Subject Index
Technical Information Papers

This document was last updated May 28, 2019

A-
Abra-sion
  Selection criteria for wet end ceramics, 0502-15
Abrasion resistance
  Selection criteria for wet end ceramics, 0502-15
Absorption
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Accessibility
  Maintenance considerations in new construction and rebuilds, 0408-02
Acrylic fibers
  see Polya-crylics, Synthetic fibers
Additives
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
Adhesives
  Buying, storing, and handling flexo folder gluер/rotary diecutter adhesives, 0305-25
  Causes and corrections of common corrugator bonding problems, 0304-32
  Evaluating glue lap adhesive properties, 0304-16
  Procedure for setting up a raw material trial on the corrugator, 0304-01
  Proper methods of measuring starch adhesive viscosity, 0304-33
  Starch adhesive preparation and distribution systems: housekeeping, 0304-06
  Starch adhesive trial, 0304-22
  Statistical process control of starch gelatinization temperature, 0304-14
  Statistical process control of starch viscosity, 0304-15
  Stickies definition and classification, 0603-25
  Techniques for bonding of densified liners, 0304-40
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
  Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
  Understanding and troubleshooting hot melt adhesives, 0304-74
  Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44
After dryers
  Paper machine drying rate, 0404-07
Agitation
  Using washing water as the vehicle in starch based corrugating adhesive, 0304-44
Agitators
  Guidelines for side-entering stock agitators, 0420-13
Air
  Paper machine room ventilation guidelines, 0404-50
  Air balance
    see Air, Materials balance
  Air flow
    Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
    Recommended minimum dryer pocket air requirements, 0404-17
    Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
    Sheet handling devices, 0404-44
  Air jets
    Sheet handling devices, 0404-44
  Air permeability
    Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20
  Air pollution
    Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
    Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
  Air staging
    Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Alignment
  Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
Alkali
  Specific heat of caustic soda solutions, 0606-07
Alkaline sulfite pulping
  Boiling point rise of spent sulfite liquors, 0607-21
  Definitions of terms in the sulfite pulping process, 0607-25
  Density of aqueous sodium sulfite solution, 0607-18
  Density of milk of lime solution, 0607-05
  Solubility of sulfur dioxide, Ca(HSO3): solutions, 0607-07
  Sulfur burner gas strength volume, 0607-01
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Alkalinity
  Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Ammonia
  Solubility of sulfur dioxide, 0607-06
Analysis
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03

Angle of slide
see Slide angle

Anilox coaters
In-line coating at the corrugator, 0304-39

Anilox rolls
see Flexography, Printing cylinders

Anvil
Troubleshooting the diecutting section, 0305-39

Approach flow systems
Headbox approach piping guidelines, 0404-54

Ash
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Drainage evaluation by mass measurement, 0502-12
Chemical cleaning guide for press fabrics, 0404-65

Atmosphere
Testing atmospheres simulating end use conditions, 0808-05

Auditing
Checklist for a properly planned project, 0408-01

Automatic feeders
see Feeders

Availability
Definitions of black liquor recovery furnace availability, 0416-02

B-
Backer Blade
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Bacteria
Starch adhesive preparation and distribution systems: housekeeping, 0304-06

Bag papers
Paper machine performance guidelines, 0404-47

Bags
Paper machine drying rate, 0404-07

Bar Width Reduction (BWR)
see Product codes

Bar codes
see Product codes

Bases
see Hydroxides

Basis weight
Headbox approach piping guidelines, 0404-54

Batch digesters
Guidelines for inspecting batch digesters, 0402-22

Batch process
Measurement of dryer condensing rates (vertical separator method), 0404-18

Beams
Calibration of flexible beam crush tester, 0304-20

Bearings
Corrugator bearing clearance checks and their impact, 0304-47

Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Total indicated runout and its impact on combined board quality, 0304-56
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Bearing failure
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Biocide
Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Biomass
Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Biomechanics
see Human factors

