Subject Index

Technical Information Papers

This document was last updated November 30, 2022

--------A--------

Abrasion
  Selection criteria for wet end ceramics, 0502-15

Abrasion resistance
  Selection criteria for wet end ceramics, 0502-15

Absorption
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Accessibility
  Maintenance considerations in new construction and rebuilds, 0408-02

Acrylic fibers
  see Polyacrylics, Synthetic fibers

Additives
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46

Adhesives
  Buying, Storing, and Handling P.V.A. Adhesives Used on Folder Gluers and on Sheet Laminators, 0305-25
  Causes and corrections of common corrugator bonding problems, 0304-32
  Evaluating glue lap adhesive properties, 0304-16
  Procedure for setting up a raw material trial on the corrugator, 0304-01
  Starch adhesive preparation and distribution systems: housekeeping, 0304-06
  Starch adhesive trial, 0304-22
  Statistical process control of starch gelatinization temperature, 0304-14
  Statistical process control of starch viscosity, 0304-15
  Stickies definition and classification, 0603-02
  Techniques for bonding modern high-performance liners, 0304-40
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
  Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
  Understanding and troubleshooting hot melt adhesives, 0304-74
  Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44

After dryers
  Paper machine drying rate, 0404-07

Agitation
  Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Agitators
  Guidelines for side-entering stock agitators, 0420-13

Air
  Paper machine room ventilation guidelines, 0404-50

Air balance
  see Air, Materials balance

Air flow
  Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
  Recommended minimum dryer pocket air requirements, 0404-17
  Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
  Sheet handling devices, 0404-44

Air jets
  Sheet handling devices, 0404-44

Air permeability
  Automated Scanning for Moisture Content and Air Permeability on Paper Machine Felts, 0502-21
  Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20

Air pollution
  Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Air staging
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Alignment
  Checking the parallel of corrugating rolls with “NCR” paper, 0304-62

Alkali
  Specific heat of caustic soda solutions, 0606-07

Alkaline sulfite pulping
  Boiling point rise of spent sulfite liquors, 0607-21
  Definitions of terms in the sulfite pulping process, 0607-25
  Density of aqueous sodium sulfite solution, 0607-18
  Density of milk of lime solution, 0607-05
  Solubility of sulfur dioxide, Ca(HSO3)2: solutions, 0607-07
  Sulfur burner gas strength volume, 0607-01
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

Alkalinity
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Alumina
  Guidelines for Rotary Lime Kiln Refractory, 0416-27
Ammonia
Solubility of sulfur dioxide, 0607-06

Analysis
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

Angle of slide
see Slide angle

Anilox coaters
In-line coating at the corrugator, 0304-39

Anilox rolls
see Flexography, Printing cylinders
Ink metering systems for corrugated flexo presses, 0306-09

Anvil Wear
Troubleshooting the Die Cutting Section, 0305-39

Approach flow systems
Headbox approach piping guidelines, 0404-54

Ash
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Drainage evaluation by mass measurement, 0502-12
Chemical cleaning guide for press fabrics, 0404-65

Atmosphere
Testing atmospheres simulating end use conditions, 0808-05

Auditing
Checklist for a properly planned project, 0408-01

Automatic feeders
see Feeders

Automated Felt Scanner
Automated Scanning for Moisture Content and Air Permeability on Paper Machine Felts, 0502-21

Automation
Industry 4.0 Lexicon, 1103-04

Availability
Definitions of black liquor recovery furnace availability, 0416-02

B

Backing Blade
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Bacteria
Starch adhesive preparation and distribution systems: housekeeping, 0304-06

Bags
Paper machine drying rate, 0404-07

Bar Width Reduction (BWR)
see Product codes

Bar codes
see Product codes

Bases
see Hydroxides

Basis weight
Headbox approach piping guidelines, 0404-54

Batch digesters
Guidelines for inspecting batch digesters, 0402-22

Batch process
Measurement of dryer condensing rates (vertical separator method), 0404-18

Bauxite
Guidelines for Rotary Lime Kiln Refractory, 0416-27

Bearings
Corrugator bearing clearance checks and their impact, 0304-47
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Total indicated runout and its impact on combined board quality, 0304-56
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Bearing failure
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Biocide
Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Biomass
Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Biomechanics
see Human factors

