Subject Index
Technical Information Papers

This document was last updated March 12, 2021

A-
Abrasion
  Selection criteria for wet end ceramics, 0502-15
Abrasion resistance
  Selection criteria for wet end ceramics, 0502-15
Absorption
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Accessibility
  Maintenance considerations in new construction and rebuilds, 0408-02
Acrylic fibers
  see Polyacrylics, Synthetic fibers
Additives
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
Adhesives
  Buying, storing, and handling flexo folder gluer/rotary diecutter adhesives, 0305-25
  Causes and corrections of common corrugator bonding problems, 0304-32
  Evaluating glue lap adhesive properties, 0304-16
  Procedure for setting up a raw material trial on the corrugator, 0304-01
  Starch adhesive preparation and distribution systems: housekeeping, 0304-06
  Starch adhesive trial, 0304-22
  Statistical process control of starch gelatinization temperature, 0304-14
  Statistical process control of starch viscosity, 0304-15
  Stickies definition and classification, 0603-02
  Techniques for bonding modern high-performance liners, 0304-40
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
  Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
  Understanding and troubleshooting hot melt adhesives, 0304-74
After dryers
  Paper machine drying rate, 0404-07
Agitation
  Using washing water as the vehicle in starch-based corrugating adhesive, 0304-44
Agitators
  Guidelines for side-entering stock agitators, 0420-13
Air
  Paper machine room ventilation guidelines, 0404-50
Air balance
  see Air, Materials balance
Air flow
  Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
  Recommended minimum dryer pocket air requirements, 0404-17
  Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
  Sheet handling devices, 0404-44
Air jets
  Sheet handling devices, 0404-44
Air permeability
  Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20
Air pollution
  Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Air staging
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Alignment
  Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
Alkali
  Specific heat of caustic soda solutions, 0606-07
Alkaline sulfite pulping
  Boiling point rise of spent sulfite liquors, 0607-21
  Definitions of terms in the sulfite pulping process, 0607-25
  Density of aqueous sodium sulfite solution, 0607-18
  Density of milk of lime solution, 0607-05
  Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
  Sulfur burner gas strength volume, 0607-01
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Alkalinity
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Ammonia
  Solubility of sulfur dioxide, 0607-06
Analysis
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Angle of slide
see Slide angle

Anilox coaters
In-line coating at the corrugator, 0304-39

Anilox rolls
see Flexography, Printing cylinders

Anvil
Troubleshooting the diecutting section, 0305-39

Approach flow systems
Headbox approach piping guidelines, 0404-54

Ash
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Drainage evaluation by mass measurement, 0502-12
Chemical cleaning guide for press fabrics, 0404-65

Atmosphere
Testing atmospheres simulating end use conditions, 0808-05

Auditing
Checklist for a properly planned project, 0408-01

Automatic feeders
see Feeders

Availability
Definitions of black liquor recovery furnace availability, 0416-02

B-

Backing Blade
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Bacteria
Starch adhesive preparation and distribution systems: housekeeping, 0304-06

Bags
Paper machine drying rate, 0404-07

Bar Width Reduction (BWR)
see Product codes

Bar codes
see Product codes

Bases
see Hydroxides

Basis weight
Headbox approach piping guidelines, 0404-54

Batch digesters
Guidelines for inspecting batch digesters, 0402-22

Batch process
Measurement of dryer condensing rates (vertical separator method), 0404-18

Bearings
Corrugator bearing clearance checks and their impact, 0304-47
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0404-34
Total indicated runout and its impact on combined board quality, 0304-56
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Bearing failure

Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Biocide
Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Biomass
Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Biomechanics
see Human factors

Bisulfites
Physical and chemical properties of magnesia-base pulping solutions, 0607-04
Solubility of sulfur dioxide, 0607-06
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Black liquors
Field welding of pin studs in black liquor recovery boilers, 0402-15
Recommended test procedure for black liquor evaporators, 0416-11
Recovery boiler performance calculation – short form, 0416-01
Response to contamination of high purity boiler feedwater, 0416-05
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Blade
Paper machine doctor recommendations, 0404-67