Bisulfites
Physical and chemical properties of magnesia-base pulping solutions, 0607-04
Solubility of sulfur dioxide, 0607-06
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Black liquors
Field welding of pin studs in black liquor recovery boilers, 0402-15
Recommended test procedure for black liquor evaporators, 0416-11
Recovery boiler performance calculation – short form, 0416-01
Response to contamination of high purity boiler feedwater, 0416-05
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Blade coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Bleach plants
Bleaching plant washer efficiency guide, 0606-23

Bleached board
Paper machine drying rate, 0404-07
Paper machine performance guidelines, 0404-47

Bleaching
Boiling point rise of spent sulfite liquors, 0607-21
Cotton in nonwovens, 1205-02
Chlorine gas curve, 0606-02
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of chlorine gas, 0606-03
Density of milk of lime solution, 0607-05
Energy checklist: pulp mill, 0416-24
Heat of vaporization of liquid chlorine, 0606-04
Recommended pulp bleaching stage designation method, 0606-21
Relative enthalpy (heat content) of sodium hydroxide solutions, 0606-08
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Viscosity of liquid chlorine 0606-05
Viscosity of sodium hydroxide solutions, 0606-11

Bleaching stages
see Bleaching
Blind-drilled rolls
see Vacuum rolls
Blistering
Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17
Blow boxes
Sheet handling devices, 0404-44
Blowdown
see also Blowing
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Blowing
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Board
Pilot paper and wet laid nonwoven machines, 0502-16
Board caliper
see Thickness
Boiler feed water
see Boilers, Feedwater
Boiler tubes
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13
Boilers
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Explanation of recovery boiler leak indications, 0416-23
Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Keys to successful chemical cleaning of boilers, 0416-06
Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26
Bonding
Techniques for bonding of densified liners, 0304-40
Box compression
see Compression strength
Box flaps
see Flaps
Box machines
Troubleshooting a glue lap problem, 0304-10
Box plants
see Converting plants
Boxes
Corrugated boxplant-list of potential hazards, 0301-01
Critical properties to consider when unitizing, 0304-72
High vacuum sheet dewatering, 0404-60
Squaring flap cut (center special) boxes, 0305-45
Broke
Broke loss calculations, 0502-10
Bronze
Guidelines for nondestructive examination of suction roll shells, 0402-19
Weld repairs on new suction roll shells, 0402-17
Burners
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Burst testers
Calibration and maintenance of, 0304-24
Butt joints
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Butt welds
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
C-
CADCAM
   Computer-assisted machinery, 0305-02
CONEG
   see Regulations
Cadmium
   An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58
Calcination
   Physical data of calcined kaolin-water suspensions, 0106-09
Calcium base liquors
   Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Calcium bisulfite
   Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Calcium carbonate
   Physical data of calcium carbonate-water suspensions, 0106-01
Calcium hydroxide
   Density of milk of lime solution, 0607-05
Calculations
   see Computation
Calibration
   Basic guidelines for image analysis measurements, 0804-09
   Calibration and maintenance of the manually operated micrometer, 0304-30
   Calibration of flexible beam crush tester, 0304-20
   Of burst testers, 0304-24
   Suggestions for developing a box plant quality manual, 0304-49
Caliper
   see Thickness
Canadian standard freeness
   Interconversion of freeness, 0809-01
Carbon steel
   Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Carbonates
   Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
   Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
   Physical data of calcium carbonate-water suspensions, 0106-01
Cartridges
   Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06
Cast iron
   Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14
Castings
   Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Caustic soda
   see Sodium hydroxide
Causticizing
   Energy checklist: pulp mill, 0416-24
   Material balance equations relating to digester requirements, 0418-02
Ceramics
   Selection criteria for wet end ceramics, 0502-15
   Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19
Certification
   Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Chalk
   see Calcium carbonate
Charting
   Introduction to the flow chart, 0305-26
   Short-run statistical process control: a basic charting method, 0304-70
   Statistical process control pin adhesion, 0304-23
   Statistical process control - procedures for charting warp, 0304-13
Checklist
   see Maintenance
Chemical preparation
   Specific gravity and density of caustic soda solutions, 0606-20
   Specific gravity of sodium chloride solutions, 0606-10
Chemical properties
   Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
   Fluoropolymer properties and applications in pulp and paper mills, 0402-37
   Magnesia-base pulping solutions, 0607-04
   Sodium chlorate (NaClO₃) safe handling and storage, 0606-31
Chemical pulps
   Boiling point rise of spent sulfite liquors, 0607-21
   Definitions of terms in the sulfite pulping process, 0607-25
   Density of aqueous sodium sulfite solution, 0607-18
   Density of milk of lime solution, 0607-05
   Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-01
   Sulfur burner gas strength volume, 0607-01
   Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Chemical recovery
   Recausticizing material balance equations relating to digester requirements, 0418-02
Chemicals
Material safety data sheets, what to look for - how to understand them, 0304-38
Chemical cleaning guide for press fabrics, 0404-65

