Subject Index

Technical Information Papers

This document was last updated August 31, 2023

_____________A_____________

Abrasion
   Selection criteria for wet end ceramics, 0502-15

Abrasion resistance
   Selection criteria for wet end ceramics, 0502-15

Absorption
   Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Accessibility
   Maintenance considerations in new construction and rebuilds, 0408-02

Acoustic Emission
   See Nondestructive Tests

Acrylic fibers
   see Polyacrylics, Synthetic fibers

Additives
   Techniques for running “WRA” (water resistant starch adhesive), 0304-46

Adhesives
   Buying, Storing, and Handling P.V.A. Adhesives Used on Folder Gluers and on Sheet Laminators, 0305-25
   Causes and corrections of common corrugator bonding problems, 0304-32
   Evaluating glue lap adhesive properties, 0304-16
   Procedure for setting up a raw material trial on the corrugator, 0304-01
   Starch adhesive preparation and distribution systems: housekeeping, 0304-06
   Starch adhesive trial, 0304-22
   Statistical process control of starch gelatinization temperature, 0304-14
   Statistical process control of starch viscosity, 0304-15
   Techniques for bonding modern high-performance liners, 0304-40
   Techniques for running “WRA” (water resistant starch adhesive), 0304-46
   Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
   Understanding and troubleshooting hot melt adhesives, 0304-74
   Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44

After dryers
   Paper machine drying rate, 0404-07

Agitation
   Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Agitators
   Guidelines for side-entering stock agitators, 0420-13

Air
   Paper machine room ventilation guidelines, 0404-50

Air balance
   see Air, Materials balance

Air flow
   Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
   Recommended minimum dryer pocket air requirements, 0404-17
   Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
   Sheet handling devices, 0404-44

Air jets
   Sheet handling devices, 0404-44

Air permeability
   Automated Scanning for Moisture Content and Air Permeability on Paper Machine Felts, 0502-21
   Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20

Air pollution
   Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
   Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Air staging
   Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Alignment
   Checking the parallel of corrugating rolls with “NCR” paper, 0304-62

Alkali
   Specific heat of caustic soda solutions, 0606-07

Alkaline sulfite pulping
   Boiling point rise of spent sulfite liquors, 0607-21
   Definitions of terms in the sulfite pulping process, 0607-25
   Density of aqueous sodium sulfite solution, 0607-18
   Density of milk of lime solution, 0607-05
   Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
   Sulfur burner gas strength volume, 0607-01
   Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Alkalinity
   Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

Alumina
   Guidelines for Rotary Lime Kiln Refractory, 0416-27
Ammonia
   Solubility of sulfur dioxide, 0607-06
Analysis
   Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Angle of slide
   see Slide angle
Anilox coaters
   In-line coating at the corrugator, 0304-39
Anilox rolls
   see Flexography, Printing cylinders
   Ink metering systems for corrugated flexo presses, 0306-09
Anvil Wear
   Troubleshooting the Die Cutting Section, 0305-39
Approach flow systems
   Headbox approach piping guidelines, 0404-54
Ash
   Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
   Drainage evaluation by mass measurement, 0502-12
   Chemical cleaning guide for press fabrics, 0404-65
Atmosphere
   Testing atmospheres simulating end use conditions, 0808-05
Attenuation
   Headbox approach piping guidelines, 0404-54
Auditing
   Checklist for a properly planned project, 0408-01
Automatic feeders
   see Feeders
Automated Felt Scanner
   Automated Scanning for Moisture Content and Air Permeability on Paper Machine Felts, 0502-21
Automation
   Industry 4.0 Lexicon, 1103-04
Availability
   Definitions of black liquor recovery furnace availability, 0416-02

