

# Subject Index

## Technical Information Papers

This document was last updated September 30, 2021

### A

#### Abrasion

Selection criteria for wet end ceramics, [0502-15](#)

#### Abrasion resistance

Selection criteria for wet end ceramics, [0502-15](#)

#### Absorption

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

#### Accessibility

Maintenance considerations in new construction and rebuilds, [0408-02](#)

#### Acrylic fibers

*see* Polyacrylics, Synthetic fibers

#### Additives

Techniques for running “WRA” (water resistant starch adhesive), [0304-46](#)

#### Adhesives

Buying, Storing, and Handling P.V.A. Adhesives Used on Folder Gluers and on Sheet Laminators, [0305-25](#)

Causes and corrections of common corrugator bonding problems, [0304-32](#)

Evaluating glue lap adhesive properties, [0304-16](#)

Procedure for setting up a raw material trial on the corrugator, [0304-01](#)

Starch adhesive preparation and distribution systems: housekeeping, [0304-06](#)

Starch adhesive trial, [0304-22](#)

Statistical process control of starch gelatinization temperature, [0304-14](#)

Statistical process control of starch viscosity, [0304-15](#)

Stickies definition and classification, [0603-02](#)

Techniques for bonding modern high-performance liners, [0304-40](#)

Techniques for running “WRA” (water resistant starch adhesive), [0304-46](#)

Understanding wet strength: what are MRA, WRA, and WPA?, [0304-69](#)

Understanding and troubleshooting hot melt adhesives, [0304-74](#)

Using washup water as the vehicle in starch-based corrugating adhesive, [0304-44](#)

#### After dryers

Paper machine drying rate, [0404-07](#)

#### Agitation

Using washing water as the vehicle in starch based corrugating adhesive, [0304-44](#)

#### Agitators

Guidelines for side-entering stock agitators, [0420-13](#)

#### Air

Paper machine room ventilation guidelines, [0404-50](#)

#### Air balance

*see* Air, Materials balance

#### Air flow

Guidelines for evaluation of liquid ring vacuum pump performance, [0420-12](#)

Recommended minimum dryer pocket air requirements, [0404-17](#)

Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, [0404-24](#)

Sheet handling devices, [0404-44](#)

#### Air jets

Sheet handling devices, [0404-44](#)

#### Air permeability

Automated Scanning for Moisture Content and Air Permeability on Paper Machine Felts, [0502-21](#)

Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, [0404-20](#)

#### Air pollution

Collection and burning of concentrated noncondensable gases: regulations, design and operation, [0416-09](#)

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

#### Air staging

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

#### Alignment

Checking the parallel of corrugating rolls with “NCR” paper, [0304-62](#)

#### Alkali

Specific heat of caustic soda solutions, [0606-07](#)

#### Alkaline sulfite pulping

Boiling point rise of spent sulfite liquors, [0607-21](#)

Definitions of terms in the sulfite pulping process, [0607-25](#)

Density of aqueous sodium sulfite solution, [0607-18](#)

Density of milk of lime solution, [0607-05](#)

Solubility of sulfur dioxide, Ca(HSO<sub>3</sub>)<sub>2</sub> solutions, [0607-07](#)

Sulfur burner gas strength volume, [0607-01](#)

Viscosities of various spent sulfite liquors at 26.7°C, [0607-22](#)

#### Alkalinity

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, [0416-14](#)

#### Alumina

Guidelines for Rotary Lime Kiln Refractory, [0416-27](#)

#### Ammonia

Solubility of sulfur dioxide, [0607-06](#)

#### **Analysis**

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

#### **Angle of slide**

*see* Slide angle

#### **Anilox coaters**

In-line coating at the corrugator, [0304-39](#)

#### **Anilox rolls**

*see* Flexography, Printing cylinders

Ink metering systems for corrugated flexo presses,

[0306-09](#)

#### **Anvil Wear**

Troubleshooting the Die Cutting Section, [0305-39](#)

#### **Approach flow systems**

Headbox approach piping guidelines, [0404-54](#)

#### **Ash**

Chloride and potassium measurement and control in the pulping and chemical recovery cycle, [0416-15](#)

Drainage evaluation by mass measurement, [0502-12](#)

Chemical cleaning guide for press fabrics, [0404-65](#)

#### **Atmosphere**

Testing atmospheres simulating end use conditions, [0808-05](#)

#### **Auditing**

Checklist for a properly planned project, [0408-01](#)

#### **Automatic feeders**

*see* Feeders

#### **Automated Felt Scanner**

Automated Scanning for Moisture Content and Air Permeability on Paper Machine Felts, [0502-21](#)

#### **Automation**

Industry 4.0 Lexicon, 1103-04

#### **Availability**

Definitions of black liquor recovery furnace availability, [0416-02](#)

---

## **B**

#### **Backing Blade**

Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, [0425-06](#)

#### **Bacteria**

Starch adhesive preparation and distribution systems: housekeeping, [0304-06](#)

#### **Bags**

Paper machine drying rate, [0404-07](#)

#### **Bar Width Reduction (BWR)**

*see* Product codes

#### **Bar codes**

*see* Product codes

#### **Bases**

*see* Hydroxides

#### **Basis weight**

Headbox approach piping guidelines, [0404-54](#)

#### **Batch digesters**

Guidelines for inspecting batch digesters, [0402-22](#)

#### **Batch process**

Measurement of dryer condensing rates (vertical separator

method), [0404-18](#)

#### **Bauxite**

Guidelines for Rotary Lime Kiln Refractory, [0416-27](#)

#### **Bearings**

Corrugator bearing clearance checks and their impact, [0304-47](#)

Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, [0402-34](#)

Total indicated runout and its impact on combined board quality, [0304-56](#)

Design, monitoring and maintenance guidelines for Yankee dryer bearings, [0425-03](#)

#### **Bearing failure**

Design, monitoring and maintenance guidelines for Yankee dryer bearings, [0425-03](#)

#### **Biocide**

Using washing water as the vehicle in starch based corrugating adhesive, [0304-44](#)

#### **Biomass**

Performance test procedure for boilers using biomass as fuel, [0416-18](#)

Sampling procedures for biomass fuel for boiler performance testing, [0416-17](#)