Chests
see Stock chests

Chip silos
see Chip bins

Chlorides
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12

Chlorine
Chlorine gas curve, 0606-02
Density of chlorine gas, 0606-03
Heat of vaporization of liquid chlorine, 0606-04
Viscosity of liquid chlorine, 0606-05

Chlorine dioxide
Safe storage and handling of, 0606-30
Specific gravity of sodium chloride solutions, 0606-10

Chrome
Tests for corrugator roll wear, 0304-53

Chromium
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58

Clad-steel plate
see Plates

Classification
Paper grade classifications, 0404-36

Clay
Kaolin clay pigment index, 0106-06
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of hydrous Kaolin-water suspensions, 0106-02

Cleaners
Catalog of Stock Preparation Pilot Plants, 0502-20
Introduction to centrifugal cleaners, 0508-10

Cleaning
Cleaning anilox rolls: procedures and options, 0306-18
Cleanup procedures for flexo folder gluer/rotary diecutters, 0305-33
Daily, weekly, and monthly maintenance checklists, 0305-34
Dryer fabric cleaning, 0404-38
Housekeeping at order and shift change and weekly, 0305-32
Introduction to centrifugal cleaners, 0508-10
Keys to successful chemical cleaning of boilers, 0416-06
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Paper machine shower recommendations, 0404-61
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35

Cleaning chemicals
see Cleaners

Cleansers
Keys to successful chemical cleaning of boilers, 0416-06

Clogging
Nozzle maintenance and clogging, 0420-15

Clothing
see Felts, Machine clothing

Coating color
see Color

Coating thickness
Tests for corrugator roll wear, 0304-53

Coatings
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Tests for corrugator roll wear, 0304-53

Coefficient of friction
see Friction factor

Combined boards
Common curtain coating problems: causes, detection, and correction, 0304-26
Obtaining off the corrugator for use in statistical process control procedures, 0304-12
Total indicated runout and its impact on combined board quality, 0304-56

Compression
Corrugated caliper: why is it so important?, 0304-04

Compression resistance
see Compression strength

Compression strength
Corrugated caliper: why is it so important?, 0304-04
Obtaining a combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Computation
Paper machine drying rate, 0404-07

Computer-assisted
see CADCAM

Concentricity
Total indicated runout and its impact on combined board quality, 0304-56

Condensates
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Measurement of dryer condensing rates (continuous method), 0404-03
Measurement of dryer condensing rates (vertical separator method), 0404-18
Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Yankee dryer steam condensing rates, 0404-49
Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04

Condensation
Dryer condensing rates (batch method), 0404-02
Dryer condensing rates (continuous method), 0404-03

Condensing rates
see Condensation

Conditioning
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Testing atmospheres simulating end use conditions, 0808-05

Conductivity
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Conical refiners
Conical refining intensity, 0508-07

Consistency
Drainage evaluation by mass measurement, 0502-12
Generalized method for determining the pipe friction loss of flowing pulp suspensions, 0410-14
Optimum for pumping pulp, 0410-15

Construction materials
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31

Contact bearings
see Bearings

Contact technique
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Container boards
Fricition -- slide angle, 0304-34

Contaminants
see Impurities

Contamination
see Pollution control

Continuous digesters
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27

Contraction
Flow from a 45° slice, 0410-03
Flow from a nozzle (slice) with inclined upper lip, 0410-04
Flow from a vertical slice, 0410-02