Bisulfites
Physical and chemical properties of magnesia-base pulping solutions, 0607-04
Solubility of sulfur dioxide, 0607-06
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Black liquor
Field welding of pin studs in black liquor recovery boilers, 0402-15
Recommended test procedure for black liquor evaporators, 0416-11
Recovery boiler performance calculation – short form, 0416-01
Response to contamination of high purity boiler feedwater, 0416-05
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Black Oxide
Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04

Blade
Paper machine doctor recommendations, 0404-67

Blade coaters
see also Coaters
In-line coating at the corrugator, 0304-39

Blade holder
Bleach plants
Bleaching plant washer efficiency guide, 0606-23

Bleached board
Paper machine drying rate, 0404-07
Paper machine performance guidelines, 0404-47

Bleaching
Boiling point rise of spent sulfite liquors, 0607-21
Cotton in nonwovens, 1205-02
Chlorine gas curve, 0606-02
Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of chlorine gas, 0606-03
Density of milk of lime solution, 0607-05
Energy checklist: pulp mill, 0416-24
Heat of vaporization of liquid chlorine, 0606-04
Recommended pulp bleaching stage designation method, 0606-21
Relative enthalpy (heat content) of sodium hydroxide solutions, 0606-08
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Viscosity of liquid chlorine 0606-05
Viscosity of sodium hydroxide solutions, 0606-11

Bleaching stages
see Bleaching

Blind-drilled rolls
see Vacuum rolls

Blistering
Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17

Blow boxes
Sheet handling devices, 0404-44

Blow-through steam
Recommended Dryer Differential Pressures, 0404-31

Blowdown
see also Blowing
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Blowing
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

Board
Pilot paper and wet laid nonwoven machines, 0502-16

Board caliper
see Thickness

Boiler feed water
see Boilers, Feedwater

Boiler tubes
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13

Boilers
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Explanation of recovery boiler leak indications, 0416-23
Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Keys to successful chemical cleaning of boilers, 0416-06
Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Bonding
Techniques for bonding modern high-performance liners, 0304-40

Box compression
see Compression strength

Box flaps
see Flaps

Box machines
Troubleshooting a glue lap problem, 0304-10

Box plants
see Converting plants

Boxes
Corrugated boxplant-list of potential hazards, 0301-01
Critical properties to consider when unitizing, 0304-72
High vacuum sheet dewatering, 0404-60
Broke
Broke loss calculations, 0502-10

Bronze
Guidelines for nondestructive examination of suction roll shells, 0402-19
Weld repairs on new suction roll shells, 0402-17

Burners
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Burst testers
Calibration and maintenance of, 0304-24

Butt joints
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

Butt welds
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

CADCAM
Computer-assisted machinery, 0305-02

CONEG
see Regulations

Cadmium
An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58

Calcination
Physical data of calcined kaolin-water suspensions, 0106-09

Calcium base liquors
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07

Calcium bisulfite
Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07

Calcium carbonate
Physical data of calcium carbonate-water suspensions, 0106-01

Calcium hydroxide
Density of milk of lime solution, 0607-05

Calculations
see Computation

Calibration
Basic guidelines for image analysis measurements, 0804-09
Calibration and maintenance of the manually operated micrometer, 0304-30
Of burst testers, 0304-24
Suggestions for developing a box plant quality manual, 0304-49
Caliper
see Thickness

Canadian standard freeness
Interconversion of freeness, 0809-01

Carbon steel
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Carbonates
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Physical data of calcium carbonate-water suspensions, 0106-01

Cartridges
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Cast iron
Guide for increasing the maximum allowable working pressure of cast iron, ASME constructed paper machine dryers, 0420-14

Castings
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25

Caustic soda
see Sodium hydroxide

Causticizing
Energy checklist: pulp mill, 0416-24
Material balance equations relating to digester requirements, 0418-02

Centrifugal Cleaner
Introduction to centrifugal cleaners, 0508-10

Ceramics
Selection criteria for wet end ceramics, 0502-15
Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

Certification
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

Chalk
see Calcium carbonate

Chambered Doctor Blade
Ink metering systems for corrugated flexo presses, 0306-09