Blade coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Blade holder
Paper machine doctor recommendations, 0404-67

Bleach plants
Bleaching plant washer efficiency guide, 0606-23

Bleached board
Paper machine drying rate, 0404-07
Paper machine performance guidelines, 0404-47

Bleaching
Boiling point rise of spent sulfite liquors, 0607-21
Cotton in nonwovens, 1205-02
Chlorine gas curve, 0606-02
 Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of chlorine gas, 0606-03
Density of milk of lime solution, 0607-05
Energy checklist: pulp mill, 0416-24
Heat of vaporization of liquid chlorine, 0606-04
Recommended pulp bleaching stage designation method, 0606-21
Relative enthalpy (heat content) of sodium hydroxide
solutions, 0606-08
  Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
  Specific gravity and density of caustic soda solutions, 0606-20
  Specific gravity of sodium chloride solutions, 0606-10
  Sulfur burner gas strength volume, 0607-01
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
  Viscosity of liquid chlorine 0606-05
  Viscosity of sodium hydroxide solutions, 0606-11

**Bleaching stages**
  see Bleaching

**Blind-drilled rolls**
  see Vacuum rolls

**Blistering**
  Addendum to *Corrugating Defect Terminology Manual* - defects related to the use of fingerless singlefacers, 0304-17

**Blow boxes**
  Sheet handling devices, 0404-44

**Blowdown**
  see also Blowing
  Design engineer decisions tree: paper mill boiler feedwater, 0416-04
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

**Blowing**
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

**Board**
  Pilot paper and wet laid nonwoven machines, 0502-16

**Board caliper**
  see Thickness

**Boiler feed water**
  see Boilers, Feedwater

**Boiler tubes**
  Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
  Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
  Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13

**Boilers**
  Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
  Design engineer decisions tree: paper mill boiler feedwater, 0416-04
  Explanation of recovery boiler leak indications, 0416-23
  Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07
  Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
  Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
  Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
  Keys to successful chemical cleaning of boilers, 0416-06
  Performance test procedure for boilers using biomass as fuel, 0416-18
  Sampling procedures for biomass fuel for boiler performance testing, 0416-17
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
  Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
  Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

**Bonding**
  Techniques for bonding modern high-performance liners, 0304-40

**Box compression**
  see Compression strength

**Box flaps**
  see Flaps

**Box machines**
  Troubleshooting a glue lap problem, 0304-10

**Box plants**
  see Converting plants

**Boxes**
  Corrugated boxplant-list of potential hazards, 0301-01
  Critical properties to consider when unitizing, 0304-72
  High vacuum sheet dewatering, 0404-60
  Squaring flap cut (center special) boxes, 0305-45

**Broke**
  Broke loss calculations, 0502-10

**Bronze**
  Guidelines for nondestructive examination of suction roll shells, 0402-19
  Weld repairs on new suction roll shells, 0402-17

**Burners**
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

**Burst testers**
  Calibration and maintenance of, 0304-24

**Butt joints**
  Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

**Butt welds**
  Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

**C-**

**CADCAM**
  Computer-assisted machinery, 0305-02

**CONEG**
  see Regulations

**Cadmium**
  An explanation of the toxics in packaging (formerly
CONEG) heavy metal guidelines, 0304-58

Calcination
Physical data of calcined kaolin-water suspensions, 0106-09

Calcium base liquors
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07

Calcium bisulfite
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07

Calcium carbonate
Physical data of calcium carbonate-water suspensions, 0106-01

Calcium hydroxide
Density of milk of lime solution, 0607-05

Calculations
see Computation

Calibration
Basic guidelines for image analysis measurements, 0804-09
Calibration and maintenance of the manually operated micrometer, 0304-30
Of burst testers, 0304-24
Suggestions for developing a box plant quality manual, 0304-49

Caliper
see Thickness

Canadian standard freeness
Interconversion of freeness, 0809-01

Carbon steel
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Carbonates
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Physical data of calcium carbonate-water suspensions, 0106-01

Cartridges
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Cast iron
Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14