Control charts
see Charting

Control systems
Short-run statistical process control: a basic charting method, 0304-70

Conversion factors
Units of measurement and, 0800-01

Converting factors
Moisture content of paper: terminology and conversion, 0808-02

Converting plants
Boxplant quality measurement: why test?, 0304-02
Computer-assisted machinery, 0305-02
Corrugated boxplant - list of potential hazards, 0301-01
Machinery considerations and selection, 0305-06

Copper
Role of in a printing ink, 0304-61
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Copper sulfate
Tests for corrugator roll wear, 0304-53

Cores
Determination of winder sets per reel, 0502-02
Reel diameter for various reel spool and roll core sizes, 0502-03

Corrosion
see also Corrosion inhibitors
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Fluoropolymer properties and applications in pulp and paper mills, 0402-37

Guide to the use of stainless steel pipe specifications, 0402-24
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for inspecting batch digesters, 0402-22
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Guidelines for nondestructive examination of suction roll shells, 0402-19
Nozzle maintenance and clogging, 0420-15
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Corrosion inhibitors
Keys to successful chemical cleaning of boilers, 0416-06

Corrosion prevention
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Corrugated boards
Copper in a printing ink, 0304-61
Critical properties to consider when unitizing, 0304-72
Important quality parameters of a printing ink, 0304-59
Obtaining caliper off the corrugator for use in statistical process control procedures, 0304-12
Proofing a flexo printing ink, 0304-60
Statistical process control friction-slide angle, 0304-34
Techniques to minimize twist warp, 0304-50
Warp in corrugated board, 0304-07
Corrugated boxes
see Boxes, Corrugated boards
Corrugated containers
see Boxes, Corrugated board, Folder gluers, Die cutters
Corrugated medium
An alternative method for designating flute sizes, 0302-04
Corrugating
An alternative method for designating flute sizes, 0302-04
Corrugating adhesives
see Adhesives
Corrugating machines
Checking for coating wear on corrugating rolls, 0304-73
Checking the flute depth of corrugating rolls, 0304-75
Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
Computer-assisted machinery, 0305-02
Conducting a corrugator temperature audit, 0304-65
Corrugator bearing clearance checks and their impact, 0304-47
Impact of doublebacker hot plate level on board quality and how to measure it, 0304-66
Improved techniques to measure corrugator glue machine meter gaps, 0304-68
Prevention of score cracking in a box plant, 0304-37
Starch viscosity in corrugating adhesives, 0304-15
Tests for corrugator roll wear, 0304-53
Corrugating medium
Causes and corrections of common corrugator bonding problems, 0304-32
Edge crush test (ECT): its relationship to box compression and its derivation from containerboard edge stiffness, 0304-09
Paper machine performance guidelines, 0408-02
Paper machine drying rate, 0404-07
Procedure for setting up a raw material trial on the corrugator, 0304-01
Costs
Press section economic evaluation, 0404-22
Cotton
In nonwovens, 1205-02
Couch rolls
Paper machine vacuum selection factors, 0502-01
Counters
Counter ejector section, 0305-44
Cover
Maintenance considerations in new construction and rebuilds, 0408-02
Cracks
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for nondestructive examination of suction roll shells, 0402-19
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Crescent formers
Paper machine vacuum selection factors, 0502-01
Cross direction
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Statistical process control -- procedures for charting warp, 0304-13
Troubleshooting cross-machine direction moisture profile problems, 0404-57
Warp in corrugated board, 0304-07
Crown
see Roll crown
Crush
Calibration of flexible beam crush tester, 0304-20
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11
Cubical contents
see Volumetry
Curing
Drying and curing techniques for in-line flexographic printing, 0306-06
Curtain coating
Common curtain coating problems: causes, detection, and correction, 0304-26
Weight test, 0304-19
Cutters
see Die cutters
Cutting dies
see Die cutters, Rotary machines
D-    Damage
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
    Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26
Dandy rolls
Dandy roll applications, 0404-53
Data storage
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Data tables
Moisture content of paper: terminology and conversion, 0808-02
Deaerators
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
    Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Defects
Addendum to Corrugating Defect Terminology Manual -- defects related to the use of fingerless singlefacers, 0304-17
    Corrugator bearing clearance checks and their impact, 0304-47
Definitions
see Nomenclature
Degradation
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Densified liners
see Liners
Density

