Subject Index
Technical Information Papers

This document was last updated April 28, 2021

A-
Abrasion
  Selection criteria for wet end ceramics, 0502-15
Abrasion resistance
  Selection criteria for wet end ceramics, 0502-15
Absorption
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Accessibility
  Maintenance considerations in new construction and rebuilds, 0408-02
Acrylic fibers
  see Polyacrylics, Synthetic fibers
Additives
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
Adhesives
  Buying, storing, and handling flexo folder gluer/rotary diecutter adhesives, 0305-25
  Causes and corrections of common corrugator bonding problems, 0304-32
  Evaluating glue lap adhesive properties, 0304-16
  Procedure for setting up a raw material trial on the corrugator, 0304-01
  Starch adhesive preparation and distribution systems: housekeeping, 0304-06
  Starch adhesive trial, 0304-22
  Statistical process control of starch gelatinization temperature, 0304-14
  Statistical process control of starch viscosity, 0304-15
  Stickies definition and classification, 0603-02
  Techniques for bonding modern high-performance liners, 0304-40
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
  Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
  Understanding and troubleshooting hot melt adhesives, 0304-74
  Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44
After dryers
  Paper machine drying rate, 0404-07
Agitation
  Using washing water as the vehicle in starch based corrugating adhesive, 0304-44
Agitators
  Guidelines for side-entering stock agitators, 0420-13
Air
  Paper machine room ventilation guidelines, 0404-50
Air balance
  see Air, Materials balance
Air flow
  Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
  Recommended minimum dryer pocket air requirements, 0404-17
  Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
  Sheet handling devices, 0404-44
Air jets
  Sheet handling devices, 0404-44
Air permeability
  Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20
Air pollution
  Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Air staging
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Alignment
  Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
Alkali
  Specific heat of caustic soda solutions, 0606-07
Alkaline sulfite pulping
  Boiling point rise of spent sulfite liquors, 0607-21
  Definitions of terms in the sulfite pulping process, 0607-25
  Density of aqueous sodium sulfite solution, 0607-18
  Density of milk of lime solution, 0607-05
  Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
  Sulfur burner gas strength volume, 0607-01
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Alkalinity
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Ammonia
  Solubility of sulfur dioxide, 0607-06
Analysis
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Angle of slide
see Slide angle

Anilox coaters
In-line coating at the corrugator, 0304-39

Anilox rolls
see Flexography, Printing cylinders

Anvil
Troubleshooting the diecutting section, 0305-39

Approach flow systems
Headbox approach piping guidelines, 0404-54

Ash
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Drainage evaluation by mass measurement, 0502-12
Chemical cleaning guide for press fabrics, 0404-65

Atmosphere
Testing atmospheres simulating end use conditions, 0808-05

Auditing
Checklist for a properly planned project, 0408-01

Automatic feeders
see Feeders

Automation
Industry 4.0 Lexicon, 1103-04

Availability
Definitions of black liquor recovery furnace availability, 0416-02

B-

Backing Blade
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Bacteria
Starch adhesive preparation and distribution systems: housekeeping, 0304-06

Bags
Paper machine drying rate, 0404-07

Bar Width Reduction (BWR)
see Product codes

Bar codes
see Product codes

Bases
see Hydroxides

Basis weight
Headbox approach piping guidelines, 0404-54

Batch digesters
Guidelines for inspecting batch digesters, 0402-22

Batch process
Measurement of dryer condensing rates (vertical separator method), 0404-18

Bearings
Corrugator bearing clearance checks and their impact, 0304-47
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Total indicated runout and its impact on combined board quality, 0304-56
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Bearing failure
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Bicide
Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Biomass
Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Biomechanics
see Human factors

Bisulfites
Physical and chemical properties of magnesia-base pulping solutions, 0607-04
Solubility of sulfur dioxide, 0607-05
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Black liquors
Field welding of pin studs in black liquor recovery boilers, 0402-15
Recommended test procedure for black liquor evaporators, 0416-11
Recovery boiler performance calculation – short form, 0416-01
Response to contamination of high purity boiler feedwater, 0416-05
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Blade
Paper machine doctor recommendations, 0404-67

Blade coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Blade holder
Paper machine doctor recommendations, 0404-67