Charting
Short-run statistical process control: a basic charting method, 0304-70
Statistical process control - procedures for charting warp, 0304-13

Checklist
see Maintenance

Chemical Cleaning
Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51

Chemical properties
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10

Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Magnesia-base pulping solutions, 0607-04
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31

**Chemical pulps**
- Boiling point rise of spent sulfite liquors, 0607-21
- Definitions of terms in the sulfite pulping process, 0607-25
- Density of aqueous sodium sulfite solution, 0607-18
- Density of milk of lime solution, 0607-05

- Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
- Sulfur burner gas strength volume, 0607-01
- Viscosities of various spent sulfite liquors at 26.7°C, 0607-22

**Chemical recovery**
- Recausticizing material balance equations relating to digester requirements, 0418-02

**Chemicals**
- Material safety data sheets, what to look for - how to understand them, 0304-38
- Chemical cleaning guide for press fabrics, 0404-65

**Chests**
- see Stock chests

**Chip silos**
- see Chip bins

**Chlorides**
- Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
- Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12

**Chlorine**
- Chlorine gas curve, 0606-02
- Density of chlorine gas, 0606-03
- Heat of vaporization of liquid chlorine, 0606-04
- Viscosity of liquid chlorine, 0606-05

**Chlorine dioxide**
- Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
- Specific gravity of sodium chloride solutions, 0606-10

**Chrome**
- Tests for corrugator roll wear, 0304-53

**Chromium**
- An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58

**Clad-steel plate**
- see Plates

**Classification**
- Paper grade classifications, 0404-36

**Clay**
- Kaolin clay pigment index, 0106-06
- Physical data of calcined kaolin-water suspensions, 0106-09
- Physical data of hydrous Kaolin-water suspensions, 0106-02

**Cleaners**
- Catalog of Stock Preparation Pilot Plants, 0502-20

**Cleaning**
- Cleaning anilox rolls: procedures and options, 0306-18
- Cleanup procedures for flexo folder glue/rotary diecutters, 0305-33
- Daily, weekly, and monthly maintenance checklists, 0305-34
- Dryer fabric cleaning, 0404-38
- Housekeeping guidelines, 0305-32
- Keys to successful chemical cleaning of boilers, 0416-06

**Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use**, 0404-51
- Paper machine shower recommendations, 0404-61
- Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35

**Cleaning chemicals**
- see Cleansers

**Cleansers**
- Keys to successful chemical cleaning of boilers, 0416-06

**Clogging**
- Nozzle maintenance and clogging, 0420-15

**Clothing**
- see Felts, Machine clothing

**Coating**
- Kaolin clay pigment index, 0106-06

**Coating color**
- see Color

**Coating thickness**
- Tests for corrugator roll wear, 0304-53

**Coatings**
- Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
- Tests for corrugator roll wear, 0304-53

**Coefficient of friction**
- see Friction factor

**Combination Metering System**
- Ink metering systems for corrugated flexo presses, 0306-09

**Combined boards**
- Common curtain coating problems: causes, detection, and correction, 0304-26
- Obtaining off the corrugator for use in statistical process control procedures, 0304-12
- Total indicated runout and its impact on combined board quality, 0304-56
- How to Minimize Rolling Scores in Diecutting Operations, 0304-64

**Compressibility**
- Objective Determination of the Haptic Properties of Tissue Products, 0808-07

**Compression**
- Corrugated caliper: why is it so important?, 0304-04

**Compression resistance**
- see Compression strength

**Compression strength**
- Corrugated caliper: why is it so important?, 0304-04
- Obtaining a combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

**Computation**
- Paper machine drying rate, 0404-07

**Computer-assisted**
- see CADCAM

**Concentricity**
- Total indicated runout and its impact on combined board quality, 0304-56

**Condensate**
- Application of dryer bars, 0404-35

**Condensates**
- Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0404-36

Measurement of dryer condensing rates (continuous method), 0404-03
- Measurement of dryer condensing rates (vertical separator method), 0404-18
- Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
- Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
- Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
- Yankee dryer steam condensing rates, 0404-49
- Guidelines for properly sampling steam & condensate in Yankee dryer steam systems, 0425-04