Pulping
  Density of chlorine gas, 0606-03
Pulpstones
  Grinder pulpstones: cubical contents, 0605-01
  Pulpstone speed chart, 0605-02
Pulps
  Generalized method for determining the pipe friction loss of flowing pulp suspensions, 0410-14
  Optimus consistency for pumping, 0410-15
  Paper machine drying rate, 0404-07
  Pilot paper and wet laid nonwoven machines, 0502-16
Pumping
  Generalized method for determining the pipe friction loss of flowing pulp suspensions, 0410-14
  Pulp, optimum consistency for, 0410-15
Pumps
  Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Purchase
  Buying, storing, and handling flexo folder gluer/rotary diecutter adhesives, 0305-25
Purchase orders
  Purchase order, 0305-07
Pyrometry
  Dryer surface temperature measurement, 0404-39
Q-
Qualification
  Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21
Quality
  Box plant quality measurement: why test?, 0304-02
  Important quality parameters of a printing ink, 0304-59
  Quality techniques using existing equipment, 0306-11
  Starch adhesive trial, 0304-22
  Suggestions for developing a box plant quality manual, 0304-49
Quality control
  Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
  Guideline for direct contact printing of bar code symbols on corrugated, 0306-16
  Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13
  Liquid penetrant testing of new suction roll shells, 0402-11
Quality manual
  see Quality
R-
Radiography
  Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Raw materials
  Procedure for setting up a raw material trial on the corrugator, 0304-01
Raw Yankee
  Guidelines for usage of MAP on raw Yankee surfaces, 0425-05
Recastizing
  see Causticizing
Reclaimed fibers
  Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Record books
  see Documentation
Recovery
  Energy checklist: pulp mill, 0416-24
  Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26
Recovery boilers
  Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
  Explanation of recovery boiler leak indications, 0416-23
  Field welding of pin studs in black liquor recovery boilers, 0402-15
  Guideline specification for procurement of an economizer for a recovery boiler, 0416-21
  Guidelines for operating and maintenance practices impacting an economizer on a recovery boiler, 0416-22
  Recovery boiler energy efficiency improvements, 0416-16
  Recovery boiler performance calculation – short form, 0416-01
  Recovery boiler sootblowers: practical guidelines, 0416-20
  Recovery boiler sootblowers: the basics, 0416-19
  Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21
  Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
  Definitions of black liquor recovery furnace availability, 0416-02
Recovery furnaces
  Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
  Explanation of recovery boiler leak indications, 0416-23
  Field welding of pin studs in black liquor recovery boilers, 0402-15
  Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
  Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
  Recovery boiler performance calculation – short form, 0416-01
Recycled fibers
  see Reclaimed fibers
Recycled paperboard
  Paper machine performance guidelines, 0404-47
Recycled papers
  Paper machine performance guidelines, 0404-47
Recycling
  Stickies definition and classification, 0603-02
Reels
  Determination of winder sets per reel, 0502-02
  Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
  Reel diameter for various reel spool and roll core sizes, 0502-03
  TAPPI Roll number for inventory/tracking systems and bar codes, 1004-01
Refiner plates
  see Refiner disks
Refiners
  Catalog of Stock Preparation Pilot Plants, 0502-20
  Conical refining intensity, 0508-07
  Refiner systems, their inspection and maintenance, 0508-06
Refining
  Conical refining intensity, 0508-07
  Refiner systems, their inspection and maintenance, 0508-06
Register
  Computer assisted mounting systems, 0306-02
Regulating systems
  see Control systems
Regulations
  An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58
Relative enthalpy
  see Enthalpy
Relative humidity
  see Humidity
Relief
  Water quality and monitoring requirements for paper mill boilers, operating on high purity feedwater, 0416-03
Removal
  Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Repair
  see Maintenance
Repeatability
How to perform a gauge repeatability and reproducibility study, 0304-71