Bleach plants
Bleaching plant washer efficiency guide, 0606-23

Bleached board
Bleaching process guidelines, 0404-47

Bleaching
Boiling point rise of spent sulfite liquors, 0607-21
Cotton in nonwovens, 1205-02
Chlorine gas curve, 0606-02
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of chlorine gas, 0606-03
Density of milk of lime solution, 0607-05
Energy checklist: pulp mill, 0416-24
Heat of vaporization of liquid chlorine, 0606-04
Recommended pulp bleaching stage designation method,
Relative enthalpy (heat content) of sodium hydroxide solutions, 0606-08
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10
Sulfur burner gas strength volume, 0606-10
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Viscosity of liquid chlorine 0606-05
Viscosity of sodium hydroxide solutions, 0606-11
Bleaching stages
see Bleaching
Blind-drilled rolls
see Vacuum rolls
Blistering
Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17
Blow boxes
Sheet handling devices, 0404-44
Blowdown
see also Blowing
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Blowing
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Board
Pilot paper and wet laid nonwoven machines, 0502-16
Board caliper
see Thickness
Boiler feed water
see Boilers, Feedwater
Boiler tubes
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13
Boilers
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Explanation of recovery boiler leak indications, 0416-23
Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Keys to successful chemical cleaning of boilers, 0416-06
Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26
Bonding
Techniques for bonding modern high-performance liners, 0304-40
Box compression
see Compression strength
Box flaps
see Flaps
Box machines
Troubleshooting a glue lap problem, 0304-10
Box plants
see Converting plants
Boxes
Corrugated boxplant-list of potential hazards, 0301-01
Critical properties to consider when unitizing, 0304-72
High vacuum sheet dewatering, 0404-60
Squaring flap cut (center special) boxes, 0305-45
Broke
Broke loss calculations, 0502-10
Bronze
Guidelines for nondestructive examination of suction roll shells, 0402-19
Weld repairs on new suction roll shells, 0402-17
Burners
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Burst testers
Calibration and maintenance of, 0304-24
Butt joints
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Butt welds
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
C-
CADCAM
Computer-assisted machinery, 0305-02
CONEG
see Regulations
Cadmium
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58

Calcination
Physical data of calcined kaolin-water suspensions, 0106-09

Calcium base liquors
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07

Calcium bisulfite
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07

Calcium carbonate
Physical data of calcium carbonate-water suspensions, 0106-01

Calcium hydroxide
Density of milk of lime solution, 0607-05

Calculations
see Computation

Calibration
Basic guidelines for image analysis measurements, 0804-09
Calibration and maintenance of the manually operated micrometer, 0304-30
Of burst testers, 0304-24
Suggestions for developing a box plant quality manual, 0304-49

Caliper
see Thickness

Canadian standard freeness
Interconversion of freeness, 0809-01

Carbon steel
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Carbonates
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Physical data of calcium carbonate-water suspensions, 0106-01

Cartridges
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Cast iron
Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14

Castings
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25

Caustic soda
see Sodium hydroxide

Causticizing
Energy checklist: pulp mill, 0416-24
Material balance equations relating to digester requirements, 0418-02

Ceramics
Selection criteria for wet end ceramics, 0502-15
Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

Certification
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Chalk
see Calcium carbonate

Charting
Short-run statistical process control: a basic charting method, 0304-70
Statistical process control pin adhesion, 0304-23
Statistical process control - procedures for charting warp, 0304-13

Checklist
see Maintenance

Chemical
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51

Chemical preparation
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10

Chemical properties
Chlorine dioxide (ClO2) safe storage and handling, 0606-30
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Magnesia-base pulping solutions, 0607-04
Sodium chlorate (NaClO3) safe handling and storage, 0606-31

Chemical recovery
Recausticizing material balance equations relating to digester requirements, 0418-02

Chemicals
Material safety data sheets, what to look for - how to understand them, 0304-38
Chemical cleaning guide for press fabrics, 0404-65

Chests
see Stock chests

Chip silos
see Chip bins

Chlorides
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12

Chlorine
Chlorine gas curve, 0606-02
Density of chlorine gas, 0606-03
Heat of vaporization of liquid chlorine, 0606-04
Viscosity of liquid chlorine, 0606-05
Chlorine dioxide
Safe storage and handling of, 0606-30
Specific gravity of sodium chloride solutions, 0606-10
Chrome
Tests for corrugator roll wear, 0304-53
Chromium
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58
Clad-steel plate
see Plates
Classification
Paper grade classifications, 0404-36
Clay
Kaolin clay pigment index, 0106-06
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of hydrous kaolin-water suspensions, 0106-02
Cleaners
Catalog of Stock Preparation Pilot Plants, 0502-20
Introduction to centrifugal cleaners, 0508-10
Cleaning
Cleaning anilox rolls: procedures and options, 0306-18
Cleanup procedures for flexo folder gluer/rotary diecutters, 0305-33
Daily, weekly, and monthly maintenance checklists, 0305-34
Dryer fabric cleaning, 0404-38
Housekeeping guidelines, 0305-32
Introduction to centrifugal cleaners, 0508-10
Keys to successful chemical cleaning of boilers, 0416-06
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Paper machine shower recommendations, 0404-61
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Cleaning chemicals
see Cleaners
Cleansers
Keys to successful chemical cleaning of boilers, 0416-06
Clogging
Nozzle maintenance and clogging, 0420-15
Clothing
see Felts, Machine clothing
Coating
Kaolin clay pigment index, 0106-06
Coating color
see Color
Coating thickness
Tests for corrugator roll wear, 0304-53
Coatings
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Tests for corrugator roll wear, 0304-53
Coefficient of friction
see Friction factor
Combined boards
Common curtain coating problems: causes, detection, and correction, 0304-26
Obtaining off the corrugator for use in statistical process control procedures, 0304-12
Total indicated runout and its impact on combined board quality, 0304-56
Compression
Corrugated caliper: why is it so important?, 0304-04
Compression resistance
see Compression strength
Compression strength
Corrugated caliper: why is it so important?, 0304-04
Obtaining a combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11
Computation
Paper machine drying rate, 0404-07
Computer-assisted
see CADCAM
Concentricity
Total indicated runout and its impact on combined board quality, 0304-56
Condensate
Application of dryer bars, 0404-35
Condensates
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Measurement of dryer condensing rates (continuous method), 0404-03
Measurement of dryer condensing rates (vertical separator method), 0404-18
Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Yankee dryer steam condensing rates, 0404-49
Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04
Condensation
Dryer condensing rates (batch method), 0404-02
Dryer condensing rates (continuous method), 0404-03
Condensing rates
see Condensation
Conditioning
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Testing atmospheres simulating end use conditions, 0808-05
Conductivity
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Conical refiners
Conical refining intensity, 0508-07