**Condensation**
- Dryer condensing rates (batch method), 0404-02
- Dryer condensing rates (continuous method), 0404-03

**Condensing rates**
- see Condensation

**Conditioning**
- Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
- Testing atmospheres simulating end use conditions, 0808-05

**Conductivity**
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
- Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

**Conical refiners**
- Conical refining intensity, 0508-07

**Conservation**
- Paper Machine Water Efficiency, 0502-22

**Consistency**
- Drainage evaluation by mass measurement, 0502-12
- Generalized method for determining the pipe friction loss of flowing pulp suspensions, 0410-14
- Optimum consistency for pumping pulp, 0410-15

**Construction materials**
- Sodium chlorate (NaClO₃) safe handling and storage, 0606-31

**Consumption**
- Paper Machine Water Efficiency, 0502-22

**Contact bearings**
- see Bearings

**Contact technique**
- Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33

**Container boards**
- Friction -- slide angle, 0304-34

**Contaminants**
- see Impurities

**Contamination**
- see Pollution control

**Continuous digesters**
- Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27

**Contraction**
- Flow from a 45° slice, 0410-03
- Flow from a nozzle (slice) with inclined upper lip, 0410-04
- Flow from a vertical slice, 0410-02

**Control charts**
- see Charting

**Control systems**
- Industry 4.0 Lexicon, 1103-04
- Short-run statistical process control: a basic charting method, 0304-70

**Conversion factors**
- Units of measurement and, 0800-01

**Converting factors**
- Moisture content of paper: terminology and conversion, 0808-02

**Converting plants**
- Boxplant quality measurement: why test?, 0304-02
- Computer-assisted machinery, 0305-02
- Corrugated boxplant - list of potential hazards, 0301-01
- Machinery considerations and selection, 0305-06

**Coolers**
- Guidelines for Rotary Lime Kiln Refractory, 0416-27

**Copper**
- The role of copper in a printing ink, 0304-61
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
- Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

**Copper sulfate**
- Tests for corrugator roll wear, 0304-53

**Cores**
- Determination of winder sets per reel, 0502-02
- Reel diameter for various reel spool and roll core sizes, 0502-03

**Correlation**
- QCS Dynamic Sensor Correlation Sampling Method,
Corrosion
See also Corrosion inhibitors

- Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
- Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
- Fluoropolymer properties and applications in pulp and paper mills, 0402-37
- Guide to the use of stainless steel pipe specifications, 0402-24
- Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
- Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
- Guidelines for inspecting batch digesters, 0402-22
- Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
- Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
- Guidelines for nondestructive examination of suction roll shells, 0402-19
- Nozzle maintenance and clogging, 0420-15
- Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
- Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21
- Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
- Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Corrosion inhibitors
Keys to successful chemical cleaning of boilers, 0416-06

Corrosion prevention

- Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
- Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03

Corrugated boards

- The role of copper in a printing ink, 0304-61
- Critical properties to consider when unitizing, 0304-72
- Important quality parameters of a printing ink, 0304-59
- Obtaining caliper off the corrugator for use in statistical process control procedures, 0304-12
- Statistical process control friction-slide angle, 0304-34
- Techniques to minimize twist warp, 0304-50
- Warp in corrugated board, 0304-07

Corrugated boxes
See Boxes, Corrugated boards

Corrugated containers
See Boxes, Corrugated board, Folder gluers, Die cutters

Corrugated medium
An alternative method for designating flute sizes, 0302-04

Corrugating
See Adhesives

Corrugating adhesives
See Adhesives

Corrugating machines
- Checking for coating wear on corrugating rolls, 0304-73
- Checking the flute depth of corrugating rolls, 0304-75
- Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
- Computer-assisted machinery, 0305-02
- Conducting a corrugator temperature audit, 0304-65
- Corrugator bearing clearance checks and their impact, 0304-47
- Impact of doublebacker hot plate level on board quality and how to measure it, 0304-66
- Improved techniques to measure corrugator glue machine meter gaps, 0304-68
- Prevention of score cracking in a box plant, 0304-37
- Starch viscosity in corrugating adhesives, 0304-15
- Tests for corrugator roll wear, 0304-53