Reporting
Press fabric record book, 0404-21

Replacement
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08

Reproducibility
How to perform a gauge repeatability and reproducibility study, 0304-71

Resolution
Basic guidelines for image analysis measurements, 0804-09

Retention
Definitions, 0502-13
Fourdrinier drainage performance evaluation – blow test method, 0410-07

Reverse osmosis
Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07

Reverse warp
see Warpage

Rewetting
Methods to minimize sheet rewet in the press section, 0404-59

Rider rolls
Total indicated runout and its impact on combined board quality, 0304-56

Ring crush resistance
Techniques for bonding of densified liners, 0304-40

Ring crush tests
Calibration of flexible beam crush tester, 0304-20
Techniques for bonding of densified liners, 0304-40

Rod coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Roll coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Roll core
see Cores

Roll Cover Selection
A guide to proper wiper roll selection for flexographic printing in the corrugated box industry, 0306-20

Roll crown
Techniques for nip impressions, 0404-46

Roll density
see Rolls

Roll handling

Roller bearings
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Rolls
An alternative method for designating flute sizes, 0302-04
Checking the flute depth of corrugating rolls, 0304-75
Checking for coating wear on corrugating rolls, 0304-73
Corrugator temperature audit, 0304-65
Granite roll material and surface requirements, 0404-41
Parallel of corrugating rolls with “NCR” paper, 0304-62
TAPPI Roll number for inventory/tracking systems and bar codes, 1004-01
Techniques for nip impressions, 0404-46
Tests for corrugator roll wear, 0304-53
Total indicated runout and its impact on combined board quality, 0304-56
Weight of newsprint rolls, 0502-11

Rotary diecutter
see Rotary machines, Die cutters; see also Folder gluers

Rotary filters
Bleaching plant washer efficiency guide, 0606-23

Rotary machines
Buying, storing, and handling flexo folder gluerc/rotary diecutter adhesives, 0305-25
Cleanup procedures for flexo folder gluerc/rotary diecutters, 0305-33
Introduction to flexo folder gluerc/rotary diecutter TIPs, 0305-04
Ordering cutting dies, 0305-21
Project leader, 0305-13
Proper use of pull bands, 0305-18
Rotary cutting die maintenance, 0305-23
Rotary diecutter urethane anvil maintenance, 0305-35

Rotation
Pulpstone speed chart, 0605-02

Roundness
see Shape

Rubbing
see also Abrasion resistance

Runnability
Sheet handling devices, 0404-44

S-
Safety
Caustic soda (NaOH) safe storage and handling, 0606-27
Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
Corrugated boxplant-list of potential hazards, 0301-01
Gaseous ozone (O₃) safe handling, 0606-28
Hydrogen peroxide (H₂O₂) safe storage and handling, 0606-24
Material safety data sheets, 0304-38
Methanol (CH₃OH) safe storage and handling, 0606-25
Oxygen (O₂) bulk storage and safe handling, 0606-29
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31
Sulfuric acid (H₂SO₄) safe storage and handling, 0606-26
Safety equipment
Chlorine dioxide (ClO₂) safe storage and handling, *0606-33
Salt
see Sodium chloride
Sampling
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Saturated solutions
see Solutions
Scanners
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Scheduling
Checklist for a properly planned project, 0408-01
Housekeeping at order and shift change and weekly, 0305-32
Maintenance considerations in new construction and rebuilds, 0408-02
Schopper Riegler freeness
Interconversion of freeness, 0809-01
Score breaks
How to prevent score cracking in a box plant, 0304-37
Score cracking
Troubleshooting the diecutting section, 0305-39
Score cracks
see Score breaks
Scores
Minimizing rolling scores on lightweight and high-performance liners in diecutting operations, 0304-64
Preventing score cracking in a box plant, 0304-37
Scoring
Machinery considerations and selection: yoked scoring slotting section, 0305-53
Screens
Catalog of Stock Preparation Pilot Plants, 0502-20
Seal water
see Sealants, Water
Seals
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03
Sealants
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
Seamless materials
Guide to the use of stainless steel pipe specifications, 0402-24
Secondary fibers
Stickies definition and classification, 0603-02
Selection
Machinery considerations and selection, 0305-06
Selective catalytic reduction
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Selective noncatalytic reduction
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Semichemical pulps
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C and other temperatures, 0607-22
Sensitivity
Basic guidelines for image analysis measurements, 0804-09
Sensors
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Servicing
Maintenance considerations in new construction and rebuilds, 0408-02
Setting time
Understanding and troubleshooting hot melt adhesives, 0304-74
Shafts
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Shape
Total indicated runout and its impact on combined board quality, 0304-56
Sheet water content
see Moisture content
Shells
Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
Weld repairs on new suction roll shells, 0402-17
Shipping containers
Guideline for direct contact printing of bar code symbols on corrugated, 0306-16
Shock drying
Terminology for high temperature pressing, 0404-48
Showers
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Paper machine shower recommendations, 0404-61
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements 0404-27
Steam shower applications in the forming and press section, 0404-58
Chemical cleaning guide for press fabrics, 0404-65