Consistency
Drainage evaluation by mass measurement, 0502-12

Generalized method for determining the pipe friction loss of flowing pulp suspensions, 0410-14
Optimum for pumping pulp, 0410-15

Construction materials
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31

Contact bearings
see Bearings

Contact technique
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Container boards
Friction -- slide angle, 0304-34

Contaminants
see Impurities

Contamination
see Pollution control

Continuous digesters
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27

Contraction
Flow from a 45° slice, 0410-03
Flow from a nozzle (slice) with inclined upper lip, 0410-04
Flow from a vertical slice, 0410-02

Control charts
see Charting

Control systems
Industry 4.0 Lexicon, 1103-04
Short-run statistical process control: a basic charting method, 0304-70

Conversion factors
Units of measurement and, 0800-01

Converting factors
Moisture content of paper: terminology and conversion, 0808-02

Converting plants
Boxplant quality measurement: why test?, 0304-02
Computer-assisted machinery, 0305-02
Corrugated boxplant - list of potential hazards, 0301-01
Machinery considerations and selection, 0305-06

Copper
The role of copper in a printing ink, 0304-61
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Copper sulfate
Tests for corrugator roll wear, 0304-53

Cores
Determination of winder sets per reel, 0502-02
Reel diameter for various reel spool and roll core sizes, 0502-03

Corrosion
see also Corrosion inhibitors
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Guide to the use of stainless steel pipe specifications, 0402-24
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for inspecting batch digesters, 0402-22
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Guidelines for nondestructive examination of suction roll shells, 0402-19
Nozzle maintenance and clogging, 0420-15
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Corrosion inhibitors
Keys to successful chemical cleaning of boilers, 0416-06

Corrosion prevention
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03

Corrugated boards
The role of copper in a printing ink, 0304-61
Critical properties to consider when unitizing, 0304-72
Important quality parameters of a printing ink, 0304-59
Obtaining caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control friction-slide angle, 0304-34
Techniques to minimize twist warp, 0304-50
Warp in corrugated board, 0304-07

Corrugated boxes
see Boxes, Corrugated boards

Corrugated containers
see Boxes, Corrugated board, Folder gluers, Die cutters

Corrugated medium
An alternative method for designating flute sizes, 0302-04

**Corrugating**

An alternative method for designating flute sizes, 0302-04

**Corrugating adhesives**

*see* Adhesives

**Corrugating machines**

- Checking for coating wear on corrugating rolls, 0304-73
- Checking the flute depth of corrugating rolls, 0304-75
- Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
- Computer-assisted machinery, 0305-02
- Conducting a corrugator temperature audit, 0304-65
- Corrugator bearing clearance checks and their impact, 0304-47
  - Impact of doublebacker hot plate level on board quality and how to measure it, 0304-66
  - Improved techniques to measure corrugator glue machine meter gaps, 0304-68
  - Prevention of score cracking in a box plant, 0304-37
  - Starch viscosity in corrugating adhesives, 0304-15
- Tests for corrugator roll wear, 0304-53

**Corrugating medium**

- Causes and corrections of common corrugator bonding problems, 0304-32
  - Edge crush test (ECT): its relationship to box compression and its derivation from containerboard edge stiffness, 0304-09
  - Paper machine performance guidelines, 0404-47
  - Paper machine drying rate, 0404-07
  - Procedure for setting up a raw material trial on the corrugator, 0304-01
- Splicer defects and cures, 0304-31

**Corrugating plants**

*see* Operations

**Corrugating rolls**

*see* Rolls

**Corrugator-double backer**

*see* Corrugating machines

**Corrugators**

*see also* Corrugating machines

- Procedure for setting up a raw material trial on the corrugator, 0304-01

**Costs**

- Press section economic evaluation, 0402-22

**Cotton**

- In nonwovens, 1205-02

**Couch rolls**

- Paper machine vacuum selection factors, 0502-01

**Cover**

- Maintenance considerations in new construction and rebuilds, 0408-02
  - Rotary die cutter urethane anvil cover maintenance, 0305-35

**Cracks**

- Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
- Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
  - Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
  - Guidelines for nondestructive examination of suction roll shells, 0402-19
  - Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

