

CorrBox by Baumer hhs

A Greener Future

Ken Robinson

What's new?

Easier to operate interface

Simpler to maintain design

No UV tracer needed in glue

Extend your glue supply with savings of up to 60%

Run faster, cleaner and longer

Monitor your production electronically

What's **NOT** new?

No smearing, non-contact gluing

Same reliable and proven high pressure glue delivery

North American parts warehouse

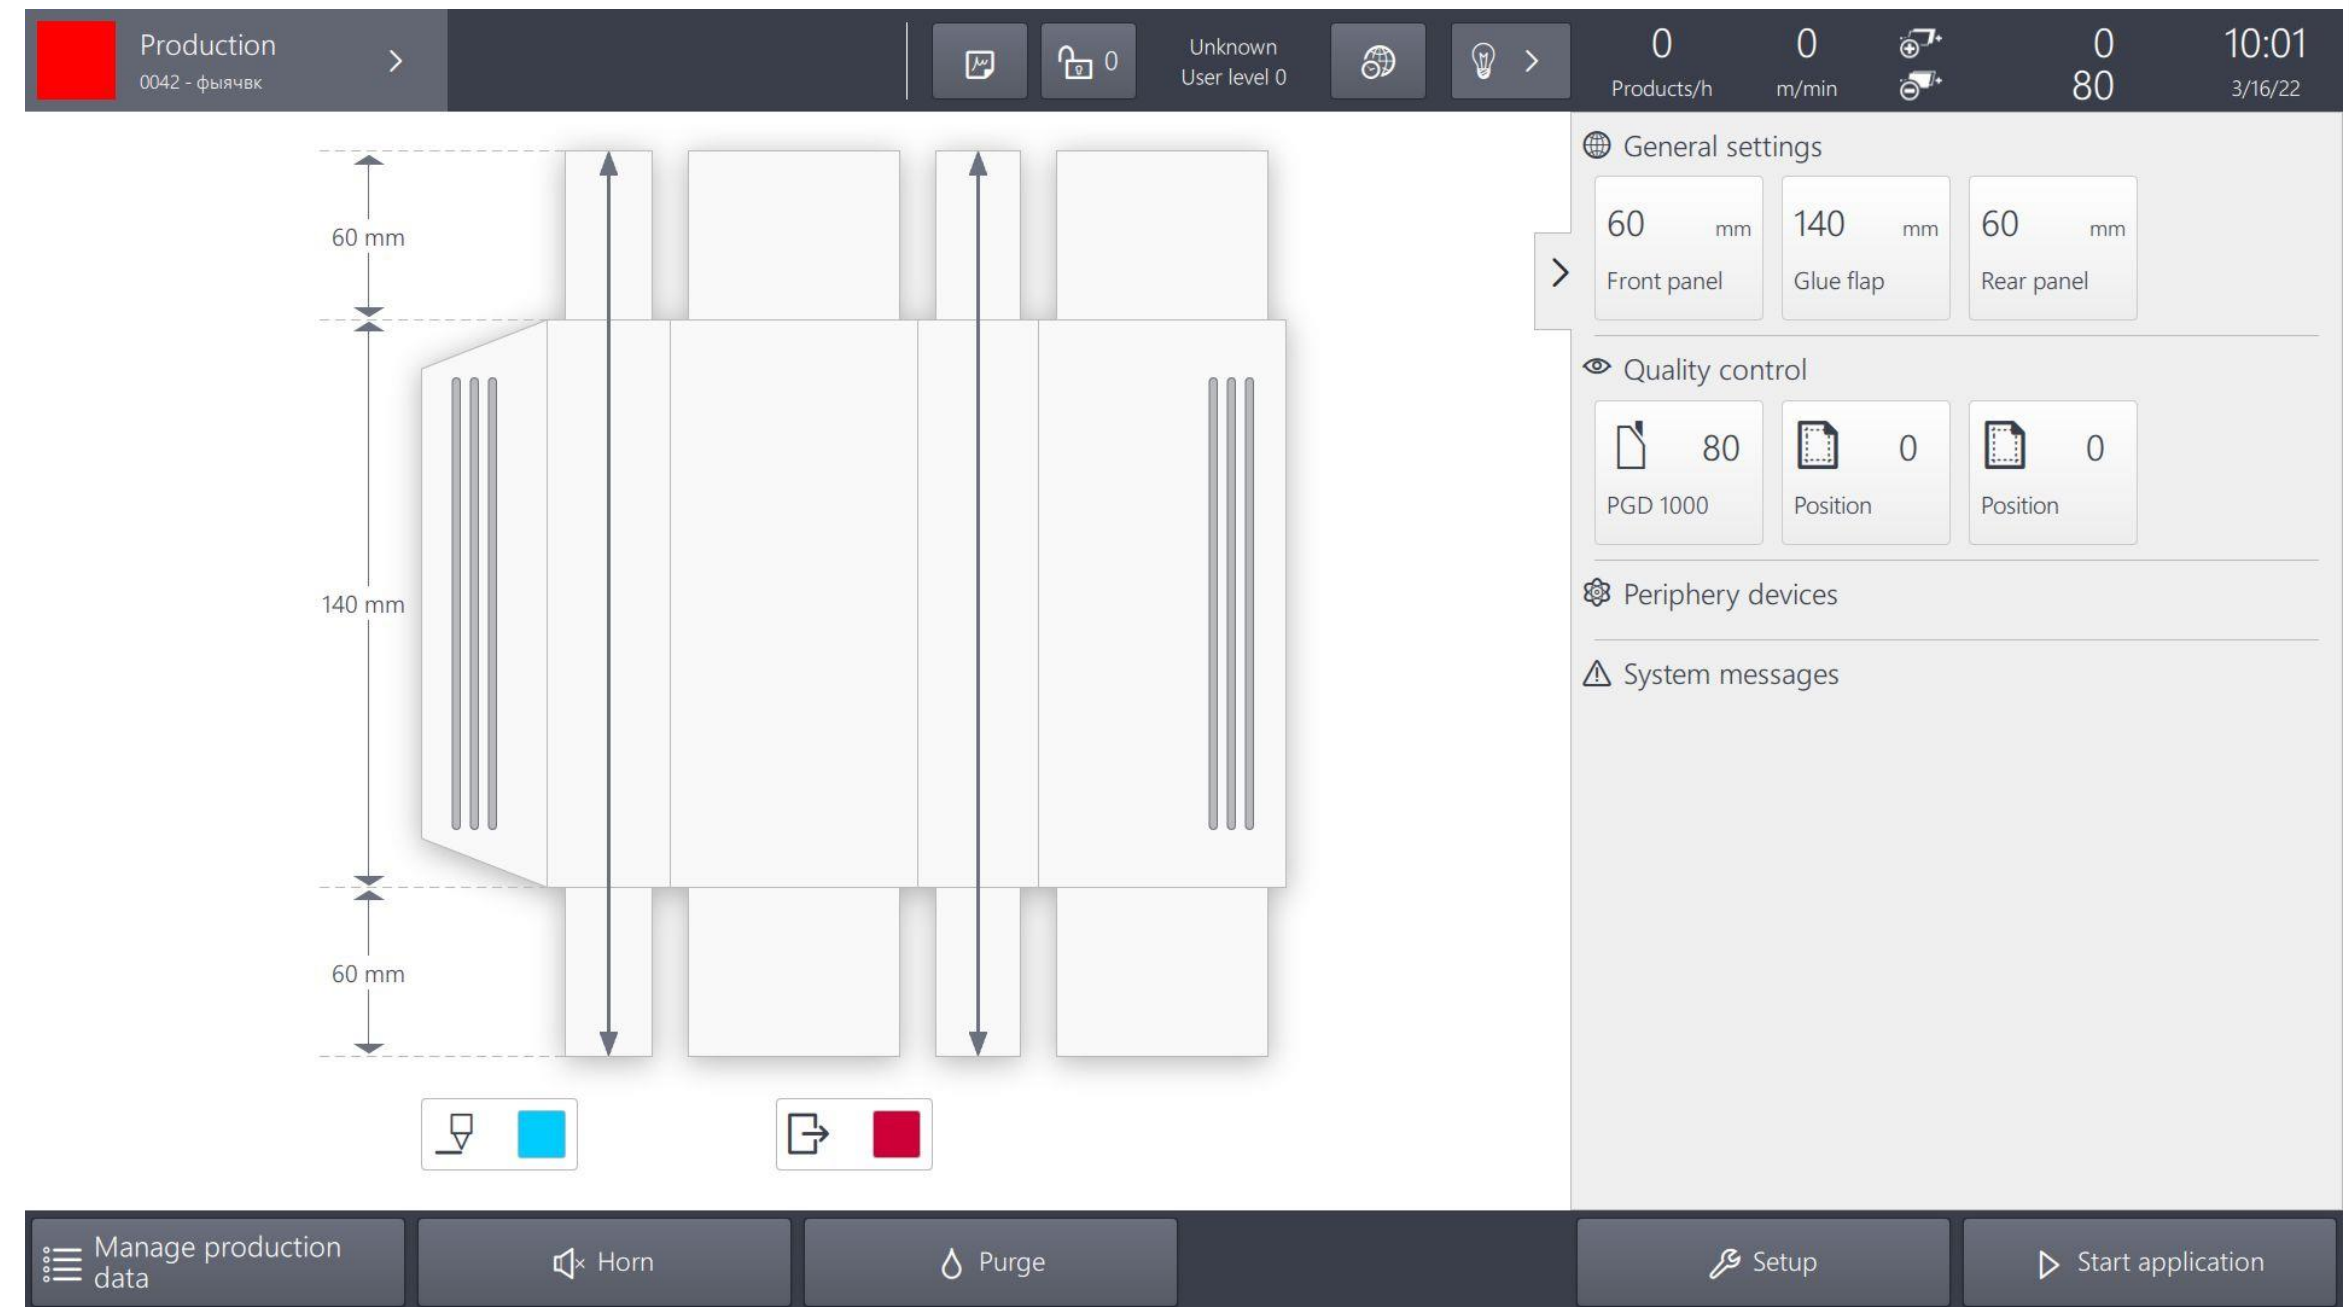

Easy to use Exchange Program

Service support via man, phone or remote access

Xtend³

The CorrBox Solution

- + New user interface
- + Glue + QC in one controller
- + Pattern transfer from host machine
- + Automatic detection setup

