medium . . . . .	.44
Wet Board . . . . .	.45
Dimensions . . . . .	.46
B. Fingerless Singlefacers Defects	
Defects Related to the use of Fingerless Singlefacers . . . . .	.47
C. Splicer Defects	
Paper wrinkles / tension warp . . . . .	.56
Paper web slack on one side . . . . .	.56
Missed splices . . . . .	.57
Missed “end of roll” splicing at roll core . . . . .	.58
No Brake . . . . .	.58
Splice Failure . . . . .	.58
Tear Outs . . . . .	.59
Slack in web while running or immediately core; after splicing . . . . .	.59
D. Corrugating Roll Defects	
Typical New Corrugating Roll Pressure Patterns . . . . .	.61
Uneven Corrugating Roll Nip Pressure Loading . . . . .	.62
Uneven Corrugating Roll Nip Pressure—High in Center . . . . .	.63
Uneven Corrugating Roll Nip Pressure—Low in Center . . . . .	.64
Misaligned—Corrugating Rolls Not Parallel . . . . .	.65
Overall Corrugating Roll Wear . . . . .	.66
Worn Out Rolls . . . . .	.67
Excessive Wear around Finger Slots Lower Corrugating Roll . . . . .	.68
Pitted Corrugating Rolls . . . . .	.69
Dirty Corrugating Rolls . . . . .	.70
Damaged Corrugating Rolls . . . . .	.71
Fractured or Cut Flutes . . . . .	.72
E. Visual Glue Line References	
Singlefacer—Target . . . . .	.73
Singlefacer—Dirty Glue Roll, Wide Applicator Gap (Applicator Glue Roll to Lower Corrugator Roll) . . . . .	.74
Singlefacer—Adhesive Slinging . . . . .	.75

Singlefacer—Finger Lines . . . . .76

Singlefacer—Vacuum Lines . . . . .77

Singlefacer—Start of a Wet Streak/Wet Streaks . . . . .78

Singlefacer—Fluff Out . . . . .79

Singlefacer—Speed Ratio (Over/Under Speed) . . . . .80

Singlefacer—Light Glue Lines . . . . .81

Singlefacer—Heavy Glue Lines . . . . .82

Singlefacer—Low Adhesive Viscosity . . . . .83

Singlefacer—High Adhesive Viscosity. . . . .84

Doublebacker—Target . . . . .85

Doublebacker—Light Glue Lines . . . . .86

Doublebacker—Heavy Glue Lines . . . . .87

Doublebacker—Excessive Brake . . . . .88

Doublebacker—Debris Wiping Starch . . . . .89

Doublebacker—Low Viscosity Adhesive . . . . .90

Doublebacker—Wide Gap—Rider to Glue Roll. . . . .91

Doublebacker—Speed Ratio (Over/Under) . . . . .92

Doublebacker—High Viscosity Adhesive—25 Quad Roll. . . . .93

Doublebacker—Blow Outs . . . . .94

Doublebacker—High Lows . . . . .95

Doublebacker—Adhesive Slinging . . . . .96

Doublebacker—Bridge Web Tension . . . . .97

Soak Tank Versus Microscope . . . . .98

Flute Washboarding. . . . .99

Part 2: Printing Problems

Walt Hickman, Thomas Staal, Coastal Container, and Richard P. Target, On Target Consultants