**Crescent formers**

- Paper machine vacuum selection factors, 0502-01

**Cross direction**

- Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
- Statistical process control -- procedures for charting warp, 0304-13
  - Troubleshooting cross-machine direction moisture profile problems, 0404-57
  - Warp in corrugated board, 0304-07

**Crown**

*see* Roll crown

**Curtain coating**

- Common curtain coating problems: causes, detection, and correction, 0304-26
- See Die cutters

**Cutting dies**

*see* Die cutters, Rotary machines

**D-**

**Damage**

- Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
- Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

**Dandy rolls**

- Dandy roll applications, 0404-53

**Data storage**

- Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

**Data tables**

- Moisture content of paper: terminology and conversion, 0808-02

**Deaerators**

- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
  - Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Defects
Addendum to *Corrugating Defect Terminology Manual* -- defects related to the use of fingerless singlefacer, 0304-17
Corrugator bearing clearance checks and their impact, 0304-47

**Definitions**
see Nomenclature

**Degradation**
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28

**Densified liners**
see Liners

**Density**
Density of aqueous sodium bicarbonate solution, 0607-13
Density of aqueous sodium carbonate solution, 0607-14
Density of chlorine gas, 0606-03
Milk of lime solution, 0607-05
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of calcium carbonate-water suspensions, 0106-01
Physical data of hydrous Kaolin-water suspensions, 0106-02
Sodium sulfite solution, 0607-18
Specific gravity and density of caustic soda solutions, 0606-20

Conical refining intensity, 0508-07
Refiner systems, their inspection and maintenance, 0508-06

Refining
Conical refining intensity, 0508-07
Refiner systems, their inspection and maintenance, 0508-06

Register
Computer assisted mounting systems, 0306-02

Regulating systems
see Control systems

Regulations
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58

Relative enthalpy
see Enthalpy

Relative humidity
see Humidity

Relief
Water quality and monitoring requirements for paper mill boilers, operating with high purity feedwater, 0416-03

Removal
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15

Repair
see Maintenance

Repeatability
How to perform a gauge repeatability and reproducibility study, 0304-71

Reporting
Press fabric record book, 0404-21

Replacement
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08

Reproducibility
How to perform a gauge repeatability and reproducibility study, 0304-71

Resolution
Basic guidelines for image analysis measurements, 0804-09

Retention
Definitions, 0502-13
Fourdrinier drainage performance evaluation – blow test method, 0410-07

Reverse osmosis
Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07

Reverse warp
see Warpage
Rewetting
Methods to minimize sheet rewet in the press section, 0404-59

Rider rolls
Total indicated runout and its impact on combined board quality, 0304-56

Ring crush/SCT resistance
Techniques for bonding modern high-performance liners, 0304-40

Ring crush/SCT tests
Techniques for bonding modern high-performance liners, 0304-40

Rod coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Roll cleaning
Paper machine doctor recommendations, 0404-67

Roll coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Roll core
see Cores

Roll Cover Selection
A guide to proper wiper roll selection for flexographic printing in the corrugated box industry, 0306-20

Roll crown
Techniques for nip impressions, 0404-46

Roll density
see Rolls

Roll handling
see Materials handling, Jumbo rolls

Roll identification
see Rolls

Roll length
see Rolls

Roll number
see Rolls

Roll stands
Splicer defects and cures, 0304-31

Roll tracking
see Rolls

Roll weight
see Rolls

Rolling contact bearings
see Bearings

Rolling scores
see Scores

Roller bearings
Design, monitoring and maintenance guidelines for Yankee dryers, 0425-03

Rolls
An alternative method for designating flute sizes, 0302-04
Checking the flute depth of corrugating rolls, 0304-75
Checking for coating wear on corrugating rolls, 0304-73
Corrugator temperature audit, 0304-65
Granite roll material and surface requirements, 0404-41
Parallel of corrugating rolls with “NCR” paper, 0304-62
TAPPI Roll number for inventory/tracking systems and bar codes, 1004-01
Techniques for nip impressions, 0404-46
Tests for corrugator roll wear, 0304-53
Total indicated runout and its impact on combined board quality, 0304-56
Weight of newsprint rolls, 0502-11

Rotary diecutter
see Rotary machines, Die cutters; see also Folder gluers

Rotary filters
Bleaching plant washer efficiency guide, 0606-23

Rotary machines
Buying, storing, and handling flexo folder gluer/rotary diecutter adhesives, 0305-25
Cleanup procedures for flexo folder gluer/rotary diecutters, 0305-35
Introduction to flexo folder gluer/rotary diecutter TIPs, 0305-04
Ordering steel rule cutting dies, 0305-21
Project leader, 0305-13
Proper use of pull bands, 0305-18
Rotary cutting die maintenance, 0305-23
Rotary die cut urethane anvil cover maintenance, 0305-35