B

Backing Blade
   Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06
Bacteria
   Starch adhesive preparation and distribution systems: housekeeping, 0304-06
Bags
   Paper machine drying rate, 0404-07
Bar Width Reduction (BWR)
   see Product codes
Bar codes
   see Product codes
Bases
   see Hydroxides
Basis weight
   Headbox approach piping guidelines, 0404-54
Batch digesters
   Guidelines for inspecting batch digesters, 0402-22
Batch process
   Measurement of dryer condensing rates (vertical separator method), 0404-18
Bauxite
   Guidelines for Rotary Lime Kiln Refractory, 0416-27
Bearings
   Corrugator bearing clearance checks and their impact, 0304-47
   Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
   Total indicated runout and its impact on combined board quality, 0304-56
   Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03
Bearing failure
   Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03
Bicocide
   Using washing water as the vehicle in starch based corrugating adhesive, 0304-44
Biomass
   Performance test procedure for boilers using biomass as fuel, 0416-18
   Sampling procedures for biomass fuel for boiler performance testing, 0416-17
   Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Biomechanics
   see Human factors
Bisulfites
   Physical and chemical properties of magnesia-base pulping solutions, 0607-04
   Solubility of sulfur dioxide, 0607-06
   Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
   Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10
Black liquor
   Field welding of pin studs in black liquor recovery boilers, 0402-15
   Recommended test procedure for black liquor evaporators, 0416-11
   Recovery boiler performance calculation – short form, 0416-01
   Response to contamination of high purity boiler feedwater, 0416-05
   Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Black Oxide
   Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04
Blade
   Paper machine doctor recommendations, 0404-67
Blade coaters
   see also Coaters
   In-line coating at the corrugator, 0304-39
Blade holder
   Paper machine doctor recommendations, 0404-67
Bleach plants
Bleaching plant washer efficiency guide, 0606-23

Bleached board
Paper machine drying rate, 0404-07
Paper machine performance guidelines, 0404-47

Bleaching
Boiling point rise of spent sulfite liquors, 0607-21
Cotton in nonwovens, 1205-02
Chlorine gas curve, 0606-02
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of chlorine gas, 0606-03
Density of milk of lime solution, 0607-05
Energy checklist: pulp mill, 0416-24
Heat of vaporization of liquid chlorine, 0606-04
Recommended pulp bleaching stage designation method, 0606-21
Relative enthalpy (heat content) of sodium hydroxide solutions, 0606-08
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Viscosity of liquid chlorine 0606-05
Viscosity of sodium hydroxide solutions, 0606-11

Bleaching stages
see Bleaching

Blind-drilled rolls
see Vacuum rolls

Blistering
Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17

Blow boxes
Sheet handling devices, 0404-44

Blow-through steam
Recommended Dryer Differential Pressures, 0404-31

Blowdown
see also Blowing

Blowing
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

Board
Pilot paper and wet laid nonwoven machines, 0502-16

Board caliper
see Thickness

Boiler feed water
see Boilers, Feedwater

Boiler tubes
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13

Boilers
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Explanation of recovery boiler leak indications, 0416-23
Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Keys to successful chemical cleaning of boilers, 0416-06
Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Bonding
Techniques for bonding modern high-performance liners, 0304-40

Box compression
see Compression strength

Box flaps
see Flaps

Box machines
Troubleshooting a glue lap problem, 0304-10

Box plants
see Converting plants

Boxes
Corrugated boxplant-list of potential hazards, 0301-01
Critical properties to consider when unitizing, 0304-72
High vacuum sheet dewatering, 0404-60

Broke
Broke loss calculations, 0502-10

Bronze
Guidelines for nondestructive examination of suction roll shells, 0402-19
Weld repairs on new suction roll shells, 0402-17

Burners
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Burst testers
Calibration and maintenance of the burst tester, 0304-24
Butt joints
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

Butt welds
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

CADCAM

CONEG
see Regulations

Cadmium
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58

Calcination
Physical data of calcined kaolin-water suspensions, 0106-09

Calcium base liquors
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07

Calcium bisulfite
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07

Calcium carbonate
Physical data of calcium carbonate-water suspensions, 0106-01

Calcium hydroxide
Density of milk of lime solution, 0607-05

Calculations
see Computation

Calibration
Basic guidelines for image analysis measurements, 0804-09
Calibration and maintenance of the manually operated micrometer, 0304-30
Calibration and maintenance of the burst tester, 0304-24
Suggestions for developing a box plant quality manual, 0304-49

Caliper
see Thickness

Canadian standard freeness
Interconversion of freeness, 0809-01

Carbon steel
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Carbonates
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Physical data of calcium carbonate-water suspensions, 0106-01

Cartridges
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Cast iron
Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14