   Generalized method for determining the pipe friction loss of lowing pulp suspensions, 0410-14
Symbols
   Guideline for direct contact printing of bar code symbols on corrugated, 0306-16
Systems
   Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15

T-
Tare weight
   Statistical control techniques to monitor the tare weight of a run of boxes, 0304-35
Task time
   see Time
Technical nomenclature
   see Nomenclature
Temperature
   Conducting a corrugator temperature audit, 0304-65
   Density of aqueous sodium bicarbonate solution, 0607-13
   Density of aqueous sodium carbonate solution, 0607-14
   Dryer section performance monitoring, 0404-33
   Dryer surface temperature measurement, 0404-39
   Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
   Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
   Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10
   Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
   Specific heat of sodium carbonate solution, 0607-15
   Statistical process control of starch gelatinization temperature, 0304-14
   Statistical process control of starch viscosity, 0304-15
   Testing atmospheres simulating end use conditions, 0808-05
Tension
   Recommended tensions in dryer fabrics, 0404-04
Terminology
   see Nomenclature
Test conditions
   Testing atmospheres simulating end use conditions, 0808-05
Test equipment
   Paper test rooms: design considerations, 0808-04
Test facilities
   Paper test rooms: design considerations, 0808-04
   Water quality and monitoring requirements for paper mill boilers operating on high purity feedwater, 0416-03
Test methods
   Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
Testing
   Basic guidelines for image analysis measurements, 0804-09
   Catalog of Stock Preparation Pilot Plants, 0502-20
Drainage evaluation by mass measurement, 0502-12
Forming section monitoring, 0502-14
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Paper test rooms: design considerations, 0808-04
Recommended test procedure for black liquor evaporators, 0416-11
Water removal by wet presses, 0404-01

Thermal measurement
Recovery boiler performance calculation – short form, 0416-01

Thermal spray
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Guidelines for inspecting batch digesters, 0402-22

Thermobonding
Cotton in nonwovens, 1205-02

Thermocompressors
Thermocompressor Applications for Paper Drying, 0404-66

Thermography
Troubleshooting cross-machine direction moisture profile problems, 0404-57

Thermoplastics
Fluoropolymer properties and applications in pulp and paper mills, 0402-37

Thick stock
see High consistency

Thickness
Corrugated caliper: why is it so important?, 0304-04
Method for evaluating thickness of wet press fabrics, 0404-28
Obtaining combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Through drying
Through drying, 0404-25

Tissue
Inspection guidelines for Yankee hood systems, 0425-02
Pilot paper and wet laid nonwoven machines, 0502-16

Tolerance
Corrugator bearing clearance checks and their impact, 0304-47

Total indicated runout
see also Combined boards
Total indicated runout and its impact on combined board quality, 0304-56

Total reduced sulfur
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

Transport
Checklist: preparing die cuts for shipment, 0305-49
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31

Sulfuric acid (H₂SO₄) safe storage and handling, 0606-26

Trim
Broke loss calculations, 0502-10
Paper machine room ventilation guidelines, 0404-50

Trimming
Machinery considerations and selection: yoked scoring slotting section, 0305-53
Squaring flap cut (center special) boxes, 0305-45