Roundness
see Shape

Rubbing
see also Abrasion resistance

Runnability
Sheet handling devices, 0404-44

Safety
Caustic soda (NaOH) safe storage and handling, 0606-27
Chlorine dioxide (ClO2) safe storage and handling, 0606-30
Corrugated boxplant-list of potential hazards, 0301-01
Gaseous ozone (O3) safe handling, 0606-28
Housekeeping guidelines, 0305-32
Hydrogen peroxide (H2O2) safe storage and handling, 0606-24
Material safety data sheets, 0304-38
Methanol (CH3OH) safe storage and handling, 0606-25
Oxygen (O2) bulk storage and safe handling, 0606-29
Sodium chlorate (NaClO3) safe handling and storage, 0606-31
Sulfuric acid (H2SO4) safe storage and handling, 0606-26

Safety equipment
Chlorine dioxide (ClO2) safe storage and handling, *0606-33

Sampling
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

Saturated solutions
see Solutions

**Scanners**
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

**Scheduling**
- Checklist for a properly planned project, 0408-01
- Housekeeping guidelines, 0305-32
- Maintenance considerations in new construction and rebuilds, 0408-02

**Schopper Riegler freeness**
- Interconversion of freeness, 0809-01

**Score breaks**
- How to prevent score cracking in a box plant, 0304-37

**Score cracking**
- Troubleshooting the diecutting section, 0305-39

**Score cracks**
see Score breaks

**Scores**
- Minimizing rolling scores on lightweight and high-performance liners in diecutting operations, 0304-64
- Preventing score cracking in a box plant, 0304-37

**Scoring**
- Machinery considerations and selection: yoked scoring slotting section, 0305-53

**Screens**
- Catalog of Stock Preparation Pilot Plants, 0502-20

**Seal water**
see Sealants, Water

**Seals**
- Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

**Sealants**
- Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12

**Seamless materials**
- Guide to the use of stainless steel pipe specifications, 0402-24

**Secondary fibers**
- Stickies definition and classification, 0603-02

**Selection**
- Machinery considerations and selection, 0305-06

**Selective catalytic reduction**
- Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

**Selective noncatalytic reduction**
- Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

**Semichemical pulps**
- Boiling point rise of spent sulfite liquors, 0607-21
- Definitions of terms in the sulfite pulping process, 0607-25
- Density of aqueous sodium sulfite solution, 0607-18
- Density of milk of lime solution, 0607-05
- Solubility of sulfur dioxide, Ca(HSO3)2: solutions, 0607-07
- Sulfur burner gas strength volume, 0607-01
- Viscosities of various spent sulfite liquors at 26.7°C and other temperatures, 0607-22

**Sensitivity**
- Basic guidelines for image analysis measurements, 0804-09

**Sensors**
- Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

**Servicing**
- Maintenance considerations in new construction and rebuilds, 0408-02

**Setting time**
- Understanding and troubleshooting hot melt adhesives, 0304-74

**Shafts**
- Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34

**Shape**
- Total indicated runout and its impact on combined board quality, 0304-56

**Sheet water content**
see Moisture content

**Shells**
- Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
- Weld repairs on new suction roll shells, 0402-17

**Shock drying**
- Terminology for high temperature pressing, 0404-48

**Showers**
- Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
- Paper machine shower recommendations, 0404-61
- Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements 0404-27
- Steam shower applications in the forming and press section, 0404-58
- Chemical cleaning guide for press fabrics, 0404-65

**Silica**
- Response to contamination of high purity boiler feedwater, 0416-05
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
- Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

**Single Facers**
- Procedure for setting up a raw material trial on the corrugator, 0304-01

**Singlefacers**
- Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17
- Alternative method for designating flute sizes, 0302-04
- Causes and corrections of common corrugator bonding problems, 0304-32
- Checking for coating wear on corrugating rolls, 0304-73
- Checking the flute depth of corrugating rolls, 0304-75
- Parallel of corrugating rolls with “NCR” paper, 0304-62
- Preventing score cracking in a box plant, 0304-37
- Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
- Splicer defects and cures, 0304-31
Recommended dryer differential pressures, 0404-31

**Siphons**  
Thermocompressor Applications for Paper Drying, 0404-66

**Skid**  
Material handling considerations for flexo folder gluers, 0305-54

**Slabbing**  
Broke loss calculations, 0502-10

**Slices**  
Flow from a 45° slice, 0410-03  
Flow from a nozzle (slice) with inclined upper lip, 0410-04  
Flow from a stock behind slice (head/jet relationship), 0410-05  
Flow from a vertical slice, 0410-02

**Slide angle**  
Statistical process control, friction, 0304-34

**Slotting**  
Machinery considerations and selection: yoked scoring slotting section, 0305-53

**Slurry**  
Physical data of calcined kaolin-water suspensions, 0106-09  
Physical data of calcium carbonate-water suspensions, 0106-01  
Physical data of hydrous Kaolin-water suspensions, 0106-02

**Slushed paper stock**  
see Paper stock

**Smearing**  
Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

**Smog**  
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

**Sodium**  
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03  
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

**Sodium bicarbonate**  
Density of aqueous sodium bicarbonate solution, 0607-13

**Sodium bisulfite**  
Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

**Sodium borate**  
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08

**Sodium carbonate**  
Density of aqueous sodium carbonate solution, 0607-14  
Specific heat of sodium carbonate solution, 0607-15  
Vapor pressure of sodium carbonate solution, 0607-16  
Viscosity of sodium carbonate solution, 0607-17

