Subject Index
Technical Information Papers

This document was last updated September 3, 2015

A-
Abrasion
  Selection criteria for wet end ceramics, 0502-15
Abrasion resistance
  Selection criteria for wet end ceramics, 0502-15
Absorption
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Acrylic fibers
  see Polyaacrylics, Synthetic fibers
Additives
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
  Buying, storing, and handling flexo folder gluers/rotary diecutter adhesives, 0305-25
  Causes and corrections of common corrugator bonding problems, 0304-32
  Evaluating glue lap adhesive properties, 0304-16
  Procedure for setting up a raw material trial on the corrugator, 0304-01
  Proper methods of measuring starch adhesive viscosity, 0304-33
  Starch adhesive preparation and distribution systems: housekeeping, 0304-06
  Starch adhesive trial, 0304-22
  Statistical process control of starch gelatinization temperature, 0304-14
  Statistical process control of starch viscosity, 0304-15
  Stickies definition and classification, 0603-02
  Techniques for bonding of densified liners, 0304-40
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
  Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
  Understanding and troubleshooting hot melt adhesives, 0304-74
  Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44
After dryers
  Paper machine drying rate, 0404-07
Agitation
  Using washing water as the vehicle in starch based corrugating adhesive, 0304-44
Agitators
  Guidelines for side-entering stock agitators, 0420-13
Air
  Paper machine room ventilation guidelines, 0404-50
Air balance
  see Air, Materials balance
Air flow
  Measurement of vacuum pump air flow, 0420-12
  Minimum dryer pocket air requirements, 0404-17
  Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
  Sheet handling devices, 0404-44
Air jets
  Sheet handling devices, 0404-44
Air permeability
  Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20
Air pollution
  Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Air staging
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Alignment
  Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
Alkali
  Specific heat of caustic soda solutions, 0606-07
Alkaline sulfite pulping
  Boiling point rise of spent sulfite liquors, 0607-21
  Definitions of terms in the sulfite pulping process, 0607-25
  Density of aqueous sodium sulfite solution, 0607-18
  Density of milk of lime solution, 0607-05
  Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
  Sulfur burner gas strength volume, 0607-01
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Alkalinity
  Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Ammonia
  Solubility of sulfur dioxide, 0607-06
Analysis
  Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Angle of slide
  see Slide angle
Anilox coaters
In-line coating at the corrugator, TIP 0304-39

Anilox rolls
see Flexography, Printing cylinders

Anvil
Troubleshooting the diecutting section, 0305-39

Approach flow systems
Headbox approach piping guidelines, 0404-54

Ash
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
  Drainage evaluation by mass measurement, 0502-12

Atmosphere
Testing atmospheres simulating end use conditions, 0808-05

Auditing
Checklist for a properly planned project, 0408-01

Automatic feeders
see Feeders

B- Bacteria
Starch adhesive preparation and distribution systems: housekeeping, 0304-06

Bag papers
Paper machine performance guidelines, 0404-47

Bags
Paper machine drying rate, 0404-07

Bar Width Reduction (BWR)
see Product codes

Bar codes
see Product codes

Bases
see Hydroxides

Basis weight
Headbox approach piping guidelines, 0404-54

Batch digesters
Guidelines for inspecting batch digesters, 0402-22

Batch process
Measurement of dryer condensing rates (vertical separator method), 0404-18

Beams
Calibration of flexible beam crush tester, 0304-20

Bearings
Corrugator bearing clearance checks and their impact, 0304-47
  Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
  Total indicated runout and its impact on combined board quality, 0304-56

Biocide
Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Biomass
Performance test procedure for boilers using biomass as fuel, 0416-18
  Sampling procedures for biomass fuel for boiler performance testing, 0416-17

  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Biomechanics
see Human factors

Bisulfites
Physical and chemical properties of magnesia-base pulping solutions, 0607-04
  Solubility of sulfur dioxide, 0607-06
  Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
  Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Black liquors
Field welding of pin studs in black liquor recovery boilers, 0402-15
  Recommended test procedure for black liquor evaporators, 0416-11
  Recovery boiler performance calculation – short form, 0416-01
  Response to contamination of high purity boiler feedwater, 0416-05
  Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Blade coaters
see also Coaters
In-line coating at the corrugator, TIP 0304-39