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

#### **Biomechanics**

*see* Human factors

#### **Bisulfites**

Physical and chemical properties of magnesia-base pulping solutions, [0607-04](#)

Solubility of sulfur dioxide, [0607-06](#)

Solubility of sulfur dioxide in magnesium bisulfite solution, [0607-09](#)

Solubility of sulfur dioxide in saturated magnesium bisulfite solution, [0607-10](#)

#### **Black liquor**

Field welding of pin studs in black liquor recovery boilers, [0402-15](#)

Recommended test procedure for black liquor evaporators, [0416-11](#)

Recovery boiler performance calculation – short form, [0416-01](#)

Response to contamination of high purity boiler feedwater, [0416-05](#)

Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, [0402-18](#)

#### **Blade**

Paper machine doctor recommendations, [0404-67](#)

#### **Blade coaters**

*see also* Coaters

In-line coating at the corrugator, [0304-39](#)

#### **Blade holder**

Paper machine doctor recommendations, [0404-67](#)

#### **Bleach plants**

Bleaching plant washer efficiency guide, [0606-23](#)

#### **Bleached board**

Paper machine drying rate, [0404-07](#)

Paper machine performance guidelines, [0404-47](#)

## **Bleaching**

Boiling point rise of spent sulfite liquors, [0607-21](#)

Cotton in nonwovens, [1205-02](#)

Chlorine gas curve, [0606-02](#)

Definitions of terms in the sulfite pulping process, [0607-25](#)

Density of aqueous sodium sulfite solution, [0607-18](#)

Density of chlorine gas, [0606-03](#)

Density of milk of lime solution, [0607-05](#)

Energy checklist: pulp mill, [0416-24](#)

Heat of vaporization of liquid chlorine, [0606-04](#)

Recommended pulp bleaching stage designation method, [0606-21](#)

Relative enthalpy (heat content) of sodium hydroxide solutions, [0606-08](#)

Solubility of sulfur dioxide, Ca(HSO<sub>3</sub>)<sub>2</sub> solutions, [0607-07](#)

Specific gravity and density of caustic soda solutions, [0606-20](#)

Specific gravity of sodium chloride solutions, [0606-10](#)

Sulfur burner gas strength volume, [0607-01](#)

Viscosities of various spent sulfite liquors at 26.7°C, [0607-22](#)

Viscosity of liquid chlorine [0606-05](#)

Viscosity of sodium hydroxide solutions, [0606-11](#)

## **Bleaching stages**

*see* Bleaching

## **Blind-drilled rolls**

*see* Vacuum rolls

## **Blistering**

Addendum to *Corrugating Defect Terminology Manual* - defects related to the use of fingerless singlefacers, [0304-17](#)

## **Blow boxes**

Sheet handling devices, [0404-44](#)

## **Blow-through steam**

Recommended Dryer Differential Pressures, [0404-31](#)

## **Blowdown**

*see also* Blowing

Design engineer decisions tree: paper mill boiler feedwater, [0416-04](#)

Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, [0416-14](#)

## **Blowing**

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

## **Board**

Pilot paper and wet laid nonwoven machines, [0502-16](#)

## **Board caliper**

*see* Thickness

## **Boiler feed water**

*see* Boilers, Feedwater

## **Boiler tubes**

Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, [0402-33](#)

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, [0402-31](#)

Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical

and noncritical service, [0402-13](#)

## **Boilers**

Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, [0402-38](#)

Design engineer decisions tree: paper mill boiler feedwater, [0416-04](#)

Explanation of recovery boiler leak indications, [0416-23](#)

Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, [0416-07](#)

Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, [0402-36](#)

Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, [0416-08](#)

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, [0402-31](#)

Keys to successful chemical cleaning of boilers, [0416-06](#)

Performance test procedure for boilers using biomass as fuel, [0416-18](#)

Sampling procedures for biomass fuel for boiler performance testing, [0416-17](#)

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, [0416-14](#)

Water treatment-related opportunities for energy conservation in a paper mill powerhouse, [0416-13](#)

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), [0416-26](#)

## **Bonding**

Techniques for bonding modern high-performance liners, [0304-40](#)

## **Box compression**

*see* Compression strength

## **Box flaps**

*see* Flaps

## **Box machines**

Troubleshooting a glue lap problem, [0304-10](#)

## **Box plants**

*see* Converting plants

## **Boxes**

Corrugated boxplant-list of potential hazards, [0301-01](#)

Critical properties to consider when unitizing, [0304-72](#)

High vacuum sheet dewatering, [0404-60](#)

## **Broke**

Broke loss calculations, [0502-10](#)

## **Bronze**

Guidelines for nondestructive examination of suction roll shells, [0402-19](#)

Weld repairs on new suction roll shells, [0402-17](#)

## **Burners**

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

## **Burst testers**

Calibration and maintenance of, [0304-24](#)

### **Butt joints**

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, [0402-31](#)

### **Butt welds**

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, [0402-31](#)

## **C**

### **CADCAM**

Computer-assisted machinery, [0305-02](#)

### **CONEG**

*see* Regulations

### **Cadmium**

An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, [0304-58](#)

### **Calcination**

Physical data of calcined kaolin-water suspensions, [0106-09](#)

### **Calcium base liquors**

Solubility of sulfur dioxide,  $\text{Ca}(\text{HSO}_3)_2$  solutions, [0607-07](#)

### **Calcium bisulfite**

Solubility of sulfur dioxide,  $\text{Ca}(\text{HSO}_3)_2$  solutions, [0607-07](#)

### **Calcium carbonate**

Physical data of calcium carbonate-water suspensions, [0106-01](#)

### **Calcium hydroxide**

Density of milk of lime solution, [0607-05](#)

### **Calculations**

*see* Computation

### **Calibration**

Basic guidelines for image analysis measurements, [0804-09](#)

Calibration and maintenance of the manually operated micrometer, [0304-30](#)

Of burst testers, [0304-24](#)

Suggestions for developing a box plant quality manual, [0304-49](#)

### **Caliper**

*see* Thickness

### **Canadian standard freeness**

Interconversion of freeness, [0809-01](#)

### **Carbon steel**

Inspection for cracking of composite tubes in black liquor recovery boilers, [0402-30](#)

### **Carbonates**

Chloride and potassium measurement and control in the pulping and chemical recovery cycle, [0416-15](#)

