Subject Index
Technical Information Papers

This document was last updated June 29, 2021

_____________A_____________

Abrasion
  Selection criteria for wet end ceramics, 0502-15
Abrasion resistance
  Selection criteria for wet end ceramics, 0502-15
Absorption
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Accessibility
  Maintenance considerations in new construction and rebuilds, 0408-02
Acrylic fibers
  see Polyacrylics, Synthetic fibers
Additives
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
Adhesives
  Buying, storing, and handling flexo folder gluer/rotary diecutter adhesives, 0305-25
  Causes and corrections of common corrugator bonding problems, 0304-32
  Evaluating glue lap adhesive properties, 0304-16
  Procedure for setting up a raw material trial on the corrugator, 0304-01
  Starch adhesive preparation and distribution systems: housekeeping, 0304-06
  Starch adhesive trial, 0304-22
  Statistical process control of starch gelatinization temperature, 0304-14
  Statistical process control of starch viscosity, 0304-15
  Stickies definition and classification, 0603-02
  Techniques for bonding modern high-performance liners, 0304-40
  Techniques for running “WRA” (water resistant starch adhesive), 0304-46
  Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69
  Understanding and troubleshooting hot melt adhesives, 0304-74
  Using washup water as the vehicle in starch-based corrugating adhesive, 0304-44
After dryers
  Paper machine drying rate, 0404-07
Agitation
  Using washing water as the vehicle in starch based corrugating adhesive, 0304-44
Agitators
  Guidelines for side-entering stock agitators, 0420-13
Air
  Paper machine room ventilation guidelines, 0404-50

Air balance
  see Air, Materials balance
Air flow
  Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
  Recommended minimum dryer pocket air requirements, 0404-17
  Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24
  Sheet handling devices, 0404-44
Air jets
  Sheet handling devices, 0404-44
Air permeability
  Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20
Air pollution
  Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Air staging
  Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Alignment
  Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
Alkali
  Specific heat of caustic soda solutions, 0606-07
Alkaline sulfite pulping
  Boiling point rise of spent sulfite liquors, 0607-21
  Definitions of terms in the sulfite pulping process, 0607-25
  Density of aqueous sodium sulfite solution, 0607-18
  Density of milk of lime solution, 0607-05
  Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
  Sulfur burner gas strength volume, 0607-01
  Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Alkalinity
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
  Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Ammonia
  Solubility of sulfur dioxide, 0607-06
Analysis
  Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Angle of slide  
see Slide angle

Anilox coaters  
In-line coating at the corrugator, 0304-39

Anilox rolls  
see Flexography, Printing cylinders

Anvil Wear  
Troubleshooting the Die Cutting Section, 0305-39

Approach flow systems  
Headbox approach piping guidelines, 0404-54

Ash  
Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15  
Drainage evaluation by mass measurement, 0502-12  
Chemical cleaning guide for press fabrics, 0404-65

Atmosphere  
Testing atmospheres simulating end use conditions, 0808-05

Auditing  
Checklist for a properly planned project, 0408-01

Automatic feeders  
see Feeders

Automation  
Industry 4.0 Lexicon, 1103-04

Availability  
Definitions of black liquor recovery furnace availability, 0416-02

Backing Blade  
Guidelines and Procedures for Inspections and Maintenance of Yankee Dryer Doctor Systems, 0425-06

Bacteria  
Starch adhesive preparation and distribution systems: housekeeping, 0304-06

Bags  
Paper machine drying rate, 0404-07

Bar Width Reduction (BWR)  
see Product codes

Bar codes  
see Product codes

Bases  
see Hydroxides

Basis weight  
Headbox approach piping guidelines, 0404-54

Batch digesters  
Guidelines for inspecting batch digesters, 0402-22

Batch process  
Measurement of dryer condensing rates (vertical separator method), 0404-18

Bearings  
Corrugator bearing clearance checks and their impact, 0304-47  
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34  
Total indicated runout and its impact on combined board quality, 0304-56

Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Bearing failure  
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03

Biocide  
Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

Biomass  
Performance test procedure for boilers using biomass as fuel, 0416-18  
Sampling procedures for biomass fuel for boiler performance testing, 0416-17  
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Biomechanics  
see Human factors

Bisulfites  
Physical and chemical properties of magnesia-base pulping solutions, 0607-04  
Solubility of sulfur dioxide, 0607-06  
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09  
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Black liquors  
Field welding of pin studs in black liquor recovery boilers, 0402-15  
Recommended test procedure for black liquor evaporators, 0416-11  
Recovery boiler performance calculation – short form, 0416-01  
Response to contamination of high purity boiler feedwater, 0416-05  
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Blade  
Paper machine doctor recommendations, 0404-67

Blade coaters  
see also Coaters

Blade holder  
In-line coating at the corrugator, 0304-39

Blended board  
Paper machine doctor recommendations, 0404-67

Bleach plants  
Bleaching plant washer efficiency guide, 0606-23

Bleached board  
Paper machine drying rate, 0404-07  
Paper machine performance guidelines, 0404-47

