

AMERICAN BALER

About American Baler Company

- Leading manufacturer of horizontal recycling balers since 1945
- Located in Bellevue, Ohio
- American Baler specializes in high production, efficient balers that are designed to keep energy costs and baling wire consumption to a minimum

Current Solution for Corrugated Box Plants

American's Narrow Body Line of Balers

PAC and NN Series

- 29" Wide x 43" High Cross Section
- Single 30 up to Twin 30hp Power Pack

Limited Facility Space

Limited Charge Capacity

Emerging Opportunity

- New Larger / Higher Production Facilities
 - Wider, higher speed corrugators
 - Facilities with 10+ converting lines
 - 30% Faster than 5 years ago
 - Limited floor space for multiple balers
 - Pressure on labor

Our Solution

Model 5042WN-10T50

- Increased throughput
 - Twin 50hp Power Pack
- Increased the capacity 40%
 - Throughput of 21,553 cf/hr
- Reduced material handling
 - 50% Increase to bale weight
 - 2400lb Bale – Less trips to load a truck

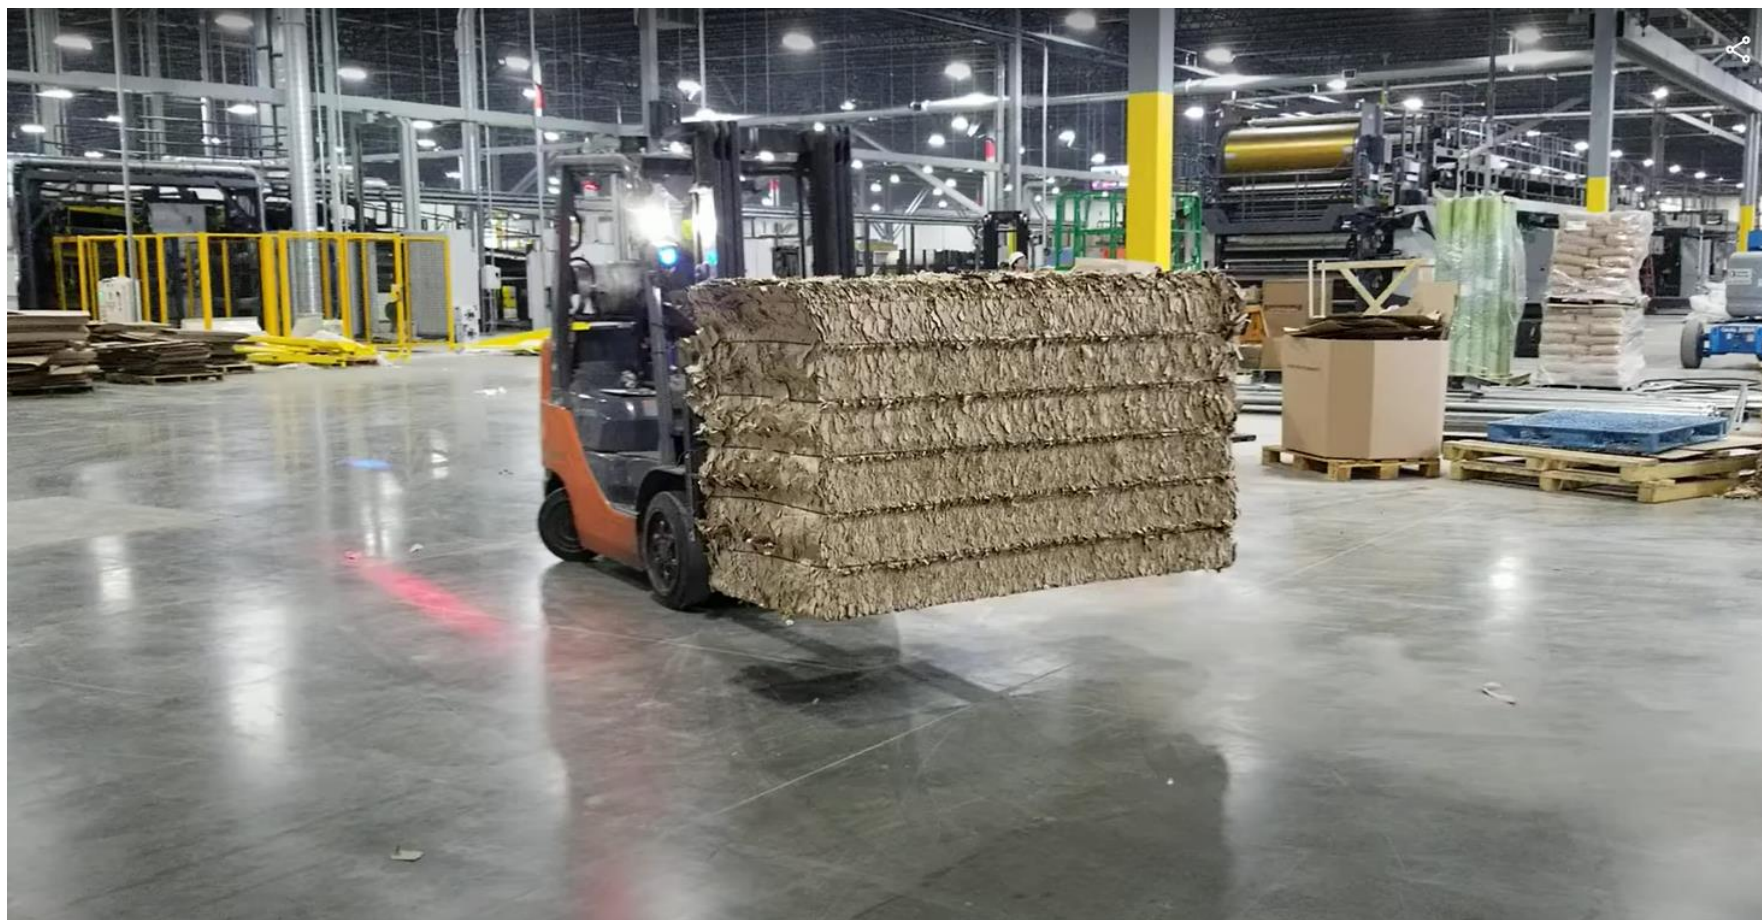

High performance, efficient power unit

Reduced Material Handling

Productivity Option - Bulk Wire System

Productivity Option – Bale Runout Sensor

Solution – 5042WN-10T50 Summary

- Reduced material handling
- Increased charge capacity
- Throughput to match facility production demands
- Category 3 Safety Circuits & Trap Key Interlocks