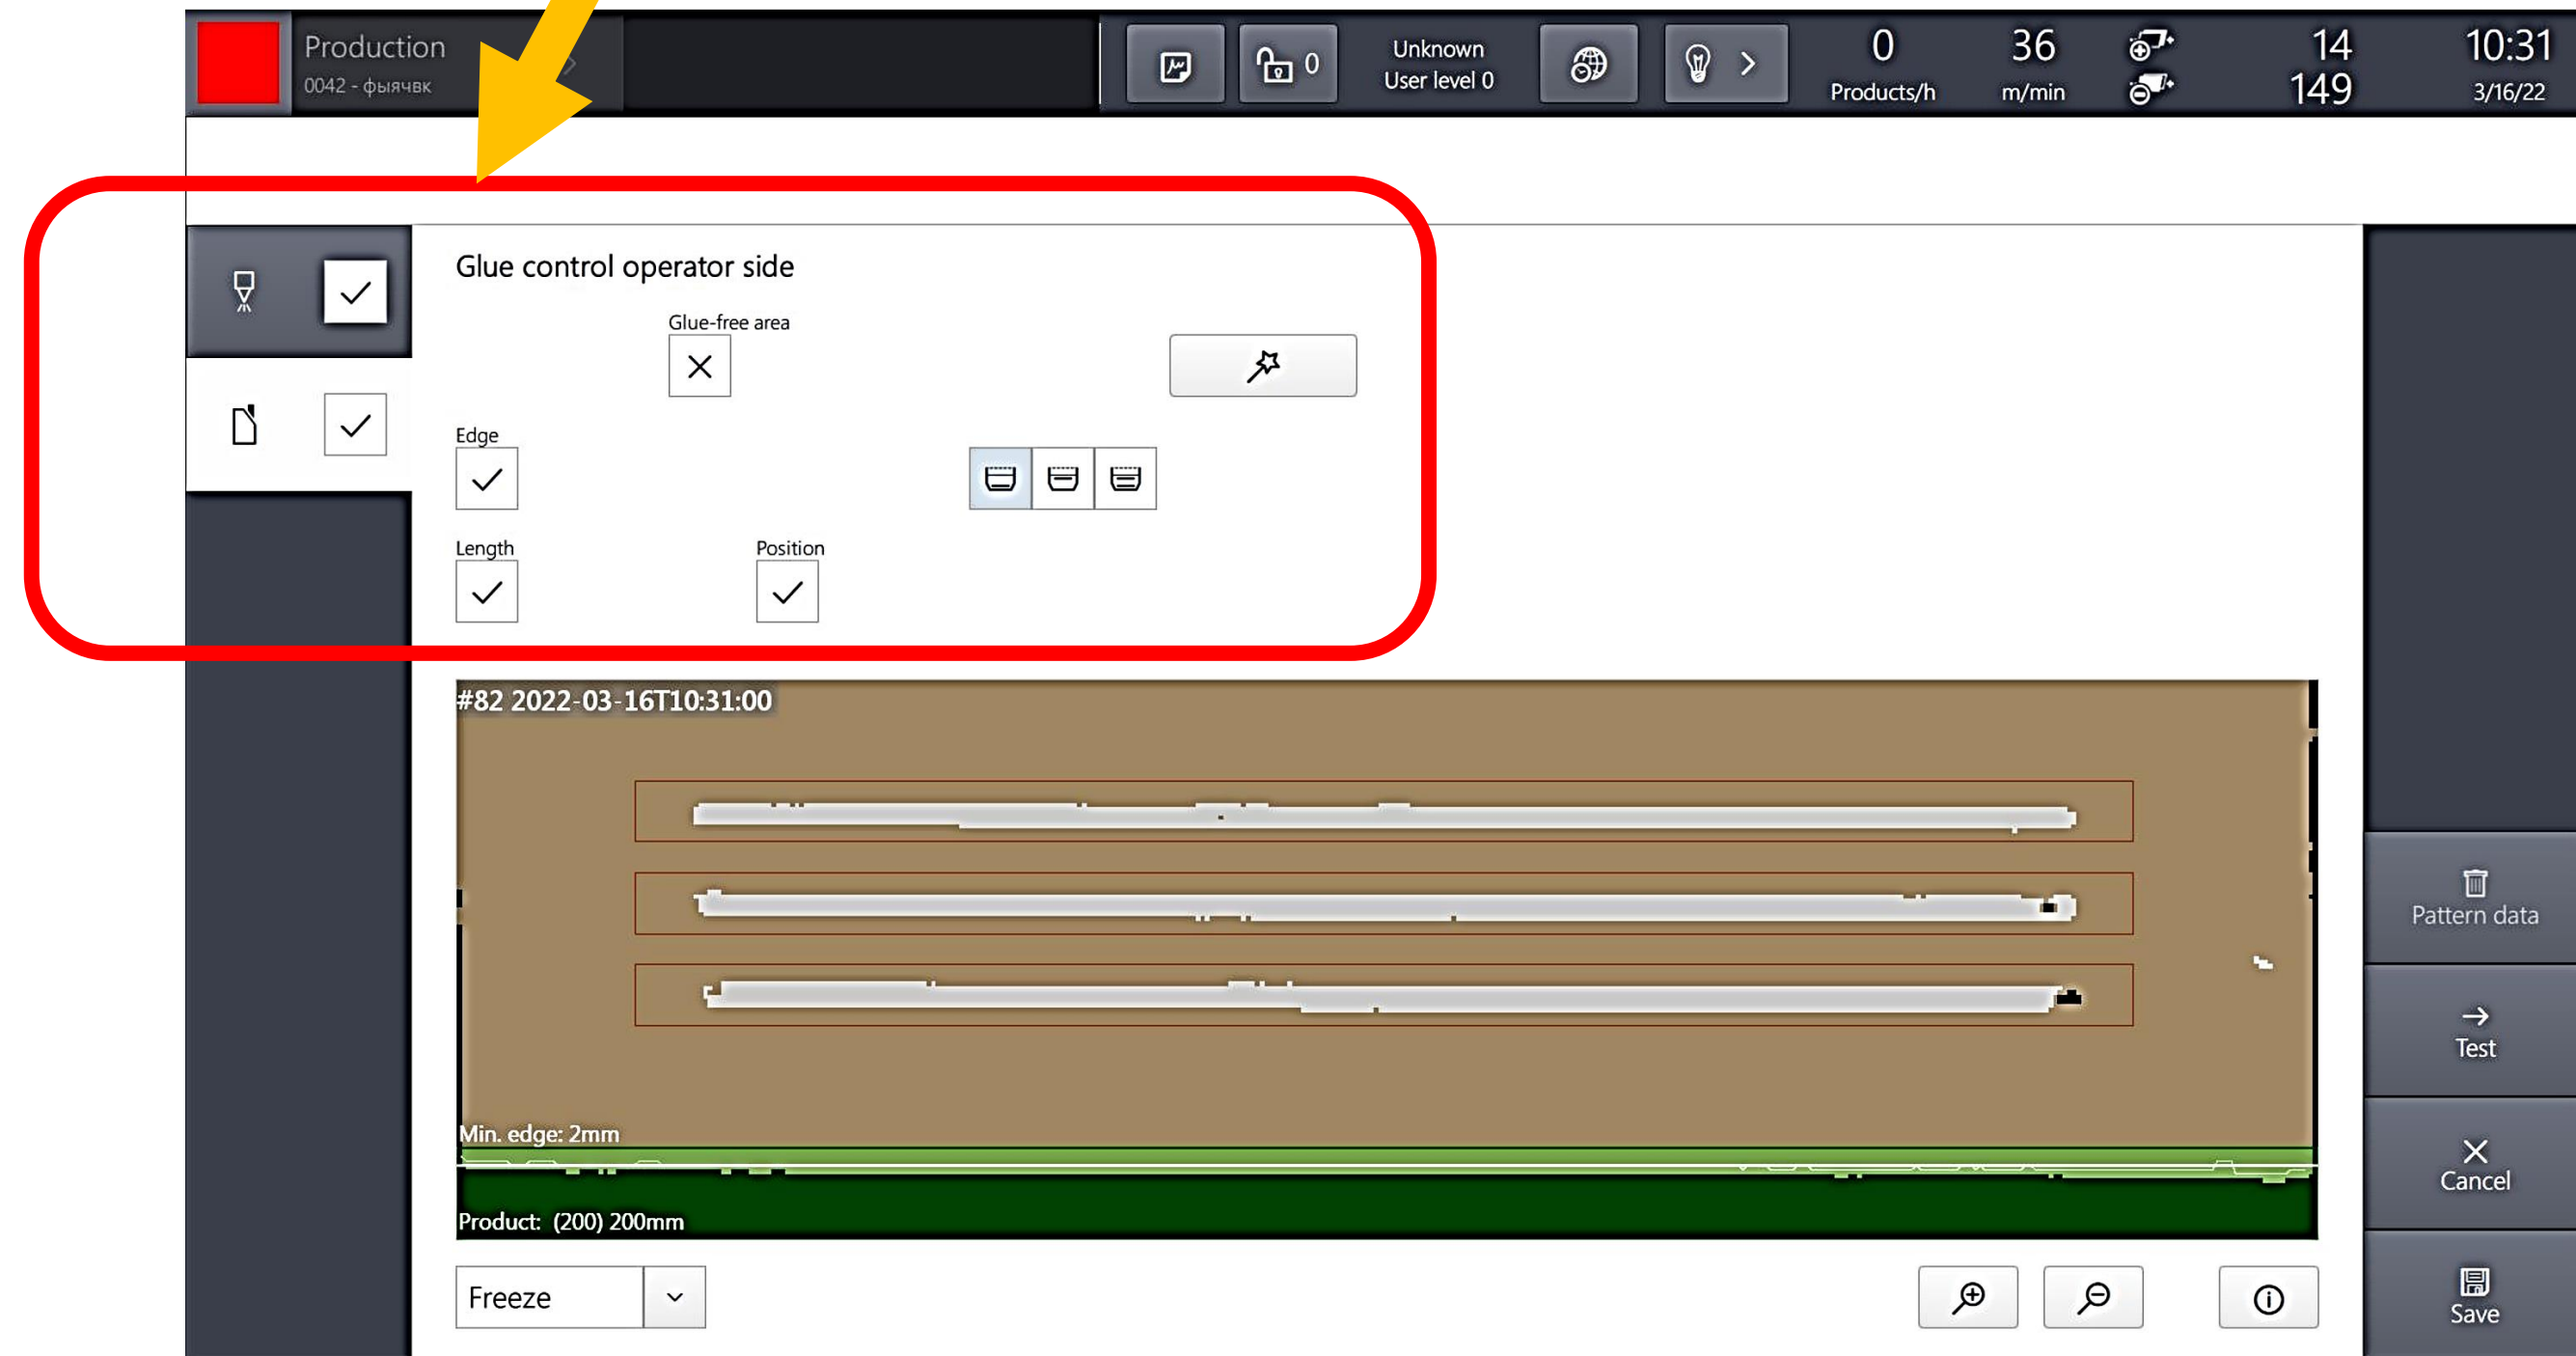

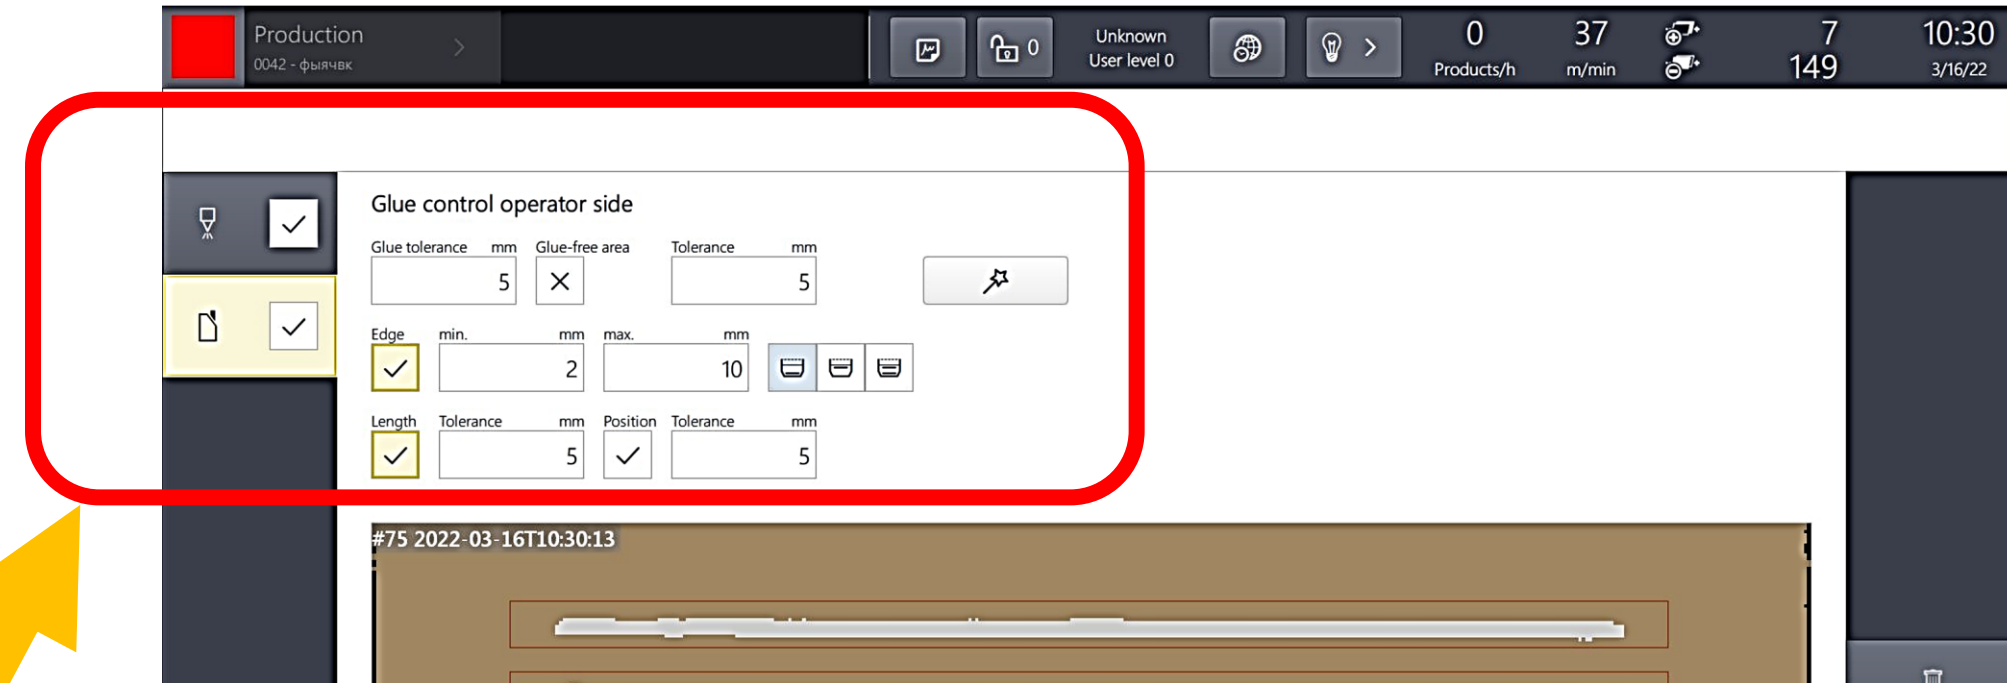

Hardware

Xtend³ controller

Manage interface access

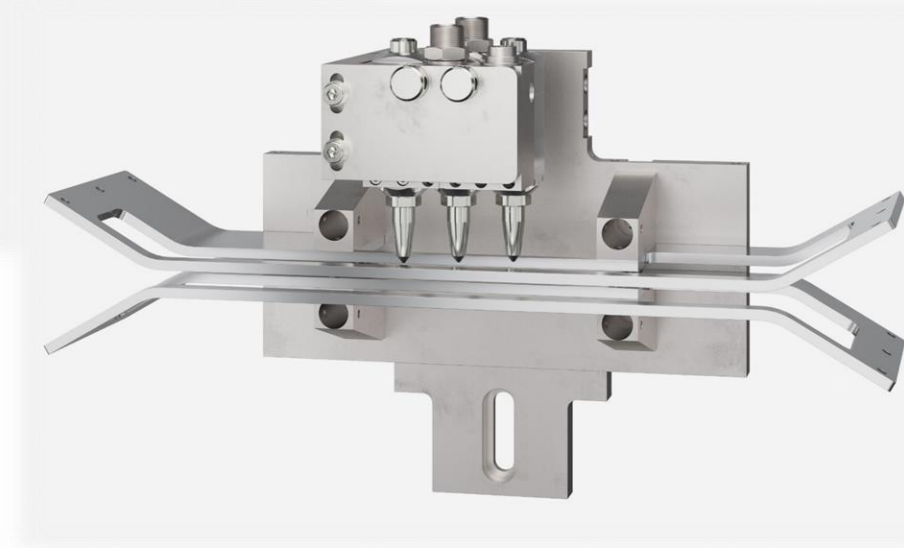

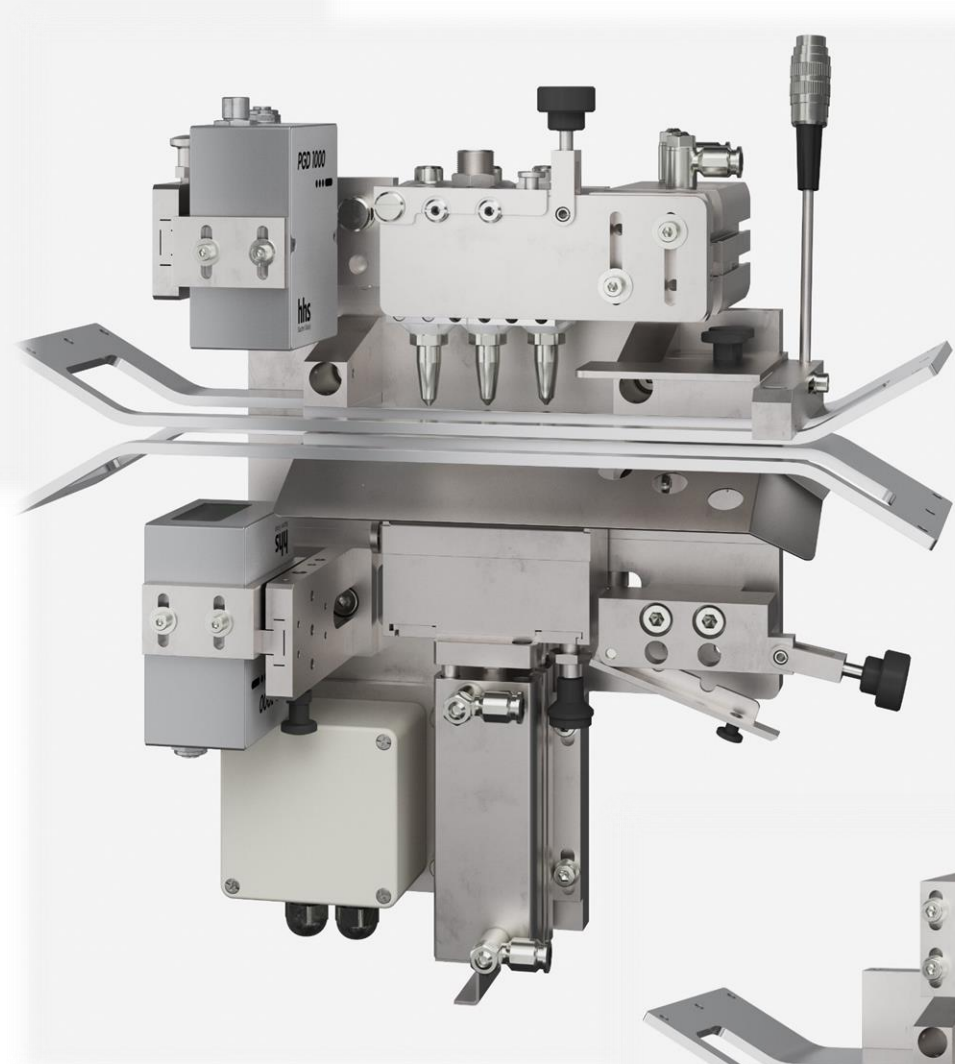

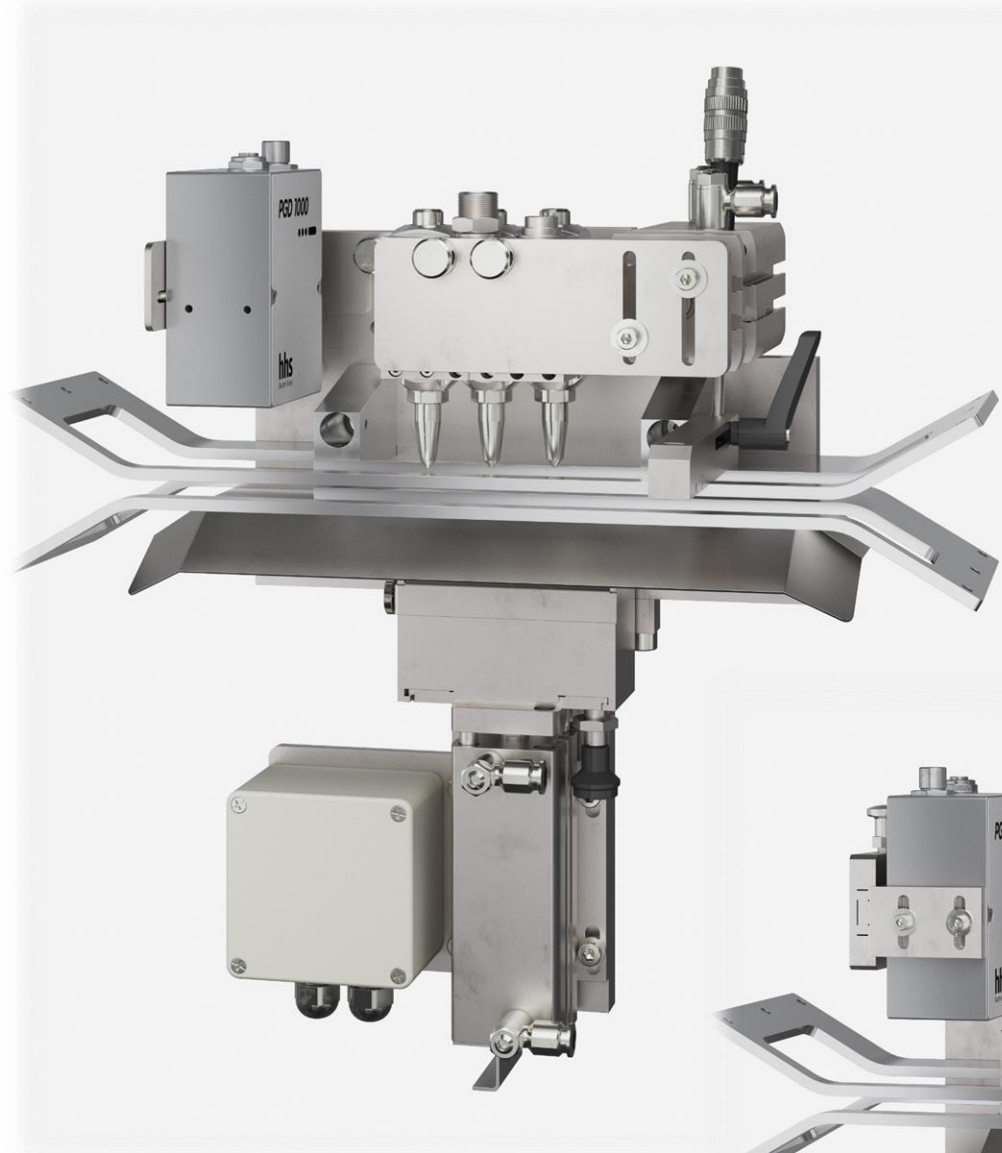

- + YOU control the what your operator is able to see.... And change!
- + Simplifies operation