Bleaching  
Boiling point rise of spent sulfite liquors, 0607-21  
Cotton in nonwovens, 1205-02  
Chlorine gas curve, 0606-02  
Definitions of terms in the sulfite pulping process, 0607-25  
Density of aqueous sodium sulfite solution, 0607-18  
Density of chlorine gas, 0606-03  
Density of milk of lime solution, 0607-05  
Energy checklist: pulp mill, 0416-24  
Heat of vaporization of liquid chlorine, 0606-04
Recommended pulp bleaching stage designation method, 0606-21
Relative enthalpy (heat content) of sodium hydroxide solutions, 0606-08
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Specific gravity and density of caustic soda solutions, 0606-20
Specific gravity of sodium chloride solutions, 0606-10
Sulfur burner gas strength volume, 0607-01
Viscosities of various spent sulfite liquors at 26.7°C, 0607-22
Viscosity of liquid chlorine 0606-05
Viscosity of sodium hydroxide solutions, 0606-11

Bleaching stages
see Bleaching

Blind-drilled rolls
see Vacuum rolls

Blistering
Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17

Blow boxes
Sheet handling devices, 0404-44

Blow-through steam
Recommended Dryer Differential Pressures, 0404-31

Blowdown
see also Blowing
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

Blowing
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

Board
Pilot paper and wet laid nonwoven machines, 0502-16

Board caliper
see Thickness

Boiler feed water
see Boilers, Feedwater

Boiler tubes
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Guidelines for specification and inspection of electric resistance welded (ERW) and seamless boiler tube for critical and noncritical service, 0402-13

Boilers
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Design engineer decisions tree: paper mill boiler feedwater, 0416-04
Explanation of recovery boiler leak indications, 0416-23
Evaluating reverse osmosis for treating makeup to the boiler feedwater in a pulp and paper mill, 0416-07

Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Keys to successful chemical cleaning of boilers, 0416-06

Performance test procedure for boilers using biomass as fuel, 0416-18
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26

Bonding
Techniques for bonding modern high-performance liners, 0304-40

Box compression
see Compression strength

Box flaps
see Flaps

Box machines
Troubleshooting a glue lap problem, 0304-10

Box plants
see Converting plants

Boxes
Corrugated boxplant-list of potential hazards, 0301-01
Critical properties to consider when unitizing, 0304-72
High vacuum sheet dewatering, 0404-60
Squaring flap cut (center special) boxes, 0305-45

Broke
Broke loss calculations, 0502-10

Bronze
Guidelines for nondestructive examination of suction roll shells, 0402-19
Weld repairs on new suction roll shells, 0402-17

Burners
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

Burst testers
Calibration and maintenance of, 0304-24

Butt joints
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31

Butt welds
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
CADCAM
   Computer-assisted machinery, 0305-02
CONEG
   see Regulations
Cadmium
   An explanation of the toxics in packaging (formerly
   CONEG) heavy metal guidelines, 0304-58
Calcination
   Physical data of calcined kaolin-water suspensions,
   0106-09
Calcium base liquors
   Solubility of sulfur dioxide, Ca(HSO3)2 solutions,
   0607-07
Calcium bisulfite
   Solubility of sulfur dioxide, Ca(HSO3)2 solutions,
   0607-07
Calcium carbonate
   Physical data of calcium carbonate-water suspensions,
   0106-01
Calcium hydroxide
   Density of milk of lime solution, 0607-05
Calculations
   see Computation
Calibration
   Basic guidelines for image analysis measurements,
   0804-09
   Calibration and maintenance of the manually operated
   micrometer, 0304-30
   Of burst testers, 0304-24
   Suggestions for developing a box plant quality manual,
   0304-49
Caliper
   see Thickness
Canadian standard freeness
   Interconversion of freeness, 0809-01
Carbon steel
   Inspection for cracking of composite tubes in black liquor
   recovery boilers, 0402-30
Carbonates
   Chloride and potassium measurement and control in the
   pulping and chemical recovery cycle, 0416-15
   Estimating the first melting temperature of fireside
   deposits in recovery boilers, 0416-12
   Physical data of calcium carbonate-water suspensions,
   0106-01
Cartridges
   Guidelines and Procedures for Inspections and
   Maintenance of Yankee Dryer Doctor Systems, 0425-06
Cast iron
   Guide for increasing the maximum allowable working
   pressure of cast iron, ASME constructed paper machine
   dryers, 0420-14
Casts
   Guidelines for procurement of cast stainless steels for
   large pumps and valves for the pulp and paper industry, 0402-
   25
Caustic soda
   see Sodium hydroxide
Causticizing
   Energy checklist: pulp mill, 0416-24
   Material balance equations relating to digester
   requirements, 0418-02
Ceramics
   Selection criteria for wet end ceramics, 0502-15
   Use of ceramics on the forming section: diagnosing and
   preventing forming fabric wear, 0502-19
Certification
   Guideline for obtaining high quality radiographic testing
   of butt welds in boiler tubes, 0402-33
Chalk
   see Calcium carbonate
Charting
   Short-run statistical process control: a basic charting
   method, 0304-70
   Statistical process control pin adhesion, 0304-23
   Statistical process control - procedures for charting warp,
   0304-13
Checklist
   see Maintenance
Chemical Cleaning
   Paper Machine Clothing Cleaning and Conditioning for
   Recycled Fiber Use, 0404-51
Chemical preparation
   Specific gravity and density of caustic soda solutions,
   0606-20
   Specific gravity of sodium chloride solutions, 0606-10
Chemical properties
   Chlorine dioxide (ClO2) safe storage and handling,
   0606-30
   Fluoropolymer properties and applications in pulp and
   paper mills, 0402-37
   Magnesia-base pulping solutions, 0607-04
   Sodium chlorate (NaClO3) safe handling and storage,
   0606-31
Chemical pulps
   Boiling point rise of spent sulfite liquors, 0607-21
   Definitions of terms in the sulfite pulping process,
   0607-25
   Density of aqueous sodium sulfite solution, 0607-18
   Density of milk of lime solution, 0607-05
   Solubility of sulfur dioxide, Ca(HSO3)2 solutions,
   0607-07
   Sulfur burner gas strength volume, 0607-01
   Viscosities of various spent sulfite liquors at 26.7°C,
   0607-22
Chemical recovery
   Recausticizing material balance equations relating to
   digester requirements, 0418-02
Chemicals
   Material safety data sheets, what to look for - how to
   understand them, 0304-38
   Chemical cleaning guide for press fabrics, 0404-65
Chests
   see Stock chests
Chip silos  
*see* Chip bins