Corrugating medium
Causes and corrections of common corrugator bonding problems, 0304-32
- Edge crush test (ECT): its relationship to box compression and its derivation from containerboard edge stiffness, 0304-09
- Paper machine performance guidelines, 0404-47
- Paper machine drying rate, 0404-07
- Procedure for setting up a raw material trial on the corrugator, 0304-01
- Splicer defects and cures, 0304-31

Corrugating plants
See Operations

Corrugating rolls
See Rolls

Corrugator-double backer
See Corrugating machines

Corrugators
See also Corrugating machines

Procedure for setting up a raw material trial on the corrugator, 0304-01

Costs
Press section economic evaluation, 0404-22

Cotton
In nonwovens, 1205-02

Couch rolls
- Paper Machine Vacuum System Selection Factors, 0502-01
- Cover
  Maintenance considerations in new construction and rebuilds, 0408-02
  Rotary die cutter urethane anvil cover maintenance, 0305-35

Cracks
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
- Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
- Guidelines for inspection of continuous digesters and...
impregnation vessels, 0402-27
Guidelines for nondestructive examination of suction roll shells, 0402-19
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30

Creasing
Troubleshooting the Die Cutting Section, 0305-39

Crescent formers
Paper Machine Vacuum System Selection Factors, 0502-01

Cross direction
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Statistical process control -- procedures for charting warp, 0304-13
Troubleshooting cross-machine direction moisture profile problems, 0404-57
Warp in corrugated board, 0304-07

Crown
see Roll crown

Crush
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

Cubical contents
see Volumetry

Curing
Drying and curing techniques for in-line flexographic printing, 0306-06

Curtain coating
Common curtain coating problems: causes, detection, and correction, 0304-26

Cutters
see Die cutters

Cutting
Troubleshooting the Die Cutting Section, 0305-39

Cutting dies
see Die cutters, Rotary machines

Cylinder Machines
Paper Machine Vacuum System Selection Factors, 0502-01

Damage
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Dancer Rolls
Guidelines for Tension During Web Conveyance and for Winding, 0200-01

Dandy rolls
Dandy roll applications, 0404-53

Data storage
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Data tables
Moisture content of paper: terminology and conversion, 0808-02

Deaerators
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Debris Removal
Introduction to centrifugal cleaners, 0508-10

Defects
Addendum to Corrugating Defect Terminology Manual -- defects related to the use of fingerless singlefacers, 0304-17
Corrugator bearing clearance checks and their impact, 0304-47

Definitions
see Nomenclature

Degradation
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28

Densified liners
see Liners

Density
Density of aqueous sodium bicarbonate solution, 0607-13
Density of aqueous sodium carbonate solution, 0607-14
Density of chlorine gas, 0606-03
Milk of lime solution, 0607-05
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of calcium carbonate-water suspensions, 0106-01
Physical data of hydrous Kaolin-water suspensions, 0106-02
Sodium sulfite solution, 0607-18
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10
The Impact of Pressing on Web Densification, 0404-68

Density Gradient
The Impact of Pressing on Web Densification, 0404-68

Deposits
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Keys to successful chemical cleaning of boilers, 0416-06

Deterioration
see Degradation

Dewatering
see Drainage, Water removal

Diameter
Roll diameter for various reel spool and roll core sizes, 0502-03

Dictionaries
see Nomenclature

Runnability
Sheet handling devices, 0404-44

Safety
Caustic soda (NaOH) safe storage and handling, 0606-27
Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
Corrugated boxplant-list of potential hazards, 0301-01
Gaseous ozone (O₃) safe handling, 0606-28
Housekeeping guidelines, 0305-32
Hydrogen peroxide (H₂O₂) safe storage and handling, 0606-24
Material safety data sheets, 0304-38
Methanol (CH₃OH) safe storage and handling, 0606-25
Bulk Oxygen (O₂) Safe Storage and Handling, 0606-29
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31
Sulfuric acid (H₂SO₄) safe storage and handling, 0606-26
Sootblower Safety and Upgrade Guidelines, 0416-08

Safety equipment
Chlorine dioxide (ClO₂) safe storage and handling, 0606-30

Salt
see Sodium chloride

Sampling
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
QCS Dynamic Sensor Correlation Sampling Method, 1101-04