**Sodium chloride**  
Specific gravity of sodium chloride solutions, 0606-10

**Sodium hydroxide**  
Caustic soda (NaOH) safe storage and handling, 0606-27  
Relative enthalpy of solution, 0606-08  
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08  
Specific gravity and density of caustic soda solutions, 0606-20  
Specific heat of caustic soda solutions, 0606-07  
Viscosity of sodium hydroxide solutions, 0606-11

**Sodium sulfite**  
Density of aqueous sodium sulfite solution, 0607-18

**Solids content**  
Physical data of calcined kaolin-water suspensions, 0106-09  
Physical data of calcium carbonate-water suspensions, 0106-01  
Physical data of hydrous Kaolin-water suspensions, 0106-02

**Solubility**  
Solubility of sulfur dioxide, 0607-06  
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07  
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09  
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

**Solutions**  
Equilibrium relative humidities over saturated salt solutions, 0808-03  
Specific heat of caustic soda solutions, 0606-07

**Sorption**  
Cotton in nonwovens, 1205-02

**Soot blowers**  
Recovery boiler sootblowers: practical guidelines, 0416-20  
Recovery boiler sootblowers: the basics, 0416-19

**SPC techniques**  
see Statistical methods

**Specialty coating pigment**  
see Pigment

**Specialty papers**  
Paper machine performance guidelines, 0404-47

**Specific gravity**  
see Density

**Specific heat**  
Specific heat of caustic soda solutions, 0606-07  
Specific heat of sodium carbonate solution, 0607-15

**Specifications**  
Guideline specification for procurement of an economizer for a recovery boiler, 0416-21  
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

**Speed**  
see Velocity
Spent sulfite liquors
Density of aqueous sodium sulfite solution, 0607-18

Splicers
Splicer defects and cures, 0304-31

Spools
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Reel diameter for various reel spool and roll core sizes, 0502-03

Spunlaced fabric
Cotton in nonwovens, 1205-02

Spray coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Squared paper
Squaring flap cut (center special) boxes, 0305-45

Squaring
see Squared papers, Trimming

Stackers
Multiple-out rotary diecut stacking, 0305-47
Stacking off the rotary diecutter, 0305-46

Stacking
Corrugated caliper: why is it so important?, 0304-04

Stacking strength
see Compression strength

Stainless steel
Guide to the use of stainless steel pipe specifications, 0402-24
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Guidelines for nondestructive examination of suction roll shells, 0402-19
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Weld repairs on new suction roll shells, 0402-17

Standard conditions
Testing atmospheres simulating end use conditions, 0808-05

Starch
Starch adhesive preparation and distribution systems: housekeeping, 0304-06
Starch adhesive trial, 0304-22
Statistical process control of starch gelatinization temperature, 0304-14
Statistical process control of starch viscosity, 0304-15
Techniques for running “WRA” (water resistant starch adhesive), 0304-46
Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44

Starch conversion
Statistical process control of starch gelatinization temperature, 0304-14

Statistical analysis
How to perform a gauge repeatability and reproducibility study, 0304-71
Obtaining combined board caliper off the corrugator for use statistical process control procedures, 0304-12
Starch viscosity in corrugating adhesives, 0304-15

Statistical distribution
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Statistical methods
Boxplant quality measurement: why test?, 0304-02
Obtaining combined board caliper off the corrugator, 0304-12
Procedures for charting warp, 0304-13
Procedures for utilizing statistical control techniques to monitor the tare weight of a run of boxes, 0304-35
Short-run statistical process control: a basic charting method, 0304-70
Statistical process control: friction - slide angle, 0304-34
Statistical process control of starch gelatinization temperature, 0304-14
Statistical process control of starch viscosity, 0304-15
Statistical process control pin adhesion, 0304-23
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Statistical process control
see Statistical methods

Statistical quality control
see Statistical methods

Statistics
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Obtaining combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Starch viscosity in corrugating adhesives, 0304-15
Statistical process control of starch gelatinization temperature, 0304-14

Status reports
see Reporting

Steam
Application of dryer bars, 0404-35
Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for routine periodic inspection and testing of cast iron Yankee and MG dryers, 0425-01
Response to contamination of high purity boiler feedwater, 0416-05
Steam shower applications in the forming and press section, 0404-58
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water,
Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04

Steam chests
Terminology for high temperature pressing, 0404-48

Steam pressure
See Pressure gradient

Step-Up Strip
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Sterilization
Starch adhesive preparation and distribution systems: housekeeping, 0304-06

Stickies
Stickies definition and classification, 0603-02

Stitch bonding
Cotton in nonwovens, 1205-02

Stock flow
Optimum consistency for pumping pulp, 0410-15

Stock (pulp)
Control of stock activity on a fourdrinier table, 0410-08
Head of stock behind slice (head/jet relationships), 0410-05