**Chlorides**
- Chloride and potassium measurement and control in the pulping and chemical recovery cycle, 0416-15
- Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12

**Chlorine**
- Chlorine gas curve, 0606-02
- Density of chlorine gas, 0606-03
- Heat of vaporization of liquid chlorine, 0606-04
- Viscosity of liquid chlorine, 0606-05

**Chlorine dioxide**
- Safe storage and handling of, 0606-30
- Specific gravity of sodium chloride solutions, 0606-10

**Chrome**
- Tests for corrugator roll wear, 0304-53

**Chromium**
- An explanation of the toxics in packaging (formerly CONEG) heavy metal guidelines, 0304-58

**Clad-steel plate**
*see* Plates

**Classification**
- Paper grade classifications, 0404-36

**Clay**
- Kaolin clay pigment index, 0106-06
- Physical data of calcined kaolin-water suspensions, 0106-09
- Physical data of hydrous Kaolin-water suspensions, 0106-02

**Cleaners**
- Catalog of Stock Preparation Pilot Plants, 0502-20
- Introduction to centrifugal cleaners, 0508-10

**Cleaning**
- Cleaning anilox rolls: procedures and options, 0306-18
- Cleanup procedures for flexo folder gluer/rotary diecutters, 0305-33
- Daily, weekly, and monthly maintenance checklists, 0305-34
- Dryer fabric cleaning, 0404-38
- Housekeeping guidelines, 0305-32
- Introduction to centrifugal cleaners, 0508-10
- Keys to successful chemical cleaning of boilers, 0416-06
- Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
- Paper machine shower recommendations, 0404-61
- Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35

**Cleaning chemicals**
*see* Cleansers

**Cleansers**
- Keys to successful chemical cleaning of boilers, 0416-06

**Clogging**
- Nozzle maintenance and clogging, 0420-15

**Clothing**
*see* Felts, Machine clothing

**Coating**
- Kaolin clay pigment index, 0106-06
- Coating color  
  *see* Color
- Coating thickness  
  Tests for corrugator roll wear, 0304-53
- Coatings  
  Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
  Tests for corrugator roll wear, 0304-53
- Coefficient of friction  
  *see* Friction factor

**Combined boards**
- Common curtain coating problems: causes, detection, and correction, 0304-26
- Obtaining off the corrugator for use in statistical process control procedures, 0304-12
- Total indicated runout and its impact on combined board quality, 0304-56

**Compressibility**
- Objective Determination of the Haptic Properties of Tissue Products, 0808-07

**Compression**
- Corrugated caliper: why is it so important?, 0304-04
- Compression resistance  
  *see* Compression strength

**Compression strength**
- Corrugated caliper: why is it so important?, 0304-04
- Obtaining a combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
- Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11