Castings
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25

Caustic soda
see Sodium hydroxide

Causticizing
Energy checklist: pulp mill, 0416-24
Material balance equations relating to digester requirements, 0418-02

Centrifugal Cleaner
Introduction to centrifugal cleaners, 0508-10

Ceramics
Selection criteria for wet end ceramics, 0502-15
Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

Certification
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Chalk
see Calcium carbonate

Chambered Doctor Blade
Ink metering systems for corrugated flexo presses, 0306-09

Charting
Short-run statistical process control: a basic charting method, 0304-70
Statistical process control - procedures for charting warp, 0304-13

Checklist
see Maintenance

Chemical Cleaning
Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51

Chemical preparation
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10

Chemical properties
Chlorine dioxide (ClO2) safe storage and handling, 0606-30
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Magnesia-base pulping solutions, 0607-04
Sodium chlorate (NaClO3) safe handling and storage, 0606-31

Chemical pulps
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Chemical Recovery
Recausticizing material balance equations relating to digester requirements, 0418-02

Chemicals
Material safety data sheets, what to look for - how to understand them, 0304-38
Chemical cleaning guide for press fabrics, 0404-65

Chests
see Stock chests

Chip silos
see Chip bins

Chlorides
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12

Chlorine
Chlorine gas curve, 0606-02
Density of chlorine gas, 0606-03
Heat of vaporization of liquid chlorine, 0606-04
Viscosity of liquid chlorine, 0606-05

Chlorine dioxide
Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
Specific gravity of sodium chloride solutions, 0606-10

Chrome
Tests for corrugator roll wear, 0304-53

Chromium
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58

Clad-steel plate
see Plates

Classification
Paper grade classifications, 0404-36

Clay
Kaolin clay pigment index, 0106-06
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of hydrous Kaolin-water suspensions, 0106-02

Cleaners
Catalog of Stock Preparation Pilot Plants, 0502-20

Cleaning
Cleaning anilox rolls: procedures and options, 0306-18
Cleanup procedures for flexo folder gluer/rotary diecutters, 0305-33
Daily, weekly, and monthly maintenance checklists, 0305-34
Dryer fabric cleaning, 0404-38
Housekeeping guidelines, 0305-32
Keys to successful chemical cleaning of boilers, 0416-06
Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
Paper machine shower recommendations, 0404-61
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35

Cleaning chemicals
see Cleansers

Cleansers
Keys to successful chemical cleaning of boilers, 0416-06

Clogging
Nozzle maintenance and clogging, 0420-15

Clothing
see Felts, Machine clothing

Coating
Kaolin clay pigment index, 0106-06

Coating color
see Color

Coating thickness
Tests for corrugator roll wear, 0304-53

Coatings
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Tests for corrugator roll wear, 0304-53

Coefficient of friction
see Friction factor

Combination Metering System
Ink metering systems for corrugated flexo presses, 0306-09

Combined boards
Common curtain coating problems: causes, detection, and correction, 0304-26
Obtaining off the corrugator for use in statistical process control procedures, 0304-12
Total indicated runout and its impact on combined board quality, 0304-56
How to Minimize Rolling Scores in Diecutting Operations, 0304-64

Compressibility
Objective Determination of the Haptic Properties of Tissue Products, 0808-07

Compression
Corrugated caliper: why is it so important?, 0304-04

Compression resistance
see Compression strength

Compression strength
Corrugated caliper: why is it so important?, 0304-04
Obtaining a combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Computation
Paper machine drying rate, 0404-07

Computer-assisted
see CADCAM

Concentration
Best Practices for Consistency Measurement, 1101-07

Concentricity
Total indicated runout and its impact on combined board quality, 0304-56