Estimating the first melting temperature of fireside deposits in recovery boilers, [0416-12](#)

Physical data of calcium carbonate-water suspensions, [0106-01](#)

### **Cartridges**

Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, [0425-06](#)

### **Cast iron**

Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, [0420-14](#)

### **Castings**

Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, [0402-25](#)

### **Caustic soda**

*see* Sodium hydroxide

### **Causticizing**

Energy checklist: pulp mill, [0416-24](#)

Material balance equations relating to digester requirements, [0418-02](#)

### **Ceramics**

Selection criteria for wet end ceramics, [0502-15](#)

Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, [0502-19](#)

### **Certification**

Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, [0402-33](#)

### **Chalk**

*see* Calcium carbonate

### **Chambered Doctor Blade**

Ink metering systems for corrugated flexo presses, [0306-09](#)

### **Charting**

Short-run statistical process control: a basic charting method, [0304-70](#)

Statistical process control - procedures for charting warp, [0304-13](#)

### **Checklist**

*see* Maintenance

### **Chemical Cleaning**

Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, [0404-51](#)

### **Chemical preparation**

Specific gravity and density of caustic soda solutions, [0606-20](#)

Specific gravity of sodium chloride solutions, [0606-10](#)

### **Chemical properties**

Chlorine dioxide ( $\text{ClO}_2$ ) safe storage and handling, [0606-30](#)

Fluoropolymer properties and applications in pulp and paper mills, [0402-37](#)

Magnesia-base pulping solutions, [0607-04](#)

Sodium chlorate ( $\text{NaClO}_3$ ) safe handling and storage, [0606-31](#)

### **Chemical pulps**

Boiling point rise of spent sulfite liquors, [0607-21](#)

Definitions of terms in the sulfite pulping process, [0607-25](#)

Density of aqueous sodium sulfite solution, [0607-18](#)

Density of milk of lime solution, [0607-05](#)

Solubility of sulfur dioxide,  $\text{Ca}(\text{HSO}_3)_2$  solutions, [0607-07](#)

Sulfur burner gas strength volume, [0607-01](#)

Viscosities of various spent sulfite liquors at 26.7°C,

[0607-22](#)

### **Chemical recovery**

Recausticizing material balance equations relating to digester requirements, [0418-02](#)

### **Chemicals**

Material safety data sheets, what to look for - how to understand them, [0304-38](#)

Chemical cleaning guide for press fabrics, [0404-65](#)

### **Chests**

*see* Stock chests

### **Chip silos**

*see* Chip bins

### **Chlorides**

Chloride and potassium measurement and control in the pulping and chemical recovery cycle, [0416-15](#)

Estimating the first melting temperature of fireside deposits in recovery boilers, [0416-12](#)

### **Chlorine**

Chlorine gas curve, [0606-02](#)

Density of chlorine gas, [0606-03](#)

Heat of vaporization of liquid chlorine, [0606-04](#)

Viscosity of liquid chlorine, [0606-05](#)

### **Chlorine dioxide**

Safe storage and handling of, [0606-30](#)

Specific gravity of sodium chloride solutions, [0606-10](#)

### **Chrome**

Tests for corrugator roll wear, [0304-53](#)

### **Chromium**

An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, [0304-58](#)

### **Clad-steel plate**

*see* Plates

### **Classification**

Paper grade classifications, [0404-36](#)

### **Clay**

Kaolin clay pigment index, [0106-06](#)

Physical data of calcined kaolin-water suspensions,

[0106-09](#)

Physical data of hydrous Kaolin-water suspensions,

[0106-02](#)

### **Cleaners**

Catalog of Stock Preparation Pilot Plants, [0502-20](#)

Introduction to centrifugal cleaners, [0508-10](#)

### **Cleaning**

Cleaning anilox rolls: procedures and options, [0306-18](#)

Cleanup procedures for flexo folder gluer/rotary

diecutters, [0305-33](#)

Daily, weekly, and monthly maintenance checklists,

[0305-34](#)

Dryer fabric cleaning, [0404-38](#)

Housekeeping guidelines, [0305-32](#)

Introduction to centrifugal cleaners, [0508-10](#)

Keys to successful chemical cleaning of boilers, [0416-06](#)

Paper Machine Clothing Cleaning and Conditioning for

Recycled Fiber Use, [0404-51](#)

Paper machine shower recommendations, [0404-61](#)

Post-fabrication cleaning of stainless steel in the pulp and

paper industry, [0402-35](#)

### **Cleaning chemicals**

*see* Cleansers

### **Cleansers**

Keys to successful chemical cleaning of boilers, [0416-06](#)

### **Clogging**

Nozzle maintenance and clogging, [0420-15](#)

### **Clothing**

*see* Felts, Machine clothing

### **Coating**

Kaolin clay pigment index, [0106-06](#)

### **Coating color**

*see* Color

### **Coating thickness**

Tests for corrugator roll wear, [0304-53](#)

### **Coatings**

Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, [0402-32](#)

Tests for corrugator roll wear, [0304-53](#)

### **Coefficient of friction**

*see* Friction factor

### **Combination Metering System**

Ink metering systems for corrugated flexo presses, [0306-09](#)

### **Combined boards**

Common curtain coating problems: causes, detection, and correction, [0304-26](#)

Obtaining off the corrugator for use in statistical process control procedures, [0304-12](#)

Total indicated runout and its impact on combined board quality, [0304-56](#)

### **Compressibility**

Objective Determination of the Haptic Properties of Tissue Products, [0808-07](#)

### **Compression**

Corrugated caliper: why is it so important?, [0304-04](#)

### **Compression resistance**

*see* Compression strength

### **Compression strength**

Corrugated caliper: why is it so important?, [0304-04](#)

Obtaining a combined board caliper off the corrugator for use in statistical process control procedures, [0304-12](#)

Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, [0304-11](#)

### **Computation**

Paper machine drying rate, [0404-07](#)

### **Computer-assisted**

*see* CAD/CAM

### **Concentricity**

Total indicated runout and its impact on combined board quality, [0304-56](#)

### **Condensate**

Application of dryer bars, [0404-35](#)

### **Condensates**

Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, [0402-36](#)

Measurement of dryer condensing rates (continuous

method), [0404-03](#)

Measurement of dryer condensing rates (vertical separator method), [0404-18](#)