Bleach plants
Bleaching plant washer efficiency guide, 0606-23

Bleached board
Paper machine drying rate, 0404-07
  Paper machine performance guidelines, 0404-47

Bleaching
Boiling point rise of spent sulfite liquors, 0607-21
  Cotton in nonwovens, 1205-02
  Chlorine gas curve, 0606-02
  Definitions of terms in the sulfite pulping process, 0607-25
  Density of aqueous sodium sulfite solution, 0607-18
  Density of chlorine gas, 0606-03
  Density of milk of lime solution, 0607-05
  Energy checklist: pulp mill, 0416-24
  Heat of vaporization of liquid chlorine, 0606-04
  Recommended pulp bleaching stage designation method, 0606-21
  Relative enthalpy (heat content) of sodium hydroxide solutions, 0606-08
  Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
  Specific gravity and density of caustic soda solutions, 0606-20
  Specific gravity of sodium chloride solutions, 0606-10
  Sulfur burner gas strength volume, 0607-01
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
  Viscosity of liquid chlorine 0606-05
  Viscosity of sodium hydroxide solutions, 0606-11

Bleaching stages
see Bleaching
Blind-drilled rolls

see Vacuum rolls

Blistering

Addendum to Corrugating Defect Terminology Manual -
defects related to the use of fingerless singlefacers, 0304-17

Blow boxes

Sheet handling devices, 0404-44

Blowdown

see also Blowing

Design engineer decisions tree: paper mill boiler feedwater, 0416-04

Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Blowing

Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03

Board caliper

see Thickness

Boiler feed water

see Boilers, Feedwater

Boiler tubes

Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13

Boilers

Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38

Design engineer decisions tree: paper mill boiler feedwater, 0416-04

Explanation of recovery boiler leak indications, 0416-23

Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07

Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36

Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

Keys to successful chemical cleaning of boilers, 0416-06

Performance test procedure for boilers using biomass as fuel, 0416-18

Sampling procedures for biomass fuel for boiler performance testing, 0416-17

Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03

Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Bonding

Techniques for bonding of densified liners, 0304-40

Box compression

see Compression strength

Box flaps

see Flaps

Box machines

Troubleshooting a glue lap problem, 0304-10

Box plants

see Converting plants

Boxes

Corrugated boxplant-list of potential hazards, 0301-01

Critical properties to consider when unitizing, 0304-72

High vacuum sheet dewatering, 0404-60

Squaring flap cut (center special) boxes, 0305-45

Broke

Broke loss calculations, 0502-10

Bronze

Guidelines for nondestructive examination of suction roll shells, 0402-19

Weld repairs on new suction roll shells, 0402-17

Burners

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Burst testers

Calibration and maintenance of, 0304-24

Butt joints

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

Butt welds

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

C-

CADCAM

Computer-assisted machinery, 0305-02

CONEG

see Regulations

Cadmium

An explanation of the CONEG heavy metal guidelines, 0304-58

Calcination

Physical data of calcined kaolin-water suspensions, 0106-09

Calcium base liquors

Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07

Calcium bisulfite

Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07

Calcium carbonate

Physical data of calcium carbonate-water suspensions,
Calcium hydroxide
Density of milk of lime solution, 0607-05

Calculations
see Computation

Calibration
Basic guidelines for image analysis measurements, 0804-09
Calibration and maintenance of the manually operated micrometer, 0304-30
Calibration of flexible beam crush tester, 0304-24
Of burst testers, 0304-24
Calibration technique for the drum style chip thickness classifier, 0602-03
Suggestions for developing a box plant quality manual, 0304-49

Caliper
see Thickness

Canadian standard freeness
Interconversion of freeness, 0809-01

Carbon steel
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Carbonates
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Physical data of calcium carbonate-water suspensions, 0106-01