Condensate
Application of dryer bars, 0404-35
Condensates
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
  Measurement of dryer condensing rates (continuous method), 0404-03
  Measurement of dryer condensing rates (vertical separator method), 0404-18
Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
  Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
  Yankee dryer steam condensing rates, 0404-49
Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04
Condensation
Dryer condensing rates (batch method), 0404-02
Dryer condensing rates (continuous method), 0404-03
Condensing rates
  see Condensation
Conditioning
  Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
  Testing atmospheres simulating end use conditions, 0808-05
Conductivity
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Conical refiners
  Conical refining intensity, 0508-07
Consistency
  Drainage evaluation by mass measurement, 0502-12
  Generalized method for determining the pipe friction loss of flowing pulp suspensions, 0410-14
  Optimum consistency for pumping pulp, 0410-15
  Best Practices for Consistency Measurement, 1101-07
Construction materials
  Sodium chlorate (NaClO₃) safe handling and storage, 0606-31
Consumption
  Paper Machine Water Efficiency, 0502-22
Contact bearings
  see Bearings
Contact technique
  Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0404-33
Container boards
  Friction -- slide angle, 0304-34
Contaminants
  see Impurities
Contamination
  see Pollution control
Continuous digesters
  Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Contraction
  Flow from a 45° slice, 0410-03
  Flow from a nozzle (slice) with inclined upper lip, 0410-04
  Flow from a vertical slice, 0410-02
Control charts
  see Charting
Control systems
  Industry 4.0 Lexicon, 1103-04
  Short-run statistical process control: a basic charting method, 0304-70
Conversion factors
  Units of measurement and, 0800-01
Converting factors
  Moisture content of paper: terminology and conversion, 0808-02
Converting plants
  Boxplant quality measurement: why test?, 0304-02
  Corrugated boxplant - list of potential hazards, 0301-01
  Machinery considerations and selection, 0305-06
Coolers
  Guidelines for Rotary Lime Kiln Refractory, 0416-27
Copper
  The role of copper in a printing ink, 0304-61
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Copper sulfate
  Tests for corrugator roll wear, 0304-53
Cores
  Determination of winder sets per reel, 0502-02
  Reel diameter for various reel spool and roll core sizes, 0502-03
Correlation
  QCS Dynamic Sensor Correlation Sampling Method, 1101-04
  Moisture Dynamic Correlation Method, 1101-05
Corrosion
  see also Corrosion inhibitors
  Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
  Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
  Fluoropolymer properties and applications in pulp and paper mills, 0402-37
  Guide to the use of stainless steel pipe specifications, 0402-24
  Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
  Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
  Guidelines for inspecting batch digesters, 0402-22
  Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
  Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
  Guidelines for nondestructive examination of suction roll shells, 0402-19
Nozzle maintenance and clogging, 0420-15
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Corrosion inhibitors
Keys to successful chemical cleaning of boilers, 0416-06

Corrosion prevention
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03

Corrugated boards
The role of copper in a printing ink, 0304-61
Critical properties to consider when unitizing, 0304-72
Important quality parameters of a printing ink, 0304-59
Obtaining caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control friction-slide angle, 0304-34
Techniques to minimize twist warp, 0304-50
Warp in corrugated board, 0304-07

Corrugated boxes
see Boxes, Corrugated boards

Corrugated containers
see Boxes, Corrugated boards, Folder gluers, Die cutters

Corrugated medium
An alternative method for designating flute sizes, 0302-04

Corrugating
An alternative method for designating flute sizes, 0302-04

Corrugating adhesives
see Adhesives

Corrugating machines
Checking for coating wear on corrugating rolls, 0304-73
Checking the flute depth of corrugating rolls, 0304-75
Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
Conducting a corrugator temperature audit, 0304-65

Corrugator bearing clearance checks and their impact, 0304-47
Impact of doublebacker hot plate level on board quality and how to measure it, 0304-66
Improved techniques to measure corrugator glue machine meter gaps, 0304-68
Prevention of score cracking in a box plant, 0304-37
Starch viscosity in corrugating adhesives, 0304-15
Tests for corrugator roll wear, 0304-53

Corrugating medium
Causes and corrections of common corrugator bonding problems, 0304-32
Edge crush test (ECT): its relationship to box compression and its derivation from containerboard edge stiffness, 0304-09
Paper machine performance guidelines, 0404-47
Paper machine drying rate, 0404-07

Procedure for setting up a raw material trial on the corrugator, 0304-01
Splicer defects and cures, 0304-31

Corrugating plants
see Operations

Corrugating rolls
see Rolls

Corrugator-double backer
see Corrugating machines

Corrugators
see also Corrugating machines
Procedure for setting up a raw material trial on the corrugator, 0304-01