Stripping of kraft pulping process condensates: regulations, design and operation, [0416-10](#)

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, [0416-14](#)

Water treatment-related opportunities for energy conservation in a paper mill powerhouse, [0416-13](#)

Yankee dryer steam condensing rates, [0404-49](#)

Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, [0425-04](#)

### **Condensation**

Dryer condensing rates (batch method), [0404-02](#)

Dryer condensing rates (continuous method), [0404-03](#)

### **Condensing rates**

*see* Condensation

### **Conditioning**

Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, [0404-51](#)

Testing atmospheres simulating end use conditions, [0808-05](#)

### **Conductivity**

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, [0416-14](#)

### **Conical refiners**

Conical refining intensity, [0508-07](#)

### **Consistency**

Drainage evaluation by mass measurement, [0502-12](#)

Generalized method for determining the pipe friction loss of flowing pulp suspensions, [0410-14](#)

Optimum for pumping pulp, [0410-15](#)

### **Construction materials**

Sodium chlorate (NaClO<sub>3</sub>) safe handling and storage, [0606-31](#)

### **Contact bearings**

*see* Bearings

### **Contact technique**

Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, [0402-33](#)

### **Container boards**

Friction -- slide angle, [0304-34](#)

### **Contaminants**

*see* Impurities

### **Contamination**

*see* Pollution control

### **Continuous digesters**

Guidelines for inspection of continuous digesters and impregnation vessels, [0402-27](#)

### **Contraction**

Flow from a 45° slice, [0410-03](#)

Flow from a nozzle (slice) with inclined upper lip,

### **0410-04**

Flow from a vertical slice, [0410-02](#)

### **Control charts**

*see* Charting

### **Control systems**

Industry 4.0 Lexicon, 1103-04

Short-run statistical process control: a basic charting method, [0304-70](#)

### **Conversion factors**

Units of measurement and, [0800-01](#)

### **Converting factors**

Moisture content of paper: terminology and conversion, [0808-02](#)

### **Converting plants**

Boxplant quality measurement: why test?, [0304-02](#)

Computer-assisted machinery, [0305-02](#)

Corrugated boxplant - list of potential hazards, [0301-01](#)

Machinery considerations and selection, [0305-06](#)

### **Coolers**

Guidelines for Rotary Lime Kiln Refractory, [0416-27](#)

### **Copper**

The role of copper in a printing ink, [0304-61](#)

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, [0416-14](#)

### **Copper sulfate**

Tests for corrugator roll wear, [0304-53](#)

### **Cores**

Determination of winder sets per reel, [0502-02](#)

Reel diameter for various reel spool and roll core sizes, [0502-03](#)

### **Corrosion**

*see also* Corrosion inhibitors

Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, [0402-38](#)

Estimating the first melting temperature of fireside deposits in recovery boilers, [0416-12](#)

Fluoropolymer properties and applications in pulp and paper mills, [0402-37](#)

Guide to the use of stainless steel pipe specifications, [0402-24](#)

Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, [0402-03](#)

Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, [0402-36](#)

Guidelines for inspecting batch digesters, [0402-22](#)

Guidelines for inspection of continuous digesters and impregnation vessels, [0402-27](#)

Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, [0402-28](#)

Guidelines for nondestructive examination of suction roll shells, [0402-19](#)

Nozzle maintenance and clogging, [0420-15](#)

Post-fabrication cleaning of stainless steel in the pulp and paper industry, [0402-35](#)

Ultrasonic technician performance test for boiler tube thickness measurement, [0402-21](#)

Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, [0402-18](#)

Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), [0416-26](#)

### **Corrosion inhibitors**

Keys to successful chemical cleaning of boilers, [0416-06](#)

### **Corrosion prevention**

Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, [0402-32](#)

Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, [0402-03](#)

### **Corrugated boards**

Viscosities of various spent sulfite liquors at 26.7°C and other temperatures, [0607-22](#)

## **Sensitivity**

Basic guidelines for image analysis measurements, [0804-09](#)

## **Sensors**

Calculation and partitioning of variance using paper machine scanning sensor measurements, [1101-01](#)

## **Servicing**

Maintenance considerations in new construction and rebuilds, [0408-02](#)

## **Setting time**

Understanding and troubleshooting hot melt adhesives, [0304-74](#)

## **Shafts**

Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, [0402-34](#)

## **Shape**

Total indicated runout and its impact on combined board quality, [0304-56](#)

## **Sheet water content**

*see* Moisture content

## **Shells**

Guidelines for inspection and nondestructive testing of paper machine dryers, [0402-16](#)

Weld repairs on new suction roll shells, [0402-17](#)

## **Shock drying**

Terminology for high temperature pressing, [0404-48](#)

## **Showers**

Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, [0404-51](#)

Paper machine shower recommendations, [0404-61](#)

Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements [0404-27](#)

Steam shower applications in the forming and press section, [0404-58](#)

Chemical cleaning guide for press fabrics, [0404-65](#)

## **Silica**

Guidelines for Rotary Lime Kiln Refractory, [0416-27](#)

Response to contamination of high purity boiler feedwater, [0416-05](#)

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, [0416-14](#)

## **Single Facers**

Procedure for setting up a raw material trial on the corrugator, [0304-01](#)

## **Singlefacers**

Addendum to *Corrugating Defect Terminology Manual* - defects related to the use of fingerless singlefacers, [0304-17](#)

Alternative method for designating flute sizes, [0302-04](#)

Causes and corrections of common corrugator bonding problems, [0304-32](#)

Checking for coating wear on corrugating rolls, [0304-73](#)

Checking the flute depth of corrugating rolls, [0304-75](#)

Parallel of corrugating rolls with “NCR” paper, [0304-62](#)

Preventing score cracking in a box plant, [0304-37](#)

Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, [0304-08](#)

Splicer defects and cures, [0304-31](#)

## **Siphons**

Thermocompressor Applications for Paper Drying, [0404-66](#)

## **Skid**

Material handling considerations for flexo folder gluers, [0305-54](#)

Recommended Dryer Differential Pressures, [0404-31](#)

## **Slabbing**

Broke loss calculations, [0502-10](#)

## **Slices**

Flow from a 45° slice, [0410-03](#)

Flow from a nozzle (slice) with inclined upper lip, [0410-04](#)