- + Simplifies training

Three hardware configurations

- + Traditional LEFT+RIGHT with water bath (verification optional)
- + TOP / BOTTOM for single-side machines
- + COMPACT entry-level for basic retrofits
- + ALL with the best non-contact glue applicators in the industry

Hardware

Blank guide with water bath

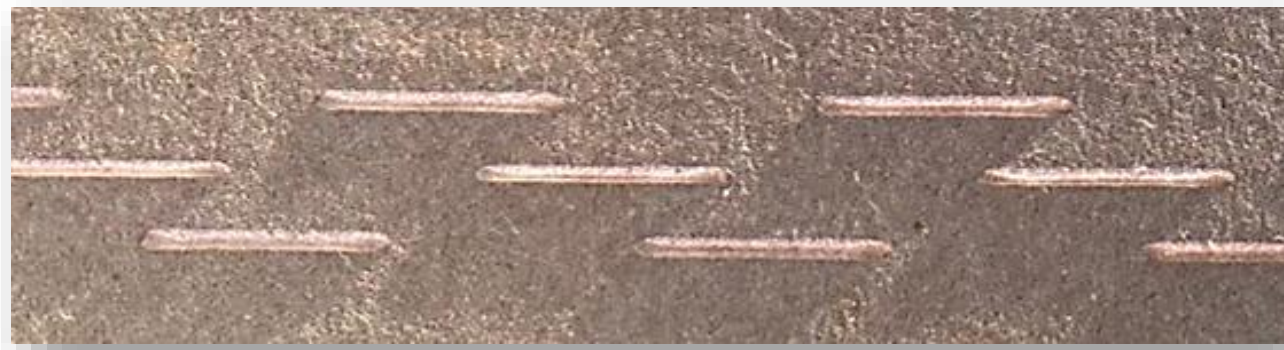