Cast iron
Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14

Castings
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25

Caustic soda
see Sodium hydroxide

Causticizing
Energy checklist: pulp mill, 0416-24
Material balance equations relating to digester requirements, 0418-02

Ceramic coatings
Press roll cover application guidelines, 0404-37

Ceramics
Selection criteria for wet end ceramics, 0502-15
Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

Certification
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Chalk
see Calcium carbonate

Charting
Introduction to the flow chart, 0305-26
Short-run statistical process control: a basic charting method, 0304-70
Statistical process control pin adhesion, 0304-23
Statistical process control - procedures for charting warp, 0304-13

Checklist
see Maintenance

Chemical preparation
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10

Chemical properties
Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Magnesia-base pulping solutions, 0607-04
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31

Chemical pulps
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Chemical recovery
Recausticizing material balance equations relating to digester requirements, 0418-02

Chemicals
Material safety data sheets, what to look for - how to understand them, 0304-38

Chests
see Stock chests

Chip classifiers
Calibration technique for the drum style chip thickness classifier, 0602-03

Chip silos
see Chip bins

Chips
Calibration technique for the drum style chip thickness classifier, 0602-03

Chlorides
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12

Chlorine
Chlorine gas curve, 0606-02
Density of chlorine gas, 0606-03
Heat of vaporization of liquid chlorine, 0606-04
Viscosity of liquid chlorine, 0606-05

Chlorine dioxide
Safe storage and handling of, 0606-30
Specific gravity of sodium chloride solutions, 0606-10
Chrome
Tests for corrugator roll wear, 0304-53

Chromium
An explanation of the CONEG heavy metal guidelines, 0304-58

Clad-steel plate
see Plates

Classification
Paper grade classifications, 0404-36

Clay
Kaolin clay pigment index, 0106-06
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of hydrous Kaolin-water suspensions, 0106-02

Cleaners
Catalog of stock prep pilot plants, 0502-20
Introduction to centrifugal cleaners, 0508-10

Cleaning
Cleaning anilox rolls: procedures and options, 0306-18
Cleanup procedures for flexo folder gluer/rotary diecutters, 0305-33
Daily, weekly, and monthly maintenance checklists, 0305-34
Dryer fabric cleaning, 0404-38
Housekeeping at order and shift change and weekly, 0305-32
Introduction to centrifugal cleaners, 0508-10
Keys to successful chemical cleaning of boilers, 0416-06
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Paper machine shower recommendations, 0404-61
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35

Cleaning chemicals
see Cleansers

Cleansers
Keys to successful chemical cleaning of boilers, 0416-06

Clogging
Nozzle maintenance and clogging, 0420-15

Clothing
see Felts, Machine clothing

Coating color
see Color

Coating thickness
Tests for corrugator roll wear, 0304-53

Coatings
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Tests for corrugator roll wear, 0304-53

Coefficient of friction
see Friction factor

Combined boards
Common curtain coating problems: causes, detection, and correction, 0304-26
Obtaining off the corrugator for use in statistical process control procedures, 0304-12
Total indicated runout and its impact on combined board quality, 0304-56

Compression
Corrugated caliper: why is it so important?, 0304-04

Compression resistance
see Compression strength

Compression strength
Corrugated caliper: why is it so important?, 0304-04
Obtaining a combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Computation
Paper machine drying rate, 0404-07

Computer-assisted
see CADCAM

Concentricity
Total indicated runout and its impact on combined board quality, 0304-56

Condensates
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Measurement of dryer condensing rates (continuous method), 0404-03
Measurement of dryer condensing rates (vertical separator method), 0404-18
Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Yankee dryer steam condensing rates, 0404-49

Condensation
Dryer condensing rates (batch method), 0404-02
Dryer condensing rates (continuous method), 0404-03

Condensing rates
see Condensation

Conditioning
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Testing atmospheres simulating end use conditions, 0808-05

Conductivity
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Conical refiners
Conical refining intensity, 0508-07

Consistency
Drainage evaluation by mass measurement, 0502-12
Generalized method for determining the pipe friction loss
of flowing pulp suspensions, 0410-14
  Optimum for pumping pulp, 0410-15