Head of Stock Behind Slice (Head/Jet and Slice Flow Rate Relationships), [0410-05](#)

Flow from a vertical slice, [0410-02](#)

## **Slide angle**

Statistical process control, friction, [0304-34](#)

## **Slotting**

Machinery considerations and selection: yoked scoring slotting section, [0305-53](#)

## **Slurry**

Physical data of calcined kaolin-water suspensions,

## [0106-09](#)

Physical data of calcium carbonate-water suspensions,

## [0106-01](#)

Physical data of hydrous Kaolin-water suspensions,

## [0106-02](#)

### **Slushed paper stock**

*see* Paper stock

### **Smearing**

Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, [0305-40](#)

### **Smog**

Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, [0416-25](#)

### **Smoothness**

Objective Determination of the Haptic Properties of Tissue Products, [0808-07](#)

### **Sodium**

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, [0416-14](#)

### **Sodium bicarbonate**

Density of aqueous sodium bicarbonate solution, [0607-13](#)

### **Sodium bisulfite**

Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), [0607-12](#)

### **Sodium borate**

Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, [0304-08](#)

### **Sodium carbonate**

Density of aqueous sodium carbonate solution, [0607-14](#)

Specific heat of sodium carbonate solution, [0607-15](#)

Vapor pressure of sodium carbonate solution, [0607-16](#)

Viscosity of sodium carbonate solution, [0607-17](#)

### **Sodium chlorate**

Safe storage of, [0606-31](#)

### **Sodium chloride**

Specific gravity of sodium chloride solutions, [0606-10](#)

### **Sodium hydroxide**

Caustic soda (NaOH) safe storage and handling, [0606-27](#)

Relative enthalpy of solution, [0606-08](#)

Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, [0304-08](#)

Specific gravity and density of caustic soda solutions, [0606-20](#)

Specific heat of caustic soda solutions, [0606-07](#)

Viscosity of sodium hydroxide solutions, [0606-11](#)

### **Sodium sulfite**

Density of aqueous sodium sulfite solution, [0607-18](#)

### **Solids content**

Physical data of calcined kaolin-water suspensions,

## [0106-09](#)

Physical data of calcium carbonate-water suspensions,

## [0106-01](#)

Physical data of hydrous Kaolin-water suspensions,

## [0106-02](#)

### **Solubility**

Solubility of sulfur dioxide, [0607-06](#)

Solubility of sulfur dioxide, Ca(HSO<sub>3</sub>)<sub>2</sub> solutions, [0607-07](#)

Solubility of sulfur dioxide in magnesium bisulfite solution, [0607-09](#)

Solubility of sulfur dioxide in saturated magnesium bisulfite solution, [0607-10](#)

### **Solutions**

Equilibrium relative humidities over saturated salt solutions, [0808-03](#)

Specific heat of caustic soda solutions, [0606-07](#)

### **Sorption**

Cotton in nonwovens, [1205-02](#)

### **Soot blowers**

Recovery boiler sootblowers: practical guidelines, [0416-20](#)

Recovery boiler sootblowers: the basics, [0416-19](#)

### **SPC techniques**

*see* Statistical methods

### **Specialty coating pigment**

*see* Pigment

### **Specialty papers**

Paper machine performance guidelines, [0404-47](#)

### **Specific gravity**

*see* Density

### **Specific heat**

Specific heat of caustic soda solutions, [0606-07](#)

Specific heat of sodium carbonate solution, [0607-15](#)

### **Specifications**

Guideline specification for procurement of an economizer for a recovery boiler, [0416-21](#)

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

### **Speed**

*see* Velocity

### **Spent sulfite liquors**

Density of aqueous sodium sulfite solution, [0607-18](#)

### **Splicers**

Splicer defects and cures, [0304-31](#)

### **Spools**

Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, [0402-34](#)

Reel diameter for various reel spool and roll core sizes, [0502-03](#)

### **Spunlaced fabric**

Cotton in nonwovens, [1205-02](#)

### **Spray coaters**

*see also* Coaters

In-line coating at the corrugator, [0304-39](#)

### **Squaring**

*see* Squared papers, Trimming

### **Stackers**

Multiple-out rotary diecut stacking, [0305-47](#)

Stacking off the rotary diecutter, [0305-46](#)

### **Stacking**

Corrugated caliper: why is it so important?, [0304-04](#)

### **Stacking strength**

*see* Compression strength

### **Stainless steel**

Guide to the use of stainless steel pipe specifications,

## [0402-24](#)

Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, [0402-03](#)

Guidelines for nondestructive examination of suction roll shells, [0402-19](#)

Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, [0402-25](#)

Inspection for cracking of composite tubes in black liquor recovery boilers, [0402-30](#)

Post-fabrication cleaning of stainless steel in the pulp and paper industry, [0402-35](#)

Weld repairs on new suction roll shells, [0402-17](#)

## **Standard conditions**

Testing atmospheres simulating end use conditions, [0808-05](#)

## **Starch**

Starch adhesive preparation and distribution systems: housekeeping, [0304-06](#)

Starch adhesive trial, [0304-22](#)

Statistical process control of starch gelatinization temperature, [0304-14](#)

Statistical process control of starch viscosity, [0304-15](#)

Techniques for running "WRA" (water resistant starch adhesive), [0304-46](#)

Understanding wet strength: what are MRA, WRA, and WPA?, [0304-69](#)

Using washup water as the vehicle in starch-based corrugating adhesive, [0304-44](#)

## **Starch conversion**

Statistical process control of starch gelatinization temperature, [0304-14](#)

## **Statistical analysis**

How to perform a gauge repeatability and reproducibility study, [0304-71](#)

Obtaining combined board caliper off the corrugator for use statistical process control procedures, [0304-12](#)

Starch viscosity in corrugating adhesives, [0304-15](#)

## **Statistical distribution**

Calculation and partitioning of variance using paper machine scanning sensor measurements, [1101-01](#)

## **Statistical methods**

Boxplant quality measurement: why test?, [0304-02](#)

Obtaining combined board caliper off the corrugator, [0304-12](#)

Procedures for charting warp, [0304-13](#)

Procedures for utilizing statistical control techniques to monitor the tare weight of a run of boxes, [0304-35](#)

Short-run statistical process control: a basic charting method, [0304-70](#)

Statistical process control: friction - slide angle, [0304-34](#)