Casting
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25

Caustic soda
see Sodium hydroxide

Causticizing
Energy checklist: pulp mill, 0416-24
Material balance equations relating to digester requirements, 0418-02

Ceramics
Selection criteria for wet end ceramics, 0502-15
Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

Certification
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Chalk
see Calcium carbonate

Charting
Short-run statistical process control: a basic charting method, 0304-70
Statistical process control pin adhesion, 0304-23
Statistical process control - procedures for charting warp, 0304-13

Checklist
see Maintenance

Chemical
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51

Chemical preparation
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10

Chemical properties
Chlorine dioxide (ClO2) safe storage and handling, 0606-30
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Magnesia-base pulping solutions, 0607-04
Sodium chlorate (NaClO3) safe handling and storage, 0606-31

Chemical recovery
Recaustralizing material balance equations relating to digester requirements, 0418-02

Chemicals
Material safety data sheets, what to look for - how to understand them, 0304-38
Chemical cleaning guide for press fabrics, 0404-65

Chests
see Stock chests

Chip silos
see Chip bins

Chlorides
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12

Chlorine
Chlorine gas curve, 0606-02
Density of chlorine gas, 0606-03
Heat of vaporization of liquid chlorine, 0606-04
Viscosity of liquid chlorine, 0606-05
Chlorine dioxide
Safe storage and handling of, 0606-30
Specific gravity of sodium chloride solutions, 0606-10
Chrome
Tests for corrugator roll wear, 0304-53
Chromium
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58
Clad-steel plate
see Plates
Classification
Paper grade classifications, 0404-36
Clay
Kaolin clay pigment index, 0106-06
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of hydrous Kaolin-water suspensions, 0106-02
Cleaners
Catalog of Stock Preparation Pilot Plants, 0502-20
Introduction to centrifugal cleaners, 0508-10
Cleaning
Cleaning anilox rolls: procedures and options, 0306-18
Cleanup procedures for flexo folder gluer/rotary diecutters, 0305-33
Daily, weekly, and monthly maintenance checklists, 0305-34
Dryer fabric cleaning, 0404-38
Housekeeping guidelines, 0305-32
Introduction to centrifugal cleaners, 0508-10
Keys to successful chemical cleaning of boilers, 0416-06
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Paper machine shower recommendations, 0404-61
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Cleaning chemicals
see Cleaners
Cleansers
Keys to successful chemical cleaning of boilers, 0416-06
Clogging
Nozzle maintenance and clogging, 0420-15
Clothing
see Felts, Machine clothing
Coating color
see Color
Coating thickness
Tests for corrugator roll wear, 0304-53
Coatings
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Tests for corrugator roll wear, 0304-53
Coefficient of friction
see Friction factor
Combined boards
Common curtain coating problems: causes, detection, and correction, 0304-26
Obtaining off the corrugator for use in statistical process control procedures, 0304-12
Total indicated runout and its impact on combined board quality, 0304-56
Compression
Corrugated caliper: why is it so important?, 0304-04
Compression resistance
see Compression strength
Compression strength
Corrugated caliper: why is it so important?, 0304-04
Obtaining a combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11
Computation
Paper machine drying rate, 0404-07
Computer-assisted
see CADCAM
Concentricity
Total indicated runout and its impact on combined board quality, 0304-56
Condensates
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Measurement of dryer condensing rates (continuous method), 0404-03
Measurement of dryer condensing rates (vertical separator method), 0404-18
Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Yankee dryer steam condensing rates, 0404-49
Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04
Condensation
Dryer condensing rates (batch method), 0404-02
Dryer condensing rates (continuous method), 0404-03
Condensing rates
see Condensation
Conditioning
Paper machine clothing cleaning and conditioning for recycled fiber use, 0404-51
Testing atmospheres simulating end use conditions, 0808-05
Conductivity
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Conical refiners
Conical refining intensity, 0508-07
Consistency
Drainage evaluation by mass measurement, 0502-12
Generalized method for determining the pipe friction loss of flowing pulp suspensions, 0410-14
Optimum for pumping pulp, 0410-15
Construction materials
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31
Contact bearings
see Bearings
Contact technique
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Container boards
Friction - slide angle, 0304-34
Contaminants
see Impurities
Contamination
see Pollution control
Continuous digesters
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Contraction
Flow from a 45° slice, 0410-03
Flow from a nozzle (slice) with inclined upper lip, 0410-04
Flow from a vertical slice, 0410-02
Control charts
see Charting
Control systems
Short-run statistical process control: a basic charting method, 0304-70
Conversion factors
Units of measurement and, 0800-01
Converting factors
Moisture content of paper: terminology and conversion, 0808-02
Converting plants
Boxplant quality measurement: why test?, 0304-02
Computer-assisted machinery, 0305-02
Corrugated boxplant - list of potential hazards, 0301-01
Machinery considerations and selection, 0305-06
Copper
The role of copper in a printing ink, 0304-61
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Copper sulfate
Tests for corrugator roll wear, 0304-53
Cores
Determination of winder sets per reel, 0502-02
Reel diameter for various reel spool and roll core sizes, 0502-03
Corrosion
see also Corrosion inhibitors
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Guide to the use of stainless steel pipe specifications, 0402-24
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for inspecting batch digesters, 0402-22
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Guidelines for nondestructive examination of suction roll shells, 0402-19
Nozzle maintenance and clogging, 0420-15
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26
Corrosion inhibitors
Keys to successful chemical cleaning of boilers, 0416-06
Corrosion prevention
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Corrugated boards
The role of copper in a printing ink, 0304-61
Critical properties to consider when unitizing, 0304-72
Important quality parameters of a printing ink, 0304-59
Obtaining caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control friction-slide angle, 0304-34
Techniques to minimize twist warp, 0304-50
Warp in corrugated board, 0304-07
Corrugated boxes
see Boxes, Corrugated boards
Corrugated containers
see Boxes, Corrugated board, Folder gluers, Die cutters
Corrugated medium
An alternative method for designating flute sizes, 0302-04
Corrugating
An alternative method for designating flute sizes, 0302-04
Corrugating adhesives
see Adhesives
Corrugating machines
Checking for coating wear on corrugating rolls, 0304-73
Checking the flute depth of corrugating rolls, 0304-75
Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
Computer-assisted machinery, 0305-02
Conducting a corrugator temperature audit, 0304-65
Corrugator bearing clearance checks and their impact, 0304-47
Impact of doublebacker hot plate level on board quality and how to measure it, 0304-66
Improved techniques to measure corrugator glue machine meter gaps, 0304-68
Prevention of score cracking in a box plant, 0304-37
Starch viscosity in corrugating adhesives, 0304-15
Tests for corrugator roll wear, 0304-53