Costs
Press section economic evaluation, 0404-22

Cotton
In nonwovens, 1205-02

Couch rolls
Paper Machine Vacuum System Selection Factors, 0502-01

Cover
Maintenance considerations in new construction and rebuilds, 0408-02
Rotary die cutter urethane anvil cover maintenance, 0305-35

Cracks
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for nondestructive examination of suction roll shells, 0402-19
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Creasing
Troubleshooting the Die Cutting Section, 0305-39

Crescent formers
Paper Machine Vacuum System Selection Factors, 0502-01

Cross direction
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Statistical process control -- procedures for charting warp, 0304-13
Troubleshooting cross-machine direction moisture profile problems, 0404-57
Warp in corrugated board, 0304-07

Crown
see Roll crown

Crush
Best practice control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Cubical contents
see Volumetry

Curing
Drying and curing techniques for in-line flexographic printing, 0306-06
Curtain coating
Common curtain coating problems: causes, detection, and correction, 0304-26

Cutters

  Refiner systems, their inspection and maintenance, 0508-06
  Refining
  Conical refining intensity, 0508-07
  Refiner systems, their inspection and maintenance, 0508-06
  Refractory
  Guidelines for Rotary Lime Kiln Refractory, 0416-27

Register
  Computer assisted mounting systems, 0306-02
Regulating systems
  see Control systems
Regulations
  An explanation of the toxics in packaging (formerly
  CONEG) heavy metal guidelines, 0304-58
Relative enthalpy
  see Enthalpy
Relative humidity
  see Humidity
Relief
  Water quality and monitoring requirements for paper mill
  boilers, operating with high purity feedwater, 0416-03
Replacement
  Chloride and potassium measurement and control in the
  pulping and chemical recovery cycle, 0416-15
Repair
  see Maintenance
Repeatability
  How to perform a gauge repeatability and reproducibility
  study, 0304-71
Reporting
  Press fabric record book, 0404-21
Replacement
  Guidelines for replacement of generating bank tubes with
  expanded joints in two-drum boilers, 0416-08
Reproducibility
  How to perform a gauge repeatability and reproducibility
  study, 0304-71
Resolution
  Basic guidelines for image analysis measurements,
  0804-09
Retention
  Definitions, 0502-13
  Fourdrinier drainage performance evaluation – blow test
  method, 0410-07
Reverse Angle Doctor Blade
  Ink metering systems for corrugated flexo presses,
  0306-09
Reverse osmosis
  Evaluating reverse osmosis for treating makeup to the
  boiler feedwater in a pulp and paper mill, 0416-07
Reverse warp
  see Warpage
Rewetting
  Methods to minimize sheet rewet in the press section,
  0404-59
Rider rolls
  Total indicated runout and its impact on combined board
  quality, 0304-56
Ring crush/SCT resistance
  Techniques for bonding modern high-performance liners,
  0304-40
Ring crush/SCT tests
  Techniques for bonding modern high-performance liners,
  0304-40
Rod coaters

Rolling scores
see Scores

Roller bearings
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Rolls
An alternative method for designating flute sizes, 0302-04
Checking the flute depth of corrugating rolls, 0304-75
Checking for coating wear on corrugating rolls, 0304-73
Corrugator temperature audit, 0304-65
Granite roll material and surface requirements, 0404-41
Parallel of corrugating rolls with “NCR” paper, 0304-62
TAPPI Roll number for inventory/tracking systems and bar codes, 1004-01
Techniques for nip impressions, 0404-46
Tests for corrugator roll wear, 0304-53
Total indicated runout and its impact on combined board quality, 0304-56
Weight of newsprint rolls, 0502-11

Rotary
Troubleshooting the Die Cutting Section, 0305-39

Rotary diecutter
see Rotary machines, Die cutters; see also Folder gluers

Rotary filters
Bleaching plant washer efficiency guide, 0606-23

Rotary machines
Buying, Storing, and Handling P.V.A. Adhesives Used on Folder Gluers and on Sheet Laminators, 0305-25