Construction materials
  Sodium chlorate (NaClO₃) safe handling and storage, 0606-31

Contact bearings
  see Bearings

Contact technique
  Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Container boards
  Friction -- slide angle, 0304-34

Contaminants
  see Impurities

Contamination
  see Pollution control

Continuous digesters
  Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27

Contraction
  Flow from a 45° slice, 0410-03
  Flow from a nozzle (slice) with inclined upper lip, 0410-04
  Flow from a vertical slice, 0410-02

Control charts
  see Charting

Control systems
  Short-run statistical process control: a basic charting method, 0304-70

Conversion factors
  Units of measurement and, 0800-01

Converting factors
  Moisture content of paper: terminology and conversion, 0808-02

Converting plants
  Boxplant quality measurement: why test?, 0304-02
  Computer-assisted machinery, 0305-02
  Corrugated boxplant - list of potential hazards, 0301-01
  Machinery considerations and selection, 0305-06

Copper
  Role of in a printing ink, 0304-61
  Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Copper sulfate
  Tests for corrugator roll wear, 0304-53

Cores
  Determination of winder sets per reel, 0502-02
  Reel diameter for various reel spool and roll core sizes, 0502-03

Corrosion
  see also Corrosion inhibitors
  Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
  Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
  Fluoropolymer properties and applications in pulp and paper mills, 0402-37
  Guide to the use of stainless steel pipe specifications, 0402-24
  Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
  Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
  Guidelines for inspecting batch digesters, 0402-22
  Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
  Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
  Guidelines for nondestructive examination of suction roll shells, 0402-19
  Nozzle maintenance and clogging, 0420-15
  Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
  Ultrasonic technician performance test for boiler tube inspection, 0402-21
  Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
  Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Corrosion inhibitors
  Keys to successful chemical cleaning of boilers, 0416-06

Corrosion prevention
  Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
  Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03

Corrugated boards
  Copper in a printing ink, 0304-61
  Critical properties to consider when unitizing, 0304-72
  Important quality parameters of a printing ink, 0304-59
  Obtaining caliper off the corrugator for use in statistical process control procedures, 0304-12
  Proofing a flexo printing ink, 0304-60
  Statistical process control friction-slide angle, 0304-34
  Techniques to minimize twist warp, 0304-50
  Warp in corrugated board, 0304-07

Corrugated boxes
  see Boxes, Corrugated boards

Corrugated containers
  see Boxes, Corrugated board, Folder gluers, Die cutters

Corrugated medium
  An alternative method for designating flute sizes, 0302-04

Corrugating
  An alternative method for designating flute sizes, 0302-04

Corrugating adhesives
  see Adhesives

Corrugating machines
  Checking for coating wear on corrugating rolls, 0304-73
  Checking the flute depth of corrugating rolls, 0304-75
  Checking the parallel of corrugating rolls with “NCR”
paper, 0304-62
  Computer-assisted machinery, 0305-02
  Conducting a corrugator temperature audit, 0304-65
  Corrugator bearing clearance checks and their impact, 0304-47
  Impact of doublebacker hot plate level on board quality and how to measure it, 0304-66
  Improved techniques to measure corrugator glue machine meter gaps, 0304-68
    Prevention of score cracking in a box plant, 0304-37
    Procedure for setting up a raw material trial on the corrugator, 0304-01
    Starch viscosity in corrugating adhesives, 0304-15
  Tests for corrugator roll wear, 0304-53

Corrugating medium
  Causes and corrections of common corrugator bonding problems, 0304-32
    Edge crush test (ECT): its relationship to box compression and its derivation from containerboard edge stiffness, 0304-09
    Paper machine performance guidelines, 0404-47
    Paper machine drying rate, 0404-07
    Procedure for setting up a raw material trial on the corrugator, 0304-01
  Splicer defects and cures, 0304-31