Corrugating medium
Causes and corrections of common corrugator bonding problems, 0304-32
Edge crush test (ECT): its relationship to box compression and its derivation from containerboard edge stiffness, 0304-09
Paper machine performance guidelines, 0404-47
Paper machine drying rate, 0404-07
Procedure for setting up a raw material trial on the corrugator, 0304-01
Splicer defects and cures, 0304-31

Corrugating plants
see Operations

Corrugating rolls
see Rolls

Corrugator-double backer
see Corrugating machines

Corrugators
see also Corrugating machines
Procedure for setting up a raw material trial on the corrugator, 0304-01

Costs
Press section economic evaluation, 0404-22

Cotton
In nonwovens, 1205-02

Couch rolls
Paper machine vacuum selection factors, 0502-01

Cover
Maintenance considerations in new construction and rebuilds, 0408-02
Rotary die cutter urethane anvil cover maintenance, 0305-35

Cracks
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for nondestructive examination of suction roll shells, 0402-19
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Crescent formers
Paper machine vacuum selection factors, 0502-01

Cross direction
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Statistical process control -- procedures for charting warp, 0304-13
Troubleshooting cross-machine direction moisture profile problems, 0404-57
Warp in corrugated board, 0304-07

Crown
see Roll crown

Crush
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Cubical contents
see Volumetry