Statistical process control of starch gelatinization temperature, [0304-14](#)

Statistical process control of starch viscosity, [0304-15](#)

Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, [0304-11](#)

## **Statistical process control**

*see* Statistical methods

## **Statistical quality control**

*see* Statistical methods

## **Statistics**

Calculation and partitioning of variance using paper machine scanning sensor measurements, [1101-01](#)

Obtaining combined board caliper off the corrugator for use in statistical process control procedures, [0304-12](#)

Starch viscosity in corrugating adhesives, [0304-15](#)

Statistical process control of starch gelatinization temperature, [0304-14](#)

## **Status reports**

*see* Reporting

## **Steam**

Application of dryer bars, [0404-35](#)

Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, [0420-14](#)

Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, [0402-36](#)

Guidelines for routine periodic inspection and testing of cast iron Yankee and MG dryers, [0425-01](#)

Response to contamination of high purity boiler feedwater, [0416-05](#)

Steam shower applications in the forming and press section, [0404-58](#)

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, [0416-14](#)

Yankee dryer steam condensing rates, [0404-49](#)

Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, [0425-04](#)

## **Steam chests**

Terminology for high temperature pressing, [0404-48](#)

## **Steam pressure**

*see* Pressure gradient

## **Step-Up Strip**

Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, [0425-06](#)

## **Sterilization**

Starch adhesive preparation and distribution systems: housekeeping, [0304-06](#)

## **Stickies**

Stickies definition and classification, [0603-02](#)

## **Stitch bonding**

Cotton in nonwovens, [1205-02](#)

## **Stock flow**

Optimum consistency for pumping pulp, [0410-15](#)

## **Stock (pulp)**

Control of stock activity on a fourdrinier table, [0410-08](#)

Head of Stock Behind Slice (Head/Jet and Slice Flow Rate Relationships), [0410-05](#)

## **Stock flow**

Control of stock activity on a fourdrinier table, [0410-08](#)

## **Stock preparation**

Catalog of Stock Preparation Pilot Plants, [0502-20](#)

## **Stones**

*see* Pulpstones

### **Storage**

Buying, Storing, and Handling P.V.A. Adhesives Used on Folder Gluers and on Sheet Laminators, [0305-25](#)

Caustic soda (NaOH) safe storage and handling, [0606-27](#)

Chlorine dioxide (ClO<sub>2</sub>) safe storage and handling, [0606-30](#)

Hydrogen peroxide (H<sub>2</sub>O<sub>2</sub>) safe storage and handling, [0606-24](#)

Methanol (CH<sub>3</sub>OH) safe storage and handling, [0606-25](#)

Oxygen (O<sub>2</sub>) bulk storage and safe handling, [0606-29](#)

Sodium chlorate (NaClO<sub>3</sub>) safe handling and storage, [0606-31](#)

Sulfuric acid (H<sub>2</sub>SO<sub>4</sub>) safe storage and handling, [0606-26](#)

### **Strapping**

Critical properties to consider when unitizing, [0304-72](#)

Material handling considerations for flexo folder gluers, [0305-54](#)

### **Stress**

Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, [0402-38](#)

### **Stress assisted corrosion**

Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, [0402-38](#)

### **Stress corrosion**

Guidelines for inspection of continuous digesters and impregnation vessels, [0402-27](#)

### **Strippers**

Stripping of kraft pulping process condensates: regulations, design and operation, [0416-10](#)

### **Stripping**

Troubleshooting the Die Cutting Section, [0305-39](#)

### **Stuff boxes**

Headbox approach piping guidelines, [0404-54](#)

### **Suction**

Guidelines for nondestructive examination of suction roll shells, [0402-19](#)

### **Sulfite liquors**

Boiling point rise of spent sulfite liquors, [0607-21](#)

Definitions of terms in the sulfite pulping process, [0607-25](#)

Density of aqueous sodium sulfite solution, [0607-18](#)

Density of milk of lime solution, [0607-05](#)

Solubility of sulfur dioxide, Ca(HSO<sub>3</sub>)<sub>2</sub> solutions, [0607-07](#)

Sulfur burner gas strength volume, [0607-01](#)

Viscosities of various spent sulfite liquors at 26.7°C and other temperatures, [0607-22](#)

### **Sulfite pulping**

Boiling point rise of spent sulfite liquors, [0607-21](#)

Definitions of terms in the sulfite pulping process, [0607-25](#)

Density of aqueous sodium sulfite solution, [0607-18](#)

Density of milk of lime solution, [0607-05](#)

Physical and chemical properties of magnesia-base pulping solutions, [0607-04](#)

Solubility of sulfur dioxide, Ca(HSO<sub>3</sub>)<sub>2</sub> solutions, [0607-07](#)

Solubility of sulfur dioxide, [0607-06](#)

Solubility of sulfur dioxide in magnesium bisulfite solution, [0607-09](#)

Solubility of sulfur dioxide in saturated magnesium bisulfite solution, [0607-10](#)

Sulfur burner gas strength volume, [0607-01](#)

Vapor pressure of sulfur dioxide solutions, [0607-11](#)

Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), [0607-12](#)

Viscosities of various spent sulfite liquors at 26.7°C, [0607-22](#)

### **Sulfite waste liquor**

*see* Spent sulfite liquors

### **Sulfur burners**

Sulfur burner gas strength volume, [0607-01](#)

### **Sulfur dioxide**

Boiling point rise of spent sulfite liquors, [0607-21](#)

Definitions of terms in the sulfite pulping process, [0607-25](#)

Physical and chemical properties of magnesia-base pulping solutions, [0607-04](#)

Solubility of sulfur dioxide, [0607-06](#)

Solubility of sulfur dioxide, Ca(HSO<sub>3</sub>)<sub>2</sub> solutions, [0607-07](#)

Solubility of sulfur dioxide in magnesium bisulfite solution, [0607-09](#)

Solubility of sulfur dioxide in saturated magnesium bisulfite solution, [0607-10](#)

Sulfur burner gas strength volume, [0607-01](#)

Vapor pressure of sulfur dioxide solutions, [0607-11](#)

Viscosities of various spent sulfite liquors at 26.7°C, [0607-22](#)

Viscosity of a neutral sulfite spent liquor (Ostwald capillary viscometer), [0607-23](#)

Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), [0607-12](#)

### **Sulfuric acid**

Sulfuric acid (H<sub>2</sub>SO<sub>4</sub>) safe storage and handling, [0606-26](#)

### **Supervision**

Project leader, [0305-13](#)

### **Surface properties**

Granite roll material and surface requirements, [0404-41](#)

### **Surface softness**

Objective Determination of the Haptic Properties of Tissue Products, [0808-07](#)

### **Surface speed**

*see* Retention, Machine speed

### **Suspended solids**

Generalized method for determining the pipe friction loss of lowing pulp suspensions, [0410-14](#)

## Systems

Chloride and potassium measurement and control in the pulping and chemical recovery cycle, [0416-15](#)

## T

### Tare weight

Statistical control techniques to monitor the tare weight of a run of boxes, [0304-35](#)

### Task time

*see* Time

### Technical nomenclature

*see* Nomenclature

### Temperature

Conducting a corrugator temperature audit, [0304-65](#)

Density of aqueous sodium bicarbonate solution, [0607-13](#)

Density of aqueous sodium carbonate solution, [0607-14](#)

Dryer section performance monitoring, [0404-33](#)

Dryer surface temperature measurement, [0404-39](#)

Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, [0404-24](#)

Solubility of sulfur dioxide in magnesium bisulfite solution, [0607-09](#)

Solubility of sulfur dioxide in saturated magnesium bisulfite solution, [0607-10](#)

Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, [0304-08](#)

Specific heat of sodium carbonate solution, [0607-15](#)

Statistical process control of starch gelatinization temperature, [0304-14](#)

Statistical process control of starch viscosity, [0304-15](#)

Testing atmospheres simulating end use conditions, [0808-05](#)

Troubleshooting cross-machine direction moisture profile problems, [0404-57](#)

Vapor pressure of sodium carbonate solution, [0607-16](#)

Vapor pressure of sulfur dioxide solutions, [0607-11](#)

Viscosity of a neutral sulfite spent liquor (Ostwald capillary viscometer), [0607-23](#)

Viscosity of sodium carbonate solution, [0607-17](#)

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

### Tension

Recommended tensions in dryer fabrics, [0404-04](#)

### Terminology

*see* Nomenclature

### Test conditions

Testing atmospheres simulating end use conditions, [0808-05](#)

### Test equipment

Paper test rooms: design considerations, [0808-04](#)

### Test facilities

Paper test rooms: design considerations, [0808-04](#)

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

### Test methods

Guidelines for evaluation of liquid ring vacuum pump performance, [0420-12](#)

### Testing

Basic guidelines for image analysis measurements, [0804-09](#)

Catalog of Stock Preparation Pilot Plants, [0502-20](#)

Drainage evaluation by mass measurement, [0502-12](#)

Forming section monitoring, [0502-14](#)

Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, [0402-34](#)

Paper test rooms: design considerations, [0808-04](#)

Recommended test procedure for black liquor evaporators, [0416-11](#)

Water removal by wet presses, [0404-01](#)

### Thermal measurement

Recovery boiler performance calculation – short form, [0416-01](#)

### Thermal spray

Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, [0402-32](#)

Guidelines for inspecting batch digesters, [0402-22](#)

### Thermobonding

Cotton in nonwovens, [1205-02](#)

### Thermocompressors

Thermocompressor Applications for Paper Drying, [0404-66](#)

### Thermography

Troubleshooting cross-machine direction moisture profile problems, [0404-57](#)

### Thermoplastics

Fluoropolymer properties and applications in pulp and paper mills, [0402-37](#)

### Thick stock

*see* High consistency

### Thickness

Corrugated caliper: why is it so important?, [0304-04](#)

Guidelines for Rotary Lime Kiln Refractory, [0416-27](#)

Method for evaluating thickness of wet press fabrics, [0404-28](#)

Obtaining combined board caliper off the corrugator for use in statistical process control procedures, [0304-12](#)

Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, [0304-11](#)

Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, [0402-18](#)

### Through drying

Paper machine performance guidelines, [0404-47](#)

Through drying, [0404-25](#)

### Tissue

Design, Operation, Performance Evaluation and Inspection guidelines for Yankee hood systems, [0425-02](#)

Paper machine performance guidelines, [0404-47](#)

Pilot paper and wet laid nonwoven machines, [0502-16](#)

### Tolerance

Corrugator bearing clearance checks and their impact, [0304-47](#)

### Total indicated runout

*see also* Combined boards

Total indicated runout and its impact on combined board quality, [0304-56](#)

#### **Total reduced sulfur**

Collection and burning of concentrated noncondensable gases: regulations, design and operation, [0416-09](#)

#### **Touch**

Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements. [0404-27](#)

#### **Vacuum rolls**

Liquid penetrant testing of new suction roll shells, [0402-11](#)

Paper machine vacuum selection factors, [0502-01](#)

Techniques for nip impressions, [0404-46](#)

Weld repairs on new suction roll shells, [0402-17](#)

#### **Vacuum washers**

Bleaching plant washer efficiency guide, [0606-23](#)

#### **Valves**

Guidelines for procurement of cast stainless steels for

large pumps and valves for the pulp and paper industry, [0402-25](#)

Headbox approach piping guidelines, [0404-54](#)

#### **Vapor pressure**

Chlorine gas curve, [0606-02](#)

Vapor pressure of sulfur dioxide solutions, [0607-11](#)

Vapor pressure of sodium carbonate solution, [0607-16](#)

Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), [0607-12](#)

#### **Variance**

Calculation and partitioning of variance using paper machine scanning sensor measurements, [1101-01](#)

#### **Varnish**

Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, [0305-40](#)

#### **Velocity**

*see also* Machine speed

Pulpstone speed chart, [0605-02](#)

#### **Ventilation**

Paper machine room ventilation guidelines, [0404-50](#)

Recommended minimum dryer pocket air requirements, [0404-17](#)

Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, [0404-24](#)

#### **Viscosity**

Density of aqueous sodium sulfite solution, [0607-18](#)

Liquid chlorine, [0606-05](#)

Quality techniques using existing equipment, [0306-11](#)

Statistical process control of starch viscosity, [0304-15](#)

Viscosities of spent sulfite liquors at 26.7° C (Oswald capillary viscometer), [0607-22](#)