Cleanup procedures for flexo folder glue/rotary diecutters, 0305-33

Introduction to flexo folder glue/rotary diecutter TIPs, 0305-04

Ordering steel rule cutting dies, 0305-21

Proper use of pull bands, 0305-18

Rotary cutting die maintenance, 0305-23

Rotary die cutter urethane anvil cover maintenance, 0305-35

Rotation
Pulpstone speed chart, 0605-02

Roundness
see Shape

Roughness
Objective Determination of the Haptic Properties of Tissue Products, 0808-07

Rubbing
see also Abrasion resistance

Runnability
Sheet handling devices, 0404-44

Safety
Caustic soda (NaOH) safe storage and handling, 0606-27

Chlorine dioxide (ClO2) safe storage and handling, 0606-30

Corrugated boxplant-list of potential hazards, 0301-01

Gaseous ozone (O3) safe handling, 0606-28

Housekeeping guidelines, 0305-32

Hydrogen peroxide (H2O2) safe storage and handling, 0606-24

Material safety data sheets, 0304-38

Methanol (CH3OH) safe storage and handling, 0606-25

Bulk Oxygen (O2) Safe Storage and Handling, 0606-29

Sodium chlorate (NaClO3) safe handling and storage, 0606-31

Sulfuric acid (H2SO4) safe storage and handling, 0606-34

Sootblower Safety and Upgrade Guidelines, 0416-08

Saturated solutions
see Solutions

Salt
see Sodium chloride

Sampling
Sampling procedures for biomass fuel for boiler performance testing, 0416-17

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

QCS Dynamic Sensor Correlation Sampling Method, 1101-04

Moisture Dynamic Correlation Method, 1101-05

Best Practices for Consistency Measurement, 1101-07

Sumped solutions
see Solutions
Scanners
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Scheduling
Checklist for a properly planned project, 0408-01
Housekeeping guidelines, 0305-32
Maintenance considerations in new construction and rebuilds, 0408-02

Schopper Riegler freeness
Interconversion of freeness, 0809-01

Score breaks
How to prevent score cracking in a box plant, 0304-37

Score cracks
see Score breaks

Scores
How to Minimize Rolling Scores in Diecutting Operations, 0304-64
Preventing score cracking in a box plant, 0304-37

Scoring
Machinery considerations and selection: yoked scoring slotting section, 0305-53

Screens
Catalog of Stock Preparation Pilot Plants, 0502-20

Seal water
see Sealants, Water

Seals
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Sealants
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12

Seamless materials
Guide to the use of stainless steel pipe specifications, 0402-24

Selection
Machinery considerations and selection, 0305-06

Selective catalytic reduction
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Selective noncatalytic reduction
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Semichemical pulps
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfate solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C and other temperatures, 0607-22

Sensitivity
Basic guidelines for image analysis measurements, 0804-09

Sensors
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

QCS Dynamic Sensor Correlation Sampling Method, 1101-04
Moisture Dynamic Correlation Method, 1101-05

Servicing
Maintenance considerations in new construction and rebuilds, 0408-02

Setting time
Understanding and troubleshooting hot melt adhesives, 0304-74

Shafts
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34

Shape
Total indicated runout and its impact on combined board quality, 0304-56

Sheet water content
see Moisture content

Shells
Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
Weld repairs on new suction roll shells, 0402-17

Shock drying
Terminology for high temperature pressing, 0404-48

Showers
Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
Paper machine shower recommendations, 0404-61
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements 0404-27
Steam shower applications in the forming and press section, 0404-58
Chemical cleaning guide for press fabrics, 0404-65

Silica
Guidelines for Rotary Lime Kiln Refractory, 0416-27
Response to contamination of high purity boiler feedwater, 0416-05
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Paper Machine Water Efficiency, 0502-22

Silos
Headbox approach piping guidelines, 0404-54

Single Facer
Procedure for setting up a raw material trial on the corrugator, 0304-01

Singlefacers
Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17
Alternative method for designating flute sizes, 0302-04
Causes and corrections of common corrugator bonding problems, 0304-32
Checking for coating wear on corrugating rolls, 0304-73
Checking the flute depth of corrugating rolls, 0304-75
Parallel of corrugating rolls with “NCR” paper, 0304-62
Preventing score cracking in a box plant, 0304-37
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
Splicer defects and cures, 0304-31

Siphons
Thermocompressor Applications for Paper Drying,
Skid
Material handling considerations for flexo folder gluers,
Recommended Dryer Differential Pressures