Corrugating plants
  see Operations

Corrugating rolls
  see Rolls

Corrugator-double backer
  see Corrugating machines

Corrugators
  see Corrugating machines

Costs
  Press section economic evaluation, 0404-22

Cotton
  In nonwovens, 1205-02

Couch rolls
  Paper machine vacuum selection factors, 0502-01

Counters
  Counter ejector section, 0305-44

Cracks
  Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
  Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
  Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
  Guidelines for nondestructive examination of suction roll shells, 0402-19
  Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Crescent formers
  Paper machine vacuum selection factors, 0502-01

Cross direction
  Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

  Statistical process control -- procedures for charting warp, 0304-13
  Troubleshooting cross-machine direction moisture profile problems, 0404-57
  Warp in corrugated board, 0304-07

Crown
  see Roll crown

Crush
  Calibration of flexible beam crush tester, 0304-20
  Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Cubical contents
  see Volumetry

Curing
  Drying and curing techniques for in-line flexographic printing, 0306-06

Curtain coating
  Common curtain coating problems: causes, detection, and correction, 0304-26
  Weight test, 0304-19

Cutters
  see Die cutters

Cutting dies
  see Die cutters, Rotary machines

D-

Damage
  Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
  Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Dandy rolls
  Dandy roll applications, 0404-53

Data storage
  Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Data tables
  Moisture content of paper: terminology and conversion, 0808-02

Deaerators
  Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Defects
  Addendum to Corrugating Defect Terminology Manual -- defects related to the use of fingerless singlefacers, 0304-17
  Corrugator bearing clearance checks and their impact, 0304-47

Definitions
  see Nomenclature

Degradation
  Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28

Densified liners
  see Liners
Density
- Density of aqueous sodium bicarbonate solution, 0607-13
- Density of aqueous sodium carbonate solution, 0607-14
- Density of chlorine gas, 0606-03
- Milk of lime solution, 0607-05

Slices
Flow from a vertical slice, 0410-02
Slide angle
Statistical process control, friction, 0304-34

Sloting
Machinery considerations and selection: yoked scoring slotting section, 0305-53

Slurry
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of calcium carbonate-water suspensions, 0106-01
Physical data of hydrous Kaolin-water suspensions, 0106-02

Slushed paper stock
See Paper stock

Smearing
Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

Smog
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Sodium
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Sodium bicarbonate
Density of aqueous sodium bicarbonate solution, 0607-13

Sodium bisulfite
Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

Sodium borate
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08

Sodium carbonate
Density of aqueous sodium carbonate solution, 0607-14
Specific heat of sodium carbonate solution, 0607-15
Vapor pressure of sodium carbonate solution, 0607-16
Viscosity of sodium carbonate solution, 0607-17

Sodium chlorate
Safe storage of, 0606-31

Sodium chloride
Specific gravity of sodium chloride solutions, 0606-10

Sodium hydroxide
Caustic soda (NaOH) safe storage and handling, 0606-27
Relative enthalpy of solution, 0606-08
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
Specific gravity and density of caustic soda solutions, 0606-20
Specific heat of caustic soda solutions, 0606-07
Viscosity of sodium hydroxide solutions, 0606-11

Sodium sulfite
Density of aqueous sodium sulfite solution, 0607-18

Solids content
Physical data of calcined kaolin-water suspensions, 0106-09

Flow from a 45° slice, 0410-03
Flow from a nozzle (slice) with inclined upper lip, 0410-04
Flow from a stock behind slice (head/jet relationship), 0410-05
Physical data of calcium carbonate-water suspensions, 0106-01
Physical data of hydrous Kaolin-water suspensions, 0106-02

Solubility
Solubility of sulfur dioxide, 0607-06
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Solutions
Equilibrium relative humidities over saturated salt solutions, 0808-03
Specific heat of caustic soda solutions, 0606-07

Sorption
Cotton in nonwovens, 1205-02

Soot blowers
Recovery boiler sootblowers: practical guidelines, 0416-20
Recovery boiler sootblowers: the basics, 0416-19

SPC techniques

Basic guidelines for image analysis measurements, 0804-09

Volume
Grinder pulpstones – cubical contents, 0605-01
Identifying anilox volume measuring equipment, 0306-15