**Computation**
- Paper machine drying rate, 0404-07

**Computer-assisted**
*see* CADCAM

**Concentricity**
- Total indicated runout and its impact on combined board quality, 0304-56

**Condensate**
- Application of dryer bars, 0404-35

**Condensates**
- Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
- Measurement of dryer condensing rates (continuous method), 0404-03
- Measurement of dryer condensing rates (vertical separator method), 0404-18
- Stripping of kraft pulping process condensates: regulations, design and operation, 0416-10
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
- Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
- Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13
- Yankee dryer steam condensing rates, 0404-49
- Guidelines for properly sampling steam & condensate in
Yankee dryer steam systems, 0425-04
Condensation
Dryer condensing rates (batch method), 0404-02
Dryer condensing rates (continuous method), 0404-03
Condensing rates
see Condensation
Conditioning
Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
Testing atmospheres simulating end use conditions, 0808-05
Condensing rates
see Condensation
Conditioning
Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
Testing atmospheres simulating end use conditions, 0808-05
Conductivity
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Conical refiners
Conical refining intensity, 0508-07
Consistency
Drainage evaluation by mass measurement, 0502-12
Generalized method for determining the pipe friction loss of flowing pulp suspensions, 0410-14
Optimum for pumping pulp, 0410-15
Construction materials
Sodium chlorate (NaClO3) safe handling and storage, 0606-31
Contact bearings
see Bearings
Contact technique
Guideline for obtaining high quality radiographic testing of butt welds in boiler tubes, 0402-33
Container boards
Friction -- slide angle, 0304-34
Contaminants
see Impurities
Contamination
see Pollution control
Continuous digesters
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Contraction
Flow from a 45° slice, 0410-03
Flow from a nozzle (slice) with inclined upper lip, 0410-04
Flow from a vertical slice, 0410-02
Control charts
see Charting
Control systems
Industry 4.0 Lexicon, 1103-04
Short-run statistical process control: a basic charting method, 0304-70
Conversion factors
Units of measurement and, 0800-01
Converting factors
Moisture content of paper: terminology and conversion, 0808-02
Converting plants
Boxplant quality measurement: why test?, 0304-02
Computer-assisted machinery, 0305-02
Corrugated boxplant - list of potential hazards, 0301-01
Machinery considerations and selection, 0305-06
Copper
The role of copper in a printing ink, 0304-61
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14
Copper sulfate
Tests for corrugator roll wear, 0304-53
Cores
Determination of winder sets per reel, 0502-02
Reel diameter for various reel spool and roll core sizes, 0502-03
Corrosion
see also Corrosion inhibitors
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Estimating the first melting temperature of fireside deposits in recovery boilers, 0416-12
Fluoropolymer properties and applications in pulp and paper mills, 0402-37
Guide to the use of stainless steel pipe specifications, 0402-24
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for inspecting batch digesters, 0402-22
Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for inspecting used fiber-reinforced plastics (FRP) equipment, 0402-28
Guidelines for nondestructive examination of suction roll shells, 0402-19
Nozzle maintenance and clogging, 0420-15
Post-fabrication cleaning of stainless steel in the pulp and paper industry, 0402-35
Ultrasonic technician performance test for boiler tube thickness measurement, 0402-21
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18
Best Practice for Recovery Boiler Inspection (Optimizing Inspection Scope), 0416-26
Corrosion inhibitors
Keys to successful chemical cleaning of boilers, 0416-06
Corrosion prevention
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
Corrugated boards

- The role of copper in a printing ink, 0304-61
- Critical properties to consider when unitizing, 0304-72
- Important quality parameters of a printing ink, 0304-59
- Obtaining caliper off the corrugator for use in statistical process control procedures, 0304-12
- Statistical process control friction-slide angle, 0304-34
- Techniques to minimize twist warp, 0304-50
- Warp in corrugated board, 0304-07

Corrugated boxes

- see Boxes, Corrugated boards

Corrugated containers

- see Boxes, Corrugated board, Folder gluers, Die cutters

Corrugated medium

- An alternative method for designating flute sizes, 0302-04

Corrugating

- An alternative method for designating flute sizes, 0302-04

Corrugating adhesives

- see Adhesives

Corrugating machines

- Checking for coating wear on corrugating rolls, 0304-73
- Checking the flute depth of corrugating rolls, 0304-75
- Checking the parallel of corrugating rolls with “NCR” paper, 0304-62
- Computer-assisted machinery, 0305-02
- Conducting a corrugator temperature audit, 0304-65
- Corrugator bearing clearance checks and their impact, 0304-47
- Impact of doublebacker hot plate level on board quality and how to measure it, 0304-66
- Improved techniques to measure corrugator glue machine meter gaps, 0304-68
- Prevention of score cracking in a box plant, 0304-37
- Starch viscosity in corrugating adhesives, 0304-15
- Tests for corrugator roll wear, 0304-53

Corrugating medium

- Causes and corrections of common corrugator bonding problems, 0304-32
- Edge crush test (ECT): its relationship to box compression and its derivation from containerboard edge stiffness, 0304-09
- Paper machine performance guidelines, 0404-47
- Paper machine drying rate, 0404-07
- Procedure for setting up a raw material trial on the corrugator, 0304-01
- Splicer defects and cures, 0304-31

Corrugating plants

- see Operations

Corrugating rolls

- see Rolls

Corrugator-double backer

- see Corrugating machines

Corrugators

- see also Corrugating machines
- Procedure for setting up a raw material trial on the corrugator, 0304-01