Stock flow
Control of stock activity on a fourdrinier table, 0410-08

Stock preparation
Catalog of Stock Preparation Pilot Plants, 0502-20

Stones
See Pulpstones

Storage
Buying, storing, and handling flexo folder gluer/rotary diecutter adhesives, 0305-25
Caustic soda (NaOH) safe storage and handling, 0606-27
Chlorine dioxide (ClO2) safe storage and handling, 0606-30
Hydrogen peroxide (H2O2) safe storage and handling, 0606-24
Methanol (CH3OH) safe storage and handling, 0606-25
Oxygen (O2) bulk storage and safe handling, 0606-29
Sodium chlorate (NaClO3) safe handling and storage, 0606-31
Sulfuric acid (H2SO4) safe storage and handling, 0606-26

Strapping
Critical properties to consider when unitizing, 0304-72
Material handling considerations for flexo folder gluers, 0305-54

Stress
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38

Stress assisted corrosion
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38

Stress corrosion
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27

Strippers
Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10

Stripping
Troubleshooting the diecutting section, 0305-39

Stuff boxes
Headbox approach piping guidelines, 0404-54

Suction
See Vacuum

Suction press rolls
See Press rolls, Vacuum rolls

Suction presses
Paper machine vacuum selection factors, 0502-01

Suction rolls
See Vacuum rolls
Guidelines for nondestructive examination of suction roll shells, 0402-19

Sulfite liquors
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO3)2; solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C and other temperatures, 0607-22

Sulfite pulping
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Physical and chemical properties of magnesia-base pulping solutions, 0607-04
Solubility of sulfur dioxide, Ca(HSO3)2; solutions, 0607-07
Solubility of sulfur dioxide, 0607-06
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10
Sulfur burner gas strength volume, 0607-01
Vapor pressure of sulfur dioxide solutions, 0607-11
Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Sulfite waste liquor
See Spent sulfite liquors

Sulfur burners
Sulfur burner gas strength volume, 0607-01

Sulfur dioxide
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process, 0607-25
Physical and chemical properties of magnesia-base pulping solutions, 0607-04
Solubility of sulfur dioxide, 0607-06
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07

Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09

Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Sulfur burner gas strength volume, 0607-01

Vapor pressure of sulfur dioxide solutions, 0607-11

Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Viscosity of a neutral sulfite spent liquor (Ostwald capillary viscometer), 0607-23

Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

Sulfuric acid
- Sulfuric acid (H₂SO₄) safe storage and handling, 0606-26

Supervision

Total indicated runout and its impact on combined board quality, 0304-56

Total reduced sulfur
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

Transport
Checklist: preparing die cuts for shipment, 0305-49
Sodium chlorate (NaClO3) safe handling and storage, 0606-31
Sulfuric acid (H2SO4) safe storage and handling, 0606-26

Trim
Broke loss calculations, 0502-10
Paper machine room ventilation guidelines, 0404-50

Trimming
Machinery considerations and selection: yoked scoring slotting section, 0305-53
Squaring flap cut (center special) boxes, 0305-45

Troubleshooting
Forming section monitoring, 0502-14
Glue lap problem, 0304-10
Press section monitoring, 0404-19
Recommended test procedure for black liquor evaporators, 0416-11
Steam shower applications in the forming and press section, 0404-58

Tubes
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for operating and maintenance practices impacting an economizer on a recovery boiler, 0416-22

Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Keys to successful chemical cleaning of boilers, 0416-06
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

U.Tungsten carbide
Tests for corrugator roll wear, 0304-53

Tuning
see Control

Turbulence
Application of dryer bars, 0404-35

Turpentine
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

Twisting
Techniques to minimize twist warp, 0304-50

U.-
Uhl box
See also Vacuum boxes
Press fabric dewatering and conditioning – suction box (Uhl box) design and vacuum requirements, 0404-27

Ultraseen ground limestone
see Limestone

Ultrasonic tests
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Guidelines for inspecting batch digesters, 0402-22
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Uncoated free sheet
Paper machine performance guidelines, 0404-47

Unitized handling
Critical properties to consider when unitizing, 0304-72

Units of measurement
Units of measurement and conversion factors, 0800-01

Unloading
Sodium chlorate (NaClO3) safe handling and storage, 0606-31
Sulfuric acid (H2SO4) safe storage and handling, 0606-26

U.P.C.
see Product codes

UV
Drying and curing techniques for in-line flexographic printing, 0306-06

V.-
Vacuum
High vacuum sheet dewatering, 0404-60
Paper machine vacuum selection factors, 0502-01

Papermaker’s formulas, 0502-17
Steam shower applications in the forming and press section, 0404-58

Vacuum boxes
High vacuum sheet dewatering, 0404-60
Paper machine vacuum selection factors, 0502-01
Performance evaluation techniques for paper machine vacuum systems, 0404-55

**Vacuum equipment**
- Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements 0404-27

**Vacuum filters**
- Bleaching plant washer efficiency guide, 0606-23

**Vacuum pumps**
- Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
- Performance evaluation techniques for paper machine vacuum systems, 0404-55
- Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

**Vacuum rolls**
- Liquid penetrant testing of new suction roll shells, 0402-11
- Paper machine vacuum selection factors, 0502-01
- Techniques for nip impressions, 0404-46
- Weld repairs on new suction roll shells, 0402-17