Saturated solutions
see Solutions

Scanners
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Scheduling
Checklist for a properly planned project, 0408-01
Housekeeping guidelines, 0305-32
Maintenance considerations in new construction and rebuilds, 0408-02

Schopper Riegler freeness
Interconverion of freeness, 0809-01

Score breaks
How to prevent score cracking in a box plant, 0304-37

Score cracks
see Score breaks

Scores
How to Minimize Rolling Scores in Diecutting Operations, 0304-64
Preventing score cracking in a box plant, 0304-37

Scoring
Machinery considerations and selection: yoked scoring slotting section, 0305-53

Screens
Catalog of Stock Preparation Pilot Plants, 0502-20

Seal water
see Sealants, Water

Seals
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Sealants
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12

Seamless materials
Guide to the use of stainless steel pipe specifications, 0402-24

Secondary fibers
Stickies definition and classification, 0603-02

Selection
Machinery considerations and selection, 0305-06

Selective catalytic reduction
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Selective noncatalytic reduction
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Semichemical pulps
Boiling point rise of spent sulfite liquors, 0607-21

Definitions of terms in the sulfite pulping process, 0607-25
Density of aqueous sodium sulfite solution, 0607-18
Density of milk of lime solution, 0607-05
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C and other temperatures, 0607-22
Sensitivity
  Basic guidelines for image analysis measurements, 0804-09
Sensors
  Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
  QCS Dynamic Sensor Correlation Sampling Method, 1101-04
Servicing
  Maintenance considerations in new construction and rebuilds, 0408-02
Setting time
  Understanding and troubleshooting hot melt adhesives, 0304-74
Shafts
  Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Shape
  Total indicated runout and its impact on combined board quality, 0304-56
Sheet water content
  see Moisture content
Shells
  Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
  Weld repairs on new suction roll shells, 0402-17
Shock drying
  Terminology for high temperature pressing, 0404-48
Showers
  Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
  Paper machine shower recommendations, 0404-61
  Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements 0404-27
  Steam shower applications in the forming and press section, 0404-58
  Chemical cleaning guide for press fabrics, 0404-65
Silica
  Guidelines for Rotary Lime Kiln Refractory, 0416-27
  Response to contamination of high purity boiler feedwater, 0416-05
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
  Paper Machine Water Efficiency, 0502-22
Single Facers
  Procedure for setting up a raw material trial on the corrugator, 0304-01
Singlefacers
  Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17
  Alternative method for designating flute sizes, 0302-04
  Causes and corrections of common corrugator bonding problems, 0304-32
  Checking for coating wear on corrugating rolls, 0304-73
  Checking the flute depth of corrugating rolls, 0304-75
  Parallel of corrugating rolls with “NCR” paper, 0304-62
  Preventing score cracking in a box plant, 0304-37
  Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
  Splicer defects and cures, 0304-31
Siphons
  Thermocompressor Applications for Paper Drying, 0404-66
Skid
  Material handling considerations for flexo folder gluers, 0305-54
  Recommended Dryer Differential Pressures, 0404-31
Slabbing
  Broke loss calculations, 0502-10
Slices
  Flow from a 45° slice, 0410-03
  Flow from a nozzle (slice) with inclined upper lip, 0410-04
  Head of Stock Behind Slice (Head/Jet and Slice Flow Rate Relationships), 0410-05
  Flow from a vertical slice, 0410-02
Slide angle
  Statistical process control, friction, 0304-34
Slotting
  Machinery considerations and selection: yoked scoring slotting section, 0305-53
Slurry
  Physical data of calcined kaolin-water suspensions, 0106-09
  Physical data of calcium carbonate-water suspensions, 0106-01
  Physical data of hydrous Kaolin-water suspensions, 0106-02
Slushed paper stock
  see Paper stock
Smearing
  Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40
Smog
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Smoothness
  Objective Determination of the Haptic Properties of Tissue Products, 0808-07
Sodium
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Sodium bicarbonate
  Density of aqueous sodium bicarbonate solution, 0607-13
Sodium bisulfite
  Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12
Sodium borate
  Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
Sodium carbonate
Density of aqueous sodium carbonate solution, 0607-14
Specific heat of sodium carbonate solution, 0607-15
Vapor pressure of sodium carbonate solution, 0607-16
Viscosity of sodium carbonate solution, 0607-17