Costs

- Press section economic evaluation, 0404-22

Cotton

- In nonwovens, 1205-02

Couch rolls

- Paper machine vacuum selection factors, 0502-01

Cover

- Maintenance considerations in new construction and rebuilds, 0408-02
- Rotary die cutter urethane anvil cover maintenance, 0305-35

Cracks

- Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38

Safety
Caustic soda (NaOH) safe storage and handling, 0606-27
Chlorine dioxide (ClO₂) safe storage and handling, 0606-30
Corrugated boxplant-list of potential hazards, 0301-01
Gaseous ozone (O₃) safe storage and handling, 0606-28
Housekeeping guidelines, 0305-32
Hydrogen peroxide (H₂O₂) safe storage and handling, 0606-24
Material safety data sheets, 0304-38
Methanol (CH₃OH) safe storage and handling, 0606-25
Oxygen (O₂) bulk storage and safe handling, 0606-29
Sodium chlorate (NaClO₃) safe handling and storage, 0606-31
Sulfuric acid (H₂SO₄) safe storage and handling, 0606-26

Safety equipment
Chlorine dioxide (ClO₂) safe storage and handling, 0606-33
Salt
see Sodium chloride
Sampling
Sampling procedures for biomass fuel for boiler performance testing, 0416-17
Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
Saturated solutions
see Solutions
Scanners
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01
Scheduling
Checklist for a properly planned project, 0408-01
Housekeeping guidelines, 0305-32
Maintenance considerations in new construction and rebuilds, 0408-02
Schopper Riegler freeness
Interconversion of freeness, 0809-01
Score breaks
How to prevent score cracking in a box plant, 0304-37
Score cracks
see Score breaks
Scores
Minimizing rolling scores on lightweight and high-performance liners in diecutting operations, 0304-64
Preventing score cracking in a box plant, 0304-37
Scoring
Machinery considerations and selection: yoked scoring slotting section, 0305-53
Screens
Catalog of Stock Preparation Pilot Plants, 0502-20
Seal water
see Sealants, Water
Seals
Design, monitoring and maintenance guidelines for Yankee dryer bearings, 0425-03
Sealants
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
Seamless materials
Guide to the use of stainless steel pipe specifications, 0402-24
Secondary fibers
Stickies definition and classification, 0603-02
Selection
Machinery considerations and selection, 0305-06
Selective catalytic reduction
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Selective noncatalytic reduction
Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25
Semichemical pulps
Boiling point rise of spent sulfite liquors, 0607-21
Definitions of terms in the sulfite pulping process,

- Density of aqueous sodium sulfite solution, 0607-18
- Density of milk of lime solution, 0607-05
- Solubility of sulfur dioxide, Ca(HSO3)2 solutions, 0607-07
- Sulfur burner gas strength volume, 0607-01
- Viscosities of various spent sulfite liquors at 26.7°C and other temperatures, 0607-22

**Sensitivity**
- Basic guidelines for image analysis measurements, 0804-09

**Sensors**
- Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

**Servicing**
- Maintenance considerations in new construction and rebuilds, 0408-02

**Setting time**
- Understanding and troubleshooting hot melt adhesives, 0304-74

**Shafts**
- Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34

**Shape**
- Total indicated runout and its impact on combined board quality, 0304-56

**Sheet water content**
- see Moisture content

**Shells**
- Guidelines for inspection and nondestructive testing of paper machine dryers, 0402-16
- Weld repairs on new suction roll shells, 0402-17

**Shock drying**
- Terminology for high temperature pressing, 0404-48

**Showers**
- Paper Machine Clothing Cleaning and Conditioning for Recycled Fiber Use, 0404-51
- Press fabric dewatering and conditioning — suction box (Uhle box) design and vacuum requirements 0404-27
- Steam shower applications in the forming and press section. 0404-58
- Chemical cleaning guide for press fabrics, 0404-65

**Silica**
- Response to contamination of high purity boiler feedwater. 0416-05
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
- Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

**Single Facers**
- Procedure for setting up a raw material trial on the corrugator, 0304-01

**Singlefacers**
- Addendum to Corrugating Defect Terminology Manual - defects related to the use of fingerless singlefacers, 0304-17
- Alternative method for designating flute sizes, 0302-04

Causes and corrections of common corrugator bonding problems, 0304-32
- Checking for coating wear on corrugating rolls, 0304-73
- Checking the flute depth of corrugating rolls, 0304-75
- Parallel of corrugating rolls with “NCR” paper, 0304-62
- Preventing score cracking in a box plant, 0304-37
- Some questions and answers on gel temperatures and on the gel temperature test for corrugating adhesives, 0304-08
- Splicer defects and cures, 0304-31

**Siphons**
- Thermocompressor Applications for Paper Drying, 0404-66

**Skid**
- Material handling considerations for flexo folder gluers, 0305-54
- Recommended Dryer Differential Pressures, 0404-31