Curing
Drying and curing techniques for in-line flexographic printing, 0306-06

Curtain coating
Common curtain coating problems: causes, detection, and correction, 0304-26

Cutters
see Die cutters

Cutting dies
see Die cutters, Rotary machines

D-
Damage
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Dandy rolls
Dandy roll applications, 0404-53

Data storage
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Data tables
Moisture content of paper: terminology and conversion, 0808-02

Degradation
see Nomenclature

Defects
Addendum to Corrugating Defect Terminology Manual -- defects related to the use of fingerless singlefacers, 0304-17
Corrugator bearing clearance checks and their impact, 0304-47

Definitions
see Nomenclature

Degradation
Guidelines for inspecting used fiber-reinforced plastics
FRP equipment, 0402-28

Densified liners
see Liners

Density
Density of aqueous sodium bicarbonate solution, 0607-13
Density of aqueous sodium carbonate solution, 0607-14
Density of chlorine gas, 0606-03
Milk of lime solution, 0607-05
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of calcium carbonate-water suspensions, 0106-01
Physical data of hydrous Kaolin-water suspensions, 0106-02
Sodium sulfite solution, 0607-18
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10

Deposits
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12

Units of measurement and conversion factors, 0800-01

Unloading
Sodium chlorate (NaClO3) safe handling and storage, 0606-31
Sulfuric acid (H2SO4) safe storage and handling, 0606-26

U.P.C.
see Product codes

UV
Drying and curing techniques for in-line flexographic printing, 0306-06

V-

Vacuum
High vacuum sheet dewatering, 0404-60
Paper machine vacuum selection factors, 0502-01
Papermaker’s formulas, 0502-17
Steam shower applications in the forming and press section, 0404-58

Vacuum boxes
High vacuum sheet dewatering, 0404-60
Paper machine vacuum selection factors, 0502-01
Performance evaluation techniques for paper machine vacuum systems, 0404-55

Vacuum equipment
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

Vacuum filters
Bleaching plant washer efficiency guide, 0606-23

Vacuum pumps
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
Performance evaluation techniques for paper machine vacuum systems, 0404-55
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

Vacuum rolls
Liquid penetrant testing of new suction roll shells, 0402-11
Paper machine vacuum selection factors, 0502-01
Techniques for nip impressions, 0404-46
Weld repairs on new suction roll shells, 0402-17

**Vacuum washers**
- Bleaching plant washer efficiency guide, 0606-23

**Valves**
- Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
- Headbox approach piping guidelines, 0404-54

**Vapor pressure**
- Chlorine gas curve, 0606-02
- Vapor pressure of sulfur dioxide solutions, 0607-11
- Vapor pressure of sodium carbonate solution, 0607-16
- Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

**Variance**
- Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

**Varnish**
- Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

**Velocity**
  - see also: Machine speed
  - Pulpstone speed chart, 0605-02

**Ventilation**
- Paper machine room ventilation guidelines, 0404-50
- Recommended minimum dryer pocket air requirements, 0404-17
- Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24

**Viscosity**
- Density of aqueous sodium sulfite solution, 0607-18
- Liquid chlorine, 0606-05
- Quality techniques using existing equipment, 0306-11
- Statistical process control of starch viscosity, 0304-15
- Viscosities of spent sulfite liquors at 26.7° C (Oswald capillary viscometer), 0607-22
- Viscosity of a neutral sulfite spent liquor (Ostwald capillary viscometer), 0607-23
- Viscosity of sodium carbonate solution, 0607-17
- Viscosity of sodium hydroxide solutions, 0606-11
- Viscosity reading procedure for flexographic corrugated inks, 0304-18

**Vision**
- Basic guidelines for image analysis measurements, 0804-09

**Volume**
- Grinder pulpstones – cubical contents, 0605-01
- Identifying anilox volume measuring equipment, 0306-15

**W-**

**Warning labels**
  - see: Hazardous materials

**Warpage**
- Statistical process control -- procedures for charting warp, 0304-13
- Techniques to minimize twist warp, 0304-50
- Warp in corrugated board, 0304-07