Troubleshooting
Forming section monitoring, 0502-14
Glue lap problem, 0304-10
Press section monitoring, 0404-19
Recommended test procedure for black liquor evaporators, 0416-11
Steam shower applications in the forming and press section, 0404-58

Tubes
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for operating and maintenance practices impacting an economizer on a recovery boiler, 0416-22
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Keys to successful chemical cleaning of boilers, 0416-06
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Tungsten carbide
Tests for corrugator roll wear, 0304-53

Tuning
see Control

Turpentine
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

Twisting
Techniques to minimize twist warp, 0304-50

U-
Uhle box
See also Vacuum boxes
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

Ultrafine ground limestone
see Limestone

Ultraviolet radiation
Drying and curing techniques for in-line flexographic printing, 0306-06

Ultrasonic tests
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Guidelines for inspecting batch digesters, 0402-22
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Unitized handling
Critical properties to consider when unitizing, 0304-72

Units of measurement
Units of measurement and conversion factors, 0800-01

Unloading
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31
Sulfuric acid (H₂SO₄) safe storage and handling, 0606-26

U.P.C.
see Product codes

Urethanes
Rotary diecutter urethane anvil maintenance, 0305-35

V-

Vacuum
High vacuum sheet dewatering, 0404-60
Paper machine vacuum selection factors, 0502-01
Papermaker’s formulas, 0502-17
Steam shower applications in the forming and press section, 0404-58

Vacuum boxes
High vacuum sheet dewatering, 0404-60
Paper machine vacuum selection factors, 0502-01
Performance evaluation techniques for paper machine vacuum systems, 0404-55

Vacuum equipment
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements 0404-27

Vacuum filters
Bleaching plant washer efficiency guide, 0606-23

Vacuum pumps
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
Performance evaluation techniques for paper machine vacuum systems, 0404-55
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements. 0404-27

Vacuum rolls
Liquid penetrant testing of new suction roll shells, 0402-11
Paper machine vacuum selection factors, 0502-01
Techniques for nip impressions, 0404-46
Weld repairs on new suction roll shells, 0402-17

Vacuum washers
Bleaching plant washer efficiency guide, 0606-23

Valves
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Headbox approach piping guidelines, 0404-54

Vapor pressure
Chlorine gas curve, 0606-02
Vapor pressure of sulfur dioxide solutions, 0607-11
Vapor pressure of sodium carbonate solution, 0607-16
Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

Variance
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Varnish
Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

Velocity
see also Machine speed
Pulpstone speed chart, 0605-02

Ventilation
Paper machine room ventilation guidelines, 0404-50
Recommended minimum dryer pocket air requirements, 0404-17
Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24

Viscosity
Density of aqueous sodium sulfite solution, 0607-18
Liquid chlorine, 0606-05
Proper methods of measuring starch adhesive viscosity, 0304-33
Quality techniques using existing equipment, 0306-11
Statistical process control of starch viscosity, 0304-15
Viscosities of spent sulfite liquors at 26.7°C (Oswalt capillary viscometer), 0607-22
Viscosity of a neutral sulfite spent liquor (Oswald capillary viscometer), 0607-23
Viscosity of sodium carbonate solution, 0607-17
Viscosity of sodium hydroxide solutions, 0606-11
Viscosity reading procedure for flexographic corrugated inks, 0304-18

Vision
Basic guidelines for image analysis measurements, 0804-09

Volume
Grinder pulpstones – cubical contents, 0605-01
Identifying anilox volume measuring equipment, 0306-15

W-

Warning labels
see Hazardous materials

Warpage
Go/no go gauge devices for the boxplant, 0304-42
Statistical process control -- procedures for charting warp, 0304-13
Techniques to minimize twist warp, 0304-50
Warp in corrugated board, 0304-07

Wash waters
Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Washers
Energy checklist: pulp mill, 0416-24
Bleaching plant washer efficiency guide, 0606-23

Washing
Bleaching plant washer efficiency guide, 0606-23
Recommended pulp bleaching stage designation method, 0606-21

Wastewater treatment equipment
see Effluent treatment
Water