W-

Warning labels
see Hazardous materials

Warpage
Go/no go gauge devices for the boxplant, 0304-42
Statistical process control -- procedures for charting warp, 0304-13
Techniques to minimize twist warp, 0304-50
Warp in corrugated board, 0304-07

Wash waters
Using washing water as the vehicle in starch based
corrugating adhesive, 0304-44

Washers
Energy checklist: pulp mill, 0416-24
Bleaching plant washer efficiency guide, 0606-23

Washing
Bleaching plant washer efficiency guide, 0606-23
Recommended pulp bleaching stage designation method, 0606-21

Wastewater treatment equipment
see Effluent treatment

Water
see also Solubility
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Guidelines for measurement of vacuum pump air flow, 0420-12
Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13

Water content
see Moisture content

Water hardness
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03

Water permeability
Troubleshooting cross-machine direction moisture profile problems, 0404-57

Water removal
Determination of water removal by wet presses, 0404-01
High vacuum sheet dewatering, 0404-60
Methods to minimize sheet rewet in the press section, 0404-59
Paper machine drying rate, 0404-07

Water resistance
Techniques for running “WRA” (water resistant starch adhesive), 0304-46
Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69

Water treatment
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13

Water vapor
Paper machine room ventilation guidelines, 0404-50

Waterside cracking
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38

Wax
Common curtain coating problems: causes, detection, and correction, 0304-26
Curtain coating weight test, 0304-19

Wear resistance
see Abrasion resistance

Web tension
Guidelines for web conveyance and winding tension levels, 0200-01

Webs
see also Paper webs
Guidelines for web conveyance and winding tension levels, 0200-01

Weight
Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20
Procedure for utilizing statistical control techniques to monitor the tare weight of a run of boxes, 0304-35
Weight of newsprint rolls, 0502-11

Weirs
Weirs and flumes, 0410-10

Welding
Guide to the use of stainless steel pipe specifications, 0402-24
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Field welding of pin studs in black liquor recovery boilers, 0402-15

Wet bulb temperature
Relative humidity tables, 0808-06

Wet ends
Drainage evaluation by mass measurement, 0502-12
Forming section monitoring, 0502-14
How to prevent score cracking in a box plant, 0304-37
Selection criteria for wet end ceramics, 0502-15

Wet felts
see also Felts
Porosity measurement of press felts on the paper machine (HSPT), 0404-29

Wet presses
Determination of water removal by, 0404-01

Wet pressing
Terminology for high temperature pressing, 0404-48

Wet strength
Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69

Wet-laid nonwovens
Pilot paper machines, 0502-16

White liquors
Recausticizing material balance equations relating to digester requirements, 0418-02

White water
Drainage evaluation by mass measurement, 0502-12
Flow determination by chemical method, 0410-09
Weirs and flumes, 0410-10

**Width**
- Weight of newsprint rolls, 0502-11

**Winding**
- Guidelines for web conveyance and winding tension levels, 0200-01

**Wire**
- Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

**Williams freeness**
- Interconversion of freeness, 0809-01

**Winders**
- Determination of winder sets per reel, 0502-02

**Wiperoll**
- See Flexography

**Wood**
- Calibration technique for the drum style chip thickness classifier, 0602-03

**Wood chips**
- See Chips

**Wood containing papers**
- See Mechanical papers

**Wood free papers**
- Paper machine drying rate, 0404-07

**Work place**
- See Human factors

**Working conditions**
- See Environments

**Wound rolls**
- Reel diameter for various reel spool and roll core sizes, 0502-03
- TAPPI Roll number for inventory/tracking systems and bar codes, 1004-01

**Writing papers**
- Paper machine drying rate, 0404-07

**X-Y-Z**

**Yankee cylinders**
- See Yankee dryers

**Yankee dryers**
- Guidelines for routine periodic inspection and testing of cast iron Yankee and MG dryers, 0425-01
- Inspection guidelines for Yankee hood systems, 0425-02
- Techniques for nip impressions, 0404-46
- Yankee dryer steam condensing rates, 0404-49