Slabbing
Broke loss calculations

Slices
Flow from a 45° slice
Flow from a nozzle (slice) with inclined upper lip
Head of Stock Behind Slice (Head/Jet and Slice Flow Rate Relationships)
Flow from a vertical slice

Slide angle
Statistical process control, friction

Slotting
Machinery considerations and selection: yoked scoring slotting section

Slurry
Physical data of calcined kaolin-water suspensions
Physical data of calcium carbonate-water suspensions
Physical data of hydrous Kaolin-water suspensions

Slushed paper stock
see Paper stock

Smearing
Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass

Smog
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry

Smoothness
Objective Determination of the Haptic Properties of Tissue Products

Sodium
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater
Density of aqueous sodium bicarbonate solution
Density of aqueous sodium bisulfite solution (25°C)
Sodium borate
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives
Density of aqueous sodium carbonate solution
Density of sodium carbonate (NaClO₃) safe handling and storage
Specific gravity of sodium chloride solutions

Sodium hydroxide
Caustic soda (NaOH) safe storage and handling
Relative enthalpy of solution
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives
Specific gravity and density of caustic soda solutions
Specific heat of caustic soda solutions
Viscosity of sodium hydroxide solutions

Sodium sulfate
Density of aqueous sodium sulfate solution

Solids content
Physical data of calcined kaolin-water suspensions
Physical data of calcium carbonate-water suspensions
Physical data of hydrous Kaolin-water suspensions

Solubility
Solubility of sulfur dioxide
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions
Solubility of sulfur dioxide in magnesium bisulfite solution
Solubility of sulfur dioxide in saturated magnesium bisulfite solution

Solutions
Equilibrium relative humidities over saturated salt solutions
Specific heat of caustic soda solutions

Sorption
Cotton in nonwovens

Soot blower
Recovery boiler sootblowers: practical guidelines
Recovery boiler sootblowers: the basics
Sootblower Safety and Upgrade Guidelines

SPC techniques
see Statistical methods

Specialty coating pigment
see Pigment

Specialty papers
Paper machine performance guidelines

Specific gravity
see Density

Specific heat
Specific heat of caustic soda solutions
Specific heat of sodium carbonate solution

Specifications
Guideline specification for procurement of an economizer for a recovery boiler
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater

Speed
see Velocity

Spent sulfite liquors
Density of aqueous sodium sulfite solution

Splitters
Splicer defects and cures
Spools
   Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
   Reel diameter for various reel spool and roll core sizes, 0502-03

Spunlaced fabric
   Cotton in nonwovens, 1205-02

Spray coaters
   see also Coaters
   In-line coating at the corrugator, 0304-39

Squaring
   see Squared papers, Trimming

Stackers
   Multiple-out rotary diecut stacking, 0305-47
   Stacking off the rotary diecutter, 0305-46

Stacking
   Corrugated caliper: why is it so important?, 0304-04

Stacking strength
   see Compression strength

Stainless steel
   Guide to the use of stainless steel pipe specifications, 0402-24
   Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
   Guidelines for nondestructive examination of suction roll shells, 0402-19
   Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
   Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
   Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
   Weld repairs on new suction roll shells, 0402-17

Standard conditions
   Testing atmospheres simulating end use conditions, 0808-05

Starch
   Starch adhesive preparation and distribution systems: housekeeping, 0304-06
   Starch adhesive trial, 0304-22
   Statistical process control of starch gelatinization temperature, 0304-14
   Statistical process control of starch viscosity, 0304-15
   Techniques for running “WRA” (water resistant starch adhesive), 0304-46
   Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
   Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44

Starch conversion
   Statistical process control of starch gelatinization temperature, 0304-14

Statistical analysis
   How to perform a gauge repeatability and reproducibility study, 0304-71
   Obtaining combined board caliper off the corrugator for use statistical process control procedures, 0304-12
   Starch viscosity in corrugating adhesives, 0304-15