**Vacuum washers**
- Bleaching plant washer efficiency guide, 0606-23

**Valves**
- Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
  - Headbox approach piping guidelines, 0404-54

**Vapor pressure**
- Chlorine gas curve, 0606-02
- Vapor pressure of sulfur dioxide solutions, 0607-11
- Vapor pressure of sodium carbonate solution, 0607-16
- Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

**Variance**
- Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

**Varnish**
- Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

**Velocity**
- *see also* Machine speed
  - Pulstone speed chart, 0605-02

**Ventilation**
- Paper machine room ventilation guidelines, 0404-50
- Recommended minimum dryer pocket air requirements, 0404-17
  - Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24

**Viscosity**
- Density of aqueous sodium sulfite solution, 0607-18
- Liquid chlorine, 0606-05
- Quality techniques using existing equipment, 0306-11
- Statistical process control of starch viscosity, 0304-15
- Viscosities of spent sulfite liquors at 26.7° C (Oswalt capillary viscometer), 0607-22
- Viscosity of a neutral sulfite spent liquor (Ostwald capillary viscometer), 0607-23
- Viscosity of sodium carbonate solution, 0607-17
- Viscosity of sodium hydroxide solutions, 0606-11
- Viscosity reading procedure for flexographic corrugated inks, 0304-18

**Vision**
- Basic guidelines for image analysis measurements, 0804-09

**Volume**
- Grinder pulpstones – cubical contents, 0605-01
- Identifying anilox volume measuring equipment, 0306-15

**W-**

**Warning labels**
- *see* Hazardous materials

**Warpage**
- Statistical process control -- procedures for charting warp, 0304-13
  - Techniques to minimize twist warp, 0304-50
  - Warp in corrugated board, 0304-07

**Wash waters**
- Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

**Washers**
- Energy checklist: pulp mill, 0416-24
- Bleaching plant washer efficiency guide, 0606-23

**Washing**
- Bleaching plant washer efficiency guide, 0606-23
  - Recommended pulp bleaching stage designation method, 0606-21

**Wastewater treatment equipment**
- *see* Effluent treatment

**Water**
- *see also* Solubility
  - Design engineer decisions tree: paper mill boiler feedwater, 0416-04
  - Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
  - Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12
  - Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13

**Water content**
- *see* Moisture content

**Water hardness**
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

**Water permeability**
- Troubleshooting cross-machine direction moisture profile problems, 0404-57

**Water removal**
- Determination of water removal by wet presses, 0404-01
- High vacuum sheet dewatering, 0404-60
  - Methods to minimize sheet rewet in the press section, 0404-59
  - Paper machine drying rate, 0404-07

**Water resistance**
- Techniques for running “WRA” (water resistant starch adhesive), 0304-46
Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69

**Water treatment**
- Design engineer decisions tree: paper mill boiler feedwater, 0416-04
- Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13

**Water vapor**
- Paper machine room ventilation guidelines, 0404-50

**Waterside cracking**
- Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
- Common curtain coating problems: causes, detection, and correction, 0304-26

**Wear resistance**
- see Abrasion resistance

**Web tension**
- Guidelines for web conveyance and winding tension levels, 0200-01
- see also Paper webs
- Guidelines for web conveyance and winding tension levels, 0200-01

**Weight**
- Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20
- Procedure for utilizing statistical control techniques to monitor the tare weight of a run of boxes, 0304-35
- Weight of newsprint rolls, 0502-11

**Weirs**
- Weirs and flumes, 0410-10

**Welding**
- Guide to the use of stainless steel pipe specifications, 0402-24
- Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
- Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
- Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
- Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
- Field welding of pin studs in black liquor recovery boilers, 0402-15

**Wet bulb temperature**
- Relative humidity tables, 0808-06

**Wet ends**
- Drainage evaluation by mass measurement, 0502-12
- Forming section monitoring, 0502-14
- How to prevent score cracking in a box plant, 0304-37
- Selection criteria for wet end ceramics, 0502-15

**Wet felts**
- see also Felts

**Wet presses**
- Determination of water removal by, 0404-01

**Wet pressing**
- Terminology for high temperature pressing, 0404-48

**Wet strength**
- Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69

**Wet-laid nonwovens**
- Pilot paper and wet laid nonwoven machines, 0502-16

**White liquors**
- Recausticizing material balance equations relating to digester requirements, 0418-02

**White water**
- Drainage evaluation by mass measurement, 0502-12
- Flow determination by chemical method, 0410-09
- Weirs and flumes, 0410-10

**Width**
- Weight of newsprint rolls, 0502-11

**Winding**
- Guidelines for web conveyance and winding tension levels, 0200-01

**Wire**
- Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

**Williams freeness**
- Interconversion of freeness, 0809-01

**Winders**
- Determination of winder sets per reel, 0502-02

**Wiper Roll**
- A guide to proper wiper roll selection for flexographic printing in the corrugated box industry, 0306-20

**Wiperoll**
- see Flexography

**Wood chips**
- see Chips

**Wood containing papers**
- see Mechanical papers

**Wood free papers**
- Paper machine drying rate, 0404-07