Sodium chlorate
Sodium chlorate (NaClO3) safe handling and storage, 0606-31

Sodium chloride
Specific gravity of sodium chloride solutions, 0606-10

Sodium hydroxide
Caustic soda (NaOH) safe storage and handling, 0606-27
Relative enthalpy of solution, 0606-08
Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
Specific gravity and density of caustic soda solutions, 0606-20
Specific heat of caustic soda solutions, 0606-07
Viscosity of sodium hydroxide solutions, 0606-11

Sodium sulfite
Density of aqueous sodium sulfite solution, 0607-18

Solids content
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of calcium carbonate-water suspensions, 0106-01
Physical data of hydrous Kaolin-water suspensions, 0106-02

Solubility
Solubility of sulfur dioxide, 0607-06
Solubility of sulfur dioxide, Ca(HSO3)2, solutions, 0607-07
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Solutions
Equilibrium relative humidities over saturated salt solutions, 0808-03
Specific heat of caustic soda solutions, 0606-07

Sorption
Cotton in nonwovens, 1205-02

Soot blowers
Recovery boiler sootblowers: practical guidelines, 0416-20
Recovery boiler sootblowers: the basics, 0416-19

Statistical process control of starch gelatinization temperature, 0304-14
Statistical process control of starch viscosity, 0304-15
Testing atmospheres simulating end use conditions, 0808-05
Troubleshooting cross-machine direction moisture profile problems, 0404-57
Vapor pressure of sodium carbonate solution, 0607-16
Vapor pressure of sulfur dioxide solutions, 0607-11
Viscosity of a neutral sulfite spent liquor (Ostwald capillary viscometer), 0607-23
Viscosity of sodium carbonate solution, 0607-17
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

**Tension**
Recommended tensions in dryer fabrics, 0404-04

**Terminology**
see Nomenclature

**Test conditions**
Testing atmospheres simulating end use conditions, 0808-05

**Test equipment**
Paper test rooms: design considerations, 0808-04

**Test facilities**
Paper test rooms: design considerations, 0808-04
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

**Test methods**
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12

**Testing**
Basic guidelines for image analysis measurements, 0804-09
Catalog of Stock Preparation Pilot Plants, 0502-20
Drainage evaluation by mass measurement, 0502-12
Forming section monitoring, 0502-14
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Paper test rooms: design considerations, 0808-04
Recommended test procedure for black liquor evaporators, 0416-11
Water removal by wet presses, 0404-01

**Thermal measurement**
Recovery boiler performance calculation – short form, 0416-01

**Thermal spray**
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Guidelines for inspecting batch digesters, 0402-22

**Thermobonding**
Cotton in nonwovens, 1205-02

**Thermocompressors**
Thermocompressor Applications for Paper Drying, 0404-66

**Thermography**

Troubleshooting cross-machine direction moisture profile problems, 0404-57

**Thermoplastics**
Fluoropolymer properties and applications in pulp and paper mills, 0402-37

**Thickness**
see High consistency

**Thickness**
Corrugated caliper: why is it so important?, 0304-04
Guidelines for Rotary Lime Kiln Refractory, 0416-27
Method for evaluating thickness of wet press fabrics, 0404-28
Obtaining combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

**Through drying**
Paper machine performance guidelines, 0404-47
Through drying, 0404-25

**Tissue**
Design, Operation, Performance Evaluation and Inspection guidelines for Yankee hood systems, 0425-02
Paper machine performance guidelines, 0404-47
Pilot paper and wet laid nonwoven machines, 0502-16
Safe and Reliable Start-Up and Shut-Down of Yankee Hood Air Systems, 0425-07

**Tolerance**
Corrugator bearing clearance checks and their impact, 0304-47

**Total indicated runout**
see also Combined boards
Total indicated runout and its impact on combined board quality, 0304-56

**Total reduced sulfur**
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

**Touch**
Objective Determination of the Haptic Properties of Tissue Products, 0808-07

**Transport**
Checklist: preparing die cuts for shipment, 0305-49
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31
Sulfuric acid (H₂SO₄) safe storage and handling, 0606-26