Statistical distribution
   Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Statistical methods
   Boxplant quality measurement: why test?, 0304-02
   Obtaining combined board caliper off the corrugator, 0304-12
   Procedures for charting warp, 0304-13
   Procedures for utilizing statistical control techniques to monitor the tare weight of a run of boxes, 0304-35
   Short-run statistical process control: a basic charting method, 0304-70
   Statistical process control: friction - slide angle, 0304-34
   Statistical process control of starch gelatinization temperature, 0304-14
   Statistical process control of starch viscosity, 0304-15
   Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Statistical process control
   see Statistical methods

Statistical quality control
   see Statistical methods

Statistics
   Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
   Obtaining combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
   Starch viscosity in corrugating adhesives, 0304-15
   Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Status reports
   see Reporting

Steam
   Application of dryer bars, 0404-35
   Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14
   Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
   Guidelines for routine periodic inspection and testing of cast iron Yankee and MG dryers, 0425-01
   Response to contamination of high purity boiler feedwater, 0416-05
   Steam shower applications in the forming and press section, 0404-58
   Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
   Yankee dryer steam condensing rates, 0404-49

Vacuum boxes
   High vacuum sheet dewatering, 0404-60
   Paper Machine Vacuum System Selection Factors, 0502-01
Performance evaluation techniques for paper machine vacuum systems, 0404-55

**Vacuum equipment**
- Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

**Vacuum factors**
- Paper Machine Vacuum System Selection Factors, 0502-01

**Vacuum filters**
- Bleaching plant washer efficiency guide, 0606-23

**Vacuum pumps**
- Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
- Performance evaluation techniques for paper machine vacuum systems, 0404-55
- Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

**Vacuum rolls**
- Liquid penetrant testing of new suction roll shells, 0402-11
- Paper Machine Vacuum System Selection Factors, 0502-01
- Techniques for nip impressions, 0404-46
- Weld repairs on new suction roll shells, 0402-17

**Vacuum washers**
- Bleaching plant washer efficiency guide, 0606-23

**Valves**
- Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
- Headbox approach piping guidelines, 0404-54

**Vapor pressure**
- Chlorine gas curve, 0606-02
- Vapor pressure of sulfur dioxide solutions, 0607-11
- Vapor pressure of sodium carbonate solution, 0607-16
- Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

**Variance**
- Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

**Varnish**
- Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

**Velocity**
- see also Machine speed
- Pulpstone speed chart, 0605-02
- Headbox approach piping guidelines, 0404-54

**Ventilation**
- Paper machine room ventilation guidelines, 0404-50
- Recommended minimum dryer pocket air requirements, 0404-17
- Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24

**Viscosity**
- Density of aqueous sodium sulfite solution, 0607-18
- Liquid chlorine, 0606-05
- Quality techniques using existing equipment, 0306-11
- Statistical process control of starch viscosity, 0304-15
- Viscosities of spent sulfite liquors at 26.7°C (Oswald capillary viscometer), 0607-22
- Viscosity of a neutral sulfite spent liquor (Oswald capillary viscometer), 0607-23
- Viscosity of sodium carbonate solution, 0607-17
- Viscosity of sodium hydroxide solutions, 0606-11
- Viscosity reading procedure for flexographic corrugated inks, 0304-18

**Vision**
- Basic guidelines for image analysis measurements, 0804-09

**Volume**
- Grinder pulpstones – cubical contents, 0605-01
- Identifying anilox volume measuring equipment, 0306-15

**Warning labels**
- see Hazardous materials

**Warpage**
- Statistical process control -- procedures for charting warp, 0304-13
- Techniques to minimize twist warp, 0304-50
- Warp in corrugated board, 0304-07

**Wash waters**
- Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

**Washers**
- Energy checklist: pulp mill, 0416-24
- Bleaching plant washer efficiency guide, 0606-23

**Washing**
- Bleaching plant washer efficiency guide, 0606-23
- Recommended pulp bleaching stage designation method, 0606-21

**Wastewater treatment equipment**
- see Effluent treatment

**Water**
- see also Solubility
- Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
- Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12
- Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
- Paper Machine Water Efficiency, 0502-22

**Water content**
- see Moisture content

**Water hardness**
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

**Water permeability**
- Troubleshooting cross-machine direction moisture profile problems, 0404-57

**Water removal**
- Determination of water removal by wet presses, 0404-01
- High vacuum sheet dewatering, 0404-60
- Methods to minimize sheet rewet in the press section, 0404-59