**Wash waters**
- Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

**Washers**
- Energy checklist: pulp mill, 0416-24
- Bleaching plant washer efficiency guide, 0606-23

**Washing**
- Bleaching plant washer efficiency guide, 0606-23
- Recommended pulp bleaching stage designation method, 0606-21

**Wastewater treatment equipment**
  - see: Effluent treatment

**Water**
  - see also: Solubility
- Design engineer decisions tree: paper mill boiler feedwater, 0416-04
- Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
- Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12
- Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13

**Water content**
  - see: Moisture content

**Water hardness**
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

**Water permeability**
- Troubleshooting cross-machine direction moisture profile problems, 0404-57

**Water removal**
- Determination of water removal by wet presses, 0404-01
- High vacuum sheet dewatering, 0404-60
- Methods to minimize sheet rewet in the press section, 0404-59
- Paper machine drying rate, 0404-07

**Water resistance**
- Techniques for running “WRA” (water resistant starch adhesive), 0304-46
- Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69

**Water treatment**
- Design engineer decisions tree: paper mill boiler feedwater, 0416-04
- Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13

**Water vapor**
- Paper machine room ventilation guidelines, 0404-50

**Waterside cracking**
- Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38

**Wax**
- Common curtain coating problems: causes, detection, and correction, 0304-26

**Wear resistance**
  - see: Abrasion resistance

**Web tension**
Guidelines for web conveyance and winding tension levels, 0200-01

**Webs**

*see also* Paper webs

Guidelines for web conveyance and winding tension levels, 0200-01

**Weight**

Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20

Procedure for utilizing statistical control techniques to monitor the tare weight of a run of boxes, 0304-35

Weight of newsprint rolls, 0502-11

**Weirs**

Weirs and flumes, 0410-10

**Welding**

Guide to the use of stainless steel pipe specifications, 0402-24

Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27

Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25

Field welding of pin studs in black liquor recovery boilers, 0402-15

**Wet bulb temperature**

Relative humidity tables, 0808-06

**Wet ends**

Drainage evaluation by mass measurement, 0502-12

Forming section monitoring, 0502-14

How to prevent score cracking in a box plant, 0304-37

Selection criteria for wet end ceramics, 0502-15

**Wet felts**

*see also* Felts

**Wet presses**

Determination of water removal by, 0404-01

**Wet pressing**

Terminology for high temperature pressing, 0404-48

**Wet strength**

Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69

**Wet-laid nonwovens**

Pilot paper and wet laid nonwoven machines, 0502-16

**White liquors**

Recausticizing material balance equations relating to digester requirements, 0418-02

**White water**

Drainage evaluation by mass measurement, 0502-12

Flow determination by chemical method, 0410-09

Weirs and flumes, 0410-10

**Width**

Weight of newsprint rolls, 0502-11

**Winding**

Guidelines for web conveyance and winding tension levels, 0200-01

**Wire**

Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

**Williams freeness**

Interconversion of freeness, 0809-01

**Winders**

Determination of winder sets per reel, 0502-02

**Wiper Roll**

A guide to proper wiper roll selection for flexographic printing in the corrugated box industry, 0306-20

**Wiperoll**

*see* Flexography

**Wood chips**

*see* Chips

**Wood containing papers**

*see* Mechanical papers

**Wood free papers**

Paper machine drying rate, 0404-07

**Work place**

*see* Human factors

**Working conditions**

*see* Environments

**Wound rolls**

Reel diameter for various reel spool and roll core sizes, 0502-03

TAPPI Roll number for inventory/tracking systems and bar codes, 1004-01

**Writing papers**

Paper machine drying rate, 0404-07

**X-Y-Z**

**Yankee cylinders**

*see* Yankee dryers

**Yankee dryers**

Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Guidelines for routine periodic inspection and testing of cast iron Yankee and MG dryers, 0425-01

Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04

Guidelines for usage of MAP on raw Yankee surfaces, 0425-05

Inspection guidelines for Yankee hood systems, 0425-02

Techniques for nip impressions, 0404-46

Yankee dryer steam condensing rates, 0404-49