Reducing glue consumption

Intermittent glue lines

- + We have your sustainability answer. Every major corrugated producer has published an initiative on reduction of GHG (Green House Gasses), recyclability and conservation of resources.
- + Extend the adhesive you have and avoid continued price increases, lack of readily available glue and formulation changes due to material shortages.
- + CorrBox is your answer.
- + **Slashes your glue consumption**
- + **Contributes to your Green Initiatives**

To achieve Next-Level speed, you need a Next-Level glue valve.

- + 42% more powerful than it's predecessor
- + Capable of using a wider range of adhesive viscosities
- + Tested to save glue at maximum machine speeds
- + Built for ONE BILLION cycles

Hardware

PX-1000

Reducing glue consumption

- ⊕ Real-World production testing

Reducing glue consumption

- + Does it work?
- + YES

All-In-One Solution

- + GLUE verification
- + ANTI GLUE verification
- + GLUE LATERAL POSITION both in and out
- + ANY surface
- + ANY background
- + NO additional lighting
- + NO glue additives or UV
- + New standard for corrugated board detection

Glue Monitoring

PGD 1000

1

NEW Improved
Operator Interface:
Controller XTS3

2

NEW Simpler to
maintain modular
design

3

NEW No UV Tracer
Needed for Detection:
PGD 1000

4

NEW Faster Line Speeds,
Minimal Tailing, Glue
Savings Mode: **NEW** PX
1000 Applicator