Introduction—Flexo Printing Defects . . . . . 103

A. Printing Defects

Dimensions—Incorrect . . . . . 106

Printing Plates—Incorrect Layout . . . . . 107

Printing Plates—Poor Condition. . . . . 108

Poor Definition . . . . . 109

Distorted Image. . . . . 110

Register . . . . . 111

Printing Crush. . . . . 112

Ink—Incorrect Color . . . . .	113
Ink—Poor Coverage. . . . .	114
Poor Trapping / Overprint. . . . .	116
Ink Smearing /Tracking . . . . .	117
Dirty Printing . . . . .	119
Ink Fill In . . . . .	120
Ink Voids . . . . .	121
Print Askew . . . . .	122
Haloing . . . . .	123
Striations . . . . .	124
Washboard Print . . . . .	125
Ink Foaming. . . . .	126
Pinholes or Fisheyes . . . . .	127
Dark or Dirty Print Color . . . . .	128
Mottled Print . . . . .	129
Uneven Print . . . . .	130
Inconsistent Print Color . . . . .	131
Dot Bridging . . . . .	132
Weak Print Color . . . . .	133
Insufficient Ink . . . . .	134
B. Sample Anilox Rolls . . . . .	135
Anilox Roll References . . . . .	137
Sample Anilox Rolls. . . . .	138
Summary: Sample Anilox Rolls. . . . .	139

Part 3: Die Cutting Problems

Rick Putch, National Steel Rule and Richard P. Target, On Target Consultants

Die Cutting Problems . . . . .	153
Unintentional Biased Blanks . . . . .	157
Poor Crease Quality. . . . .	158
Finished Product Not Releasing from Die . . . . .	159
Poor Scrap Removal and Hanging Trim . . . . .	160
Flaking and Fractured Edges on Diecuts. . . . .	161
Inconsistent / Sporadic Cutting . . . . .	162
Severely Damaged and Broken Tooling . . . . .	163
Crushing of Combined Board . . . . .	164

Unacceptable Print Register. . . . . 165  
 Dimensional Instability . . . . . 166  
 Accelerated Anvil Wear. . . . . 167  
 Unacceptable Set Up Times. . . . . 168  
 Controlling Wrinkling of Die Cuts. . . . . 169  
 Die Board Mounting Issues . . . . . 170  
 Failing to Hold Together When Nicked . . . . . 171  
 Improving Machine Uptime. . . . . 172  
 Improving Retail Ready Packaging Results . . . . . 173  
 Deflection Problems . . . . . 174  
 Malfunction of Mechanical Stripping . . . . . 175  
 Stacking and Delivery Challenges. . . . . 176

Part 4: Gap Variation and Its Causes

Peter Sauer, Sauer System, Emite Rose, Consolidated Machine Resources,  
 and Richard P. Target, On Target Consultants

Introduction 179

A. Feed Section Issues

Introduction. . . . . 183  
 Sheets do not feed . . . . . 184  
 Sheets double-feed . . . . . 185  
 Sheets crushed during feeding . . . . . 186  
 Sheets slipping . . . . . 187  
 Skewing Sheets . . . . . 187

B. Slotting Section Issues

Introduction. . . . . 187  
 Scoring Issues—Weak Score Lines . . . . . 189  
 Scoring Issues—Weak Glue Tab Score Line. . . . . 190  
 Scoring Issues—Rolling Scores . . . . . 191  
 Scoring Issues—Liner Fracturing . . . . . 192  
 Slotting Section Issues—“Footballing” bundles . . . . . 193  
 Slotting Section Issues—Ragged Slotting . . . . . 194  
 Slotting Section Issues—Jumping Slots . . . . . 195  
 Remedies if all slots have jumped. . . . . 195  
 Remedies if one slot has jumped . . . . . 196  
 Slotting Section Issues—Ragged Edge Trim . . . . . 197

Slotting Section Issues—Center-lining Issues . . . . .	198
Slotting Section Issues—Skewed Blanks . . . . .	199
Slotting Section Issues—Hanging Glue Tabs—Soft Anvil Systems . . . . .	200
Applies to soft anvil and steel-to-steel systems . . . . .	201
Soft anvil specific . . . . .	201
Steel-to-steel specific . . . . .	201
C. Folding Section Issues	202
Introduction. . . . .	202
Jam-ups at the folding section entrance . . . . .	203
Jamming occurs at the folding section exit . . . . .	204
Twisting, skewing, and slippage in the folding section . . . . .	205
Fishtailing in the rails . . . . .	206
D. Counter-Ejector Issues	207
Introduction. . . . .	207
Jam-ups . . . . .	208
Damaged sheets . . . . .	209
Improper transfer . . . . .	210
Subject Index	211
Standards Subject Index	259
Useful Methods Subject Index	301