**Slabbing**
- Broke loss calculations, 0502-10

**Slices**
- Flow from a 45° slice, 0410-03
- Flow from a nozzle (slice) with inclined upper lip, 0410-04
- Flow from a stock behind slice (head/jet relationship), 0410-05
- Flow from a vertical slice, 0410-02

**Slide angle**
- Statistical process control, friction, 0304-34

**Slotting**
- Machinery considerations and selection: yoked scoring slotting section, 0305-53

**Slurry**
- Physical data of calcined kaolin-water suspensions, 0106-09
- Physical data of calcined kaolin-water suspensions, 0106-01
- Physical data of hydrous Kaolin-water suspensions, 0106-02

**Slushed paper stock**
- Paper stock

**Smearing**
- Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

**Smog**
- Nitrogen oxide emissions control from biomass and kraft recovery boilers in the pulp and paper industry, 0416-25

**Smoothness**
- Objective Determination of the Haptic Properties of Tissue Products, 0808-07

**Sodium**
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03
- Water quality guidelines and monitoring requirements for paper mill boilers operating with softened makeup water, 0416-14

**Sodium bicarbonate**
- Density of aqueous sodium bicarbonate solution, 0607-13

**Sodium bisulfite**
- Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12
Sodium borate
Some questions and answers on gel temperatures and on
the gel temperature test for corrugating adhesives, 0304-08

Sodium carbonate
Density of aqueous sodium carbonate solution, 0607-14
Specific heat of sodium carbonate solution, 0607-15
Vapor pressure of sodium carbonate solution, 0607-16
Viscosity of sodium carbonate solution, 0607-17

Sodium chlorate
Safe storage of, 0606-31

Sodium chloride
Specific gravity of sodium chloride solutions, 0606-10

Sodium hydroxide
Caustic soda (NaOH) safe storage and handling, 0606-27
Relative enthalpy of solution, 0606-08
Some questions and answers on gel temperatures and on
the gel temperature test for corrugating adhesives, 0304-08
Specific gravity and density of caustic soda solutions, 0606-20
Specific heat of caustic soda solutions, 0606-07
Viscosity of sodium hydroxide solutions, 0606-11

Sodium sulfite
Density of aqueous sodium sulfite solution, 0607-18

Solids content
Physical data of calcined kaolin-water suspensions, 0106-09
Physical data of calcium carbonate-water suspensions, 0106-01
Physical data of hydrous Kaolin-water suspensions, 0106-02

Solubility
Solubility of sulfur dioxide, 0607-06
Solubility of sulfur dioxide, Ca(HSO₃)₂ solutions, 0607-07
Solubility of sulfur dioxide in magnesium bisulfite solution, 0607-09
Solubility of sulfur dioxide in saturated magnesium bisulfite solution, 0607-10

Solutions
Equilibrium relative humidities over saturated salt solutions, 0808-03
Specific heat of caustic soda solutions, 0606-07

Sorption
Cotton in nonwovens, 1205-02

Soot blowers
Recovery boiler sootblowers: practical guidelines, 0416-20
Recovery boiler sootblowers: the basics, 0416-19

Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

Test methods
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12

Testing
Basic guidelines for image analysis measurements, 0804-09
Catalog of Stock Preparation Pilot Plants, 0502-20
Drainage evaluation by mass measurement, 0502-12
Forming section monitoring, 0502-14
Paper machine reel-spool journals: guidelines for crack testing and repair or replacement, 0402-34
Paper test rooms: design considerations, 0808-04
Recommended test procedure for black liquor evaporators, 0416-11
Water removal by wet presses, 0404-01

Thermal measurement
Recovery boiler performance calculation – short form, 0416-01

Thermal spray
Guidelines for thermal spray coatings installed to prevent corrosion in pulp mill process equipment, 0402-32
Guidelines for inspecting batch digesters, 0402-22

Thermobonding
Cotton in nonwovens, 1205-02

Thermocompressors
Thermocompressor Applications for Paper Drying, 0404-66

Thermography
Troubleshooting cross-machine direction moisture profile problems, 0404-57

Thermoplastics
Fluoropolymer properties and applications in pulp and paper mills, 0402-37

Thick stock
see High consistency

Thickness
Corrugated caliper: why is it so important?, 0304-04
Method for evaluating thickness of wet press fabrics, 0404-28
Obtaining combined board caliper off the corrugator for use in statistical process control procedures, 0304-12
Statistical process control techniques to assist in meeting specification at finishing crush process control points to the paper and paperboard industries, 0304-11
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Through drying
Paper machine performance guidelines, 0404-47
Through drying, 0404-25

Tissue
Design, Operation, Performance Evaluation and Inspection guidelines for Yankee hood systems, 0425-02
Paper machine performance guidelines, 0404-47
Pilot paper and wet laid nonwoven machines, 0502-16

Tolerance
Corrugator bearing clearance checks and their impact, 0304-47

Total indicated runout
see also Combined boards
Total indicated runout and its impact on combined board quality, 0304-56