**Trim**
Broke loss calculations, 0502-10
Paper machine room ventilation guidelines, 0404-50

**Trimming**
Machinery considerations and selection: yoked scoring slotting section, 0305-53
Forming section monitoring, 0502-14
Glue lap problem, 0304-10
Press section monitoring, 0404-19
Recommended test procedure for black liquor evaporators, 0416-11
Steam shower applications in the forming and press section, 0404-58

Tubes
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for operating and maintenance practices impacting an economizer on a recovery boiler, 0416-22
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Keys to successful chemical cleaning of boilers, 0416-06
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Tungsten carbide
Tests for corrugator roll wear, 0304-53

Tuning
see Control

Turbulance
Application of dryer bars, 0404-35

Turpentine
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

Twisting
Techniques to minimize twist warp, 0304-50

U.P.C.
see Product codes

UV
Drying and curing techniques for in-line flexographic printing, 0306-06

Vacuum
High vacuum sheet dewatering, 0404-60
Paper Machine Vacuum System Selection Factors, 0502-01
Papermaker’s formulas, 0502-17
Steam shower applications in the forming and press section, 0404-58

Vacuum boxes
High vacuum sheet dewatering, 0404-60
Paper Machine Vacuum System Selection Factors, 0502-01
Performance evaluation techniques for paper machine vacuum systems, 0404-55

Vacuum equipment
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

Vacuum factors
Paper Machine Vacuum System Selection Factors, 0502-01

Vacuum filters
Bleaching plant washer efficiency guide, 0606-23

Vacuum pumps
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
Performance evaluation techniques for paper machine vacuum systems, 0404-55
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

Vacuum rolls
Liquid penetrant testing of new suction roll shells, 0402-11
Paper Machine Vacuum System Selection Factors, 0502-01
Techniques for nip impressions, 0404-46
Weld repairs on new suction roll shells, 0402-17

Vacuum washers
Bleaching plant washer efficiency guide, 0606-23

Valves
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Headbox approach piping guidelines, 0404-54

Vapor pressure
Chlorine gas curve, 0606-02
Vapor pressure of sulfur dioxide solutions, 0607-11
Vapor pressure of sodium carbonate solution, 0607-16
Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

Variance
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Varnish
Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

Velocity
see also Machine speed
Pulpstone speed chart, 0605-02

Ventilation
- Paper machine room ventilation guidelines, 0404-50
- Recommended minimum dryer pocket air requirements, 0404-17

Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24

Viscosity
- Density of aqueous sodium sulfite solution, 0607-18
- Liquid chlorine, 0606-05
- Quality techniques using existing equipment, 0306-11
- Statistical process control of starch viscosity, 0304-15
- Viscosities of spent sulfite liquors at 26.7°C (Ostwald capillary viscometer), 0607-22
- Viscosity of a neutral sulfite spent liquor (Ostwald capillary viscometer), 0607-23
- Viscosity of sodium carbonate solution, 0607-17
- Viscosity of sodium hydroxide solutions, 0606-11
- Viscosity reading procedure for flexographic corrugated inks, 0304-18

Vision
- Basic guidelines for image analysis measurements, 0804-09

Volume
- Grinder pulpstones – cubical contents, 0605-01
- Identifying anilox volume measuring equipment, 0306-15

------------------------------W------------------------------

Warning labels
see Hazardous materials

Warpage
- Statistical process control -- procedures for charting warp, 0304-13
  - Techniques to minimize twist warp, 0304-50
  - Warp in corrugated board, 0304-07

Wash waters
- Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Washers
- Energy checklist: pulp mill, 0416-24
- Bleaching plant washer efficiency guide, 0606-23

Washing
- Bleaching plant washer efficiency guide, 0606-23
- Recommended pulp bleaching stage designation method, 0606-21

Wastewater treatment equipment
see Effluent treatment

Water
see also Solubility
- Design engineer decisions tree: paper mill boiler feedwater, 0416-04

Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
- Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12
- Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
- Paper Machine Water Efficiency, 0502-22

Water content
see Moisture content

Water hardness
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

Water permeability
- Troubleshooting cross-machine direction moisture profile problems, 0404-57

Water removal
- Determination of water removal by wet presses, 0404-01