Viscosity of a neutral sulfite spent liquor (Oswald capillary viscometer), [0607-23](#)

Viscosity of sodium carbonate solution, [0607-17](#)

Viscosity of sodium hydroxide solutions, [0606-11](#)

Viscosity reading procedure for flexographic corrugated inks, [0304-18](#)

#### **Vision**

Basic guidelines for image analysis measurements, [0804-09](#)

#### **Volume**

Grinder pulpstones – cubical contents, [0605-01](#)

Identifying anilox volume measuring equipment, [0306-15](#)

---

## **W**

#### **Warning labels**

*see* Hazardous materials

#### **Warpage**

Statistical process control -- procedures for charting warp, [0304-13](#)

Techniques to minimize twist warp, [0304-50](#)

Warp in corrugated board, [0304-07](#)

#### **Wash waters**

Using washing water as the vehicle in starch based corrugating adhesive, [0304-44](#)

#### **Washers**

Energy checklist: pulp mill, [0416-24](#)

Bleaching plant washer efficiency guide, [0606-23](#)

#### **Washing**

Bleaching plant washer efficiency guide, [0606-23](#)

Recommended pulp bleaching stage designation method, [0606-21](#)

#### **Wastewater treatment equipment**

*see* Effluent treatment

#### **Water**

*see also* Solubility

Design engineer decisions tree: paper mill boiler feedwater, [0416-04](#)

Guidelines for evaluation of liquid ring vacuum pump performance, [0420-12](#)

Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), [0607-12](#)

Water treatment-related opportunities for energy conservation in a paper mill powerhouse, [0416-13](#)

#### **Water content**

*see* Moisture content

#### **Water hardness**

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, [0416-03](#)

#### **Water permeability**

Troubleshooting cross-machine direction moisture profile problems, [0404-57](#)

#### **Water removal**

Determination of water removal by wet presses, [0404-01](#)

High vacuum sheet dewatering, [0404-60](#)

Methods to minimize sheet rewet in the press section, [0404-59](#)

Paper machine drying rate, [0404-07](#)

#### **Water resistance**

Techniques for running “WRA” (water resistant starch adhesive), [0304-46](#)

Understanding wet strength: what are MRA, WRA, and WPA?, [0304-69](#)

#### **Water treatment**

Design engineer decisions tree: paper mill boiler feedwater, [0416-04](#)

Water treatment-related opportunities for energy conservation in a paper mill powerhouse, [0416-13](#)

#### **Water vapor**

Paper machine room ventilation guidelines, [0404-50](#)

#### **Waterside cracking**

Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, [0402-38](#)

#### **Wax**

Common curtain coating problems: causes, detection, and correction, [0304-26](#)

#### **Wear resistance**

*see* Abrasion resistance

#### **Web tension**

Guidelines for web conveyance and winding tension levels, [0200-01](#)

#### **Webs**

*see also* Paper webs

Guidelines for web conveyance and winding tension levels, [0200-01](#)

### **Weight**

Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, [0404-20](#)

Procedure for utilizing statistical control techniques to monitor the tare weight of a run of boxes, [0304-35](#)

Weight of newsprint rolls, [0502-11](#)

### **Weirs**

Weirs and flumes, [0410-10](#)

### **Welding**

Guide to the use of stainless steel pipe specifications, [0402-24](#)

Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, [0402-03](#)

Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, [0402-31](#)

Guidelines for inspection of continuous digesters and impregnation vessels, [0402-27](#)

Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, [0402-25](#)

Field welding of pin studs in black liquor recovery boilers, [0402-15](#)

### **Wet bulb temperature**

Relative humidity tables, [0808-06](#)

### **Wet ends**

Drainage evaluation by mass measurement, [0502-12](#)

Forming section monitoring, [0502-14](#)

How to prevent score cracking in a box plant, [0304-37](#)

Selection criteria for wet end ceramics, [0502-15](#)

### **Wet felts**

*see also* Felts

### **Wet presses**

Determination of water removal by, [0404-01](#)

### **Wet pressing**

Terminology for high temperature pressing, [0404-48](#)

### **Wet strength**

Understanding wet strength: what are MRA, WRA, and WPA?, [0304-69](#)

### **Wet-laid nonwovens**

Pilot paper and wet laid nonwoven machines, [0502-16](#)

### **White liquors**

Reausticizing material balance equations relating to digester requirements, [0418-02](#)

### **White water**

Drainage evaluation by mass measurement, [0502-12](#)

Flow determination by chemical method, [0410-09](#)

Weirs and flumes, [0410-10](#)

### **Width**

Weight of newsprint rolls, [0502-11](#)

### **Winding**

Guidelines for web conveyance and winding tension levels, [0200-01](#)

### **Wire**

Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, [0502-19](#)

### **Williams freeness**

Interconversion of freeness, [0809-01](#)

### **Winders**

Determination of winder sets per reel, [0502-02](#)

### **Wiper Roll**

A guide to proper wiper roll selection for flexographic printing in the corrugated box industry, [0306-20](#)

Ink metering systems for corrugated flexo presses, [0306-09](#)

### **Wiperroll**

*see* Flexography

### **Wood chips**

*see* Chips

### **Wood containing papers**

*see* Mechanical papers

### **Wood free papers**

Paper machine drying rate, [0404-07](#)

### **Work place**

*see* Human factors

### **Working conditions**

*see* Environments

### **Wound rolls**

Reel diameter for various reel spool and roll core sizes, [0502-03](#)

TAPPI Roll number for inventory/tracking systems and bar codes, [1004-01](#)

### **Writing papers**

Paper machine drying rate, [0404-07](#)

---

## **X-Y-Z**

---

### **Yankee cylinders**

*see* Yankee dryers

### **Yankee driers**

Design, Operation, Performance Evaluation and Inspection guidelines for Yankee hood systems, [0425-02](#)

### **Yankee dryers**

Design, monitoring and maintenance guidelines for Yankee dryer bearings, [0425-03](#)

Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, [0425-06](#)

Guidelines for routine periodic inspection and testing of cast iron Yankee and MG dryers, [0425-01](#)

Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, [0425-04](#)

Guidelines for usage of MAP on raw Yankee surfaces, [0425-05](#)

Techniques for nip impressions, [0404-46](#)

Yankee dryer steam condensing rates, [0404-49](#)