Total reduced sulfur
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

Touch
Objective Determination of the Haptic Properties of Tissue Products, 0808-07

Transport
Checklist: preparing die cuts for shipment, 0305-49
Sodium chlorate (NaClO3) safe handling and storage, 0606-31
Sulfuric acid (H2SO4) safe storage and handling, 0606-26

Trim
Broke loss calculations, 0502-10
Paper machine room ventilation guidelines, 0404-50

Trimming
Machinery considerations and selection: yoked scoring slotting section, 0305-53
Squaring flap cut (center special) boxes, 0305-45

Troubleshooting
Forming section monitoring, 0502-14
Glue lap problem, 0304-10
Press section monitoring, 0404-19
Recommended test procedure for black liquor evaporators, 0416-11
Steam shower applications in the forming and press section, 0404-58

Tubes
Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38
Guidelines for detection, monitoring and prevention of flow accelerated corrosion (FAC) in the pulp and paper mill, 0402-36
Guidelines for operating and maintenance practices impacting an economizer on a recovery boiler, 0416-22
Guidelines for replacement of generating bank tubes with expanded joints in two-drum boilers, 0416-08
Inspection for cracking of composite tubes in black liquor recovery boilers, 0402-30
Keys to successful chemical cleaning of boilers, 0416-06
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Tungsten carbide
Tests for corrugator roll wear, 0304-53

Tuning
see Control

Turbulence
Application of dryer bars, 0404-35

Turpentine
Collection and burning of concentrated noncondensible gases: regulations, design and operation, 0416-09

Twisting
Techniques to minimize twist warp, 0304-50

Uhle box
See also Vacuum boxes
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

Ultrafine ground limestone
see Limestone

Ultrasonic tests
Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
Guidelines for inspecting batch digesters, 0402-22
Ultrasonic testing (UT) for tube thickness in black liquor recovery boilers, 0402-18

Uncoated free sheet
Paper machine performance guidelines, 0404-47

Unitized handling
Critical properties to consider when unitizing, 0304-72

Units of measurement
Units of measurement and conversion factors, 0800-01

Unloading
Sodium chlorate (NaClO3) safe handling and storage, 0606-31
Sulfuric acid (H2SO4) safe storage and handling, 0606-26

U.P.C.
see Product codes

UV
Drying and curing techniques for in-line flexographic printing, 0306-06

Vacuum
High vacuum sheet dewatering, 0404-60
Paper machine vacuum selection factors, 0502-01
Papermaker’s formulas, 0502-17
Steam shower applications in the forming and press section, 0404-58

Vacuum boxes
High vacuum sheet dewatering, 0404-60
Paper machine vacuum selection factors, 0502-01
Performance evaluation techniques for paper machine vacuum systems, 0404-55

Vacuum equipment
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

Vacuum filters
Bleaching plant washer efficiency guide, 0606-23

Vacuum pumps
Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
Performance evaluation techniques for paper machine vacuum systems, 0404-55
Press fabric dewatering and conditioning – suction box (Uhle box) design and vacuum requirements, 0404-27

Vacuum rolls
Liquid penetrant testing of new suction roll shells, 0402-11
Paper machine vacuum selection factors, 0502-01
Techniques for nip impressions, 0404-46
Weld repairs on new suction roll shells, 0402-17

Vacuum washers
Bleaching plant washer efficiency guide, 0606-23

Valves
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Headbox approach piping guidelines, 0404-54

Vapor pressure
Chlorine gas curve, 0606-02
Vapor pressure of sulfur dioxide solutions, 0607-11
Vapor pressure of sodium carbonate solution, 0607-16
Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12

Variance
Calculation and partitioning of variance using paper machine scanning sensor measurements, 1101-01

Varnish
Reduction or elimination of ink and/or varnish smear when printing and rotary die cutting in one pass, 0305-40

Velocity
see also Machine speed
Pulpstone speed chart, 0605-02

Ventilation
Paper machine room ventilation guidelines, 0404-50
Recommended minimum dryer pocket air requirements, 0404-17
Guidelines for the design, operation, performance evaluation, and troubleshooting of a paper machine hood and air systems, 0404-24

**Viscosity**
- Density of aqueous sodium sulfite solution, 0607-18
- Liquid chloride, 0606-05
- Quality techniques using existing equipment, 0306-11
- Statistical process control of starch viscosity, 0304-15
- Viscosities of spent sulfite liquors at 26.7°C (Oswalt capillary viscometer), 0607-22
- Viscosity of a neutral sulfite spent liquor (Ostwald capillary viscometer), 0607-23
- Viscosity of sodium carbonate solution, 0607-17
- Viscosity of sodium hydroxide solutions, 0606-11
- Viscosity reading procedure for flexographic corrugated inks, 0304-18

**Vision**
- Basic guidelines for image analysis measurements, 0804-09

**Volume**
- Grinder pulstones – cubical contents, 0605-01
- Identifying anilox volume measuring equipment, 0306-15

---

**Warning labels**
- see Hazardous materials

**Warpage**
- Statistical process control -- procedures for charting warp, 0304-13
- Techniques to minimize twist warp, 0304-50
- Warp in corrugated board, 0304-07

**Wash waters**
- Using washing water as the vehicle in starch based corrugating adhesive, 0304-44

**Washers**
- Energy checklist: pulp mill, 0416-24
- Bleaching plant washer efficiency guide, 0606-23

**Washing**
- Bleaching plant washer efficiency guide, 0606-23
- Recommended pulp bleaching stage designation method, 0606-21

**Wastewater treatment equipment**
- see Effluent treatment

**Water**
- see also Solubility
- Design engineer decisions tree: paper mill boiler feedwater, 0416-04
- Guidelines for evaluation of liquid ring vacuum pump performance, 0420-12
- Vapor pressure of water and sulfur dioxide above sodium bisulfite solutions (25°C), 0607-12
- Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13

**Water content**
- see Moisture content

**Water hardness**
- Water quality and monitoring requirements for paper mill boilers operating with high purity feedwater, 0416-03

**Water permeability**
- Troubleshooting cross-machine direction moisture profile problems, 0404-57

**Water removal**
- Determination of water removal by wet presses, 0404-01
- High vacuum sheet dewatering, 0404-06
- Methods to minimize sheet rewet in the press section, 0404-59
- Paper machine drying rate, 0404-07

**Water resistance**
- Techniques for running “WRA” (water resistant starch adhesive), 0304-46
- Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69

**Water treatment**
- Design engineer decisions tree: paper mill boiler feedwater, 0416-04
- Water treatment-related opportunities for energy conservation in a paper mill powerhouse, 0416-13

**Water vapor**
- Paper machine room ventilation guidelines, 0404-50

**Waterside cracking**
- Best practice guidelines for detecting and mitigating waterside cracking (stress-assisted corrosion) in power and recovery boilers, 0402-38

**Wax**
- Common curtain coating problems: causes, detection, and correction, 0304-26

**Wear resistance**
- see Abrasion resistance

**Web tension**
- Guidelines for web conveyance and winding tension levels, 0200-01

**Webs**
- see also Paper webs
- Guidelines for web conveyance and winding tension levels, 0200-01

**Weight**
- Physical characterization of press fabrics: basis weight, air permeability, void volume under loading and pressure uniformity, 0404-20
- Procedure for utilizing statistical control techniques to monitor the tare weight of a run of boxes, 0304-35
- Weight of newsprint rolls, 0502-11

**Weirs**
- Weirs and flumes, 0410-10

**Welding**
- Guide to the use of stainless steel pipe specifications, 0402-24
- Guidelines for corrosion resistant weld metal overlay of digester vessels in alkaline pulping service, 0402-03
- Guidelines for evaluating quality of boiler tube butt welds with ultrasonic testing, 0402-31
- Guidelines for inspection of continuous digesters and impregnation vessels, 0402-27
Guidelines for procurement of cast stainless steels for large pumps and valves for the pulp and paper industry, 0402-25
Field welding of pin studs in black liquor recovery boilers, 0402-15

Wet bulb temperature
  Relative humidity tables, 0808-06

Wet ends
  Drainage evaluation by mass measurement, 0502-12
  Forming section monitoring, 0502-14
  How to prevent score cracking in a box plant, 0304-37
  Selection criteria for wet end ceramics, 0502-15

Wet felts
  see also Felts

Wet presses
  Determination of water removal by, 0404-01

Wet pressing
  Terminology for high temperature pressing, 0404-48

Wet strength
  Understanding wet strength: what are MRA, WRA, and WPA?, 0304-69

Wet-laid nonwovens
  Pilot paper and wet laid nonwoven machines, 0502-16

White liquors
  Recausticizing material balance equations relating to digester requirements, 0418-02

White water
  Drainage evaluation by mass measurement, 0502-12
  Flow determination by chemical method, 0410-09
  Weirs and flumes, 0410-10

Width
  Weight of newsprint rolls, 0502-11

Winding
  Guidelines for web conveyance and winding tension levels, 0200-01

Wire
  Use of ceramics on the forming section: diagnosing and preventing forming fabric wear, 0502-19

Williams freeness
  Interconversion of freeness, 0809-01

Winders
  Determination of winder sets per reel, 0502-02

Wiper Roll
  A guide to proper wiper roll selection for flexographic printing in the corrugated box industry, 0306-20

Wiperoll
  see Flexography

Wood chips
  see Chips

Wood containing papers
  see Mechanical papers

Wood free papers
  Paper machine drying rate, 0404-07

Work place
  see Human factors

Working conditions
  see Environments

Wound rolls
  Reel diameter for various reel spool and roll core sizes,

0502-03
  TAPPI Roll number for inventory/tracking systems and bar codes, 1004-01

Writing papers
  Paper machine drying rate, 0404-07

Yankee cylinders
